Preface *XI*

List of Contributors *XIII*

1	Organometallic Polycondensation for Conjugated Polymers	1
	<i>Takakazu Yamamoto</i>	
1.1	Basic Organometallic C–C Coupling	1
1.2	Syntheses of π -Conjugated Polymers	4
1.3	Optical Properties	12
1.3.1	UV–Vis Data	12
1.3.2	Photoluminescence	14
1.3.3	Other Optical Properties	16
1.4	Redox Behavior and Electrical Conductivity	16
1.5	Linear Structure and Alignment on the Surface of Substrates	19
1.6	Stacking in the Solid and Colloid	21
1.7	Chemical Reactivity and Catalysis	22
1.7.1	Metal Complexes and Modification of Nitrogen	22
1.8	Electronic and Optical Devices (ECD, Battery, EL, Diode, Transistor, Nonlinear Optical Device, etc.)	24
1.8.1	Redox Functions	24
1.8.2	Electronic and Optical Devices	25
1.9	Conclusions	25
	References	26
2	Catalyst-Transfer Condensation Polymerization for Precision Synthesis of π-Conjugated Polymers	35
	<i>Tsutomu Yokozawa</i>	
2.1	Introduction	35
2.2	Kumada–Tamao Coupling Polymerization with Ni Catalyst	36

2.2.1	Polythiophene	36
2.2.1.1	Discovery and Mechanism of Catalyst-Transfer Condensation Polymerization	36
2.2.1.2	A Variety of Monomers	39
2.2.1.3	Block Polythiophenes	40
2.2.1.4	Block Copolymers of Polythiophene and Other Polymers	42
2.2.1.5	Graft Copolymers	45
2.2.2	Polyphenylenes	48
2.2.3	Polypyrroles	50
2.2.4	Polyfluorenes and Polycarbazoles	51
2.3	Suzuki–Miyaura Coupling Polymerization with Pd Catalyst	53
2.3.1	Polyfluorenes	53
2.3.2	Polyphenylenes	54
2.4	Conclusion	55
	References	55
3	Regioregular and Regiosymmetric Polythiophenes	59
	<i>Itaru Osaka and Richard D. McCullough</i>	
3.1	Introduction	59
3.2	Synthesis of Polythiophene and Regioirregular Polythiophenes	59
3.3	Head-to-Tail Coupled Regioregular Poly(3-Alkylthiophene)s	61
3.3.1	Design and Synthesis of rrP3ATs	61
3.3.1.1	McCullough Method	62
3.3.1.2	Rieke Method	64
3.3.1.3	GRIM Method	64
3.3.1.4	Palladium-Catalyzed Polymerization Methods	64
3.3.2	Mechanism of the Nickel-Catalyzed Polymerization	65
3.4	Side Chain Functionalized HT Regioregular Polythiophenes	66
3.4.1	Heteroatom-Containing Groups	68
3.4.2	Aromatic-Containing Group	69
3.4.3	Chiral Groups	69
3.4.4	γ -Functionalized Groups	70
3.5	End Group Functionalized HT Regioregular Polythiophenes	70
3.5.1	Postpolymerization End Group Functionalization	70
3.5.2	<i>In Situ</i> End Group Functionalization	71
3.6	Block Copolymers Derived from HT Regioregular Polythiophenes	72
3.6.1	All-Conjugated Block Copolymers	73
3.6.2	Conjugated–Non-Conjugated Block Copolymers	76
3.7	Universal Use of the GRIM Method	80
3.8	Regiosymmetric Polythiophenes	85
3.9	Summary	86
	References	87

4 Functional Hyperbranched Polymers Constructed from Acetylenic**A_n-Type Building Blocks 91***Jianzhao Liu, Jacky W.Y. Lam, and Ben Zhong Tang*

