

Preface	IX	<i>Kevin Wolters, Georgios Christou, Markus Feldmann</i>
Composite Construction in Steel and Concrete	X	Probabilistic design of composite girders considering the degradation of the shear connection and the redistribution of forces
CODIFICATION	1	99
<i>Nicole Schmeckebier, Wolfgang Kurz</i>		
Engineering model for the vertical shear capacity of composite slabs with additional reinforcing steel	3	
<i>Stephen Hicks, Markus Schäfer, Graham Couchman</i>		
European code developments	15	
<i>Roberto T. Leon</i>		
Evolution of USA composite codes: Changes in chapter I (composite construction) of the AISC 360-22	27	
<i>Stephen Hicks, Matthias Braun, Zlatko Markovic, James Way</i>		
New Eurocode 4 design rules for composite beams with precast concrete slabs	40	
<i>Ioan Diaucu</i>		
Potentially unsafe structural consequences in the design of composite beams shear connectors (a look at some of the Eurocode 4-1-1 design backgrounds)	50	
COMPOSITE BEAMS	61	149
<i>Roland Bärtschi, Samuel Garcia, Robert Kroyer, Pascal Sutter</i>		
Deformation capacity and ductility of shear connectors	63	
<i>Samiran Adhikari, Gian Andrea Rassati, James A. Swanson, Rachel A. Chicchi</i>		
High-definition modelling of composite beams	75	
<i>Philipp Hauser, Wolfgang Kurz</i>		
Non-linear analysis of composite beams with minimal modelling and calculation effort for strain-limited design	87	
<i>Trent Phillips, Gian Andrea Rassati, James Swanson, Nadia Baldassino, Riccardo Zandonini</i>		
Progressive collapse modeling of a steel structure with composite slab using commercial finite element software	111	
COMPOSITE BRIDGES	123	
<i>Wojciech Lorenc, Günter Seidl, Robert Kühne</i>		
Composite dowels for bridges: trends and challenges for new European design rules	125	
<i>Richard Stroetmann, Cäcilia Karge, Tobias Mansperger</i>		
Development of an orthotropic composite slab system for road bridges	139	
<i>Luís Vieira, José Oliveira Pedro, Rodrigo Gonçalves, Dinar Camotim</i>		
Effect of cross-section bracing in steel-concrete composite bridge decks using the generalized beam theory	149	
<i>Mike Tibolt, Dennis Rademacher, Oliver Hechler, Kevin Wolters, Nils Rittich, Stoyan Ivanov</i>		
Integral sheet piling abutments of modular composite bridges for a time efficient construction	161	
<i>Radosław Sęk, Bogusław Pilujski, Dariusz Sobala, Wojciech Lorenc</i>		
New type of composite arch element using composite dowels: application in railway network arch bridge	173	
<i>Piotr Koziół, Wojciech Lorenc, Maciej Kożuch, Witold Kosecki, Adam Stempniewicz</i>		
New type of transition zone for steel-concrete hybrid beams in bridges	182	

CONTENTS

<i>Riccardo Zanon</i>		<i>Qingjie Zhang, Markus Schäfer</i>	
Use of high-strength steel for slender medium span bridges: two recent case studies in France	192	Innovative numerical approaches for strain limited design of composite beams	295
COMPOSITE COLUMNS	205	<i>Joshua Henneberg, Peter Schaumann</i>	
<i>Markus Schäfer, Qingjie Zhang, Pellumb Zogu, Marco Bergmann, Ozgun Ergun</i>		Numerical analysis of early age movement in grouted connections	307
Assessment of general method for composite column design in EN 1994-1-1 and comparison with simplified method	207	<i>Sina Kazemzadeh Azad, Brian Uy, Yifan Zhou, Yuchen Song, Jia Wang</i>	
		Performance and design of stainless-steel composite structures – beams, columns and joints	320
<i>Ozgun Ergun, Markus Schäfer</i>		FATIGUE AND FRACTURE	333
Comparison of geometrical imperfection definitions on encased composite columns	219	<i>Lena Stempniewski, Ulrike Kuhlmann</i>	
<i>Przemyslaw Schurgacz, Martin Neuenschwander, Markus Knobloch</i>		Composite bridges with cracked concrete deck spanning between transverse beams under fatigue shear loading	335
Slender column strength of innovative concrete filled steel tube columns with high-performance building materials	231	<i>Maryam Hosseini, Olivia Mirza, Fidelis Mashiri</i>	
		Fatigue analysis of composite beam with bolted shear connectors	347
<i>Mark Denavit</i>		<i>Martin Mensinger, Florian Oberhaider, Lukas Stimmelmayr</i>	
Variable stiffness reduction factor for stability design of steel-concrete composite columns	243	Influence of hot dip galvanizing on the fatigue behaviour of T-studs for a grouted joint of integral composite frame bridges	354
COMPOSITE DECKS	255	<i>Josef Karl Kraus, Karsten Geißler</i>	
<i>Valentino Vigneri, Christoph Odenbreit, Markus Schäfer, Stephen Hicks, Dennis Lam, François Hanus</i>		Studies of the fatigue stress and strength of large composite bridges with cantilevers and precast concrete elements	364
Characterization of the load-slip behaviour of headed stud shear connections in narrow profiled sheeting	257	FIRE BEHAVIOUR	373
<i>Leopold Sokol, Anna Palisson</i>		<i>Manuel Romero, Vicente Albero, Ana Espinos, Enrique Serra, Antonio Hospitaler, David Pons</i>	
Sagging bending resistance of composite slabs in partial shear connection	270	A novel strategy for slim-floor fire protection	375
COMPOSITE STRUCTURAL ELEMENTS	281		
<i>Dongxu Li, Brian Uy, Zhichao Huang, Mahbub Khan</i>			
Behaviour and design of high-performance steel and steel-concrete composite structures	283		

