Preface *ix*

1	Introduction	<i>1</i>
2	Viscoelasticity	<i>5</i>
2.1	Introduction	<i>5</i>
2.2	Concept of Viscoelastic Behavior	<i>5</i>
2.3	Concept of Time–Temperature Superposition Principle (TTSP)	<i>7</i>
2.4	Master Curve of Creep Compliance of Matrix Resin	<i>8</i>
2.5	Generalization of TTSP for Nondestructive Deformation Properties to Static, Creep, and Fatigue Strengths of FRPs	<i>9</i>
2.6	Master Curve of Static Strength of FRP	<i>11</i>
2.7	Master Curve of Creep Strength of FRP	<i>12</i>
2.8	Master Curve of Fatigue Strength of FRP	<i>13</i>
2.9	Conclusion	<i>15</i>
	Reference	<i>15</i>
3	Master Curves of Viscoelastic Coefficients of Matrix Resin	<i>17</i>
3.1	Introduction	<i>17</i>
3.2	Master Curve of Creep Compliance Based on Modified TTSP	<i>17</i>
3.2.1	Experimental Procedures	<i>19</i>
3.2.2	Reliable Long-Term Creep Compliance of Matrix Resin	<i>20</i>
3.3	Simplified Determination of Long-Term Viscoelastic Behavior	<i>22</i>
3.3.1	Relation between Storage Modulus and Creep Compliance	<i>24</i>
3.3.2	Formulation of Master Curves of Creep Compliance	<i>24</i>
3.3.3	TTSP Automatic Shifting Procedure	<i>26</i>
3.3.4	Experimental Procedures	<i>26</i>
3.3.5	Master Curve of Storage Modulus by DMA	<i>26</i>
3.3.6	Comparison of Master Curves of Creep Compliance	<i>29</i>
3.4	Conclusion	<i>30</i>
	References	<i>32</i>

4	Nondestructive Mechanical Properties of FRP	33
4.1	Introduction	33
4.2	Role of Mixture	33
4.3	Mechanical and Thermal Properties of Unidirectional CFRPs, Fibers, and Matrix Resin	35
4.4	Master Curves of Creep Compliance of Matrix Resin	35
4.5	Conclusion	36
	References	37
5	Static and Fatigue Strengths of FRP	39
5.1	Introduction	39
5.2	Experimental Procedures	39
5.2.1	Preparation of Specimens	39
5.2.2	Test Procedures	40
5.3	Results and Discussion	42
5.3.1	Master Curve of Static Strength	42
5.3.2	Master Curve of Fatigue Strength	44
5.3.3	Characterization of Fatigue Strength for Loading Directions of Three Kinds	45
5.4	Applicability of TTSP	51
5.5	Conclusion	52
	References	53
6	Formulation of Static Strength of FRP	55
6.1	Introduction	55
6.2	Formulation of Static Strength	55
6.3	Application of Formulation	57
6.3.1	Experimental Procedures	57
6.3.2	Preparation of Specimens	57
6.3.3	Test Procedures	58
6.4	Results and Discussion	60
6.4.1	Master Curve of Creep Compliance for Matrix Resin	60
6.4.2	Master Curve of Tensile Static Strength for Matrix Resin	62
6.4.3	Master Curves of Three Kinds of Static Strengths of Unidirectional CFRP	64
6.5	Conclusion	69
	References	69
7	Formulation of Fatigue Strength of FRP	71
7.1	Introduction	71
7.2	Formulation	71
7.3	Application of Formulation	72
7.3.1	Specimens and Test Methods	72
7.3.2	Creep Compliance of Matrix Resin	73
7.3.3	Master Curves of Static and Fatigue Strengths for Unidirectional CFRP	74
7.4	Conclusion	81
	References	82

8	Formulation of Creep Strength of FRP	83
8.1	Introduction	83
8.2	Formulation	83
8.3	Application of Formulation	85
8.3.1	Specimens and Test Methods	86
8.3.2	Creep Compliance of Matrix Resin and Static Strength of CFRP Strand	86
8.3.3	Creep Failure Time of CFRP Strand	88
8.4	Conclusion	90
	References	90
9	Application 1: Static Strengths in Various Load Directions of Unidirectional CFRP Under Water Absorption Condition	91
9.1	Introduction	91
9.2	Experimental Procedures	91
9.3	Viscoelastic Behavior of Matrix Resin	92
9.4	Master Curves of Static Strengths for Unidirectional CFRP	96
9.5	Relation between Static Strengths and Viscoelasticity of Matrix Resin	99
9.6	Conclusion	100
	References	100
10	Application 2: Static and Fatigue Flexural Strengths of Various FRP Laminates Under Water Absorption Condition	101
10.1	Introduction	101
10.2	Specimen Preparation	101
10.3	Experimental Procedures	104
10.4	Creep Compliance	105
10.5	Flexural Static Strength	107
10.6	Flexural Fatigue Strength	109
10.7	Conclusion	121
	References	122
11	Application 3: Life Prediction of CFRP/Metal Bolted Joint	123
11.1	Introduction	123
11.2	Experimental Procedures	123
11.2.1	Preparation of CFRP/Metal Bolted Joints	123
11.2.2	Tensile Static and Fatigue Tests	125
11.3	Results and Discussion	126
11.3.1	Master Curves of Creep Compliance for Transverse Direction of Unidirectional CFRP Laminates	126
11.3.2	Load–Elongation Curves at Tensile Static Tests for CFRP/Metal Bolted Joint	128
11.3.3	Master Curves of Static Failure Load for CFRP/Metal Bolted Joint	130
11.3.4	Master Curves of Fatigue Failure Load for CFRP/Metal Bolted Joint	131

11.3.5	Fracture Appearance of CFRP/Metal Bolted Joints Under Static and Fatigue Loadings	135
11.4	Conclusion	138
	References	139
12	Application 4: Life Prediction of CFRP Structures Based on MMF/ATM Method	141
12.1	Introduction	141
12.2	Procedure of MMF/ATM Method	142
12.3	Determination of MMF/ATM Critical Parameters	143
12.3.1	Long-Term Static and Fatigue Strengths of Unidirectional CFRP	143
12.3.2	MMF/ATM Critical Parameters of Unidirectional CFRP	144
12.4	Life Determination of CFRP Structures Based on MMF/ATM Method	144
12.5	Experimental Confirmation for OHC Static and Fatigue Strengths of CFRP QIL	148
12.6	Conclusion	151
	References	151
A	Effect of Physical Aging on the Creep Deformation of an Epoxy Resin	153
A.1	Introduction	153
A.2	Creep Deformation for Aged Polymers	153
A.3	Experimental Procedure	156
A.4	Results and Discussion	157
A.4.1	Creep Compliance	157
A.4.2	Effect of Physical Aging on Creep Compliance	159
A.5	Conclusions	162
	References	162
B	Reliable Test Method for Tensile Strength in Longitudinal Direction of Unidirectional CFRP	165
B.1	Introduction	165
B.2	Evaluation of Tensile Strength Using Post-Bonded CFRP Strand Specimen	166
B.3	Development of Co-Cured CFRP Strand Specimen	169
B.3.1	Molding of Co-Cured CFRP Strand Specimen	169
B.3.2	Improvement of Co-Cured CFRP Strand Specimen	169
B.4	Conclusions	174
	References	174
	Index	177
