	Preface	<i>xi</i>
	List of Abbreviations	<i>xiii</i>
1	Atovaquone: An Antipneumocystic Agent	1
	Answers	4
	References	8
2	SEN794: An SMO Receptor Antagonist	9
	Answers	13
	References	20
3	Synthesis of an H1–H3 Antagonist	21
3.1	Synthesis of Fragment 2	21
3.2	Synthesis of Fragment 3	26
3.3	Fragment Assembly and End of Synthesis	27
	Answers	29
	References	40
4	Synthesis of Eletriptan	41
	Answers	45
	References	50
5	Total Synthesis and Structure Revision of Streptophenazine A	51
	Answers	54
	References	59
6	Synthesis of Leiodermatolide, A Biologically Active Macrolide	61
6.1	Access to Fragment C	62
6.1.1	Preparation of Compound 2	62
6.1.2	Preparation of Compound 7	63
6.1.3	Preparation of Compound 12	63
6.1.4	Preparation of Fragment C	65
6.2	Access to Fragment D	65
6.2.1	Preparation of Compound 26	65
6.2.2	Preparation of Fragment D	66
6.3	Final Steps	67

- 6.3.1 Assembly of B and Formation of A by Ring-Closing Alkyne Metathesis 67
- 6.3.2 Coupling of Sugar and Macrocycle 68
 - Answers 68
 - References 76

- 7 Azobenzene-Thiourea Catalysts for the Control of Chemical Reactivity with Light 77**
 - 7.1 Synthesis of Azobenzene-Thiourea Derivatives 77
 - 7.2 Investigation of Catalytic Properties 82
 - Answers 85
 - References 92

- 8 Synthesis and Properties of a Photo-activatable Mimic of Pyridoxal 5'-Phosphate 93**
 - Answers 99
 - References 105

- 9 Fluorescent Peptides for Monitoring Activity of Autophagy-Initiating Enzyme 107**
 - 9.1 Solid-Phase Synthesis of a Putative Fluorogenic Peptide Substrate for ATG4B 107
 - 9.2 Evaluation as Fluorogenic Substrates for ATG4B 108
 - 9.3 Solution-Phase Synthesis of a Fluorogenic Substrate Analog Containing a Self-Immolating Linker 111
 - Answers 112
 - References 118

- 10 Fluorescent Peptide Probes for Cathepsin B 119**
 - 10.1 Solution Synthesis of a Water-Soluble Cyanine Fluorophore 119
 - 10.2 Synthesis of a Water-Soluble Cyanine Fluorophore Using a Polymeric Support 121
 - 10.3 Synthesis and Evaluation of Cyanine-Based NIR Peptide Probes for Monitoring Cathepsin B Activity 123
 - Answers 129
 - References 138

- 11 Total Synthesis of Stemoamide 141**
 - 11.1 Radical Approach to the Construction of the Tricyclic Core of Stemoamide 141
 - 11.2 Formal Synthesis of (\pm)-Stemoamide 143
 - 11.3 Enantioselective Total Synthesis of (-)-Stemoamide 145
 - Answers 148
 - References 158

- 12 Total Synthesis and Structure Revision of Caraphenol B 159**
 - 12.1 Synthesis of the Proposed Structure of Caraphenol B 159

12.2	Synthesis of the Revised Structure of Caraphenol B	162
	Answers	164
	References	170
13	Synthetic Routes Toward Muricatacin and Analogs	171
13.1	Synthesis of (+)-Muricatacin	171
13.2	Synthesis of (+)- <i>epi</i> -Muricatacin by Enantioselective Ketone Reduction	173
13.3	Synthesis of (–)-Muricatacin	176
	Answers	178
	References	187
14	Asymmetric Synthesis of (–)-Martinelllic Acid	189
14.1	Preliminary Studies: Toward the Formation of a Model Tricyclic Compound	189
14.2	Synthesis of an Advanced Intermediate	192
14.3	Completion of the Synthesis	194
	Answers	196
	References	203
15	Cyclic Pseudopeptides as Potent Integrin Antagonists	205
15.1	Conformational Analysis	205
15.2	Synthesis of Bicyclic Lactam Templates	208
15.3	Solid Phase Peptide Synthesis	211
15.4	Pharmacological Study	214
	Answers	215
	References	224
16	Enantioselective Synthesis of Nonnatural Amino Acids for Incorporation in Antimicrobial Peptides	227
16.1	First Generation Mimetics: Synthesis and Biological Evaluation	227
16.2	Structural Analysis and Mechanism of Action	229
16.3	Sequence Optimization: Synthesis of Nonnatural Amino Acids	231
16.3.1	Synthesis of Homophenylalanine (Hfe)	231
16.3.2	Synthesis of Phenylglycine (Phg)	232
16.3.3	Synthesis of 4-Chlorophenylalanine (Clf)	234
16.3.4	Synthesis of 2-Naphtylalanine (2-Nal)	235
16.3.5	Synthesis of 1-Naphtylalanine (1-Nal)	235
16.3.6	Synthesis of Cyclohexylalanine (Cha)	236
16.3.7	Synthesis of Norleucine (Nle)	237
16.3.8	Synthesis of Biphenylalanine (Bip)	238
	Answers	240
	References	256
	Further Reading	259
	Index	261
