Preface *XI*

List of Contributors *XIII*

1	Asymmetric Synthesis of Chiral Sulfoxides	1
	<i>Henri B. Kagan</i>	
1.1	Chiral Sulfoxides	1
1.1.1	Introduction	1
1.1.2	The Main Routes to Chiral Sulfoxides	2
1.2	Use of Chiral Sulfur Precursors	3
1.2.1	Sulfinates (Andersen Method)	3
1.2.2	Diastereoselective Formation of Sulfinates	5
1.2.3	Sulfinates from Sulfites	7
1.2.4	Sulfinamides	9
1.3	Catalytic Enantioselective Sulfide Oxidation	12
1.3.1	Titanium Complexes	12
1.3.1.1	Diesters of Tartaric Acid	12
1.3.1.2	C ₂ -Symmetric 1,2-Diols as Ligands	14
1.3.1.3	Binaphthol and Derivatives	15
1.3.1.4	C ₃ -Symmetric Triethanolamine Ligands	15
1.3.1.5	Ti (Salen) Catalysts	16
1.3.2	Manganese Complexes	17
1.3.3	Vanadium Complexes	18
1.3.4	Molybdenum Complexes	19
1.3.5	Iron Complexes	19
1.3.6	Miscellaneous	20
1.4	Catalytic Arylation of Sulfenate Anions	21
1.5	Enantioselective Oxidation of Sulfides	22
1.6	Summary	25
	References	26

2	Asymmetric Synthesis of Optically Active Sulfinic Acid Esters	31
	<i>Józef Drabowicz, Piotr Kielbasiński, Dorota Krasowska, and Marian Mikołajczyk</i>	
2.1	Introduction	31
2.2	Enantiomeric Sulfinic Acid Esters	32
2.3	Diastereomeric Sulfinic Acid Esters	40
	References	53
3	Asymmetric Transformations Mediated by Sulfinyl Groups	55
	<i>José L. García Ruano, José Alemán, M. Belén Cid, M. Ángeles Fernández-Ibáñez, M. Carmen Maestro, M. Rosario Martín, and Ana M. Martín-Castro</i>	
3.1	Introduction	55
3.2	Nucleophilic Additions to C=O and C=N Bonds Mediated by α -Sulfinyl Groups	57
3.2.1	β -Ketosulfoxides	57
3.2.1.1	Reduction Reactions	57
3.2.1.2	Alkylation Reactions	70
3.2.1.3	Aldol Reaction with β -Ketosulfoxides Acting as Electrophiles	73
3.2.1.4	Hydrocyanation Reactions	76
3.2.2	β -Imino(enamino)sulfoxides	79
3.3	Conjugate Additions to α,β -Unsaturated Sulfoxides	83
3.3.1	Nucleophilic Additions	84
3.3.1.1	(<i>E</i>) and (<i>Z</i>)-2-Substituted Vinyl Sulfoxides	84
3.3.1.2	1-Substituted Vinyl Sulfoxides	88
3.3.2	Tandem Reactions	91
3.3.3	Radical Conjugate Additions and Other Reactions	95
3.4	Cycloadditions	96
3.4.1	Asymmetric Diels–Alder Reactions	96
3.4.1.1	Sulfinyl Dienophiles	96
3.4.1.2	Sulfinyl Dienes	107
3.4.2	Asymmetric Hetero Diels–Alder Reactions	109
3.4.3	Asymmetric 1,3-Dipolar Cycloadditions	111
3.4.3.1	Reactions with Nitrones	111
3.4.3.2	Reactions with Azomethine Ylides	115
3.4.3.3	Reactions with Nitrile Oxides	117
3.4.3.4	Reactions with Diazoalkanes	118
3.4.3.5	Reactions with Other Dipoles	121
3.4.4	Other Asymmetric Cycloadditions	122
3.5	Asymmetric Processes Stereocontrolled by Remote Sulfoxides	123
3.5.1	Nucleophilic Processes	123
3.5.1.1	Reactions with Sulfinylated Electrophiles	123
3.5.1.2	Reactions with Sulfinylated Nucleophiles	130
3.6	Asymmetric Pummerer Reaction	136
	References	142

