|----------|------------------------------------------------------------|----|
|          | <b>Preface .....</b>                                       | xv |
| <b>0</b> | <b>Introduction.....</b>                                   | 1  |
| 0.1      | Subject of the book .....                                  | 1  |
| 0.2      | Building physics vs. applied building physics .....        | 1  |
| 0.3      | Units and symbols.....                                     | 2  |
|          | Further reading.....                                       | 5  |
| <b>1</b> | <b>Outdoor and indoor ambient conditions.....</b>          | 7  |
| 1.1      | Overview.....                                              | 7  |
| 1.2      | Outdoors .....                                             | 8  |
| 1.2.1    | Air temperature .....                                      | 9  |
| 1.2.2    | Solar radiation.....                                       | 12 |
| 1.2.2.1  | Beam radiation .....                                       | 14 |
| 1.2.2.2  | Diffuse radiation .....                                    | 16 |
| 1.2.2.3  | Reflected radiation .....                                  | 17 |
| 1.2.2.4  | Total radiation.....                                       | 17 |
| 1.2.3    | Longwave radiation .....                                   | 18 |
| 1.2.4    | Relative humidity and (partial water) vapour pressure..... | 22 |
| 1.2.5    | Wind .....                                                 | 23 |
| 1.2.5.1  | Wind speed .....                                           | 24 |
| 1.2.5.2  | Wind pressure .....                                        | 24 |
| 1.2.6    | Precipitation and wind-driven rain.....                    | 26 |
| 1.2.6.1  | Precipitation .....                                        | 27 |
| 1.2.6.2  | Wind-driven rain.....                                      | 28 |
| 1.2.7    | Microclimates around buildings.....                        | 30 |
| 1.2.8    | Standardized outdoor climate data .....                    | 31 |
| 1.2.8.1  | Design temperature .....                                   | 31 |
| 1.2.8.2  | Reference years.....                                       | 31 |
| 1.2.8.3  | Very hot summer, very cold winter day.....                 | 31 |
| 1.2.8.4  | Moisture reference years .....                             | 31 |
| 1.2.8.5  | Equivalent temperature for condensation and drying.....    | 34 |
| 1.2.8.6  | Monthly mean vapour pressure outdoors.....                 | 37 |
| 1.3      | Indoors .....                                              | 37 |
| 1.3.1    | Air temperatures.....                                      | 37 |
| 1.3.1.1  | In general .....                                           | 37 |
| 1.3.1.2  | Measured data .....                                        | 38 |
| 1.3.2    | Relative humidity and vapour pressure .....                | 41 |
| 1.3.2.1  | Vapour release indoors.....                                | 41 |
| 1.3.2.2  | Measured data .....                                        | 44 |
| 1.3.2.3  | Indoor climate classes .....                               | 47 |
| 1.3.3    | Indoor/outdoor air pressure differentials .....            | 50 |
|          | Further reading.....                                       | 51 |

|          |                                                                          |           |
|----------|--------------------------------------------------------------------------|-----------|
| <b>2</b> | <b>Performance metrics and arrays .....</b>                              | <b>54</b> |
| 2.1      | Definitions.....                                                         | 54        |
| 2.2      | Functional demands .....                                                 | 54        |
| 2.3      | Performance requirements .....                                           | 54        |
| 2.4      | A short history.....                                                     | 55        |
| 2.5      | Performance arrays .....                                                 | 56        |
| 2.5.1    | Overview.....                                                            | 56        |
| 2.5.1.1  | The built environment.....                                               | 56        |
| 2.5.1.2  | Whole buildings and building assemblies.....                             | 57        |
| 2.5.2    | In detail .....                                                          | 57        |
| 2.5.2.1  | Functionality .....                                                      | 57        |
| 2.5.2.2  | Structural adequacy.....                                                 | 57        |
| 2.5.2.3  | Building physics related quality .....                                   | 60        |
| 2.5.2.4  | Fire safety.....                                                         | 60        |
| 2.5.2.5  | Durability .....                                                         | 61        |
| 2.5.2.6  | Maintenance.....                                                         | 61        |
|          | Further reading.....                                                     | 62        |
| <b>3</b> | <b>Whole building level.....</b>                                         | <b>63</b> |
| 3.1      | Thermal comfort .....                                                    | 63        |
| 3.1.1    | General concepts .....                                                   | 63        |
| 3.1.2    | Physiological basis.....                                                 | 63        |
| 3.1.2.1  | Exothermic .....                                                         | 63        |
