

Index

A

axle loads 5, 86

B

ballasted track 1–3, 9, 14, 41, 42, 47–51, 63, 68, 69, 74–76, 82–84, 86

BLHB (base layer with a hydraulic binder) 6, 22, 23, 62

Bögl system 7, 14, 74

bonded bearing layer 28

C

cam plate 46–48, 50, 54, 57, 63

CEN/TC 256 WG 46 18

cracking 7, 11, 22–24, 35, 77, 78

crack width 24

D

Deutsche Bahn Standard (DBS) 17

drainage 18, 20, 45, 46, 56, 61, 68, 77, 81

E

Eisenmann's method 28, 29

F

FE model 36, 37

frost protection 7, 12, 20, 21, 80, 82

G

guide block 59

H

HBL (hydraulically bonded layer) 8, 9, 21, 23, 28, 32–35, 80, 84

I

intermediate joint 45–48, 54, 62–65, 67, 69

intermediate layer 35

L

lateral loads 19

lateral misalignment 55

long bridges 45, 53, 54, 57, 59–62, 68

LVT (low-vibration track) system 12, 24

N

noise control 3, 12, 48, 49

O

ORE test track 12

P

PACT (Paved Concrete Track) 12

R

rail fastening system 7, 14, 19, 22, 24, 40, 42, 51, 77, 78, 80

rail support point 19, 22, 26, 28, 30, 32, 33, 75

Rheda 2000 9–11, 13, 14

Rheda system 2, 5, 6, 9–11, 13, 14, 46, 48, 52, 74, 76

S

short bridges 45, 51, 57–59, 61, 68

sound absorption 79–81, 86, 87

STEDDEF (Switzerland) 12

T

tests 4, 7, 12, 14, 39–41, 46, 47, 49, 50, 53, 62, 76

three-layer system 28

track base 5, 6, 22, 29, 46, 59

train speeds 5

U

UIC (Union internationale des chemins de fer) 17

unbonded base layer 20, 22

W

Westergaard method 28, 30

Winkler's beam 25, 28