- 4.1 Introduction 91
- 4.2 Hyperbranched Polymers Constructed from Acetylenic A_n-Type Building Blocks 94
 - 4.2.1 Hyperbranched Poly(Alkylphenylene)s (*hb*-PAPs) 94
 - 4.2.1.1 Synthesis 94
 - 4.2.1.2 Structures 96
 - 4.2.1.3 Properties 98
 - 4.2.2 Hyperbranched Poly(Arylenephenylene)s (*hb*-PArPs) 100
 - 4.2.2.1 Synthesis 100
 - 4.2.2.2 Structures 102
 - 4.2.2.3 Properties 103
 - 4.2.3 Hyperbranched Poly(Aroylphenylene)s (*hb*-PAkPs) and Poly(Aroxycarbonylphenylene)s (*hb*-PAePs) 106
 - 4.2.3.1 Synthesis 108
 - 4.2.3.2 Structures 110
 - 4.2.3.3 Properties 112
 - 4.2.4 Hyperbranched Polytriazoles (*hb*-PTAs) 114
 - 4.2.4.1 Synthesis 114
 - 4.2.4.2 Structures 115
 - 4.2.4.3 Properties 116
 - 4.2.5 Hyperbranched Poly(Aryleneethynylene)s (*hb*-PAEs) 117
 - 4.2.5.1 Synthesis 117
 - 4.2.5.2 Properties 117
 - 4.2.6 Hyperbranched Polydiynes (*hb*-PDYs) 119
 - 4.2.6.1 Synthesis 119
 - 4.2.6.2 Thermal Curing 121
 - 4.2.6.3 Micropattern Formation 122
 - 4.2.6.4 Metal Complexation 123
 - 4.2.6.5 Magnetic Ceramization 125
- 4.3 Conclusions 127
- References 128

5 Through-Space Conjugated Polymers 133*Yasuhiro Morisaki and Yoshiki Chujo*

- 5.1 Introduction 133
- 5.2 Through-Space Conjugated Polymers with the Layered π -Electron Systems in the Side Chain 134
 - 5.2.1 Polyacenaphthylene 134
 - 5.2.2 Polydibenzofulvene 134
 - 5.2.3 Polybenzofulvene 135
 - 5.2.4 Polystyrene-graft-Poly(4-Phenylquinoline) 137
 - 5.2.5 [3.2]Paracyclophane-Containing Polymer 138

5.2.6	Polymethylene with [2.2]Paracyclophane	139
5.3	Through-Space Conjugated Polymers with the Layered π -Electron Systems in the Main Chain	143
5.3.1	Phenylene-Layered Polymer Based on a Norbornane Scaffold	143
5.3.2	Aromatic Ring-Layered Polymers Based on a Xanthene Scaffold	144
5.3.2.1	[2.2]Paracyclophane-Layered Polymer	144
5.3.2.2	Oligophenylene-Layered Polymers	148
5.3.2.3	Ferrocene-Layered Polymers Based on a Naphthalene Scaffold	148
5.3.3	Cyclophane-Containing Through-Space Conjugated Polymers	149
5.3.3.1	[2.2]Metacyclophane-Containing Through-Space Conjugated Polymers	149
5.3.3.2	[2.2]Paracyclophane-Containing Through-Space Conjugated Polymers	151
5.4	Conclusion	159
	References	160
6	Fully Conjugated Nano-Sized Macrocycles: Syntheses and Versatile Properties	165
	<i>Masayoshi Takase and Masahiko Iyoda</i>	
6.1	Introduction	165
6.2	Synthesis of π -Conjugated Macrocycles	166
6.2.1	One-Pot Synthesis of Phenylacetylene Macrocycles	166
6.2.2	Template Synthesis of Macrocycles	170
6.2.3	Synthesis of Conjugated Thiophene, Porphyrin, and Heteroarylene Macrocycles	170
6.3	Isolation and Self-Association in Solution and in the Solid State	183
6.4	Versatile Properties of Giant π -Conjugated Macrocycles	185
6.5	Conclusion	188
	References	190
7	Organoboron Conjugated Polymers	195
	<i>Atsushi Nagai and Yoshiki Chujo</i>	
7.1	Introduction	195
7.2	Tricoordinate Boron π -Conjugated Polymers	196
7.2.1	Hydroboration Polymerization of Diyne Monomers	196
7.2.2	Tin–Boron Exchange Polymerization of Bis(Trimethylsilyl) Monomer	198
7.2.3	Haloboration–Phenylboration Polymerization of Diyne Monomers	199
7.2.4	Polycondensation of Aryldimethoxyborane Using Grignard and Organolithium Reagents	199
7.2.5	Stepwise Reaction from Boraanthracene	200
7.3	Tetracoordinate Boron π -Conjugated Polymers	201
7.3.1	π -Conjugated Poly(Cyclodiborazane)s	201
7.3.2	Poly(Pyrazabole)s	203
7.3.3	π -Conjugated Organoboron Quinolate Polymers	204

