Contents

Preface *XV*
List of Contributors *XVII*

Part One Basic Methodology

1 Infrared and Raman Instrumentation for Mapping and Imaging *3*
Peter R. Griffiths
1.1 Introduction to Mapping and Imaging *3*
1.2 Mid-Infrared Microspectroscopy and Mapping *5*
1.2.1 Microscopes and Sampling Techniques *5*
1.2.2 Detectors for Mid-Infrared Microspectroscopy *9*
1.2.3 Sources for Mid-Infrared Microspectroscopy *12*
1.2.4 Spatial Resolution *15*
1.2.5 Transmission Microspectroscopy *20*
1.2.6 Attenuated Total Reflection Microspectroscopy *21*
1.3 Raman Microspectroscopy and Mapping *24*
1.3.1 Introduction to Raman Microspectroscopy *24*
1.3.2 CCD Detectors *29*
1.3.3 Spatial Resolution *31*
1.3.4 Tip-Enhanced Raman Spectroscopy *33*
1.4 Near-Infrared Hyperspectral Imaging *36*
1.5 Raman Hyperspectral Imaging *41*
1.6 Mid-Infrared Hyperspectral Imaging *45*
1.6.1 Spectrometers Based on Two-Dimensional Array Detectors *45*
1.6.2 Spectrometers Based on Hybrid Linear Array Detectors *50*
1.6.3 Sampling *52*
1.7 Mapping with Pulsed Terahertz Radiation *56*
1.8 Summary *60*
Acknowledgments *62*
References *62*

Infrared and Raman Spectroscopic Imaging. Edited by Reiner Salzer and Heinz W. Siesler

2 Chemometric Tools for Image Analysis *65*
Anna de Juan, Marcel Maeder, Thomas Hancewicz, Ludovic Duponchel, and Romà Tauler
2.1 Introduction *65*
2.2 Hyperspectral Images: The Measurement *66*
2.2.1 The Data Set and the Underlying Model *66*
2.3 Image Preprocessing *68*
2.3.1 Signal Preprocessing *69*
2.3.1.1 De-noising *69*
2.3.1.2 Baseline Correction *69*
2.3.1.3 Detection and Suppression of Anomalous Pixels or Anomalous Spectral Readings *70*
2.3.2 Data Pretreatments *70*
2.3.3 Image Compression *71*
2.4 Exploratory Image Analysis *72*
2.4.1 Classical Image Representations *72*
2.4.2 Multivariate Image Analysis (MIA) and Principal Component Analysis (PCA) *72*
2.5 Quantitative Image Information: Multivariate Image Regression (MIR) *77*
2.6 Image Segmentation *80*
2.6.1 Unsupervised and Supervised Segmentation Methods *80*
2.6.2 Hard and Fuzzy Segmentation Approaches *83*
2.7 Image Resolution *84*
2.7.1 The Image Resolution Concept: Monolayer and Multilayer Image Analysis *84*
2.7.2 Spatial and Spectral Exploration *85*
2.7.3 The Resolution Process: Initial Estimates and Constraints *89*
2.7.4 Resolution on Compressed Images *95*
2.7.5 Resolution and Available Library Spectra *97*
2.7.6 Multilayer and Multi-Image Resolution *100*
References *106*

Part Two Biomedical Applications

3 Vibrational Spectroscopic Imaging of Soft Tissue *113*
Christoph Krafft
3.1 Introduction *113*
3.1.1 Epithelium *114*
3.1.2 Connective Tissue and Extracellular Matrix *115*
3.1.3 Muscle Tissue *116*
3.1.4 Nervous Tissue *117*
3.2 Preparation of Soft Tissue for Vibrational Spectroscopic Imaging *118*
3.2.1 General Preparation Strategies *118*
3.2.2 Vibrational Spectra of Reference Materials *119*

