

## Index

### **a**

- abnormal skin-effect 372
- Abraham force 319
- acceleration near a shock front 641
- acceleration of particles by moving medium 640
- adiabatic demagnetization 147
- Alfvén waves 214
- Alfvén velocity 215
- amplification of waves in nonequilibrium media 501
- amplitude of scattering 403, 446
- analytical properties of the response function 292
- angle of total polarization 378
- angle of total reflection 378
- anharmonic oscillator 499
- anisotropic diffusion 631
- antidynamo theorem 224
- antiferromagnetism 144
- atomic form-factor 407
- averaging over the Gibbs ensemble 275
- axial and planar channeling 612

### **b**

- Babinet principle 399
- Bethe-Heitler cross-section 580
- Bloch equation 305
- Bohr–Van Leeuwen theorem 14
- Boltzmann distribution 7
- Boltzmann equation 10
- bound charge density 4
- boundary conditions for the field vectors 277
- Bragg–Wulf equation 408
- Brillouin function 27
- Brillouin's formula 302

### Brown–Twiss interferometer 474

- Buneman instability increment 520
- Burgers equation 492

### **c**

- capacitance coefficients 40
- capacitance of a capacitor 39
- cascade length 580
- Cauchy–Riemann conditions 50
- causality principle 291
- cause and consequence 292
- charged particle in random magnetic field 626
- Cherenkov radiation 572
- Clausius–Mossotti formulas 10
- cloaking of material bodies 375
- “close” and “distant” collisions 566
- cnoidal wave 517
- coaxial line 527
- coherence length, area, and volume 467
- coherencse (correlation) time and length 465
- collision integral in the relaxation time approximation 10
- complex degree of coherence 470
- complex dielectric permeability 281
- complex electric conductivity 281
- Complex order parameter 156
- complex resistance (impedance) 195
- conformal mapping in electrostatics 48
- conformity 49
- contact potential difference 114
- correlation time and correlation length of turbulence 683
- Cooper pairs in superconductors 158, 162
- correlation field tensors 463
- cosmic rays 625
- Cotton–Mouton effect 427
- Curie law for paramagnetics 26

Curie temperature of ferroelectric 66  
 Curie–Weiss law 68, 139

**d**

Debye–Hückel radius 32  
 Debye potentials 442  
 density effect in magnetic bremsstrahlung 602  
 density of energy and Poynting vector in the dispersion medium 302  
 depolarization coefficients 54  
 developed turbulence 681  
 diamagnetic susceptibility 15  
 diamagnetics 6  
 dielectric and magnetic susceptibilities 6  
 dielectric permittivity 7  
 dielectric permittivity in X-range 405  
 dielectric susceptibility 6  
 diffracted X-ray radiation 619  
 diffraction at a random screen 487  
 diffraction by single crystall 407  
 diffusion of particles in momentum space 637  
 diffusion of particles in random field 626  
 diffusion of the magnetic field 204  
 4-dimensional Maxwell equations 310  
 discontinuities in MHD 218  
 dispersion equations 284, 363  
 dispersion measure (DM) 378  
 dispersion relations 294  
 dispersion relations in the presence of a spatial dispersion 295  
 dispersion relations taking into account STR 296  
 dissipation of electromagnetic energy in medium 297  
 Drude formula for electric conductivity 12

**e**

Eddy current 202  
 eigen oscillations in isotropic media 363  
 eigenfrequency of the oscillatory circuit 196  
 eigenmodes in isotropic media 386  
 Einstein formula for the extinction ratio 484  
 electric conductivity 6, 10  
 electric conductivity of random media 128  
 electric field vector 3  
 electric induction vector 6  
 electric polarization 7  
 electric polarizability tensor 40  
 electric stress tensor 65

electromagnetic potentials in moving media 311

electromotive force of induction 193  
 electromotive forces (EMF) 16, 115  
 electron paramagnetic resonance, EPR 351  
 electron–photon showers 581  
 electronic paramagnetic resonance 351  
 electronic plasma (Langmuir) oscillations 346  
 electrostatic Green reciprocity theorem 40  
 electrostriction 65  
 Elsasser's antidynamo-theorem 224  
 emission in crystals 615  
 energy losses in waveguides 524  
 energy of the field in dispersive media 299  
 energy spectrum of the accelerated particles 642

energy-momentum tensors of Abraham and Minkowski 317

entropy simple waves 213

equation

- Bragg–Wulf 408
- for electromagnetic potentials in moving media 313
- Helmholtz 442
- Laue 408
- of transfer and acceleration of particles 638

