

Index

a

acetylcholine (ACh) receptor 96
 actin 54
 actin binding site 31
 actin filament 4f., 16, 24, 27ff., 59, 67, 120, 240, 285f., 287
 – time course of movement 34
 actomyosin 22ff.
 acyl-carrier protein (ACP) 135
 AGT fusion protein 134f.
 O6-alkylguanine-DNA alkyltransferase (AGT) 134
 alternating laser excitation (ALEX) 208, 221ff., 227
 amplification rate 113
 analysis methods 210
 artificial bilayer 88ff., 92
 atomic force microscopy (AFM) 6, 157, 159, 298, 301
 – AFM-based techniques 159
 – force-clamp AFM 306
 – high-speed AFM 281ff., 290
 – imaging rate 277f.
 – non-contact AFM (nc-AFM) 284, 292f.
 – operation 278
 – scan speed 284
 – set-up 278
 – single protein AFM techniques 298ff.
 – substratum 290
 – tapping-mode AFM 279, 281, 289
 ATP analog 14ff., 41
 ATP hydrolysis 237f., 243, 249, 285
 ATP hydrolysis cycles 14ff., 22
 ATP synthase 237ff.
 – Boyer's proposal 238
 – components 237
 – conformations of the β subunit 239f.
 – crystal structure 239f., 248

– rotation 240
 – subcomplex 237, 246
 – ϵ subunit 248f.
 – subunit structure 237, 245
 ATPase cycle 68f.
 autofluorescent protein (AFP) 132f.
 avalanche photodiode (APD) 45, 55, 209, 211

b

biased Brownian step model 27ff., 33
 – potential profile 28
 bilayer
 – artificial 88ff., 92
 – self-standing 89ff.
 – solid supported 88ff.
 bilayer apparatus 91
 binding site 103, 149
 bioimaging 284ff.
 biomolecular dynamics 3
 black lipid membrane technique 155
 Boltzmann energy distribution 27
 branch migration 269, 271
 Brownian motion 15, 27, 33
 Brownian ratchet model 250

c

calmodulin (CaM) 60ff., 65ff.
 cAMP receptor 1 (cAR1) 99
 cAMP receptor complex 110
 cantilever 278f., 282, 288f., 300
 cell lines 126
 cell membrane, organization and dynamics 136
 cell surface receptor, labeling methods 132ff.
 cell treatment 126
 channel conformational change, detection 95

channel gating 151
 chemical gating 153
 chemo-mechanical coupling 243ff.
 chemoattractant receptors 111ff.
 chemotactic signaling molecules, stochastic nature 109
 chemotactic signaling system 109
 chemotaxis 108f., 114
 chromophore 54
 chymotrypsin inhibitor (CI) 218
 cross-bridge swinging model 30

d

darkfield imaging with one nanometer accuracy (DIONA) 53, 63
 darkfield microscopy 53
 data reduction 210
 defocused orientational and positional imaging (DOPI) 57, 62
 detection format 209
 dichroic mirror (DM) 205
Dictyostelium 109ff., 114
 diffusion coefficient 106f.
 dipole moment 257
 displacement 16ff., 41
 – nature of sub-steps 22
 – number of sub-steps 21
 – rising phase 21
 – sub-steps 20ff., 25
 disulfide bond 314f.
 dithiothreitol (DTT) 313f.
 DNA-based motors 5
 DNA-processing enzymes 225
 dynamic clustering 105
 dynamic PID (proportional-integral-differential) controller 284, 286f.
 dynein 59f., 71
 – axonemal dynein 71ff.
 – cytoplasmic dynein 71
 – structure 59

e

electric dipole 197
 electron transfer 223
 electronic multiplying charge-coupled device (emCCD) 45, 175
 electronic multiplying charge-coupled device (emCCD) camera 118, 121ff.
 endocytosis 117
 energy landscape 305f.
 epidermal growth factor (EGF) 2, 98ff., 106, 115, 117ff., 126
 – dimeric bindings 102f.
 – monomeric bindings 102f.

