Contents

Preface *xi*

1 Introduction *1*
For Further Reading *7*

Part I Nucleophilic Reactions *9*

2 Reactions of Alkylating Compounds (A) with Nucleophilic Agents (1–5) *13*
2.1 Inorganic Anions *17*
2.1.1 Reactions Involving an Electron *17*
2.1.2 Reactions with the Hydride Anion *18*
2.1.3 Reactions with the Hydroxide Anion *19*
2.1.4 Reactions with Other Nucleophilic Inorganic Anions *19*
2.2 Uncharged Nucleophilic Agents *23*
2.3 Organic Anions with a Charge on a Heteroatom *27*
2.4 Carbanions *31*
2.5 Organometallic Compounds *45*
Further Reading *47*

3 Reactions of Electrophilic Compounds Containing a Double Bond Between Atoms of Different Electronegativity (B) with Nucleophilic Agents (1–5) *49*
3.1 Inorganic Anions *50*
3.1.1 Reactions Involving an Electron *50*
3.1.2 Reactions with the Hydride Anion *51*
3.1.3 Reactions with the Hydroxide Anion *53*
3.1.4 Reactions with the Amide Anion *54*
3.1.5 Reactions with Other Nucleophilic Inorganic Anions *55*
3.2 Uncharged Nucleophilic Agents *56*
3.3 Organic Anions with a Charge on a Heteroatom *61*
3.4 Carbanions *62*
3.4.1 Reactions Proceeding via Protonation of the Adduct Anion *64*

3.4.2 Transformations of the Adduct Anion in a Reaction with an Electrophilic Agent Other than a Proton *67*
3.4.3 Elimination of the Hydroxide Anion or Water from the Adduct Anion *69*
3.4.4 Reactions of Carbonyl Compounds with Phosphorus Ylides and Similar Processes *71*
3.4.5 Transformations of the Anionic Adduct via Intramolecular Substitution *74*
3.4.6 Reactions of Carbanions with Carbonyl Groups Attached to Leaving Groups Y *76*
3.5 Organometallic Compounds *78*
Further Reading *81*

4 Reactions of Electrophilic Alkenes (C) with Nucleophilic Agents (1–5) *83*
4.1 Inorganic Anions *84*
4.2 Uncharged Nucleophilic Agents *85*
4.3 Organic Anions with a Charge on a Heteroatom *86*
4.4 Carbanions *87*
4.5 Organometallic Compounds *90*
Further Reading *92*

5 Reactions of Aromatic Compounds (D) with Nucleophilic Agents (1–5) *93*
Further Reading *103*

6 Reactions of Compounds with an Electrophilic Center on a Heteroatom (E) with Nucleophilic Agents (1–5) *105*
6.1 Inorganic Anions *105*
6.2 Uncharged Nucleophilic Agents *105*
6.3 Organic Anions with a Charge on a Heteroatom *106*
6.4 Carbanions *107*
6.5 Organometallic Compounds *109*
Further Reading *109*

Part II Electrophilic Reactions *111*

7 Interactions of Nucleophilic Compounds (A–C) with Inorganic Cations (1) *123*

8 Interactions of Nucleophilic Compounds (A–C) with Uncharged Electrophilic Agents (2) *125*

9 Reactions of Nucleophilic Compounds (A–C) with Carbocations (3) *127*
9.1 Inorganic Anions *127*
9.1.1 Hydrocarbon Carbocations *127*
9.1.1.1 Addition of Halogen Molecules to Alkenes *128*
9.1.1.2 Addition of Sulfenyl Chlorides to Alkenes *129*
9.1.2 Heteroatom-stabilized Carbocations *130*
9.1.3 Carbocations Stabilized by Two Heteroatoms *131*
9.2 *p*-electron Donors *131*
9.2.1 Hydrocarbon Carbocations *131*
9.2.1.1 Hydration of Alkenes *131*
9.2.1.2 Synthesis of Ethers, Dialkyl Sulfides, and Sulfonium Salts *132*
9.2.1.3 Mercuration of Alkenes *133*
9.2.1.4 Koch Reaction *133*
9.2.1.5 Synthesis and Decomposition of Esters of Tertiary Alcohols *134*
9.2.2 Heteroatom-stabilized Carbocations *135*
9.2.2.1 Synthesis and Hydrolysis of Acetals *135*
9.2.2.2 Reactions with Nitriles *136*
9.2.3 Carbocations Stabilized by Two Heteroatoms *136*
9.2.3.1 Esterification and Hydrolysis of Esters *136*
9.2.3.2 Reactions with Nitriles *137*
9.2.4 Carbocations Stabilized by Three Heteroatoms *138*
9.3 π-electron Donors *139*
9.3.1 Hydrocarbon Carbocations *140*
9.3.2 Heteroatom-stabilized Carbocations *142*
9.3.3 Carbocations Stabilized by Two Heteroatoms *146*
Further Reading *146*

10 Reactions of Aromatic Compounds (D) with Electrophilic Agents (1–3) *147*
10.1 Inorganic Electrophilic Agents *152*
10.1.1 Nitration *152*
10.1.2 Nitrosation *156*
10.1.3 Mercuration *156*
10.1.4 Thallation *157*
10.1.5 Halogenation *157*
10.2 Uncharged Electrophilic Agents *159*
10.2.1 Sulfonation *159*
10.2.2 Chlorosulfonation *161*
10.3 Carbocations *161*
10.3.1 Hydrocarbon Carbocations *161*
10.3.2 Heteroatom-stabilized Carbocations *165*
10.3.3 Carbocations Stabilized by Two Heteroatoms *168*
10.3.4 Carbocations Stabilized by Three Heteroatoms *173*
Further Reading *174*

11 Reactions of Nucleophilic Compounds (A–D) with Organic Cations with a Charge on a Heteroatom (4) *177*
11.1 Inorganic Anions *177*
11.2 *p*-electron Donors *177*
11.3 π-electron Donors *178*
11.4 Aromatic Compounds *178*
Further Reading *179*

12 Reactions of Nucleophilic Compounds (A–D) with Electrophilic Carbenes (5) *181*
12.1 Inorganic and Organic Anions *185*
12.2 *p*-electron Donors *186*
12.3 π-electron Donors *187*
12.4 Aromatic Compounds *189*
Further Reading *190*

13 Rearrangements of Electron-deficient Nitrogen Compounds *191*
Further Reading *192*

14 Reactions of Alkenes with Uncharged Electrophilic Agents *193*
14.1 Reactions of Organic Peracids with Alkenes *193*
14.2 Hydroboration Reactions *193*
Further Reading *194*

Part III Reactions Involving Radicals *195*

15 Methods of Radicals Generation *199*
Further Reading *203*

16 Substitution Reactions *205*
Further Reading *216*

17 Radical Addition to Unsaturated Bonds *217*
Further Reading *220*

Part IV Pericyclic Reactions *221*
Further Reading *221*

18 Diels–Alder Reaction *223*
Further Reading *228*

19 1,3-dipolar Cycloaddition Reactions *229*
Further Reading *236*

20 **[2+2] Cycloaddition Reactions** *237*
Further Reading *238*

21 **Ene Reactions** *239*
Further Reading *241*

22 **Sigmatropic Rearrangements** *243*
22.1 Cope Rearrangement *246*
Further Reading *247*

Index *249*