ergodicity 466

evolutionarity of MHD discontinuities 221

example of artificial dielectric 290

external charges and currents 1

external electromotive force 115

external scale of turbulence 685

extinction ratio 484

**f**

Faraday effect 388, 428

fast and slow simple waves 215

ferroelectrics 66

Ferromagnetic resonance 352

ferromagnetics in alternating fields 305

ferromagnetism 138

Fluctuation-dissipative theorem 482

Fokker–Planck equation 574

force-free magnetic field 223

forces in a magnetic field 137

forces in an alternating field 316

forces in an electric field 63

Fraunhofer diffraction 397

free and bound charges 5

freezing of a magnetic field into conducting medium 210

Fresnel diffraction 395  
 Fresnel equation for gyrotropic media 385  
 Fresnel equation of crystaloptics 383  
 Fresnel's formulas 366

***g***

generalized electric induction 278  
 generalized Ohm law 212  
 generalized Poynting vector 302  
 generalized susceptibility 479  
 generation of plasmons 572  
 geometrical optics 394  
 Ginzburg–Landau theory 156  
 Ginzburg–Landau theory of superconductors 156  
 Green function in moving media 314  
 Green function for moving media 316  
 Green function in electrostatics 46  
 Green's function in moving medium 316  
 group velocity 323  
 gyroscopic turbulence 687

***h***

Hall current 35  
 Heisenberg ferromagnetic 139  
 Hertz vector in moving media 313  
 high-temperature superconductors 149  
 holography 471  
 Huygens'–Fresnel principle 391

***i***

impedance 195  
 induction EMF 193  
 inhomogeneous medium 373  
 inhomogeneous plane waves 364, 370  
 integral transformation method in electrostatics 45  
 interference effect in scattering 609  
 inversion method in electrostatics 45  
 ion plasma oscillations 348  
 ion-sound oscillations 348  
 ionization losses 566  
 Ising model 142  
 isotopic effect 152

***j***

Joule–Lenz law 119  
 Joule losses 119

***k***

Kelvin–Helmholtz instability 227, 265  
 kinematic theory of diffraction 406  
 kinematic theory of X-ray diffraction 406

kinematic viscosity 209  
 kinematics of the collision 565  
 kinetic equation for a stochastic magnetic field 630  
 kinetic equation in a strong magnetic field 635  
 kinetic helicity 687  
 Kirchhoff integral 393  
 Kirchhoff laws 118  
 Klausius–Mossotti formulas 10  
 Kolmogorov–Obukhov model 684  
 Korteweg–de Vries (KdV) equation 495  
 Kramers–Kronig dispersion relations 294

***l***

Landé g-factor 27  
 Landau damping 287  
 Landau diamagnetism 30  
 Landau–Lifshitz equation 306  
 Landau–Pomeranchuk effect 582  
 Langevin function 8  
 law of refraction and reflection 366  
 "left-handed" media 368  
 length of formation of radiation 578  
 length of radiation formation 579  
 Leontovich boundary condition 371  
 light pressure and "light attraction" 369  
 linear response function 280  
 local homogeneity and isotropy of turbulent motion 685  
 longitudinal and transverse waves 284  
 longitudinal length of the quantum formation 579  
 longitudinal oscillations in gases and solid bodies 303  
 Lorenz–Lorentz formulas 10

***m***

magnetic field amplification 272  
 magnetic field diffusion 204  
 magnetic field strength vector 6  
 magnetic flux quantization 152  
 magnetic induction vector 3  
 magnetic permeability 7  
 magnetic polaritons 410, 425  
 magnetic polarizability tensor 204  
 magnetic polarization 10  
 magnetic pressure 210  
 magnetic Reynolds number 209  
 magnetic stress tensor 138  
 magnetic susceptibility 6  
 magnetic tensions 210  
 magnetic viscosity 209  
 magnetization current 277

- magnetoacoustic waves 215  
 magnetostatics of superconductors 153  
 magnetostriction 148  
 magnons (spin waves) 351  
 material coupling equations 278  
 Maxwellian distribution 7  
 Meissner–Ochsenfeld effect 150  
 metallic waveguides 523  
 metamaterials 367  
 method of equivalent photons 576  
 method of slowly varying amplitude 405  
 MHD shock wave 219  
 MHD turbulence 687  
 Michelson interferometer 466  
 Michelson stellar interferometer 473  
 Mie's problem (scattering by conducting sphere) 402  
 Migdal theory of multiple scattering 582  
 Minkowski coupling equations 310, 311  
 momentum flux in dispersive medium 325  
 multiple scattering 573  
 mutual coherence function 469
