Preface XXI

List of Contributors XXIII

Part A Pathogens 1

Part I Bacteria 3

1 Bacillus anthracis: Anthrax 5

*Markus Antwerpen, Paola Pilo, Pierre Wattiau, Patrick Butaye,
Joachim Frey, and Dimitrios Frangoulidis*

- 1.1 Introduction 5
- 1.2 Characteristics of the Agent 5
- 1.3 Diagnosis 6
 - 1.3.1 Phenotypical Identification 6
 - 1.3.2 Growth Characteristics 6
 - 1.3.3 Antibiotic Resistance 7
 - 1.3.4 Phage Testing and Biochemistry 8
 - 1.3.5 Antigen Detection 8
 - 1.3.6 Molecular Identification 8
 - 1.3.6.1 Virulence Plasmid pXO1 8
 - 1.3.6.2 Virulence Plasmid pXO2 10
 - 1.3.7 Chromosome 10
 - 1.3.8 MLVA, SNR, and SNP Typing 11
 - 1.3.9 Serological Investigations 11
- 1.4 Pathogenesis 12
 - 1.4.1 Animals 12
 - 1.4.2 Humans 12
- 1.5 Clinical and Pathological Findings 13
 - 1.5.1 Oropharyngeal Anthrax 14
 - 1.5.2 Abdominal or Intestinal Anthrax 14
 - 1.5.3 Inhalational or Pulmonary Anthrax 14
- 1.6 Epidemiology 15

1.7	Conclusion	15
	References	16
2	<i>Brucella Species: Brucellosis</i>	19
	<i>Sally J. Cutler, Michel S. Zygmunt, and Bruno Garin-Bastuji</i>	
2.1	Introduction	19
2.2	Characteristics of the Agent	20
2.3	Diagnosis	22
2.3.1	Immunological Approaches	25
2.3.2	Polymerase Chain Reaction Assays	25
2.4	Pathogenesis	26
2.5	Clinical and Pathological Findings	27
2.6	Epidemiology, Molecular Typing, and Control Strategies	29
2.6.1	Epidemiology	29
2.6.2	Molecular Typing Methods	29
2.6.3	Control Strategies	31
2.7	Conclusions	31
	References	32
3	<i>Burkholderia mallei: Glanders</i>	37
	<i>Lisa D. Sprague and Mandy C. Elschner</i>	
3.1	Introduction	37
3.2	Characteristics of the Agent	37
3.3	Diagnosis	38
3.3.1	Cultural Identification	38
3.3.2	Molecular Based Methods	39
3.3.3	Antigen Detection	39
3.3.4	Serology	39
3.4	Clinical and Pathological Findings in Humans	40
3.5	Clinical and Pathological Findings in Animals	41
3.6	Epidemiology	42
3.7	Molecular Typing	43
3.8	Conclusions	43
	References	43
4	<i>Burkholderia pseudomallei: Melioidosis</i>	47
	<i>Lisa D. Sprague and Mandy C. Elschner</i>	
4.1	Introduction	47
4.2	Characteristics of the Agent	47
4.3	Diagnosis	48
4.3.1	Cultural Identification	48
4.3.2	Antigen Detection	49
4.3.3	Molecular Based Methods	49
4.3.4	Serology	49

4.4	Clinical and Pathological Findings in Humans	50
4.5	Clinical and Pathological Findings in Animals	50
4.6	Epidemiology	52
4.6.1	Molecular Typing	52
4.7	Conclusions	52
	References	53
5	<i>Coxiella burnetii: Q Fever</i>	57
	<i>Matthias Hanczaruk, Sally J. Cutler, Rudolf Toman, and Dimitrios Frangoulidis</i>	
5.1	Introduction	57
5.2	Characteristics of the Agent	58
5.3	Diagnosis	59
5.3.1	Direct Detection	59
5.3.2	<i>C. burnetii</i> Cultivation	59
5.3.3	Detection of <i>C. burnetii</i> Specific DNA	60
5.3.4	Serology	61
5.4	Pathogenesis	62
5.5	Clinical and Pathological Findings	63
5.5.1	Acute Q Fever	63
5.5.2	Chronic Q Fever	64
5.6	Epidemiology, Including Molecular Typing	64
5.6.1	Plasmid Types	64
5.6.2	RFLP	65
5.6.3	IS1111 Typing	65
5.6.4	Multispacer Sequence Typing	65
5.6.5	MLVA Typing	66
5.7	Conclusion	66
	References	66
6	<i>Francisella tularensis: Tularemia</i>	71
	<i>Anders Johansson, Herbert Tomaso, Plamen Padeski, Anders Sjöstedt, Nigel Silman, and Paola Pilo</i>	
6.1	Introduction	71
6.2	Characteristics of the Agent	72
6.3	Diagnosis	72
6.3.1	Serology	72
6.3.2	Direct Isolation	72
6.3.3	Phenotypical Characteristics	73
6.3.4	Molecular Biology Tools for Identification	73
6.4	Pathogenesis	73
6.5	Clinical and Pathological Findings	74
6.5.1	Animals	74
6.5.2	Humans	74
6.6	Epidemiology and Molecular Typing	77

