Preface XI

List of Contributors XIII

I	Interface Influence of Materials and Surface Modification	1
1	Introduction	3
	<i>Jürgen Breme</i>	
	References	4
2	Metals and Alloys	5
2.1	Preparation of Titanium and Titanium Alloys	5
	<i>Stefan Winter, Dirk Velten, and Frank Aubertin</i>	
2.2	Development of Wear-Resistant Nanocrystalline and Dispersion Strengthened Titanium Materials for Implants	7
	<i>Christa Sauer, Dirk Handtrack, and Bernd Kieback</i>	
2.3	Amorphous Titanium–Silicon Alloys: New Materials for Implants	11
	<i>Gert Richter, Hartmut Worch, and Wolfgang Pompe</i>	
	References	18
3	Topological Surface Modifications	19
3.1	Patterning by Mechanical Treatment	19
	<i>Bettina Hoffmann, Günter Ziegler, Regina Lange, and Ulrich Beck</i>	
3.2	Etching Techniques	23
3.2.1	Bioactive Nanostructures	23
	<i>Lenka Müller, Egle Conforto, and Frank A. Müller</i>	

- 3.2.2 Micro Structured Titanium Surfaces Produced by Chemical and Electrochemical Etching 28
Ulrich Beck and Regina Lange
- 3.2.3 Enhanced Hydrophobicity Achieved by Etching and Coating 30
Stefan Winter, Ulrich T. Seyfert, and Frank Aubertin
- 3.3 Surface Modifications with Laser 37
André Gorbunoff, Wolfgang Pompe, and Michael Gelinsky
- 3.3.1 Introduction 37
- 3.3.2 Laser Direct Writing 37
- 3.3.3 Surface Microprocessing of Titanium Films by Self-limited Oxidation 41
- 3.4 Plasma Processes 44
Ulrich Beck and Regina Lange
- References 47

- 4 Chemical Surface Modifications 51**
- 4.1 Coatings with Passivating Properties 51
- 4.1.1 Sol–Gel Coatings 51
Stefan Winter, Dirk Velten, Frank Aubertin, Bettina Hoffmann, Frank Heidenau, and Günter Ziegler
- 4.1.2 Anodic and Thermal Oxide Coatings 65
Stefan Winter, Dirk Velten, and Frank Aubertin
- 4.2 Biomimetic Apatite Formation 71
Frank A. Müller and Lenka Müller
- 4.3 Surface Modification by Covalent and Noncovalent Attachment of Biomolecules 81
- 4.3.1 Immobilization of RGD Peptides 83
Bettina Hoffmann, Volker Faust, Günter Ziegler, Irina Dieser, and Georg Lipps
- 4.3.2 Improving the Biocompatibility of Titanium- and Cobalt-Based Biomaterials by Covalent Immobilization of Crosslinked Collagen 88
Rainer Müller, Klaus Heckmann, Peter Angele, Richard Kujat, and Michael Nerlich
- 4.3.3 Modifying Titanium Surfaces with Glycoaminynglycanes for Hemocompatibility 92
David Tebbe, Uwe Gbureck, and Roger Thull

4.3.4	Surface Modification of Titanium for Improvement of the Interfacial Biocompatibility	102
	<i>Doris Klee, Jürgen Böing, and Hartwig Höcker</i>	
4.3.5	Biofunctionalization of Titanium Substrates Using Maleic Anhydride Copolymer Films	106
	<i>Tilo Pompe, Carsten Werner, and Hartmut Worch</i>	
	References	110
II	Physical and Physicochemical Surface Characterization	117
1	Introduction	119
	<i>Roger Thull</i>	
2	Surface Topology	121
2.1	Mechanical Characterization	121
	<i>Ulrich Beck and Regina Lange</i>	
2.2	Optical Characterization	125
	<i>Ulrich Beck and Regina Lange</i>	
2.3	Electrochemical Characterization	129
2.3.1	DC Methods	129
	<i>Ulrich Beck, Regina Lange, and Roger Thull</i>	
2.3.2	Impedance Spectroscopic Interface Characterization: Titanium in Contact with Electrolyte and Biosystem	133
	<i>Ulrich Beck, Regina Lange, and Roger Thull</i>	
	References	140
3	Spectroscopic Interface Characterization	143
3.1	Electronic Structure of the Interface	143
	<i>Andreas Zoll and Roger Thull</i>	
3.2	Spectro-electrochemistry of the Surface	148
	<i>Andreas Zoll and Roger Thull</i>	
	References	152
4	Physical Characterization of Protein Adsorption: Time-Resolved Determination of Protein Adsorption Using Quartz Crystal Microgravimetry with Dissipation Monitoring (QCM-D)	153
	<i>Claus Moseke, René Michalek, and Roger Thull</i>	
	References	161