epidermal growth factor receptor (EGFR) 99f., 102ff., 115, 117
 epidermal growth factor receptor (EGFR) activation 104, 106
 – amplification 104f.
 – propagation 104f.
 epidermal growth factor receptor (EGFR) dimer 118
 epi-fluorescence microscopy 1f.
 eucaryotic cells 109
 evanescent wave 43, 47f.
 excitation 203
 excitation laser 207f.
 – multiple excitations 206
 – one excitation 206

f

F_0F_1 -complex 237
 – rotation 249
 F_1 rotation 244f.
 feedback bandwidth 279ff.
 feedback operation 280
 filopodia 118, 120ff.
 flavin adenine dinucleotide (FAD) 4
 fluorescence 44, 94
 fluorescence-aided molecule sorting (FAMS) 213
 fluorescence correlation spectroscopy (FCS) 3, 121, 137f., 149f., 174, 191, 212, 223
 – application to membrane receptor mobility 138
 – at high fluorophore concentrations 150
 fluorescence imaging to one nanometer accuracy (FIONA) 24, 51ff., 61ff., 67, 68, 70, 74
 fluorescence intensity distribution analysis (FIDA) 212
 fluorescence lifetime 220f.
 fluorescence lifetime imaging microscopy (FLIM) 74
 fluorescence polarization 197, 202
 fluorescence quenching 223
 fluorescence recovery after photobleaching (FRAP) 121, 137, 174, 176f.
 fluorescence resonance energy transfer (FRET) 3, 53, 67f., 95, 134, 173, 197ff., 201, 216f., 221ff., 229, 243, 249, 251, 257f., 270
 fluorescence spectroscopy 3, 194
 fluorescent detection volume 43
 fluorescent *in situ* hybridization (FISH) 172
 fluorescent *in vivo* hybridization (FIVH) 172f.
 fluorescent marker 42

fluorophore 48ff., 53ff., 62, 74, 88, 92, 173, 194, 196ff., 277
 folding trajectory 307f., 310
 force-clamp spectroscopy 297ff., 315
 force-extension spectroscopy 299f.
 force measurement 6
 force quench 307ff.
 force-velocity curve 23f.
 forces 309, 311, 313f.
 frame acquisition time 279
 fusion proteins 133f.

g

G protein-coupled receptor (GPCR) 99, 131, 159
 gain fluctuation relationship 113f.
 gliding filament assay 42
 gramicidin 95
 green fluorescent protein (GFP) 24, 42, 49, 61, 74, 111, 133, 173

h

hand-over-hand mechanism 2, 67
 helicase 257ff., 271
 – mechanism 262ff.
 – properties 260
 – single molecule techniques 261
 – smFRET studies 259ff.
 high-speed atomic force microscopy 277ff.
 histogram-based analysis 212
 holliday junction (HJ) 257, 271
 – conformer transitions of non-migratable HJ 266ff.
 – crossover isomers 266
 – function 265f.
 – non-migratable HJ 266f., 269f.
 – single molecule three-color FRET 268
 – smFRET studies 265ff.
 – structure 265f.
 hyperspectral imaging 127

i

imaging 41ff.
 – types 289f.
 imaging detector 45
 imaging rate 279
 immobilization 203
 – non-perturbative immobilization 258f.
 immobilized molecule 230
 input energy 34
 intermediate 104
 intracellular signal transduction 108
 ion channel 87ff., 95, 131, 151
 ion channel proteins 87, 93ff.

– incorporation 93f.
 ion-conductance scanning probe microscopy (ICSPM) 293
 isometric force 23, 29, 30

j

Jablonski diagram 194ff., 198f.

k

kinesin 59, 286
 – conventional kinesin 68ff.
 – other kinesins 69f.

l

labeling configuration 200ff.
 labeling protein components, methods 42
 Langevin equation 34
 lever-arm swinging model 30ff.
 ligand 111ff., 149, 160ff.
 ligand binding 139ff., 151ff.
 ligand binding properties 139
 ligand-gated ion channel 151, 157
 ligand-receptor complex 131ff., 158
 ligand-receptor interaction 157ff.
 – kinetics and thermodynamics 138ff.
 localization element (LE) 183
 Lorentzian function 154ff.

