Index

a

advanced glycation end products (AGE) 171
advanced lipid peroxidation end products (ALEs) 171
Affymetrix array 8
Affymetrix gene chip technology 65
Affymetrix Latin Square data set 66
Affymetrix microarrays 61, 65
aging 162
alpha-synuclein protein 162
Alzheimer's disease (AD) 1, 159, 160, 176, 177
– incipient 15
– models of 180
– oxidative damage in 176
– role of identified energy-related proteins in 178
γ-aminobutyric acid (GABA) 93
amyloid precursor protein (APP) 176
amyotrophic lateral sclerosis (ALS) 1, 159, 161
analysis of variance (ANOVA) 74
anaplastic gliomas 199
Angelman syndrome 24
animal models 16
– neurodegeneration 15
antigen–antibody complex 172
antiscarring treatment (AST) 61
Aplysia neurons 145
apoptosis-related genes 45
array-based comparative genomic hybridization (array-CGH) 200
AST-boosted genes 79, 82
AST treatment-mediated modifications 75
autoimmune disease 22

b

B-cell lymphoma-w (BCLW) 211
bead-based arrays 5
Beckwith–Wiedemann syndrome 24
brain-derived neurotrophic factor (BDNF) 94

c

Caenorhabditis elegans model 184
cAMP responsive binding element (CREB) 114
cancer research 17
– therapeutic response 18
– therapeutic targets 19
– tumor classification 17
cDNA microarray 18
– analysis 97
– technology 89
cell culture model 181
cell cycle 107
– CDK4 107
– cyclin D1 107
– cyclin G 107
– E2F5 107

Neural Degeneration and Repair: Gene Expression Profiling, Proteomics, and Systems Biology
Edited by Hans Werner Müller
Copyright © 2008 WILEY-VCH Verlag GmbH & Co. KGaA, Weinheim
ISBN: 978-3-527-31707-3

– Rb 107
central benzodiazepine (BDZ) receptor 93
central glutamatergic system 95
central nervous system (CNS) 35, 61, 101, 129, 199
chaotropic agents 174
charge-coupled device (CCD) 4
chipchat tool, *see* visual basic for applications (VBA)-based tools
ChIP-on-chip assays 118
cholinergic system 160
chondroitin sulfate proteoglycans (CSPG) 62
chromatin immunoprecipitation (ChIP) 103
chromosomal abnormalities 24
collapsin response mediator protein-2 (CRMP-2) 151
collateral circuits 108
– restoration of
cortical tissue preparation 64
corticospinal tract (CST) 61
– transection 61, 64
creatine kinase (CK) 172
creatine system 178
cytoskeleton-associated molecules 109
cytoskeleton remodeling 103

d

database searching 175
deciphering tumor heterogeneity 209
differential-display reverse-transcription polymerase chain reaction (DDPCR) 3
DNA-binding sequence specific transcription factor 115
dorsal root entry zone (DREZ) 38
dorsal root ganglia (DRG) 36, 89, 130, 146
– identification of regulated molecules 90
double-stranded cDNA 164
Down's syndrome 21, 24

e

EGFR-expressing glioblastomas 204
electrospray ionization (ESI) 174
empirical Bayes estimate (EB) 72
epidermal growth factor receptor (EGFR) 203
expressed sequence tags (ESTs) 90
expression analysis systematic explorer (EASE) 11
expression profiling 201
extracellular matrix (ECM) proteins 210

f

facial nerve 36
fingerprinting (PMF) technique 175
flow cytometry 7
fluorophores 5
fragile X mental retardation 1 gene (FMR1-RM) mutation 22, 139

g

gel-based proteomics 152, 153
gene array 89, 96
– application of 98
gene expression
– assay 13
– data 19, 46
– network 12, 103
– profiling 20
– *Rattus norvegicus* 40
gene expression omnibus (GEO) 15
gene ontology (GO) consortium 9
gene set enrichment analysis (GSEA) 11
gene-specific oligo probes 4
genomic DNA assays 7
genomic DNA microarrays 1
glial cell line derived neurotrophic factor (GDNF) 94
glioblastomas 19
glucose metabolism 163, 178, 180, 182
glucose transporter 178
glutamate dehydrogenase 183
glutamate transporter (GLT-1) 172

