

## Contents

### Preface *XIII*

<b>1</b>	<b>Introduction</b>	<i>1</i>
1.1	A Microwave Radiometer System	<i>1</i>
1.2	Blackbody Emission	<i>3</i>
1.3	Linearized Planck Function	<i>4</i>
1.4	Stokes Vector and Its Transformation	<i>5</i>
1.5	Microwave Spectrum	<i>7</i>
1.6	Spectral Response Function	<i>8</i>
1.7	Microwave Antenna Gain and Distribution Function	<i>10</i>
1.8	Microwave Instrument Scan Geometry	<i>11</i>
1.9	Microwave Data Records and Their Terminology	<i>13</i>
<b>2</b>	<b>Atmospheric Absorption and Scattering</b>	<i>15</i>
2.1	Introduction	<i>15</i>
2.2	Microwave Gaseous Absorption	<i>16</i>
2.2.1	Absorption Line and Shape	<i>16</i>
2.2.2	Oxygen Absorption	<i>18</i>
2.2.3	Water Vapor Absorption	<i>22</i>
2.2.4	Nitrogen and Ozone Absorption	<i>23</i>
2.2.5	Line-by-Line Radiative Transfer Model (LBLRTM)	<i>23</i>
2.2.6	Zeeman Splitting Absorption	<i>24</i>
2.2.7	Parameterized Transmittance Model	<i>28</i>
2.3	Cloud Absorption and Scattering	<i>32</i>
2.3.1	Scattering Parameters	<i>32</i>
2.3.2	Particle Size Distribution	<i>34</i>
2.3.3	Rayleigh Approximation	<i>38</i>
2.3.4	Henryey–Greenstein and Rayleigh Phase Matrix	<i>42</i>
2.4	Summary and Conclusions	<i>44</i>

<b>3</b>	<b>Radiative Transfer Modeling at Microwave Frequencies</b>	<b>45</b>
3.1	Introduction	45
3.2	Radiative Transfer Equation	45
3.3	Vector Discrete-Ordinate Method	47
3.4	Radiance Gradient or Jacobians	53
3.5	Benchmark Tests	55
3.6	The Zeroth-Order Approximation to Radiative Transfer Solution	60
3.7	The First-Order Approximation to Radiative Transfer Solution	62
3.8	Ocean Emissivity Model	62
3.8.1	Ocean Roughness Phenomena	62
3.8.2	Approximation of Water Dielectric Constant	64
3.8.3	Ocean Roughness Heights and Spectrum	67
3.8.4	Foam Coverage	73
3.8.5	Surface Emissivity Vector	74
3.9	Land Emissivity Model	78
3.9.1	Theoretical Approach for Land Emission	78
3.9.2	Optical Parameters of Vegetation Canopy	81
3.9.3	Optical Parameters of Snow	83
3.9.4	Surface Reflection at Layer Interfaces	85
3.9.5	Soil Dielectric Constant	87
3.9.6	Simulated Surface Emissivity Spectra	87
3.10	Summary and Conclusions	88
<b>4</b>	<b>Microwave Radiance Simulations</b>	<b>91</b>
4.1	Introduction	91
4.2	Fast Radiative Transfer Simulations	92
4.3	Calculations of Antenna Brightness Temperatures	96
4.4	Simulations of ATMS Sounding Channels Using Global Forecast Model Outputs	99
4.5	Simulations of ATMS Sounding Channels Using GPSRO Data	105
4.5.1	Collocation of GPS RO and ATMS Data	105
4.5.2	ATMS Bias with Respect to GPS RO Data	107
4.6	Uses of TRMM-Derived Hydrometeor Data in Radiative Transfer Simulations	109
4.6.1	Collocation of ATMS and TRMM Data	109
4.6.2	ATMS Biases With Respect to TRMM-Derived Simulations	112
4.7	Advanced Radiative Transfer Simulations	117
4.8	Summary and Conclusions	120
<b>5</b>	<b>Calibration of Microwave Sounding Instruments</b>	<b>123</b>
5.1	Introduction	123
5.2	Calibration Concept	124
5.3	ATMS Instrument Description	124

