

## Contents

### List of Contributors IX

<b>1</b>	<b>Introduction</b>	<b>1</b>
	<i>Günter Schmid</i>	
<b>2</b>	<b>The Nature of Nanotechnology</b>	<b>3</b>
	<i>Günter Schmid</i>	
2.1	Definition	3
2.2	From Nanoscience to Nanotechnology	8
2.2.1	Molecular Motors and Machines	9
2.2.2	Molecular Switches	15
2.2.3	Single-Electron Memories	18
2.2.4	Drug Delivery	21
2.2.5	Gene Chips	25
2.2.6	Hyperthermia	27
2.2.7	Gas Sensors	28
2.3	Technologies on the Nanoscale	31
2.3.1	Introduction	31
2.3.2	Structured Surfaces	31
2.4	Final Remarks	35
	References	36
<b>3</b>	<b>Top-Down Versus Bottom-Up</b>	<b>41</b>
	<i>Wolfgang J. Parak, Friedrich C. Simmel, and Alexander W. Holleitner</i>	
3.1	Introduction	41
3.1.1	Top-Down Strategies	43
3.1.2	Bottom-Up Strategies	46
3.2	First Example: Nanotweezers	48
3.2.1	Top-Down Nanotweezers	48

3.2.2	Bottom-Up Nanotweezers	51
3.3	Second Example: Nanomotors	52
3.3.1	Top-Down Nanomotors	52
3.3.2	Bottom-Up Nanomotors	54
3.4	Third Example: Patterning	56
3.4.1	Soft Lithography	56
3.4.2	Two-Dimensional DNA Lattices	57
3.5	Fourth Example: Quantum Dots	58
3.5.1	Different Methods for Making Quantum Dots	58
3.5.2	Lithographically Defined Quantum Dots	59
3.5.3	Epitaxially Self-Assembled Quantum Dots	61
3.5.4	Colloidal Quantum Dots	62
3.6	Perspectives and Limits of Top-Down and Bottom-Up Approaches	64
	References	66
<b>4</b>	<b>Fundamental Principles of Quantum Dots</b>	<b>73</b>
	<i>Wolfgang J. Parak, Liberato Manna, and Thomas Nann</i>	
4.1	Introduction and Outline	73
4.1.1	Nanoscale Science and Technology	73
4.2	Nanoscale Materials and Quantum Mechanics	75
4.2.1	Nanoscale Materials are Intermediates Between Atomic and Bulk Matter	75
4.2.2	Quantum Mechanics	76
4.3	From Atoms to Molecules and Quantum Dots	77
4.4	Shrinking Bulk Material to a Quantum Dot	81
4.4.1	Three-Dimensional Systems (Bulk Material)	81
4.4.2	Two-Dimensional Systems	85
4.4.3	One-Dimensional Systems (Quantum Wires)	88
4.4.4	Zero-Dimensional Systems (Quantum Dots)	90
4.5	Energy Levels of a (Semiconductor) Quantum Dot	91
	References	95
<b>5</b>	<b>Fundamentals and Functionality of Inorganic Wires, Rods and Tubes</b>	<b>97</b>
	<i>Jörg J. Schneider, Alexander Popp, and Jörg Engstler</i>	
5.1	Introduction	97
5.2	Physical Properties of 1D Structures	99
5.3	Synthetic Methods for 1D Structures	100
5.3.1	The Template Approach	101
5.3.2	Electrochemical Techniques	104
5.3.2.1	Electrospinning	104
5.3.2.2	Electrophoretic Deposition	105
5.3.3	Vapor-Liquid-Solid (VLS) and Related Synthesis Techniques	106

