Contents

Preface *IX*

List of Contributors *XIII*

Part I Introduction

1 Supply Chain and Supply Chain Management *3*
Mario Stobbe
1.1 Introduction *3*
1.2 Terms and Definitions *3*
1.3 Network Dynamics and Management of the Supply Chain *6*
1.4 Design Criteria/Integration Concepts *8*
1.5 SCOR: Modeling the Supply Chain *9*
1.6 Summary *17*
References *18*

Part II Simulation

2 Logistics Simulation in the Chemical Industry *21*
Markus Schulz and Sven Spieckermann
2.1 Introduction *21*
2.2 Areas of Application for Logistics Simulation in the Process Industry *21*
2.3 The Simulation Process in Manufacturing and Logistics *23*
2.4 Case Studies *26*
2.5 Benefits and Expenses of Simulation Projects *33*
2.6 How a Simulator Works *34*
2.7 Developments in the Field of Logistics Simulation *35*
References *36*

Logistic Optimization of Chemical Production Processes. Edited by Sebastian Engell
Copyright © 2008 WILEY-VCH Verlag GmbH & Co. KGaA, Weinheim
ISBN: 978-3-527-30830-9

3 Logistic Simulation of Pipeless Plants *37*
Andreas Liefeldt
3.1 Pipeless Batch Plants *37*
3.2 PPSiM–Pipeless Plant Simulation *39*
3.3 Industrial Case Study *44*
3.4 Conclusions *54*
References *55*

Part III Industrial Solutions

4 Planning Large Supply Chain Scenarios with "Quant-based Combinatorial Optimization" *59*
Christoph Plapp, Dirk Surholt, and Dietmar Syring
4.1 Introduction *59*
4.2 The Limits of Traditional LP *59*
4.3 Quant-based Combinatorial Optimization *61*
4.4 Typical Planning Scenarios in the Process Industry *63*
4.5 Constraints *64*
4.6 Additional Modeling Elements of the Quant-based Combinatorial Optimization *65*
4.7 The Solution Approach *66*
4.8 Special Requirements and Advanced Modeling Features for the Chemical Industry *68*
4.9 Summary *89*
References *89*

5 Scheduling and Optimization of a Copper Production Process *93*
Iiro Harjunkoski, Marco Fahl, and Hans Werner Borchers
5.1 Introduction *93*
5.2 Copper Production Process *94*
5.3 Scheduling Problem *96*
5.4 Solution Approach *99*
5.5 Results *106*
5.6 Conclusions *107*
References *109*

6 Stochastic Tools in Supply Chain Management *111*
Rudolf Metz
6.1 Introduction *111*
6.2 Random Demand *112*
6.3 Random Service (and Shortage) *120*
6.4 Optimization of Service *124*
6.5 Solution Technique *127*
6.6 Implementation in BayAPS PP *130*
References *133*

Part IV Optimization Methods

7 Engineered Mixed-Integer Programming in Chemical Batch Scheduling *137*
Guido Sand
7.1 Introduction *137*
7.2 The Case Study *138*
7.3 An Engineered Approach to Optimal Scheduling *142*
7.4 Nonlinear Short-Term Scheduling Model *144*
7.5 Linearized Short-Term Model *153*
7.6 Comparative Numerical Studies *154*
7.7 Conclusions *159*
References *160*

8 MILP Optimization Models for Short-term Scheduling of Batch Processes *163*
Carlos A. Méndez, Ignacio E. Grossmann, Iiro Harjunkoski, and Marco Fahl
8.1 Introduction *163*
8.2 Classification of Batch Scheduling Problems *164*
8.3 Classification of Optimization Models for Batch Scheduling *166*
8.4 Review of Scheduling Models *172*
8.5 Computational Comparison Discrete vs Continuous Approaches *177*
8.6 Concluding Remarks and Future Directions *181*
8.7 Acknowledgements *182*
References *182*

9 Uncertainty Conscious Scheduling by Two-Stage Stochastic Optimization *185*
Jochen Till, Guido Sand, and Sebastian Engell
9.1 Introduction *185*
9.2 Scheduling under Uncertainty using a Moving Horizon Approach with Two-Stage Stochastic Optimization *187*
9.3 Two-Stage Stochastic Integer Programming *195*
9.4 A Stage Decomposition Based Evolutionary Algorithm *201*
9.5 Numerical Studies *205*
9.6 Conclusions *212*
References *213*

10 Scheduling Based on Reachability Analysis of Timed Automata *215*
Sebastian Panek, Olaf Stursberg, and Sebastian Engell
10.1 Introduction *215*
10.2 Scheduling with Timed Automata *219*
10.3 Reachability Analysis *224*

10.4 Benchmark Example *229*
10.5 Summary *233*
References *234*

Part V Interaction with ERP Systems

11 Integrated Short and Midterm Scheduling of Chemical Production Processes – A Case Study *239*
Mathias Göbelt, Thomas Kasper, and Christopher Sürie
11.1 Introduction *239*
11.2 Advanced Planning in Chemical Industries *239*
11.3 Case Study *244*
11.4 Modeling the Case Study Scenario in mySAP SCM *246*
11.5 Solving the Case Study Scenario in mySAP SCM *254*
11.6 Conclusion *260*
References *260*

12 Integration of Scheduling with ERP Systems *263*
Winfried Jaenicke and Robert Seeger
12.1 Introduction *263*
12.2 Production Scenarios *266*
12.3 The Planning Problem and a Solution Approach *268*
12.4 Data Model *270*
12.5 Planning Software *272*
12.6 Remarks on Planning Philosophy *275*
12.7 Remarks on Technical Issues *276*
References *277*

Index *279*
