

Index

a

active corrosion inhibitors 156, 157
 additive manufacturing, *see* 3-D printing 15
 additives 63
 alkylated graphene oxide (AGO) 87
 aluminum 8
 Angel investors 195
 anodes, graphene 122
 anodic passivation 157
 atomic force microscope (AFM) 6
 atomic transfer radical polymerization (ATRP) 70, 86
 automotive and aircrafts 39
 azomethineylide 70

b

batteries
 – description 115
 – evolution of 116
 – lithium-ion, *see* lithium-ion batteries 116
 Bayer Material Science (BMS) 4, 200
 Bluestone Global Tech (BGT) 185
 bolaamphiphile 40
 bottom-up approach 53, 65
 bulk nanomaterials possessing 2

c

carbon nanotubes (CNTs) 1, 200
 – – inner surface 82
 cathodes, graphene 126
 cathodic protection 156
 chemically converted graphene (CCG)/PS composite 89
 chemical vapor deposition (CVD) 65
 – graphene 27
 China Innovation Alliance of the Graphene Industry (CGIA) 185

clean/green energy 115
 CNT, *see* carbon nanotubes (CNTs)
 composites, fabrication 77
 conventional polymer composites 64
 corrosion 155
 – complexity 155
 – inhibition 157
 – metal 155
 – resistance 157
 corrosion inhibition
 – different modes 156
 – graphene 161
 – graphene/ceramic nanocomposites 171
 – graphene/metal nanocomposites 168
 – graphene nanocomposites 164
 corrosion-resistant coating 165
 covalent modification 67

e

electrochemical exfoliation, graphite 38
 electrochemical impedance spectroscopy (EIS) 168
 EMI shielding 97
 energy consumption evolution 114
 environmental, health, and safety (EH&S) procedures 7
 entrepreneurs 192
 equity capital 198
 esterification 68
 – reaction, PVC 68
 ethylene vinyl acetate (EVA) 90
 exfoliation, graphite 38