<i>Pascal Lequime</i>		
Advanced numerical fire design of industrial composite slabs with unprotected steel beams – a case study	384	<i>Riccardo Zanon, Dennis Rademacher, Günter Seidl, Daniel Pak</i>
		Integral bridge with RS-Overpass technology – step into the future standard highway overpasses 485
<i>Hitesh Lakhani, Jan Hofmann</i>		
Concrete cone failure of post installed fasteners during fire	396	JOINTS 497
		<i>Nilde Maci, Jan Hofmann</i>
<i>Oliver Beckmann, Michael Cyllok</i>		Influence on the load-displacement behaviour of steel-to-concrete connections with post-installed adhesive anchors 499
Load transfer from hollowcore slabs to DELTABEAM® slim-floor beams in case of a Fire	404	
<i>Alexey Tretyakov, Ilia Tkachenko, Kamila Čábová, František Wald</i>		<i>Petr Cervenka, Jakub Dolejs</i>
Finite element analyses for European model of the steel and fibre reinforced concrete circular hollow section column in fire	416	Steel FRC slab in compression in steel-concrete composite frame joints 510
<i>Takeo Hirashima, Fuminobu Ozaki, Tor Yoshida, Kei Kimura, Junichi Suzuki</i>		<i>Michael Petrasch, Jan Hofmann</i>
Membrane action of reinforced concrete slabs in fire	422	Strengthening of anchor channels on the concrete surface 522
<i>Kei Kimura, T. Hirashima, F. Ozaki, T. Yoshida, Junichi Suzuki</i>		<i>Maximilian Ziwe, Jakob Ruopp, Ulrike Kuhlmann</i>
Numerical analysis of load-bearing fire test for reinforced concrete slabs	434	Studies on steel-to-concrete joints with concentrated loading conditions 534
INNOVATIVE STRUCTURES	447	PRACTICAL APPLICATIONS 547
<i>Huu Tran, Huu-Tai Thai, Brian Uy, Tuan Ngo, Dongxu Li, Jun Mo</i>		<i>Maciej Kożuch, Wojciech Lorenc, Błażej Bartoszek, Adam Stempniewicz, Henryk Windorpski, Michał Struczyński, Radosław Sęk, Wojciech Ochojski</i>
Advanced analysis of steel-concrete composite buildings	449	Application of rolled sections in composite bridges with span over 50 m 549
<i>Jovan Fodor, Markus Schäfer</i>		<i>Ulrich Breuninger, Jonas Landsberger</i>
Experimental and numerical investigation of the friction based demountable shear connector	461	Design, calculation and construction work of a prestressed composite construction to support the facade columns of a high-rise building 561
<i>Huu-Tai Thai</i>		<i>Xuemei Li, Ashpica Chhabra, Han Ding</i>
Innovative composite structural systems for modular tall buildings	473	Kunming Tower: composite systems in supertall design 573

CONTENTS

<i>Stefano China, Aroldo Tegon</i>	
NPS composite beams and columns used for the Odense university hospital	585
SEISMIC BEHAVIOUR	597
<i>Nicholas E. Briggs, Raul E. Avellaneda- Ramirez, Kyle Coleman, Benjamin W. Schafer, Matthew R. Eatherton, W. Samuel Easterling, Jerome Hajjar</i>	
Cyclic behavior of composite connections in composite floor diaphragms	599
<i>Yuko Shimada</i>	
Evaluation of the plastic deformation capacity of composite beams through the connection coefficient	611
<i>Yixin Zhang, Yang Liu, Jie Ruan, Pinzhi Wang</i>	
Seismic performance of prefabricated core steel tube reinforced concrete columns	621
<i>J. Ann Albright, Alessio Argentoni, Paolo M. Calvi</i>	
Experimental investigation of interior and exterior steel-concrete composite NPS beam-column joints	632
<i>Luis B. Fargier-Gabaldon, Paul Cordova, Gustavo Parra-Montesinos, Gregory Deierlein</i>	
RCS moment frames in high seismic zones in the United States	644
<i>Rafaela Don, Adrian Ciutina, Aurel Stratan, Cristian Vulcu</i>	
Slim-floor beam-to-column joints for seismic-resistant structures: joint performance and case study on MRFs	656
<i>Raul Avellaneda Ramirez, Matthew Eatherton, W. Samuel Easterling, Benjamin Schafer, Jerome Hajjar</i>	
Strength of concrete filled steel deck composite diaphragms with reinforcing steel	668
SHEAR CONNECTIONS	679
<i>Taygun Yolacan, Markus Schäfer</i>	
Determination of slip-factor between friction shims and shot-blasted steel surfaces	681
<i>Yannick Broschart, Wolfgang Kurz, Kevin Wolters, Georgios Christou, Markus Feldmann, Josef Hegger, Martin Claßen</i>	
Development of a consistent design concept for composite dowels	693
<i>Cäcilia Karge, Richard Stroetmann, Joachim Wisnewski</i>	
Experimental and numerical investigation of dowel strips for longitudinal and transverse loading	705
<i>Valentino Vigneri, Robert Kroyer, Stefano China, Alessio Argentoni, Andreas Taras</i>	
Longitudinal shear transfer in composite steel truss and concrete (CSTC) beams	717
<i>Angeliki Christoforidou, Florentia Kavoura, Marko Pavlovic, Milan Veljkovic</i>	
Mechanical performance of injected steel-reinforced resin connectors under different confined conditions for reusable composite structures	729