glutathione-*S*-transfersase (GST) 172
glyceraldehyde 3-phosphate dehydrogenase (GAPDH) 177
gracile axonal dystrophy (GAD) 181
green fluorescent protein fusion protein (GFP) 184
growth-associated proteins 39, 105
growth cone plasticity 110

h
high-density DNA arrays 24
high-resolution techniques 2
high-throughput gene expression techniques 2, 49
host–tumor interaction 204
housekeeping genes 68
Huntington's disease (HD) 1, 21, 159, 160

i
immunohistochemistry 211
importins 146
– importin α 39, 139, 150
– importin β 39, 133, 139, 150
ingenuity pathways analysis (IPA) 11
in silico computer-based analysis 115
in situ hybridization 2, 13, 90
– preparing tissue 6
insulin-like growth factor binding protein 2 (IGFBP) 205
intracerebral ventricular model 183
intratumoral heterogeneity 211
in vitro transfection 112
ion channels 93, 95
iron chelator 61
isobaric tags for relative and absolute quantification (iTRAQ) 154
isoelectric point (p*I*) 174
isoflurane-mediated anesthesia 64
isotope coded affinity tagging (ICAT) 153, 174

j
Janus kinase (JAK) 114

k
Klinefelter's syndromes 24

l
lactate dehydrogenase (LDH) 177
laser-capture microdissection (LCM) 7
lesion-induced rupture 149
lesion models 35
– cellular events 37
– injury signals 38
– regeneration 38
leukemia inhibiting factor (LIF) 114
low-level analyses 67, 69, 74
low-stringency microarray hybridizations 13
lymphoblastoid cell lines 23

m
macromolecule biosynthesis 45
malignant tumors 17
massively parallel signature sequencing (MPSS) 4
mass spectroscopy (MS) 174, 175
– spectrometric sequencing 150
matrix-assisted laser desorption/ionization (MALDI) 174
maximum likelihood estimate (MLE) 72
mean square error (MSE) 74
mechanical microspotting 5
medulloblastomas 19
microarray experiment 1
– alternatives 3
– designing 5
– implementing 5
microarray hybridization 8, 13
microarray platform 6
– cost versus reproducibility 6
– customizability versus scalability, two-color design 6
microarray suite (MAS) 67
microarray technology 1, 19, 25, 164
– meta-analysis of 16

microtubule-associated proteins 105
mild cognitive impairment (MCI) 172
– oxidative stress in 180
model-based expression indexes (MBEI) 68
molecular biology of regenerative neurite outgrowth, new insights 47
molecular karyotyping 24
multiple sclerosis (MS) 16
myelin-associated glycoprotein (MAG) 104, 113
myelin proteins 113, 130

n

nerve growth factor (NGF) 94
neurodegenerative disorders, therapeutic implications for 115
neurofibrillary tangles (NFT) 160
neurogenesis 46
neurological disease-relevant research 13
neuromodulator receptors, *see* neurotransmitter
neuropeptide receptors 90
neuroscience research 1
neurotransmitter 160, 161
– receptors 89, 93, 95
– secretion 76
neurotrasmitter-related proteins 177
nicotinamide adenine dinucleotide (NAD) 148
NLS-containing proteins 39
Nogo receptor complex 109
nonspecific binding (NSB) 71
Northern blot 2
novel regeneration-associated genes 40
– identification 46
nuclear localization signal (NLS) 39, 139, 146
nucleus basalis magnocellularis (NBM) 183

o

obsessive compulsive disorder (OCD) 21
oligodendrocyte-myelin glycoprotein (OMgp) 104
oligonucleotide arrays 4
– development 5
– microarray 90, 95
open screening for regeneration-associated changes
– in (phospho)proteome 49
– in transcriptome 49
oxidative stress 171