- 5 Computer Simulations: Modeling of Protein Adsorption on Nanostructured Metallic Surfaces 163**
Patrick Elter and Roger Thull
- References 168
- III Biological Characterization of the Interface and Materials-Related Biosystem Reactions 171**
- 1 Protein and Cell Adhesion Mechanisms 173**
- 1.1 Characterization of Surface-Dependent Protein Adsorption 173
Andrea Ewald, Patrick Elter, and Roger Thull
- 1.2 Integrin- and Hyaluronan-Mediated Cell Adhesion on Titanium 179
- 1.2.1 Hyaluronan-Mediated Adhesion 179
J.G. Barbara Nebe and Frank Lüthen
- 1.2.2 Integrin-Mediated Adhesion on Nanostructures 182
Thomas K. Monsees and Richard H.W. Funk
- 1.3 Surface Structure-Dependent Protein Expression in Adsorbed Cells 184
Andrea Ewald and Roger Thull
- References 187
- 2 Material-Induced Cellular Interactions 191**
- 2.1 Cell-Specific Compatibility with Materials 191
- 2.1.1 Influence of the Material Interface on Cell Migration 191
Thomas K. Monsees and Richard H.W. Funk
- 2.1.2 Titanium–Cell Interface: Cell Biology and Growth Behavior 196
Hartwig Wolburg, Friederike Pfeiffer, Andreas Heeren, Wolfgang Henschel, Jürgen Geis-Gerstorfer, Lutz Scheideler, and Dieter Kern
- 2.2 Endothelial Cell-Specific Aspects in Biocompatibility Testing *In Vitro* 204
Kirsten Peters, Ronald E. Unger, Roman Tsaryk, Harald Schmidt, Günter Kamp, and C. James Kirkpatrick
- References 211

3	Topology-Dependent Cellular Interactions	215
3.1	Cell Structure–Cell Function Dependence on Titanium Surfaces	215
	<i>J.G. Barbara Nebe, Frank Lüthen, and Joachim Rychly</i>	
3.2	Cell Behavior on Micro- and Nanostructured Surfaces	223
3.2.1	Cell Biological Response on Polished, Structured and Functionally Coated Titanium Alloys	223
	<i>Eva Eisenbarth, Margit Müller, Stefan Winter, Dirk Velten, and Frank Aubertin</i>	
3.2.2	Effect of Nanostructures on Orientation and Physiology of Osteoblasts	233
	<i>Thomas K. Monsees and Richard H. W. Funk</i>	
3.2.3	Cell Response to Ti6Al4V Modified with TiO ₂ and RGDS Peptides on Different Surface Roughness	237
	<i>Bettina Hoffmann, Frank Heidenau, Rainer Detsch, and Günter Ziegler</i>	
3.2.4	Endothelial Cell Morphology on Functionalized Microstructured Titanium	239
	<i>Tilo Pompe, Manuela Herklotz, and Carsten Werner</i>	
3.3	Resistivity of Cells Under Shear Load	242
	<i>Andrei P. Sommer, Rosemarie Fuhrmann, and Ralf-Peter Franke</i>	
	References	245
	Index	249