5.4	ATMS Radiometric Calibration	128
5.5	Impacts of ATMS Antenna Emission on Two-Point Calibration	133
5.6	Retrieval of Reflector Emissivity Using ATMS Pitch-Over Data	135
5.7	ATMS Noise-Equivalent Difference Temperature (NEDT)	138
5.8	Conversion from Antenna to Sensor Brightness Temperature	143
5.9	Summary and Conclusion	147
<b>6</b>	<b>Detection of Interference Signals at Microwave Frequencies</b>	<b>151</b>
6.1	Introduction	151
6.2	Microwave Imaging Radiometers and Data Sets	152
6.3	Radio-Frequency Interference Signals in Microwave Data	154
6.4	Detection of RFI over Land	155
6.4.1	Double Principal Component Analysis (DPCA)	155
6.4.2	Spectral Difference Method	160
6.5	RFI Detection over Oceans	162
6.6	Summary and Conclusions	175
<b>7</b>	<b>Microwave Remote Sensing of Surface Parameters</b>	<b>177</b>
7.1	Introduction	177
7.2	Remote Sensing of Ocean Surface Parameters	178
7.2.1	Retrievals of Surface Wind Vector	178
7.2.2	Simultaneous Retrieval of Sea Surface Temperature and Wind Speed	183
7.3	Remote Sensing of Land Surface Parameters	190
7.3.1	Retrievals of Land Surface Temperature	190
7.3.2	Retrieval of Land Surface Emissivity	195
7.3.3	Error Sensitivity of Land Surface Emissivity	198
7.3.4	Fast Land Emissivity Algorithms	202
7.4	Summary and Conclusions	205
<b>8</b>	<b>Remote Sensing of Clouds from Microwave Sounding Instruments</b>	<b>207</b>
8.1	Introduction	207
8.2	Remote Sensing of Cloud Liquid Water	208
8.2.1	Principle of Microwave Remote Sensing of Clouds	208
8.2.2	Cloud Liquid Water Algorithm	210
8.3	Remote Sensing of Cloud Ice Water	213
8.3.1	Microwave Scattering from Ice-Phase Cloud	213
8.3.2	Cloud Ice Water Retrieval Algorithm	216
8.4	Cloud Vertical Structures from Microwave Double Oxygen Bands	224
8.4.1	FY-3C Microwave Sounding Instruments and Their Channel Pairing	225
8.4.2	Typhoon Neoguri Observed by MWHS and MWTS	227
8.4.3	The Cloud Emission and Scattering Index (CESI)	230
8.5	Summary and Conclusions	232

<b>9</b>	<b>Microwave Remote Sensing of Atmospheric Profiles</b>	<b>235</b>
9.1	Introduction	235
9.2	Microwave Sounding Principle	236
9.3	Regression Algorithms	239
9.4	One-Dimensional Variational (1DVAR) Theory	244
9.5	Multiple 1DVARs for All-Weather Profiles	247
9.6	Microwave Integrated Retrieval System (MIRS)	251
9.7	Summary and Conclusions	257
<b>10</b>	<b>Assimilation of Microwave Data in Regional NWP Models</b>	<b>259</b>
10.1	Introduction	259
10.2	NCEP GSI Analysis System	260
10.3	ATMS Data Assimilation in HWRF	262
10.3.1	Hurricane Weather Research and Forecast (HWRF) System	262
10.3.2	Hurricane Events in 2012	264
10.3.3	ATMS Data Quality Control	266
10.3.4	Comparison between (O – B) and (O – A) Statistics	272
10.3.5	Impact of ATMS Data on Forecasting Track and Intensity	272
10.4	SSMIS Data Assimilation	282
10.4.1	SSMIS Instrument	282
10.4.2	SSMIS Data Quality Control	287
10.4.3	SSMIS Bias Correction	288
10.4.4	Impacts from SSMIS and AMSU-A Data Assimilation	293
10.4.5	Impact of SSMIS LAS Data on GFS Operational Forecasts	296
10.5	Summary and Conclusions	296
<b>11</b>	<b>Applications of Microwave Data in Climate Studies</b>	<b>299</b>
11.1	Introduction	299
11.2	Climate Trend Theory	300
11.3	A Long-Term Climate Data Record from SSM/I	303
11.3.1	Simultaneous Conical Overpassing (SCO) Method	304
11.3.2	Bias Characterization of Specific SSM/I Instrument	307
11.3.3	RADCAL Beacon Interference with F15 SSM/I	308
11.3.4	SSM/I Intersensor Bias Correction	310
11.3.5	Impact of Cross-Calibration on SSM/I SDR	313
11.3.6	Impacts of SSM/I Intersensor Calibration on TPW	315
11.4	A Long-Term Climate Data Record from MSU/AMSU	320
11.4.1	Impacts of Clouds and Precipitation on AMSU-A Trends	323
11.4.2	Emission and Scattering Effect on AMSU-A	323
11.4.3	AMSU-A Brightness Temperature Trend	326
11.5	Atmospheric Temperature Trend from 1DVar Retrieval	330
11.5.1	Climate Applications of 1DVar	330

11.5.2 MSU and AMSU-A Cross-Calibration 331  
11.5.3 Cloud Detection Algorithm for MSU Applications 331  
11.5.4 Temperature Trend from 1DVar 334  
11.6 Summary and Conclusions 337