p

pain, neuropathic 37, 89–97
Parkinson's disease (PD) 1, 159, 161
pathological protein aggregation 162
pathway-associated expression signatures 208
pediatric autoimmune neuropsychiatric disorders associated with streptococcal infections (PANDAS) 21
peptide mass 174, 175
peripheral axon tracts 151
peripheral nerve injury 45
– biological process 45
peripheral nervous system (PNS) 35, 129
– lesion models 35
pharmacogenomics 25
– clinical applications 25
phosphocreatine system 178
phosphoglycerate mutase 1 (PGM1) 177
photolithographic techniques 65
plasticity
– axonal 112, 119
– neuronal 103, 109, 115, 162
platelet-derived growth factor receptor (PDGFRA) 203
positron emission tomography (PET) 178
postganglionic trunk 37

– of superior cervical ganglion 37
posttranscriptional mechanisms in axon maintenance 148
Prader–Willi syndrome 24
principal component analysis (PCA) 80
probe filter 9
probe labeling 65
probe logarithmic intensity error (PLIER) 72
progression-associated gene expression 205, 207
protein carbonyls 171
protein–DNA interactions 50
protein-labeling techniques 49
– optimization of 49
protein modification 177
protein–protein interactions 150, 173
protein synthesis 129, 134, 145, 148
– inhibition of 135
proteomics 149
– degenerating axons 152
– regenerating axons 152
– studies of 149
puromycin-sensitive aminopeptidase (PSA) 16
P-value thresholds 73

r

reactive oxygen species (ROS) 171
redox proteomics 172
regeneration-associated genes (RAGs) 39
representational difference analysis (RDA) 3
retinoblastoma gene 205
retrograde injury signaling 146
– translation to signal identification 150
reverse Northern blot 167
reverse transcription (RT) PCR, *see also* immunohistochemistry
– optimal conditions 64
RhoA-dependent pathways 113
RNA-binding proteins 129, 138
robust median polish procedure 71
robust multiarray average (RMA) 69

s

Saccharomyces cerevisiae 50
senescence-accelerated mouse (SAM) 182
sensori motor cortex 61
serial analysis of gene expression (SAGE) 2, 3
signal transduction molecules 90, 97
single-cell assays 7
single nucleotide polymorphism (SNP) genotyping 24, 200
single photon emission computed tomography (SPECT) 178
small proline-rich protein 1 110
sodium dodecyl sulfate–polyacrylamide gel electrophoresis (SDS-PAGE) 173
spinal cord injury (SCI) 35, 61, 62, 105
– scar-suppressing treatment 62
spinal motor atrophy (SMA) 138
stable isotope labeling with amino acids in culture (SILAC) 153
stress-related gene expression 47
stress–response-related genes 81
Student's *t*-distribution 74
superior cervical ganglion (SCG) 37
survival motoneuron 1 (SMN1) 138
synaptosomal model 182

t

target of rapamycin (TOR) 135
The Institute for Genomic Research (TIGR) 168
thiamin pyrophosphate (TPP) 184
tissue heterogeneity 7, 66
Tourette syndrome (TS) 21, 23
transcription binding sites (TBSs) 115
transcriptional regulatory network elucidation 51

– approaches 51
– regeneration 51
traumatic brain injury (TBI) 159, 166
tumor suppressor protein 115
two-class prediction model 202
two-dimensional-high performance liquid chromatography (2D-HPLC) 174
two-dimensional polyacrylamide gel electrophoresis (2D-PAGE) 173, 174, 201

v
vascular endothelial growth factor (VEGF) 108
vascular permeability 102
vascular remodeling 108
vasoactive intestinal peptide (VIP) 40
ventricular cerebrospinal fluid (VF) 177
vesicle associated membrane protein 1 (VAMP-1) 93
visual basic for applications (VBA)-based tools 75
voltage-dependent anion channel protein-1 (VDAC-1) 177

w
Western blot 18
whole-genome SNP arrays 24
World Health Organization (WHO) 199

x
Xenopus retinal axons 134, 135
Xenopus spinal neurons 136

z
zip-code binding protein 1 (ZBP1) 135