4 Synthesis and Applications of Chiral Dithioacetal Derivatives 161*Philip C. Bulman Page and Benjamin R. Buckley*

- 4.1 Introduction 161
- 4.2 Lithiated Dithianes 162
- 4.3 Alternative Methods 169
- 4.4 Oxidation Methods for the Construction of Chiral Dithioacetal Derivatives and Applications in Synthesis 171
- 4.5 Applications of Chiral Dithioacetal Derivatives in Natural Product and Biologically Active Compound Synthesis 176
- 4.6 Summary 177
- References 177

5 Synthesis and Use of Chiral Sulfur Ylides 179*Jean-François Brière and Patrick Metzner*

- 5.1 Introduction 179
- 5.1.1 Reactions of Sulfonium Ylides 179
- 5.1.2 Methods of Preparation 180
- 5.1.3 Conditions for Stereocontrol and Theoretical Investigations 182
- 5.2 Epoxidation Reaction 183
- 5.2.1 Stoichiometric Use of Sulfides 183
- 5.2.1.1 Stilbene Oxides 183
- 5.2.1.2 Unsaturated Epoxides 186
- 5.2.1.3 Aliphatic Epoxides 186
- 5.2.1.4 Terminal Epoxides 187
- 5.2.1.5 Functional Epoxides 187
- 5.2.2 Catalytic Use of Sulfides 188
- 5.3 Aziridination 189
- 5.3.1 Stoichiometric Aziridination, and Mechanism 190
- 5.3.2 Catalytic Aziridination 192
- 5.4 Cyclopropanation 194
- 5.4.1 Stoichiometric Cyclopropanation 195
- 5.4.2 Catalytic Cyclopropanation 197
- 5.5 [2,3]-Sigmatropic Rearrangement 199
- 5.6 Other Reactions 203
- 5.7 Conclusions 204
- References 204

6 Synthesis and Use of Chiral Sulfoximines 209*Christin Worch, Agathe Christine Mayer, and Carsten Bolm*

- 6.1 Introduction 209
- 6.2 Synthesis and Structural Modification 211
- 6.3 Applications in Asymmetric Synthesis 213
- 6.3.1 Use of Sulfoximines as Chiral Auxiliaries 214

