	Introduction and Preface XIII					
	List of Contributors XVII					
	Abbreviations XXI					
	List of Boxes and Definitions XXXI					
1	Yeast-Based Chemical Genomic Approaches 1					
•	Katja Hübel					
1.1	Introduction 1					
1.2	The Biological Problem 1					
1.2.1	Interplay between Organic Chemistry and Biology 1					
1.2.2						
1.2.3	Small Molecules in Chemical Genomics 6					
1.2.4	Cell-based Genomic Approaches 6					
1.2.5	Yeast-Based Chemical Genomic Approaches 7					
1.3	The Chemical Approach 11					
1.4	Chemical Biological Research/Evaluation-Chemogenomic Profiling:					
	Elucidating the Mode of Action of Small Molecules 12					
1.4.1	Assay Principle 12					
1.4.2	The Yeast Deletion Strain Collection 14					
1.4.2.1	Homozygous Deletion Strains 14					
1.4.2.2	Heterozygous Deletion Strains 14					
1.4.3	Advantages and Disadvantages 16					
1.4.4	Case Studies 16					
1.5	Conclusions 19					
	References 19					
2	Microarray-Based Strategies to Identify Unknown Protein					
	Interactions 21					
	Sabine Borgmann and Christof M. Niemeyer					
2.1	Introduction 21					
2.2	The Biological Problem 21					
2.3	The Chemical Approach 25					
2.3.1	Introduction to Microarray Technology 25					

Chemical Biology: Learning through Case Studies. Edited by H. Waldmann and P. Janning Copyright © 2009 WILEY-VCH Verlag GmbH & Co. KGaA, Weinheim ISBN: 978-3-527-32330-2
