

Index

a

- abundance of neutrals 20
- accretion disk coronae 212
 - Cyg X-1 213
 - QPOs 215
- acoustic waves 187
 - energy 190
 - parametric excitation 189
- acceleration of charged particles 131
 - DC electric field 132
 - pulsating mode 138
 - shock wave 132
- adiabatic index 7, 41
 - invariant 63, 114
- ambipolar diffusion 10
- Alfvén
 - velocity 28, 70, 210
 - index of refraction 55
- Alfvén waves
 - dispersion relation 210
 - dissipation 187
 - torsional 187

b

- Bastille Day Flare 23, 33
- brightness temperature
 - 122, 167

c

- coronal magnetic loop 2
 - above spots 33
 - arcades 24, 30, 33
 - current-carrying 18, 210
 - late-type stars 195
 - thermal balance 192
- charge separation 11, 134
- chromosphere evaporation
 - 62

- Colgate's paradox 140
- collisions 6, 13, 113, 156
- conductivity 6
 - Coulomb 6, 13
 - Cowling 12, 26, 141
 - Hall 25
 - Pedersen 25
 - thermal 187
- convective flows 10
- coronal heating 185
 - acoustic waves 187, 191
 - electric current 196
 - microflares 199, 201
- current sheet 101

d

- damping 46
 - acoustic 47, 96
 - cyclotron 152
 - phase mixing 88
- diagnostics
 - electric currents 178, 182
 - stellar flare plasma 173, 175, 176
- discrete spectrum 56
- dMe stars 174, 176
- Doppler shift 75, 77, 81
- Dricer field 134, 137

e

- eigenfrequency 40, 190
 - plasma cylinder 42
 - RLC circuit 28, 208
- electric current 18
 - diagnostics 178, 182
 - excitation 210
 - Ohmic dissipation 196
 - oscillations 27
 - waves 30

- electric field 5
 - inductive 136
 - large scale 133
- emission
 - electron cyclotron maser 118
 - gamma ray 135, 158
 - gyrosynchrotron 116, 166
 - hard X-ray 135, 158, 194
 - plasma mechanism 120
- emission measure 202
- energy release 142
 - prominence 108, 110
 - pulsating phase 143
- equation
 - induction 6
 - Maxwell 5
 - plasma 6
- equivalent electric (RLC) circuit 11, 25, 208
- f**
 - fine structure of radio emission 125
 - sudden reductions 126
 - zebra pattern 126
 - QPPs 128
- force
 - Ampère 6
 - centrifugal 35
 - electromotive-emf 26
- frequency
 - bounce 63
 - collisional 6, 13, 113, 156
 - cyclotron 25, 116, 151
 - plasma 120
 - RLC-oscillations 28
- g**
 - generalized Ohm's law 6, 27
 - gravitational acceleration 70, 75
- h**
 - heating function 192
 - hollow-beam distribution 115
 - hydrostatic equilibrium 70
- i**
 - instability
 - ballooning mode 5, 142, 200, 202
 - bounce resonance 63
 - loss-cone 120, 124
 - Rayleigh–Taylor 12
 - parametric 59
 - interaction
 - inductive 29
 - wave-particle 145, 155
- j**
 - Joule current dissipation 99, 108, 141, 196
- k**
 - kinematic of energetic particles 143
 - turbulent propagation regime 145, 155, 159
- l**
 - leaky pail model 146
 - Lorenz factor 119, 151
 - loss cone 114
 - Lotka–Volterra equations 129
- m**
 - magnetar corona 205
 - trapped fireball 208
 - electric current 209
 - diagnostics 209
 - magnetic bottle 114
 - magnetic fans 74
 - MHD approach 5
 - one-fluid 40
 - MHD-resonator 54
 - MHD waves 42
 - dissipation 171
 - in coronal jets 80
 - shock 55
 - torsional 73
 - MHD mode 43
 - ballooning 35, 54, 200
 - fast magnetoacoustic 82
 - global sausage 169
 - kink 43, 45, 46, 51
 - leaky 46
 - sausage 46, 48, 171, 173, 174
 - slow magnetoacoustic 47, 176
 - trapped 43
 - MHD mode excitation
 - bounce resonance 63
 - chromosphere evaporation 62
 - external trigger 57
 - instantaneous energy release 61
 - parametric resonance 59
 - 5 min oscillations 57, 191
 - modulation by MHD oscillations
 - electron precipitation rate 168
 - gyrosynchrotron emission 166
 - plasma radiation 167
- n**
 - nonlinear generation 89
 - nonlinear resistance 110

p

- phase mixing 87, 89
- phase trajectories 104, 105, 106
- pitch angle 114, 156, 168
 - diffusion 153
- plasma beta 11, 43
- prominence 93
 - heating effect 97
 - interstellar 110
 - Kippenhahn–Schlüter model 93
 - Kuperus–Raadu model 93
 - nonlinear oscillations 99
 - pulsation period 95, 98

q

- Q-factor 28, 48, 62

r

- radio pulsations 139
- Raman scattering 122
- Rayleigh scattering 120
- Razin suppression 116
- refractive index 55, 119, 151
- resonance
 - bounce 63
 - Cherenkov 55
 - cyclotron 118, 151
 - parametric 59, 189, 211
- runaway electrons 134

s

- Saha equation 136
- seismology
 - asteroseismology 39
 - coronal seismology 1
 - diskoseismology 215
 - helioseismology 39
- single coronal loop
 - effective capacitance 28, 210
 - inductance 24, 208
 - resistance 26
- specific impedance 61
- spectrum of energetic particles 160
- stratification effect 69
- supergranules 9, 13

w

- waveguides 67
- wave train 84
- whistlers 124, 151
- Wigner–Ville transform 180, 190, 200, 201
- WKB approximation 76