m

maltodextrin 156
 maltoporin 155f.
 maximum-likelihood method (MLM) 304f.
 mean square displacement (MSD) 122
 membrane 88, 92
 membrane receptor, dynamics 117ff.
 microtubule 68f., 286
 microtubule-based motors 2
 mitotic centromere-associated kinesin (MCAK) 70ff.
 molecular beacon 173
 molecular coulter counter 154
 molecular dynamics (MD) 214
 molecular machines 14
 – biological molecular machines 11f.
 – man-made molecular machines 11f.
 molecular motors 4f., 24ff., 33, 41ff., 58ff.
 – computer simulation 31ff.
 – mechano-chemical coupling 5
 MS2 binding site (MBS) 174
 MS2 capsid protein (MCP) 174f., 181
 multiparameter fluorescence detection (MFD) 213
 muscle 22ff.
 – computer simulation 31ff.

muscle contraction models 29ff.
 myelin basic protein (MBP) 183
 myosin 16, 41
 – displacement 18ff.
 – manipulation 19
 – observation 19
 myosin II 24, 65
 myosin V 2ff., 24ff., 58ff., 66, 72,
 285f., 288
 – cellular roles 60
 – regulation 65
 myosin VI 66f., 72
 myosin heads 27ff., 54
 – force-velocity curve 23
 – multiple head cooperative activity 34
 myosin motor 14, 18, 33
 – comparing with muscle 22ff.
 – mechanical events 16f.

n

nano-detection 13
 neck domain 30
 nerve growth factor (NGF) 100, 105, 115
 – dynamics of NGF/NGFR complex 105ff.
 nerve growth factor receptor (NGFR) 105ff.,
 115
 nicotinic acetylcholine receptor
 (nAChR) 151ff.
 nitrilotriacetate (NTA) 135
 nuclear envelope (NE) 177, 179
 nuclear export signal (NES) 179
 nuclear localization signal (NLS) 179
 nuclear pore complex (NPC) 179f.
 nucleotide-driven motor 241

o

observation volume 203
 oocyte 184
 optical isolation format 203
 optical isolation of multiple points 207
 – multi-confocal spectroscopy 207
 – total internal reflection (TIR) 207
 optical isolation of single point 205f.
 – confocal 205
 – high concentration 206
 optical patch-clamping 95
 optical trap 66, 71
 optical tweezer 13f.
 optically-trapped beads 14, 16

p

parachuting 279ff., 284
 penetration depth 47f.
 phage-receptor complex 156

phase-contrast imaging 289
 phosphatidyl choline (PC) 291
 phosphatidyl ethanolamine (PE) 291
 phosphorylation 108
 photo-induced electron transfer 199
 photobleaching 49f., 53f., 56, 74, 94
 photoisomerization 49
 photon arrival-time interval distribution
 (PAID) 212
 photon counting histogram (PCH) 212
 photon stream 210
 pixel 124
 pixel size 51
 plasma membrane 99ff., 115
 point emission 196f.
 point spread function (PSF) 50, 53, 67
 polarization 44
 polarized total internal reflection
 fluorescence microscopy (polTIRF)
 55ff., 62, 69
 polyethylene glycol (PEG) 259
 polyprotein 307f.
 pore 153f.
 porin 154ff.
 post-electrophoresis relaxation (PER) 137
 power law distribution 305
 predimer 104
 processive movement 5
 programmable array microscope (PAM) 118,
 120, 122ff., 127f.
 proportional-integral-differential (PID)
 280f.
 – dynamic PID control 284f.
 protein channel 154
 protein chemistry 313f.
 protein dynamics 191ff.
 – distribution of subpopulations 192
 – monitoring 201
 – unsynchronized dynamics 192
 protein expression 3
 protein folding 6, 193, 298, 300,
 306ff.
 – conformational dynamics 220f.
 – developing a model 309ff.
 – equilibrium unfolding studies 217ff.
 – experiments 218f.
 – folding time 312
 – force dependency 309
 – labeling schemes 215f.
 – studies 3, 216
 protein unfolding 298, 302ff., 306
 proton motive force 238, 250
 pseudopod 109
 pulsed laser excitation 209