6.3.2 Use of Sulfoximines as Chiral Ligands 224

6.4 Conclusions 229

References 229

7 Synthesis and Use of Chiral Sulfinamides 233

Chris H. Senanayake, Zhengxu Han, and Dhileepkumar Krishnamurthy

7.1 Introduction 233

7.2 Synthesis of Chiral Sulfinamides and Chiral Sulfinylimines 234

7.2.1 Background 234

7.2.2 Synthesis of Chiral Sulfinamides 235

7.2.3 Synthesis of Chiral Sulfinylimines 240

7.3 Use of Chiral Sulfinamides 241

7.3.1 Use as Chiral Sulfinyl Auxiliaries 241

7.3.2 Synthesis of Chiral Amines 241

7.3.3 Synthesis of Aziridines 249

7.3.4 Use of Chiral Sulfinamides as Ligands in Catalytic Asymmetric Reactions 252

7.3.4.1 Asymmetric Diels–Alder Reaction 252

7.3.4.2 Asymmetric Allylic Alkylation Reaction 254

7.3.4.3 Asymmetric Hydrogenation of Olefins 255

7.3.5 Application of Chiral Sulfinamides in the Synthesis of Biologically Active Molecules 256

7.3.5.1 Synthesis of SC-53116 256

7.3.5.2 Total Synthesis of (6*R*,7*S*)-7-Amino-7,8-Dihydro- α -Bisabolene 257

7.3.5.3 Asymmetric Synthesis of (–)-Pateamine 258

7.3.5.4 Synthesis of Polyoxamic Acid Lactone 259

7.3.5.5 Synthesis of Single Enantiomers of Sibutramine and Cetirizine 259

7.4 Summary 261

References 262

8 Asymmetric Catalysis Using Sulfoxides as Ligands 265

Inmaculada Fernández and Noureddine Khier

8.1 Introduction 265

8.2 Some Considerations on the Coordination of Sulfoxides 266

8.3 Sulfoxides as Ligands in Metal-Catalyzed Asymmetric Catalysis 267

8.3.1 Catalytic Hydrogenations 267

8.3.2 Catalytic Cycloadditions 270

8.3.3 Addition of Diethylzinc to Benzaldehyde 272

8.3.4 Catalytic Allylic Substitutions 273

8.3.5 Utilization of Sulfoxides in Other Metal-Catalyzed Asymmetric Processes 279

8.3.5.1 Use of Sulfoxides in Lewis Acid–Lewis Base Bifunctional Asymmetric Catalysis 279

- 8.3.5.2 Use of Sulfoxides as Chiral Ligands in Combination with Achiral Catalysts 281
- 8.3.5.3 Use of Sulfoxides as Ligands in Enantioselective Radical Allylation 283
- 8.3.6 Use of Sulfoxides as Neutral Coordinate-Organocatalysts 284
- 8.4 Conclusions 287
- References 288

9 **Sulfones in Asymmetric Catalysis** 291

Juan Carlos Carretero, Ramón Gómez Arrayás, and Javier Adrio

- 9.1 Introduction 291
- 9.2 Alkenyl Sulfones in Asymmetric Catalysis 292
 - 9.2.1 Asymmetric Catalytic Conjugate Addition 292
 - 9.2.2 Asymmetric Catalytic Conjugate Reduction 297
 - 9.2.3 Asymmetric Catalytic Radical Addition 298
 - 9.2.4 Asymmetric Catalytic Cycloadditions 300
 - 9.2.5 Asymmetric Catalytic Dihydroxylation and Epoxidation Reactions 301
- 9.3 Ketosulfones 305
 - 9.3.1 Asymmetric Reduction of Ketosulfones 305
 - 9.3.2 Diels–Alder Reactions 308
 - 9.3.3 Michael–Aldol Reactions 309
- 9.4 α -Diazo- β -Ketosulfones 311
- 9.5 Miscellaneous: Other Substituted Sulfones 314
- 9.6 Summary 315
- References 317

10 **Asymmetric Reaction of α -Sulfenyl Carbanions** 321

Shuichi Nakamura and Takeshi Toru

- 10.1 Asymmetric Reactions of α -Sulfenyl Carbanions 321
 - 10.1.1 Introduction 321
- 10.2 Racemization Mechanism and Configurational Stability of α -Sulfenyl Carbanions 323
- 10.3 Diastereoselective Reaction of α -Sulfenyl Carbanions 326
- 10.4 Enantioselective Reaction of α -Sulfenyl Carbanions 329
 - 10.4.1 Reaction Pathway of Enantioselective Reaction of α -Sulfenyl Carbanions 329
 - 10.4.2 Enantioselective Reactions of α -Sulfenyl Carbanions 332
 - 10.4.3 Enantioselective Reactions of α -Lithiated Dithioacetals 344
- 10.5 Conclusions 346
- References 347

11	Stereoselective Reactions with α-Sulfinyl Carbanions	351
	<i>Alessandro Volonterio and Matteo Zanda</i>	
11.1	Introduction	351
11.2	Stereochemistry of α -Sulfinyl Carbanions	352
11.3	Alkylation of α -Sulfinyl Carbanions	354
11.4	Conjugated Additions with α -Sulfinyl Carbanions	357
11.5	Additions of α -Sulfinyl Carbanions to Carbonyl Compounds	360
11.6	Additions of α -Sulfinyl Carbanions to Imines and Related Compounds	367
11.7	Conclusions	371
	References	372
12	Asymmetric Reactions of α-Sulfonyl Carbanions	375
	<i>Hans-Joachim Gais</i>	
12.1	Introduction	375
12.2	Configurationally Stable α -Sulfonyl Carbanions	380
12.3	Configurationally Labile α -Sulfonyl Carbanions	382
12.4	Configurationally Labile α -Sulfonyl Carbanions with an Additional Stereogenic Center	388
	References	396
13	Computational Studies on Asymmetric Reactions with Sulfur Reagents	399
	<i>David Balcells and Feliu Maseras</i>	
13.1	Introduction	399
13.2	Directing Effect of Chiral Sulfur Substituents	400
13.3	Sulfur Centers in Chiral Intermediates	403
13.4	Synthesis of Chiral Sulfoxides from Prochiral Sulfides	405
13.5	Synthesis of Chiral Sulfoxides from Racemic Precursors	409
13.6	Other Systems Involving Chiral Sulfur Centers	413
13.7	Conclusions and Perspectives	414
	References	415
	Index	417
