

Index

a

absorption coefficient 8
 action spectra 19
 amplified spontaneous emission 47
 ASE 47
 Auger recombination 74

b

band 64
 bi-polarons 81
 Bohr radius 73
 bottleneck effect 72

c

carrier relaxation 71
 charge transfer state 82
 coherent 53
 coherent transport 173
 “collective” excited states 36
 complex susceptibility 8
 confinement 73
 conical intersection 107
 conjugated polymers 83
 Coulomb interaction 73
 cross-section 9, 15
 CT exciton 82

d

density matrix 13
 dephasing 12
 Dexter 103
 dimerization 85
 dipole-dipole interaction 35
 dispersion law 55
 dissociation 91
 doublet 84

e

effective conjugation length 85
 effective mass 55
 Einstein coefficients 93
 Einstein–Smoluchowski equation 161
 electroabsorption 19
 electron affinity 151
 energy distribution 50
 energy migration 91, 96
 energy transfer 96
 excited molecular state 83
 excited-state migration 191
 exciton band 48
 excitons 58
 extinction coefficient 9

f

field-assisted ionization 178
 fission 91
 Foerster energy transfer 49
 Frank-Condon integrals 24
 free carriers 79
 Frenkel exciton 58, 83
 Förster 101

g

global fitting analysis 187
 group velocity 173

h

H-aggregate 37
 hole 56
 homogeneous lineshape 53
 Huang-Ryss factor 25, 48

i

impact ionization 78
 incoherent transport 173
 induced anisotropy 192
 intensity borrowing 31
 intermediate coupling 48
 internal conversion 89
 intersystem crossing 89, 189
 Ionization Energy 151
 IRAV 81

j

J-aggregate 38

k

Kuhn 85

l

Lambert–Beer 8
 localization threshold 55, 104

m

magic angle 192
 Marcus hopping rate 175
 Markovian 114
 master equation 175
 Miller-Abrahams 175
 mirror symmetry 93
 molecular exciton basis 41

n

nonlinear absorption 18
 nonlinear polarization 184
 nonlinear susceptibility 180

o

oscillator strength 10
 oscillator sum rule 57

p

Peierls 84
 phase space filling model 66, 68
 phosphorescence 115
 photobleaching 189
 photoconductivity 19
 photoinduced absorption 189
 physical dimer 35
 PL excitation spectrum 16
 Placzek model 132
 point dipole approximation 35
 polarizability 177, 179

polarization 7
 polaron pair 81
 polarons 80
 pump probe 20

r

Raman excitation profile 134
 rate equations 187
 re-absorption 98
 re-organization energy 27
 repetition rate 182
 resonance interaction 36

s

singlet 84
 spin flip 115
 splitting 36
 Stark effect 177
 Stark shift 77, 178
 state filling 76
 stimulated emission 189
 sum rule 10
 superfluorescence 47
 superradiance 46
 susceptibility 125

t

Thomas-Reiche-Kuhn theorem 10
 time of flight 162
 time resolution 182
 transient grating 168
 trapped carrier 80
 trion 83
 triplet 84
 two-exciton band 49
 two-level model 53

u

unimolecular processes 89

v

vibrational cooling 90
 vibrational energy redistribution 90
 vibrational relaxation 89
 vibronic coupling 53

w

Wannier–Mott 58
 Wannier–Mott exciton 82
 wavepacket dynamics 127

z

Z-scan 20