| 3.1.2.2  | Homoeothermic .....                                                      | 65        |
| 3.1.2.3  | Autonomic control system .....                                           | 65        |
| 3.1.3    | Steady state thermal comfort, the physiology based approach.....         | 66        |
| 3.1.3.1  | Clothing .....                                                           | 66        |
| 3.1.3.2  | Heat flow between body and ambient .....                                 | 66        |
| 3.1.3.3  | Comfort equations.....                                                   | 68        |
| 3.1.3.4  | Comfort parameters and variables.....                                    | 69        |
| 3.1.3.5  | Thermally equivalent environments and comfort temperatures .....         | 69        |
| 3.1.3.6  | Comfort appreciation .....                                               | 71        |
| 3.1.4    | Steady state thermal comfort, the adaptive model.....                    | 72        |
| 3.1.5    | Thermal comfort under non-uniform and under transient<br>conditions..... | 74        |
| 3.1.5.1  | Refined body model .....                                                 | 74        |
| 3.1.5.2  | Local discomfort .....                                                   | 76        |
| 3.1.5.3  | Drifts and ramps.....                                                    | 78        |
| 3.1.6    | Standard-based comfort requirements.....                                 | 80        |
| 3.1.7    | Comfort related enclosure performance .....                              | 81        |
| 3.2      | Health and indoor environmental quality .....                            | 83        |
| 3.2.1    | In general .....                                                         | 83        |
| 3.2.2    | Health.....                                                              | 84        |
| 3.2.3    | Definitions.....                                                         | 85        |
| 3.2.4    | Relation between pollution outdoor and indoors .....                     | 85        |
| 3.2.5    | Process-related contaminants .....                                       | 86        |
| 3.2.5.1  | Dust, vapour, smoke, mist and gaseous clouds .....                       | 86        |

|          |                                                                           |     |
|----------|---------------------------------------------------------------------------|-----|
| 3.2.5.2  | Fibres .....                                                              | 86  |
| 3.2.5.3  | Ozone .....                                                               | 87  |
| 3.2.6    | Building, insulation and finishing material related<br>contaminants ..... | 87  |
| 3.2.6.1  | (Semi) volatile organic compounds ((S)VOCs) .....                         | 87  |
| 3.2.6.2  | Formaldehyde (HCHO) .....                                                 | 88  |
| 3.2.6.3  | Phthalates .....                                                          | 89  |
| 3.2.6.4  | Pentachlorinephenols .....                                                | 89  |
| 3.2.7    | Soil-related radon as contaminant .....                                   | 89  |
| 3.2.8    | Combustion related contaminants .....                                     | 91  |
| 3.2.8.1  | Carbon monoxide .....                                                     | 91  |
| 3.2.8.2  | Nitrous dioxide (NO <sub>2</sub> ) .....                                  | 91  |
| 3.2.9    | Bio-germs .....                                                           | 92  |
| 3.2.9.1  | Viruses .....                                                             | 92  |
| 3.2.9.2  | Bacteria .....                                                            | 92  |
| 3.2.9.3  | Mould .....                                                               | 92  |
| 3.2.9.4  | Dust mites .....                                                          | 95  |
| 3.2.9.5  | Insects .....                                                             | 95  |
| 3.2.9.6  | Rodents .....                                                             | 96  |
| 3.2.9.7  | Pets .....                                                                | 96  |
| 3.2.10   | Human related contaminants .....                                          | 96  |
| 3.2.10.1 | Carbon dioxide (CO <sub>2</sub> ) .....                                   | 97  |
| 3.2.10.2 | Water vapour .....                                                        | 97  |
| 3.2.10.3 | Bio-odours .....                                                          | 97  |
| 3.2.10.4 | Tobacco smoke .....                                                       | 98  |
| 3.2.11   | Perceived indoor air quality .....                                        | 99  |
| 3.2.11.1 | Odour .....                                                               | 99  |
| 3.2.11.2 | Indoor air enthalpy .....                                                 | 101 |
| 3.2.12   | Sick building syndrome (SBS) .....                                        | 102 |
| 3.2.13   | Contaminant control .....                                                 | 103 |
| 3.2.13.1 | Minimizing emission .....                                                 | 103 |
| 3.2.13.2 | Ventilation .....                                                         | 103 |
| 3.2.13.3 | Air cleaning and personal protective measures .....                       | 109 |
| 3.3      | Energy efficiency .....                                                   | 110 |
| 3.3.1    | In general .....                                                          | 110 |