5.4	Contacting the Outer World: Nanowires and Nanotubes as Building Blocks in Nano/Micro/Macro-Integration	110
5.4.1	Nanowire and Nanotube Sensors	111
5.4.2	Piezoelectrics Based on Nanowire Arrays	118
5.4.3	With Nanowires and Nanotubes to Macroelectronics	120
5.4.3.1	Inorganic Nanowire and Nanotube Transistors	120
5.4.3.2	Branched Nanowire Structures	129
5.5	Outlook	132
	References	132
<b>6</b>	<b>Biomolecule–Nanoparticle Hybrid Systems</b>	<b>139</b>
	<i>Maya Zayats and Itamar Willner</i>	
6.1	Introduction	139
6.2	Metal Nanoparticles for Electrical Contacting of Redox Proteins	140
6.3	Metal Nanoparticles as Electrochemical and Catalytic Labels	141
6.4	Metal Nanoparticles as Microgravimetric Labels	149
6.5	Semiconductor Nanoparticles as Electrochemical Labels for Biorecognition Events	153
6.6	Metal Nanoparticles as Optical Labels for Biorecognition Events	155
6.7	Semiconductor Nanoparticles as Optical Labels	172
6.8	Semiconductor Nanoparticles for Photoelectrochemical Applications	179
6.9	Biomolecules as Catalysts for the Synthesis of Nanoparticles	188
6.10	Biomolecule Growth of Metal Nanowires	196
6.11	Conclusions and Perspectives	205
	References	208
<b>7</b>	<b>Philosophy of Nanotechnoscience</b>	<b>217</b>
	<i>Alfred Nordmann</i>	
7.1	Introduction: Philosophy of Science and of Technoscience	217
7.2	From “Closed Theories” to Limits of Understanding and Control	219
7.2.1	Closed Relative to the Nanoscale	219
7.2.2	Applying Theory to the Nanoscale: Fitting Versus Stretching	221
7.2.3	Mute Complexity	224
7.3	From Successful Methods to the Power of Images	226
7.3.1	(Techno)scientific Methodology: Quantitative Versus Qualitative	226
7.3.2	“Ontological Indifference”: Representation Versus Substitution	227
7.3.3	Images as the Beginning and End of Nanotechnologies	229
7.4	From Definitions to Visions	231
7.4.1	Wieldy and Unwieldy Conceptions	231
7.4.2	Unlimited Potential	231
7.4.3	A Formidable Challenge	233

7.5	From Epistemic Certainty to Systemic Robustness	236
7.5.1	What Do Nanoscientists Know?	236
7.5.2	The Knowledge Society	236
7.5.3	Social Robustness	237
7.6	What Basic Science Does Nanotechnology Need?	238
	References	241
<b>8</b>	<b>Ethics of Nanotechnology. State of the Art and Challenges Ahead</b>	<b>245</b>
	<i>Armin Grunwald</i>	
8.1	Introduction and Overview	245
8.2	The Understanding of Ethics	246
8.3	Ethical Aspects of Nanotechnology – an Overview	248
8.3.1	Equity: Just Distribution of Opportunities and Risks	249
8.3.2	Environmental Issues	250
8.3.3	Privacy and Control	253
8.3.4	Military Use of Nanotechnology	254
8.3.5	Health	255
8.3.6	Artificial Life	257
8.3.7	Human Enhancement	258
8.4	Nanoparticles and the Precautionary Principle	260
8.4.1	The Risk Debate on Nanoparticles	260
8.4.2	The Precautionary Principle	261
8.4.3	The Precautionary Principle Applied to Nanoparticles	264
8.5	Human Enhancement by Converging Technologies	267
8.5.1	Human Enhancement: Visions and Expectations	268
8.5.2	Occasions of Choice and Need for Orientation	270
8.5.3	Human Enhancement – No Simple Answers from Ethics	270
8.5.4	Enhancement Technologies – A Marketplace Scenario Ahead?	273
8.6	Conceptual and Methodical Challenges	275
8.6.1	Ethical Assessments of Uncertain Futures	275
8.6.2	Ethical Vision Assessment	277
8.6.3	Ethical Reflection in Technology Foresight	279
8.6.4	Concomitant Ethical Reflection on Nanotechnology	280
	References	282
<b>9</b>	<b>Outlook and Consequences</b>	<b>287</b>
	<i>Günter Schmid</i>	
	References	288
