Note: Page numbers in *italics* indicate figures.

a

acidic aqueous wash 48, 52
air and moisture exclusion reaction
  inert gas 8–9
  procedure *9–11*
air-sensitive compounds, storage of 143
aluminum plates 29
analytical methods 95
anisaldehyde–sulfuric acid 36
anti-splash adapter 64, *64*
aqueous wash 48
argon 9
artificial intelligence, in multistep organic synthesis 150
aspirators 126
atmospheric pressure distillation 68–70, *69*

b

balances 135
  four-decimal analytical balance *136*
  tips and tricks 136
  two-decimal laboratory balance *136*
basic aqueous wash 48
brine wash 48
Büchner funnel 56, *56*, 60
Bunsen burner 133, *134*

c

calibration 104
capillary-type melting point apparatus 103
catalytic hydrogenation reactions 11–12
  atmospheric pressure 12
  balloons 16
  cyclohexene to cyclohexane *12*, *16*
  elevated pressure 15–16
  filtering 17, *18*
  gas burette 14–15, 17
  gas delivery with balloon 13–14
  hydrogen donor 16
  needle-equipped balloons *17*
  risk management 12
  sluggish reactions 17
chemical databases 145
chiral compounds 99
column chromatography 87, *88*
  computer-controlled 87
  elution 90, 92
  equipment *88*
  evaporation 92
  flash chromatography 92–93
  fraction checking 91–92
  packing 89, *89*
  pooling 91–92

column chromatography (*Cont.*)
sample application 90, 92
silica gel 87
solid-phase extraction 93
solvent selection 89, *89*
computer-controlled column chromatography 87
computers 107–108
controlled substances, storage of 142
cooling *6*, 7
corrosive compounds, storage of 142
crystallization/recrystallization 78, *78–79*
decantation 85, *86*
emulsions 85
hot filtration 85, *86*
inhibition 86
large-scale 83
oiling out 82
oversaturated 79
seeding 86–87
from single solvent 79, *80–81*
solvent selection 83–85
from two solvents 79, *82–83*

d

decantation 85, *86*
descriptive text 110
desiccator and dry cabinet 142, *144*
diaphragm pumps 127–128
dishwashing 137, *137*
hard to reach glassware 138
strong chemicals 138–140
distillation 67
atmospheric pressure 68–70, *69*
equipment *68*
heating devices 73, *74*
oil bath hazards 73–74
oil bath stirring 75
reduced pressure 70–72, *71*
smooth boiling 72–73
yields 72
documentation 107
devices for laboratory *107*
with ELN software 110–111, *111*
hand-documented *110*
lab notes handwritten on paper 108
with word-processing software 108–109, *109*

e

elevated temperature reaction 7, *7*
ELN software 110–111, *111*
elution solvents
acidic samples 33
basic samples 33
polar samples 33
silica plate 31
TLC analysis *27*
emulsions 54, 85
evaporation 61
freeze-dryer 66–67
rotavapor 61–65
speedvac 66, *67*
eye-wash equipment 120, *120*

f

filtration. *see also* suction filtrations
Büchner funnel 56, *56*, 60
filter aid 60
fritted glass funnel 56
paper filter 56, *56*, 60
small-scale 60–61
solid recovery 60
firefighting equipment 118, *118*
first-aid kit 119–120, *119*
fixed laboratory safety equipment 117
eye-wash equipment 120, *120*
firefighting equipment 118, *118*
first-aid kit 119–120, *119*
fume hood 117, *117*
gas cylinders 118–119
flammable solvents 142
flash chromatography 92–93, *92*
fluted filter paper *86*
freeze-dryer 66–67, 146
freeze-drying 75, *76*
nonaqueous 77

procedure 75
sample pretreatment 77
servicing 77
frozen glass joints 141
fume hood 117, *117*
