 alkene moiety 135
 cycloreversion process 137
 heterodimerization of styrenes 138,
 139
 intramolecular cycloaddition of
 bis(styrenes) 136
 nitromethane 136
- oxidative transformations,
 9-Mesityl-10-methylacridinium
 photocatalysts 179
- Oxy- and aminoarylation, styrene 58
- oxygen switchable reactions 119
- oxytrifluoromethylation, styrene type
 olefin 58
- P**
- PdF₂₀TPP 96
- Pd/Ru catalyzed C-H arylation 256
 (\pm)-pellucidin A 293
- N,N,N',N',N''*-
 pentamethyldiethylenetriamine
 (PMDETA) 366, 368
- perfluoroalkoxyalkane (PFA) 391, 393,
 407
- perfluoroalkylations 407
- perfluoroalkyl iodides 322
- perfluoroalkyl radicals, sulfonyl and
 sulfinyl derivatives 43–44

- perfluoro-1-iodohexane 374
- cis*-perhydroazulene 290, 291
- perylenebisimides (PDI) 216
- perylene photocatalyst 371
- phenanthrenes 209, 262
 - benzannulation 210
 - biphenyl diazonium salt 56
 - methyl propiolate 56
- phenazine ethosulfate (PES) 177
- phenothiazine-based photocatalysts 371
- phenyldiazonium 321
- 2-phenyl-dihydro benzothiazole 317
- phenylmalononitrile (PMN) 180, 311
- 10-phenylphenothiazine (PTH) 370, 372, 382
- N*-phenylpyrrolidine 99
- phenylselenium sulfonates 77
- N*-phenyltetrahydroisoquinolines 96, 98, 307
- phosphonation reaction 109
- photoactive pigments 162
- photocatalysis
 - CDC coupling 174
 - C-N bond formations 33
 - C-O bond formations 31
 - dehalogenative processes 28
 - mechanisms 161
 - oxidation, 1,3-dicarbonyl substrates 48
 - TPT-induced radical cation 175
- photocatalysts, [Ru(bpy)₃]²⁺ 20–22
- photocatalyst, visible chromophore 129
- photocatalytic cyanation reaction 105
- photocatalytic cycle 26–27
- photochemical activation, 4-nitrobenzyl bromide 238
- photochemical reactions 343
- photocycloaddition reaction 347
- photodimerization to cyclobutanes 176
- photoinduced electron transfer (PET) 152, 162, 173, 337, 345
- photoinitiated polymerization reactions 162
- photomasks 366
- photomediated controlled polymerizations
 - controlled polymerizations vs. photomediated controlled polymerizations 364
 - iodine mediated polymerization 371–375
 - light chain-end activation 383–284
 - photocatalyst activation 364
 - photoreactive chain-end, activation of 364
 - RAFT 376–382
 - ROMP 375–376
- photomicroreactor assembly 393
- photooxidation
 - N*-cyclopropylanilines 143
 - tetravalent boron compounds 47
- photophysical properties, Ru(bpy)₃²⁺ with EY. 165
- photo-Pschorr reaction 254
- photoredox activation, anion binding catalysis 103
- photoredox catalysts
 - Brønsted acid 300, 314–318
 - electrontransferagent 300
 - Lewis acids 300
 - molecular oxygen 380
 - photoATRP 373
 - photoRAFT polymerizations 382
 - radical–radical coupling 306
 - RAFT 379
 - Ru(bpy)₃Cl₂ 269
 - single-electron transfer 303
 - trifluormethylation, trifluoromethyl iodide reduction 41
- photoredox catalyzed reactions, Cu(dap)₂Cl 244
- photoredox catalyzed, oxidative coupling 248
- photoredox cyclization, di- and triarylamines 245
- photoredox hydroetherification reaction 312
- photoredox transformations 166
- photoregulated atom transfer radical polymerizations (photoATRP) Cu-catalyzed 365–368

- iridium catalyst 368
 - MMA polymerization 368
 - non-copper-based catalyst systems 368–371
 - piperidine 312
 - PMP-ether deprotection 199
 - polycyclization
 - heteroarene, α -bromochalcone and furan 56
 - unsaturated bromomalonates 50
 - poly(dimethylsiloxane) (PDMS) 403
 - polyene cascade cyclization, nucleophilic termination 195
 - porous cross-linked polymers (PCPs) 98
 - porphyrin-based chlorophyll catalyst 381
 - potassium *tert*-butoxide 41
 - proton-coupled electron transfer (PCET) 217, 313, 316
 - Pschorr reaction 253–255
 - pulsed-laser polymerization 367
 - pyrrolidine 312, 345, 346
 - pyrylium
 - acridinium dyes 177
 - photocatalyst 293
 - photoredox catalyst 375, 376
 - state oxidants, PET efficiency 174
- q**
- quantum yield (Φ), of emission 9
 - quaternary carbon centers formation 47
 - quenching processes 11
 - quinolone, photocycloaddition of 346, 347, 349, 350, 352
- r**
- racemic reaction 350, 355, 356
 - radiative quantum yields, 9, *see quantum yield (Φ), of emission*
 - radical cascade applications
 - intramolecular polycyclization processes 49
 - sequential inter- and intramolecular processes 51–56
 - radical/cationic oxyalkylation, alkenes 57
 - radical chemistry 25
 - radical multicomponent processes 56
 - radical polar crossover mechanism 77
 - radical-polar crossover pathway 78
 - radicals generation
 - C-centered radicals, formation of 27–30
 - N-centered radicals, formation of 30
 - radical trifluoromethylation 44
 - rate law, first-order reaction 10
 - rearomatization, iodine 245
 - redox auxiliary substrates 133
 - redox potentials, of photoexcited copper 235
 - redox properties, Ru(bpy)₃²⁺ 165
 - reductive catalytic cycle 3
 - reductive dimerization of chalcones 54
 - reductive quencher (Qred) 26
 - reductive quenching cycle 26
 - crossed intermolecular cycloaddition 132
 - cycloaddition
 - aryl enones 132
 - enones 130
 - N-alkylation, MeOTf 134
 - radical anion intermediate 130
 - reductive quenching, catalyst
 - aerobic oxidations 171
 - cyanoarenes 171–172
 - quinones 172–173
 - regioisomers 347, 349, 350
 - reversible-addition fragmentation chain transfer (RAFT) 376–382
 - Rhodamine B (RhodB) 193
 - riboflavin (RF) 219
 - ring opening metathesis polymerization (ROMP) 375–376
 - Ritter-type reaction 57
 - rose bengal (RB) 188
 - Ru(bpy)₃⁺ 302, 316
 - Ru(bpy)₃²⁺ 94, 253, 291, 303, 321, 322, 327
 - [Ru(bpy)₃]²⁺, photophysics
 - cyclic voltammogram of 7
 - electrochemical properties 6–8