3.2.3 Preparation for FT-IR Imaging *121*
3.2.4 Preparation for Raman Imaging *123*
3.3 Applications to Soft Tissues *124*
3.3.1 Colon Tissue *124*
3.3.2 Brain Tissue and Brain Tumors *128*
3.3.2.1 Whole Mouse Brains *129*
3.3.2.2 Primary Brain Tumors *131*
3.3.2.3 Secondary Brain Tumors *133*
3.3.3 Cervix Uteri and Squamous Cell Carcinoma *135*
3.3.4 Skin *139*
3.3.4.1 Corneocyte Biology *139*
3.3.4.2 Pharmacology *140*
3.3.4.3 Disease and Cancer Diagnosis *140*
3.3.4.4 Raman Systems for Skin Studies *141*
3.3.5 Ocular Tissue *141*
3.3.5.1 Macular Degeneration of the Retina *142*
3.3.5.2 Chemical Composition of the Vitreous and the Lens *142*
3.4 Conclusions *142*
References *143*

4 Vibrational Spectroscopic Imaging of Hard Tissues *149*
Michael D. Morris, Matthew V. Schulmerich, Kathryn A. Dooley, and Karen A. Esmonde-White
4.1 Infrared and Raman Spectroscopy of Bone *149*
4.2 Infrared and Raman Imaging of Bone *150*
4.2.1 Introduction *150*
4.2.2 Imaging of Normal, Healthy Mineralized Tissue as a Function of Age *151*
4.2.3 Adaptation of Bone Induced by Genetic Modifications *154*
4.2.4 Adaptation of Bone in Response to External Stress *156*
4.2.5 Adaptation of Bone in Response to Osteoporosis *159*
4.3 Infrared and Raman Spectroscopy of Cartilage *162*
4.4 Infrared and Raman Imaging of Cartilage *164*
4.4.1 Unmineralized Cartilage Tissue *164*
4.4.2 Mineralized Cartilage and Subchondral Bone *165*
4.4.3 Applications in Tissue Engineering *166*
4.5 Conclusions *167*
References *168*

5 Infrared and Raman Spectroscopy and Spectral Imaging of Individual Cells *173*
Max Diem, Christian Matthäus, Tatyana Chernenko, Melissa J. Romeo, Miloš Miljković, Benjamin Bird, Jennifer Schubert, Kostas Papamarkakis, and Nora Laver
5.1 Introduction *173*

5.2 Methods *175*
5.2.1 Cell Collection and Culturing Methods *175*
5.2.1.1 Exfoliated Cells *175*
5.2.1.2 Cultured Cells *176*
5.2.2 Sample Preparation *177*
5.2.2.1 Sample Substrates *177*
5.2.2.2 Fixation *177*
5.2.2.3 Sample Deposition *177*
5.2.3 Data Acquisition *178*
5.2.3.1 Raman Spectroscopy and Raman Spectral Mapping *178*
5.2.3.2 Infrared Instrumentation *179*
5.2.4 Methods of Data Analysis *179*
5.2.4.1 Data Pre-Processing *179*
5.2.4.2 Principal Component Analysis (PCA) *180*
5.2.4.3 Hierarchical Cluster Analysis (HCA) *181*
5.3 Results and Discussion *182*
5.3.1 General Features of Infrared and Raman Spectra of Cells *182*
5.3.2 Infrared Cytology *184*
5.3.2.1 Oral Mucosa Cells *184*
5.3.2.2 Human Urine-Borne Cells *185*
5.3.2.3 Human and Canine Cervical Cells *188*
5.3.3 Results from Confocal Raman Microspectroscopy of Human Cells *192*
5.3.3.1 Morphology and Subcellular Organization of Cells *192*
5.3.3.2 Visualization of Mitosis *196*
5.3.3.3 Liposome Uptake into Cells *196*
5.4 Conclusions *199*
Acknowledgments *199*
References *199*

6 3-D Imaging of Biomedical Samples *203*
Don McNaughton, Bayden R. Wood, Timothy C. Cox, Jörg-Detlef Drenckhahn, and Keith R. Bambery
6.1 Introduction *203*
6.2 Methodologies *204*
6.2.1 Sample Preparation and Spectroscopy *204*
6.2.2 Univariate and Multivariate Image Construction *205*
6.2.3 Artificial Neural Network Image Construction *208*
6.3 Resultant 3-D Images *209*
6.3.1 Chemimage and UHCA Stack Plots *209*
6.3.2 3-D Chemimage and UHCA Images *210*
6.3.2.1 Cervical Adenocarcinoma *210*
6.3.2.2 Adult Mouse Heart *215*
6.3.2.3 3-D ANN Images *217*
6.4 Conclusions *219*