6.7	Conclusion 79
	References 80
7	<i>Yersinia pestis: Plague</i> 85

7.1	Introduction 85
7.2	Characteristics of the Agent 88
7.2.1	The Plague Bacterium: <i>Yersinia pestis</i> 88
7.2.1.1	<i>Yersinia pestis</i> Microbiology 89
7.2.1.2	<i>Yersinia pestis</i> Virulence Markers and Pathogenesis 89
7.2.1.3	Chromosomal Virulence Genes 90
7.2.1.4	<i>Yersinia pestis</i> Variants 92
7.2.2	Molecular Typing 92
7.3	Pathogenesis 93
7.3.1	Clinical and Pathological Signs 93
7.3.2	Diagnosis 95
7.3.2.1	Plague Prevention and Treatment 96
7.3.3	Plague as a Biological Weapon 97
7.4	Epidemiology 98
7.4.1	Plague Distribution Today 99
7.4.2	Plague in Its Historical Perspective 100
7.4.3	An Updated Plague Cycle? 102
7.4.3.1	Flea-Borne Plague Transmission 103
7.4.4	Classical Plague Cycle 107
7.5	Conclusion 109
	References 110
8	<i>Rickettsia Species: Rickettsioses</i> 123
	<i>Alice N. Maina, Stephanie Speck, Eva Spitalska, Rudolf Toman, Gerhard Dobler, and Sally J. Cutler</i>
8.1	Introduction 123
8.2	Characteristics of the Agent 124
8.3	Phylogenetic Classification of Rickettsiae 126
8.3.1	Typhus Fever Group 126
8.3.2	Spotted Fever Group 128
8.3.3	Transitional Group Rickettsiae 129
8.3.4	Ancestral Group Rickettsiae 129
8.4	Diagnosis 130
8.4.1	Clinical Diagnosis 130
8.4.2	Laboratory Diagnostics 131
8.5	Pathogenesis 134
8.5.1	Clinical and Pathological Findings 136
8.6	Epidemiology 138
8.7	Conclusions 142

9	Mycobacterium tuberculosis: Tuberculosis 149 <i>Stefan Panaiotov, Massimo Amicosante, Marc Govaerts, Patrick Butaye, Elizabeta Bachyńska, Nadia Brankova, and Victoria Levterova</i>
9.1	Introduction 149
9.2	Diagnostic Microbiology of Mycobacteria 150
9.3	Staining and Microscopic Examination 151
9.4	Cultivation of Mycobacteria 152
9.5	Identification of Mycobacteria from Culture 153
9.6	Identification of Mycobacteria Directly from Clinical Specimens 154
9.7	Immunological Tests for the Diagnosis of <i>Mycobacterium tuberculosis</i> Infection 155
9.8	Molecular Epidemiology of Tuberculosis 157
9.9	Theoretical Principles of Typing 160
9.10	Performance Criteria Applied in Selecting the Method for Molecular Typing of Microorganisms 160
9.10.1	Reproducibility 160
9.10.2	Discriminatory Power 160
9.10.3	Typeability 161
9.11	Genetic Elements in <i>M. tuberculosis</i> that Contribute to DNA Polymorphism: Current Methods Applied for Genotyping of <i>M. tuberculosis</i> 161
9.12	IS6110-RFLP Analysis 161
9.13	Spacer Oligonucleotide Typing – Spoligotyping 162
9.14	VNTR and MIRU Analysis 163
9.15	Single Nucleotide Polymorphism 165
9.16	The Clustering Question? 166
9.17	Conclusions 167
	References 167
	Part II Viruses 173
10	Influenza Virus: Highly Pathogenic Avian Influenza 175 <i>Chantal J. Snoeck, Nancy A. Gerloff, Radu I. Tanasa, F. Xavier Abad, and Claude P. Muller</i>
10.1	Introduction 175
10.2	Characteristics of the Agent 175
10.2.1	Nomenclature 175
10.2.2	Genome and Protein Structure 176
10.2.3	Viral Replication 176
10.2.4	Antigenic Drift and Antigenic Shift 176
10.3	Pathogenesis 177
10.3.1	Reservoir 177
10.3.2	Low and Highly Pathogenic Influenza Viruses 177
10.3.3	Molecular Determinants of Pathogenicity 178
10.4	Clinical and Pathological Findings 179

10.4.1	HPAI (H5N1) Infection in Animals	179
10.4.2	HPAI (H5N1) Infection in Humans	180
10.5	Diagnosis	181
10.5.1	Direct Diagnosis	181
10.5.2	Indirect Diagnosis	181
10.5.3	Pathotyping	182
10.6	Evolution and Geographic Spread of HPAI (H5N1) Viruses	182
10.6.1	Chronology of H5N1 Virus	182
10.6.1.1	First Wave	182
10.6.1.2	Second Wave	183
10.6.1.3	Third Wave	183
10.6.2	Focus on Africa	185
10.7	Epidemiology of Other Influenza Subtypes	187
10.7.1	HPAI Virus Outbreaks	187
10.7.2	LPAI Virus Outbreaks	188
10.8	Conclusion	188
	References	189
11	Variola: Smallpox	201
	<i>Andreas Nitsche and Hermann Meyer</i>	
11.1	Introduction	201
11.2	Variola Virus	201
11.3	Human Monkeypox	202
11.4	Vaccinia Virus	203
11.5	Cowpox Virus	203
11.6	Collection of Specimens	204
11.7	Real-Time Polymerase Chain Reaction	204
11.8	Evaluation of Real-Time PCR Assays	205
11.9	Real-Time PCR Assays with Hybridization Probes	206
11.10	Real-Time PCR Assays with 5' Nuclease Probes	207
11.11	Other Real-Time PCR Formats	208
11.12	Conclusions	209
