Shewanella spp. 39
shikimate 115
shikimate tab2 117
short-chain fatty acids (SCFAs) 203
signaling inhibitors 202–203

signal transduction
– description 289
– enzymatic activity 301–304
– epi-fluorescence microscopy 294
– fluorescent proteins 295
– FRET 298, 299
– Hedgehog and Notch signaling pathways 290
– MAP kinase kinase 290
– (NF-κB) 290
– nutrient sensing 290
– protein-protein interactions 304
– protein synthesis measurement 307, 308
– relocation sensors 296
– single cell measurement techniques 291–293
– small molecules 300
– stress response pathways 290
– surface proteins 289
SimOptStrain 128
simple multicellular systems 350
single cell measurement techniques
– flow cytometry 291
– live-cell imaging 292
– mass cytometry 291
– mass spectrometry 292
– single cell transcriptomics 292
single cell transcriptomics 292
single guide RNA (sgRNA) 372
single-molecule real-time (SMRT) sequencing 374
single nucleotide polymorphisms (SNPs) 4
skin microbiota 197
soil amoebae *Dictyostelium discoideum* 346
soil microbial communities 164
statistical biology 361
stoichiometric matrix 110
strain design algorithms
– bilevel optimization 84, 92
– chemical production 83
– cofactor changes 98
– gene additions 94, 96
– gene over/under-expression 95–98
– gene/reaction deletions 94
– multiple design criteria 99
strain-specific GEMs 114–115
strains co-utilizing sugars 100–102
strains producing 1,4-butanediol 102–103
strains producing lactate 100, 101
suppressors of cytokine signaling (SOCS) 275
synthetic commensal microbes 207
synthetic lethality 143
Systems Biology Graphical Notation (SBGN) 218
Systems Biology Markup Language (SBML) 218, 330
systems biology research methodology 1

t
TALE DNA-binding domain (DBD) 369
TAL effector nucleases (TALENs) 370
thuricin CD 202
time-lapse confocal images 271
time-lapse microscopy 294
time-lapse single-cell analysis 270
TNF-neutralizing antibodies 274
tofacitinib 274
toxicity screens 150–151
trans-activating crRNA (tracrRNA) 371
transcription activator-like effectors (TALEs) 369
transcriptomics 3, 5
transient bacterial lipopolysaccharides (LPS) 272
t(9;22)(q34;q11) translocation 381
TRIF and MyD88 adaptor proteins 273
turing mechanism 333, 334
type I interferons 275
type II CRISPR-Cas system 371

u
[U-$^{13}C_6$]glucose 32
[U-$^{13}C_5$]glutamine 33
UnifiedGenoTyper 11
unphosphorylated STAT1 277
unstable fluorescent protein 323
urogenital microbiome 193

v
vaginal microbiome 193
virtual drug screens 149
virulence factors 147

x
xylitol 115
xylitol tab2 117

y
yeast mobile group II introns 368

z
zinc-finger nucleases 369
zinc-finger protein A20 270