Acknowledgments *220*
References *220*

Part Three Agricultural Applications

7 FT-IR Microspectroscopic Imaging of Plant Material *225*
David L. Wetzel
7.1 Introduction, Background and Perspective *225*
7.1.1 Early Technology *225*
7.1.2 Optical Advances *226*
7.1.3 Early Imaging Applications *227*
7.1.4 Spatial Resolution *228*
7.2 Application of IMS to Kernels and Seeds of Plants *230*
7.2.1 Motive and First Applications of Spatially Resolved IMS *230*
7.2.2 Mapping Tissue Sections *231*
7.2.3 Transitions across Botanical Parts *232*
7.2.4 Imaging Single Cells *234*
7.2.5 Applying Synchrotron IMS to Kernels, Seeds and Other Tissues *237*
7.2.6 Various Applications of IMS *240*
7.2.7 Wheat Quality via IMS and Germination Study *241*
7.2.8 Desiccation Study *243*
7.3 Leaves *244*
7.4 Application of IMS to Stems and Cellulose Polymers *247*
7.4.1 Structure and Lignification *247*
7.4.2 Application of Polarized IMS *248*
7.4.3 Alteration of Cell Wall Architecture *248*
7.4.4 Flax Fibers *250*
7.4.5 Biopolymer Structure *251*
7.4.6 Cell Wall Alterations via Mutations *252*
7.4.7 Cell Wall Heterogeneity *253*
7.4.8 Esters in Cell Walls *253*
7.5 Algae *254*
7.6 Comments *254*
Acknowledgments *254*
References *255*

8 Near-Infrared Hyperspectral Imaging in Food and Agricultural Science *259*
Véronique Bellon-Maurel and Janie Dubois
8.1 Introduction *259*
8.1.1 A Brief History of Near-Infrared Spectral Imagers *259*
8.1.2 When Should NIR Hyperspectral Imaging be Used in Food and Agricultural Products? *260*
8.2 At the Laboratory Scale *261*

8.2.1 Factors to Consider in the Development of NIR Chemical Imaging Methods *262*
8.2.2 The Many Interests of Corn from a NIR Imaging Perspective *263*
8.2.3 Can NIR Chemical Imaging Replace Traditional Wet Chemistry? *266*
8.2.4 Interest of NIR Chemical Imaging in Plant Breeding and GMOs *267*
8.2.5 Interest of NIR Chemical Imaging in Animal Feed *269*
8.2.6 A Quick Look at Other Products *270*
8.2.7 Conclusion: Laboratory-Based NIR Imaging *271*
8.3 At the Industrial Scale *271*
8.3.1 Introduction *271*
8.3.1.1 The Failure of RGB Systems in Food Quality Control *271*
8.3.1.2 How Did We Come to On-Line NIR Imaging? *272*
8.3.1.3 When Is NIR Imaging Worth Using in On-Line Settings? *274*
8.3.2 External Contamination Detection by NIR Imaging *275*
8.3.2.1 Foreign Bodies *275*
8.3.2.2 Surface Liquid Contaminations *277*
8.3.3 Surface and Subsurface Nonconformities *279*
8.3.3.1 Human-Detectable Defects *280*
8.3.3.2 Potential Defects: Chilling Injuries, Potential Greening Area *281*
8.3.4 Detection of Internal Defects by Candling *282*
8.3.4.1 Internal Foreign Bodies *282*
8.3.4.2 Internal Tissue Defects *283*
8.3.5 Measuring Internal Quality Traits *284*
8.3.6 Chemical Imaging Analysis of Heterogeneous Products and Heterogeneous Product Streams *285*
8.3.6.1 Gradual Chemical Changes: Mapping the Chemistry of a Sample *285*
8.3.6.2 Targeted Chemical Composition Analysis *287*
8.3.7 Conclusion: On-Line Applications *288*
8.4 General Conclusions *289*
8.4.1 Hardware Development *289*
8.4.2 Data Processing *290*
8.4.3 Calibration and Characterization of NIR Imaging Systems *290*
8.4.4 Concluding Remarks *292*
References *292*

Part Four Polymers and Pharmaceuticals

9 FT-IR and NIR Spectroscopic Imaging: Principles, Practical Aspects and Applications in Material and Pharmaceutical Sciences *297*
Elke Wessel, Christian Vogel, Olga Kolomiets, Uwe Hoffmann, and Heinz W. Siesler
9.1 Introduction *297*
9.2 Instrumentation for FT-IR and NIR Imaging *299*
9.2.1 NIR Imaging *300*
9.2.2 FT-IR Imaging *302*