q

quantum dot (QD) 2, 42, 49, 117ff., 122, 125
 quantum yield 49f.
 quencher 173

r

receptor 104f., 111ff., 160ff.
 receptor diffusion 139ff.
 receptor mobility 136, 139ff.
 receptor protein tyrosine kinase (RTK) 99f., 107, 115, 117
 recognition imaging 290
 regulation of G protein signaling (RGS) 114
 repetitive shuttling 263f.
 retrograde transport 118ff.
 – velocity 120
 reverse rotation 246f.
 reversible sequential labeling (ReSeq) 136
 rhodamine 49, 60, 100ff.
 ribonucleoprotein particle (RNP) 172, 177, 181
 ribozymes 4
 RNA 171ff.
 – dynamics in the cytoplasm 181ff.
 – dynamics in the nucleus 175ff.
 – movements 177
 – non-localizing RNA 181
 – techniques to label RNA 172ff.
 – transport through nuclear pore complex 179f.
 – types of RNA 171
 RNA binding protein 184
 RNA localization 182ff.
 RNA polymerase (RNAP) 5, 193, 207f., 225ff.
 – abortive initiation 229f.
 – retention of sigma 227
 RNA visualization 172ff.
 rotary motor 237
 rotation 242
 rotation steps 241
 rotational speed 242, 246
 ryanodine 88ff., 95, 157
 – binding duration 89
 ryanodine receptor channel 88ff., 95

s

scanner 282f.
 scanning near-field ultrasound holography (SNFUH) 292, 294
 scanning probe nanometry 16
 scattering plane 48
 second messenger 111ff.
 semiconductor quantum dots 42
 signal amplification 105

signal-to-noise ratio (SNR) 113f.
 signal transduction 99ff., 131
 signaling complex 108
 signaling dimer 100, 102ff., 115
 signaling molecules 99
 simultaneous optical and electrical recording 92
 single binding event 88
 single channel current recording 88
 single channel imaging 91, 240
 single fluorescence dyes 1
 single fluorophore detection 42ff.
 single molecule
 – in live cells 2f.
 – orientation 54
 – visualization 1
 single molecule detection (SMD) 2, 13f.
 single molecule dynamic force spectroscopy 160ff.
 – applications to cell surface receptors 157ff.
 – principles 157
 single molecule dynamics 1ff.
 single molecule electron transfer 199
 single molecule fluorescence imaging 41, 60, 70
 single molecule fluorescence resonance energy transfer (smFRET) 53, 68, 257ff., 261f.
 – DNA-DNA FRET 262
 – protein-DNA FRET 263
 single molecule fluorescence spectroscopy 204, 231
 single molecule force spectroscopy 301
 single molecule high resolution imaging with photobleaching (SHRIMP) 53
 single molecule identification 211
 single molecule imaging 1ff., 13ff., 49f., 65, 99, 115, 175
 single molecule intracellular imaging 73
 single molecule manipulation 4
 single molecule measurement 225
 – analysis methods 200
 – types 202
 single molecule nanomanipulation 13
 single molecule position tracking 1f.
 single molecule protein folding 219f.
 single molecule sorting 213
 single molecule spectroscopy 193f., 205
 single molecule study 11
 single molecule techniques 131ff.
 single particle tracking 121, 123, 128
 single photon counting 209
 site-specific labeling 54
 Snell's law for refraction 45
 solid supported bilayer 88ff.

- spatial light modulator (SLM) 122f.
- spot detector 45f.
- time resolution 45
- ssDNA flexibility 264f.
- step movement 2, 4
- stimulated emission depletion (STED) 206, 209
- stochastic signal processing 108
- streptavidin 291f.
- sub-diffraction localization 50
- substratum 290
- supercritical angle fluorescence (SAF) 206f.
- suppressor tRNA 132, 134
- surface immobilization 258, 267
- symmetry mismatch 249

- t**
- tetramethylrhodamine (TMR) 202
- thermal fluctuations 11
- time-correlated single photon counting (TCSPC) 209, 221
- time-integrated fluorescence cumulant analysis (TIFCA) 212
- titin 6, 313
- total internal reflection (TIR) 206, 210f.
- total internal reflection fluorescence (TIRF) 1f., 43f., 46, 49f., 55, 60, 65, 67, 73, 87f., 90, 92, 95
 - lenses 47
 - prism-type TIRF microscopy 44
- total internal reflection fluorescence microscopy (TIRFM) 13ff., 109f.
- trajectory analysis 214
- transcription 176
- transcription site 177
- transduction 108
- translocation 260, 264
- transmembrane proteins 117
- transmembrane signaling, stochastic model 111ff.
- transcriptional memory 176

- u**
- unfolding trajectories 302ff.
- unidirectional rotation 243

- v**
- velocity 23, 34, 42
- vesicle 89, 92f.
- visible fluorescent protein (VFP) 117

- w**
- wide-field microscopy 126

- x**
- X-ray crystallography 104
