Frank Endres, Andrew P. Abbott, and Douglas MacFarlane

- 14.1 Impurities 483
14.2 Counter Electrodes/Compartments 485
14.3 Ionic Liquids for Reactive (Nano)materials 486
14.4 Nanomaterials/Nanoparticles 486
14.5 Cation/Anion Effects 487
14.6 Polymers for Batteries and Solar Cells 487
14.7 Variable-Temperature Studies 488
14.8 Intrinsic Process Safety 488
14.9 Economics (Price, Recycling) 489
14.10 Fundamental Knowledge Gaps 490