9.2.2.1 Micro FT-IR Imaging *303*
9.2.2.2 Macro FT-IR Imaging *304*
9.2.2.3 Measurement of an FT-IR Image *305*
9.2.2.4 Observation of a Penetration Depth Gradient in ATR FT-IR Spectroscopic Imaging Applications *306*
9.2.2.5 Influence of Pressure on ATR FT-IR Imaging Results *310*
9.2.2.6 Spatial Resolution of Micro FT-IR Imaging Measurements *312*
9.3 Applications of FT-IR Imaging for Polymer Research and Quality Control *318*
9.3.1 Investigation of Phase Separation in Biopolymer Blends *318*
9.3.2 Imaging Anisotropic Materials with Polarized Radiation *321*
9.3.2.1 Blends of PHB and PLA *321*
9.3.2.2 Stress-Induced Phase Transformation in Poly(vinylidene fluoride) *324*
9.3.3 Diffusion of D_2O into Polyamide 11 *327*
9.3.3.1 Experimental *328*
9.3.3.2 Results and Discussion *329*
9.3.4 Conclusions *334*
9.4 NIR Imaging Spectroscopy for Quality Control of Pharmaceutical Drug Formulations *335*
9.4.1 Quantitative Determination of Active Ingredients in a Pharmaceutical Drug Formulation *335*
9.4.2 Spatial Distribution of the Active Ingredients in a Pharmaceutical Drug Formulation *340*
9.4.3 Conclusions *343*
References *343*

10 ATR-FT-IR Imaging for Pharmaceutical and Polymeric Materials: From Micro to Macro Approaches *347*
Sergei G. Kazarian, K. L. Andrew Chan, and Feng H. Tay
10.1 Introduction *347*
10.2 The Versatility of ATR-FT-IR Imaging *349*
10.2.1 Micro ATR Imaging *351*
10.2.2 ATR-FT-IR Imaging with a Diamond Accessory *352*
10.2.2.1 Comparison of 'New' and 'Old' Diamond ATR Accessories *353*
10.2.3 ATR-FT-IR Imaging with an Expanded Field of View *354*
10.2.4 ATR-FT-IR Imaging with Variable Angle of Incidence *355*
10.2.5 Quantitative ATR-FT-IR Imaging *356*
10.3 Applications of ATR-FT-IR Imaging in the Materials Sciences *358*
10.3.1 Study of the Polymer/Carbon Fiber Interface *358*
10.3.2 Polystyrene, Polyethylene Blend: The Effect of a Compatibilizer *361*
10.4 Applications of ATR-FT-IR Imaging in the Pharmaceutical Sciences *361*
10.4.1 Imaging of Compacted Tablets *361*
10.4.2 ATR-FT-IR Imaging of Tablet Dissolution *364*
10.4.3 High-Throughput Studies with ATR-FT-IR Imaging *367*

10.5 ATR-FT-IR Imaging for Forensic Applications *370*
10.5.1 Detection of Trace Materials *370*
10.5.2 Imaging of Counterfeit Tablets *372*
10.6 Conclusions and Outlook *372*
References 373

11 Raman Spectral Imaging on Pharmaceutical Products *377*
Eunah Lee
11.1 Overview *377*
11.2 Hyperspectral Imaging *378*
11.2.1 Terminologies *378*
11.2.2 Advantages *378*
11.2.3 Spectra versus Image *379*
11.2.3.1 Spectral Intensity and Speed *379*
11.2.3.2 SNR and Image Quality *380*
11.2.3.3 Spectral Resolution and Detection Limit *382*
11.2.3.4 Instrumentation *383*
11.2.4 An Example of Raman Hyperspectral Imaging Analysis: I *383*
11.3 Empirical Approach to Successful Raman Hyperspectral Imaging *383*
11.3.1 Spectroscopy *383*
11.3.2 Mapping *386*
11.3.3 Data Analysis: Spectroscopy *388*
11.3.3.1 Unsupervised Analysis *388*
11.3.3.2 Supervised Analysis *392*
11.3.4 Data Analysis: Raman Images *393*
11.3.4.1 Statistical Analysis *393*
11.3.4.2 Morphological Analysis *394*
11.3.5 An Example of Raman Hyperspectral Imaging Analysis: II *396*
11.4 Raman in Multimodal Hyperspectral Imaging *397*
11.5 Conclusions *400*
Acknowledgments *401*
References *402*

