<b>1</b>	<b>Introduction to Polyolefins</b>	<b>1</b>
1.1	Introduction	1
1.2	Polyethylene Resins	4
1.3	Polypropylene Resins	10
	Further Reading	13
<b>2</b>	<b>Polyolefin Microstructural Characterization</b>	<b>15</b>
2.1	Introduction	15
2.2	Molecular Weight Distribution	17
2.2.1	Size Exclusion Chromatography	17
2.2.2	Field Flow Fractionation	27
2.3	Chemical Composition Distribution	29
2.3.1	Crystallizability-Based Techniques	29
2.3.2	High-Performance Liquid Chromatography	40
2.4	Cross-Fractionation Techniques	43
2.5	Long-Chain Branching	46
	Further Reading	51
<b>3</b>	<b>Polymerization Catalysis and Mechanism</b>	<b>53</b>
3.1	Introduction	53
3.2	Catalyst Types	56
3.2.1	Ziegler–Natta Catalysts	56
3.2.2	Phillips Catalysts	61
3.2.3	Metallocenes	62
3.2.4	Late Transition Metal Catalysts	67
3.3	Supporting Single-Site Catalysts	70

3.4	Polymerization Mechanism with Coordination Catalysts	76
	Further Reading	86
<b>4</b>	<b>Polyolefin Reactors and Processes</b>	<b>87</b>
4.1	Introduction	87
4.2	Reactor Configurations and Design	89
4.2.1	Gas-Phase Reactors	90
4.2.1.1	Fluidized Bed Gas-Phase Reactors	91
4.2.1.2	Vertical Stirred Bed Reactor	97
4.2.1.3	Horizontal Stirred Gas-Phase Reactor	99
4.2.1.4	Multizone Circulating Reactor	102
4.2.2	Slurry-Phase Reactors	104
4.2.2.1	Autoclaves	105
4.2.2.2	Slurry Loop Reactors	106
4.2.3	Solution Reactors	107
4.2.4	Summary of Reactor Types for Olefin Polymerization	108
4.3	Olefin Polymerization Processes	109
4.3.1	Polyethylene Manufacturing Processes	112
4.3.1.1	Slurry (Inert Diluent) Processes	112
4.3.1.2	Gas-Phase Processes	115
4.3.1.3	Mixed-Phase Processes	118
4.3.1.4	Solution Processes	119
4.3.2	Polypropylene Manufacturing Processes	121
4.3.2.1	Slurry (Inert Diluent) Processes	122
4.3.2.2	Gas-Phase Processes	122
4.3.2.3	Mixed-Phase Processes	125
4.4	Conclusion	128
	References	128
	Further Reading	129
<b>5</b>	<b>Polymerization Kinetics</b>	<b>131</b>
5.1	Introduction	131
5.2	Fundamental Model for Polymerization Kinetics	134
5.2.1	Single-Site Catalysts	134
5.2.1.1	Homopolymerization	134
5.2.1.2	Copolymerization	145
5.2.2	Multiple-Site Catalysts	149
5.2.3	Temperature Dependence of Kinetic Constants	152
5.2.4	Number of Moles of Active Sites	154
5.3	Nonstandard Polymerization Kinetics Models	156
5.3.1	Polymerization Orders Greater than One	156
5.3.2	Hydrogen Effect on the Polymerization Rate	161
5.3.3	Comonomer Effect on the Polymerization Rate	173
5.3.4	Negative Polymerization Orders with Late Transition Metal Catalysts	179

5.4	Vapor-Liquid-Solid Equilibrium Considerations	181
	Further Reading	184
<b>6</b>	<b>Polyolefin Microstructural Modeling</b>	<b>187</b>
6.1	Introduction	187
6.2	Instantaneous Distributions	188
6.2.1	Molecular Weight Distribution	188
6.2.1.1	Single-Site Catalysts	188
6.2.1.2	Multiple-Site Catalysts	199
6.2.2	Chemical Composition Distribution	212
6.2.2.1	Single-Site Catalysts	212
6.2.2.2	Multiple-Site Catalysts	222
6.2.3	Comonomer Sequence Length Distribution	232
6.2.4	Long-Chain Branching Distribution	237
6.2.5	Polypropylene: Regio- and Stereoregularity	250
6.3	Monte Carlo Simulation	251
6.3.1	Steady-State Monte Carlo Models	252
6.3.2	Dynamic Monte Carlo Models	262
	Further Reading	268
<b>7</b>	<b>Particle Growth and Single Particle Modeling</b>	<b>271</b>
7.1	Introduction	271
7.2	Particle Fragmentation and Growth	274
7.2.1	The Fragmentation Step	275
7.2.2	Particle Growth	284
7.3	Single Particle Models	286
7.3.1	Particle Mass and Energy Balances: the Multigrain Model (MGM)	287
7.3.2	The Polymer Flow Model (PFM)	292
7.3.3	An Analysis of Particle Growth with the MGM/PFM Approach	295
7.3.4	Convection in the Particles – High Mass Transfer Rates at Short Times	301
7.4	Limitations of the PFM/MGM Approach: Particle Morphology	304
	References	307
	Further Reading	307
<b>8</b>	<b>Developing Models for Industrial Reactors</b>	<b>311</b>
8.1	Introduction	311
	References	321
	Further Reading	322
