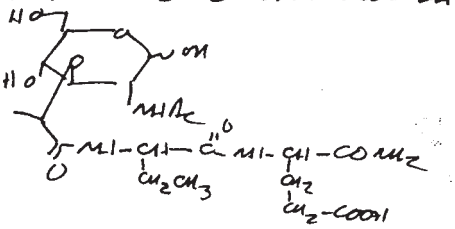
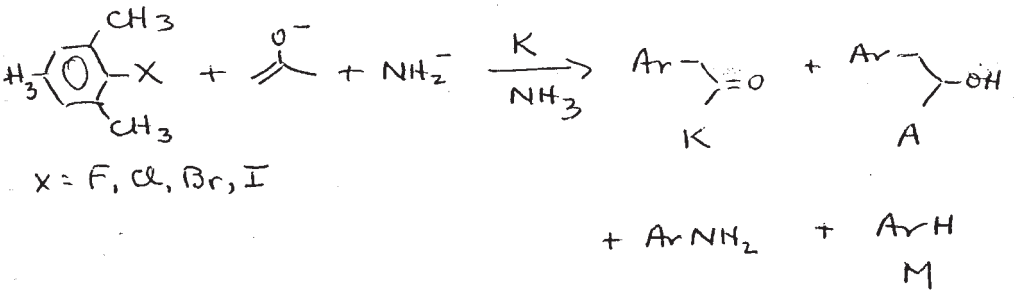
It's a great pleasure to meet such a fine scientist and gentleman as Prof. Nozoe. While he clearly has a very effective immune system if he ever needs stimulation he might try



Sept 30, 1980



X = F, Cl, Br, I

The ratios, K/A and M/(K+A) are strongly dependent on identity of X, but the ratio of $ArNH_2$ to (K+A) is independent of X!

It is a stimulating intellectual experience again to talk chemistry with Tetsuo Nozoe, one of the world's most outstanding organic chemists.

Oct. 1, 1980 Joseph F. Bunnett