Part Five Developments in Methodology

12 Deep, Noninvasive Raman Spectroscopy of Diffusely Scattering Media *405*
Pavel Matousek
12.1 Introduction *405*
12.2 Techniques for Deep, Noninvasive Raman Spectroscopy *406*
12.2.1 Temporal Methods: Ultrafast Gating *406*
12.2.2 Spatial Methods: Spatially Offset Raman Spectroscopy (SORS) *407*
12.2.3 Inverse SORS *410*
12.2.4 Transmission Raman Spectroscopy *411*

12.2.5 Raman Signal Enhancement Using a Bandpass Filter *412*
12.3 Examples of Application Areas *414*
12.3.1 Probing of Bones through Skin for Disease Diagnosis *414*
12.3.2 Chemical Identification of Calcifications in Breast Cancer Lesions *416*
12.3.3 Probing of Pharmaceutical Tablets in Quality Control *419*
12.3.4 Probing of Pharmaceutical Capsules in Quality Control *421*
12.3.5 Noninvasive Detection of Counterfeit Drugs *421*
12.4 Outlook on Raman Tomography *424*
12.5 Conclusions *424*
Acknowledgments *424*
References *425*

13 Planar Array Infrared Spectroscopy and 1-D Imaging *427*
Christian Pellerin
13.1 Introduction *427*
13.2 Concept and Instrumentation *427*
13.3 PA-IR Spectroscopy *430*
13.4 Applications *434*
13.4.1 Ultrathin Films *434*
13.4.2 Time-Resolved Studies *437*
13.4.3 Dynamic IR Linear Dichroism *442*
13.4.4 Emission PA-IR Imaging *444*
13.4.5 PA-IR Microscopy *447*
13.5 Conclusions *448*
References *448*

14 Biomedical Applications of Infrared Microspectroscopy Using Synchrotron Radiation *451*
Lisa M. Miller
14.1 Introduction *451*
14.2 Spatial Resolution Considerations *452*
14.3 Advantages of a Synchrotron IR Source *454*
14.4 Instrumentation *455*
14.4.1 Infrared Beamlines *455*
14.4.2 Synchrotron Infrared Microscopes *457*
14.4.3 Infrared Detectors *458*
14.5 Biological Sample Preparation and Modes of Data Collection *458*
14.5.1 Transmission Mode *459*
14.5.2 Reflection Mode *459*
14.6 Biological and Medical Applications of Synchrotron IR Microspectroscopy *461*
14.7 Future Directions for Synchrotron IR Microspectroscopy *466*
Acknowledgments *468*
Abbreviations *468*
References *468*

15 Spectroscopic Imaging with Nanometer Resolution Using Near-Field Methods *473*
Boon-Siang Yeo, Thomas Schmid, Weihua Zhang, and Renato Zenobi
15.1 Introduction *473*
15.2 Methods *474*
15.2.1 Scanning Near-Field Optical Microscopy with Aperture Probes *474*
15.2.2 Tip-Enhanced Raman Spectroscopy *475*
15.2.3 Scattering SNOM *478*
15.2.4 Comparison of the Near-Field Spectroscopic Methods *479*
15.2.5 Imaging *479*
15.3 Applications *480*
15.3.1 Carbon Nanotubes *480*
15.3.2 Semiconductors *481*
15.3.3 Polymers and Other Materials *484*
15.3.4 Biological Applications – I: IR a-SNOM of Fibroblasts *486*
15.3.5 Biological Applications – II: DNA *488*
15.3.6 Biological Applications – III: AFMIR of Escherichia coli *489*
15.3.7 Biological Applications – IV: Towards Full Spectroscopic Imaging *491*
15.4 Current Challenges *494*
15.4.1 Performance of the Tips *494*
15.4.2 TERS Signal Modulation by Surface Roughness *494*
15.4.3 Tip Contamination, Analyte Dissociation and 'Blinking' *495*
15.5 Summary and Outlook *496*
Acknowledgments *497*
References *497*

Index *501*