7.3.4	π -Conjugated Organoboron Diketonate Polymer	206
7.3.5	π -Conjugated BODIPY-Based Polymers	207
7.4	π -Conjugated Carborane-Based Polymers	209
7.5	Conclusions	210
	References	211
8	Recent Developments in π-Conjugated Macromolecules with Phosphorus Atoms in the Main Chain	215
	<i>Paul W. Siu and Derek P. Gates</i>	
8.1	Introduction	215
8.2	Poly(Phosphole) and Related Polymers	215
8.3	Poly(<i>p</i> -Phenylenephosphine) and Related Polymers	221
8.4	Poly(Vinylenephosphine)s and Related Polymers	222
8.5	Poly(<i>p</i> -Phenylenephosphaalkene)s and Related Polymers	223
8.6	Poly(<i>p</i> -Phenylenediphosphene)s and Related Polymers	225
8.7	Summary	226
	References	226
9	Organo-Arsenic, Phosphorus, and Antimony Conjugated Polymers	229
	<i>Kensuke Naka and Yoshiki Chujo</i>	
9.1	Introduction	229
9.2	Survey of Group 15 Element-Containing Polymers	230
9.3	Carbon–Main Group Element Bond Formation Via Bismetallation	230
9.4	Homocyclic Compounds of Group 15 Elements	231
9.5	Poly(Vinylene-Arsine)s	234
9.6	Poly(Vinylene-Phosphine)s	237
9.7	Poly(Vinylene-Stibine)s	238
9.8	Periodic Terpolymerization of Cyclooligoarsine, Cyclooligostibine, and an Acetylenic Compound	239
9.9	Stability	240
9.10	Optical Properties	241
9.11	Coordination Ability of Poly(Vinylene-Arsine)s Towards Transition Metal Ions	242
9.12	Cross-Linked Poly(Vinylene-Arsine)s	244
9.13	Conclusion	246
	References	247
10	Synthetic Strategies to Conjugated Main-Chain Metallopolymers	251
	<i>Andreas Wild, Andreas Winter, Martin D. Hager, and Ulrich S. Schubert</i>	
10.1	Introduction	251
10.2	π -Conjugated Polymers with Terpyridine Units and Other Tridentate Ligands as Part of the Main Chain	254
10.3	π -Conjugated Polymers with Porphyrin Units as Part of the Main Chain	259
10.4	Rigid-Rod Polymetallaynes	268

10.5	Conclusion and Outlook	273
	References	274
11	Helical Polyacetylene Prepared in a Liquid Crystal Field	289
	<i>Kazuo Akagi</i>	
11.1	Introduction	289
11.2	Chiral Dopants and Chiral Nematic LCs	290
11.3	Acetylene Polymerization in Chiral Nematic LC	292
11.4	Characterization of Helical Polyacetylene Film	293
11.5	Summary	298
	References	299
	Index	303
