Foreword XV

Preface XVII

About the Editors XIX

List of Contributors XXIII

Part I History and Treaties in CBRN – Warfare and Terrorism 1

- 1 A Glance Back – Myths and Facts about CBRN Incidents** 3
Andre Richardt and Frank Sabath
- 1.1 Introduction 3
- 1.2 History of Chemical Warfare 4
- 1.2.1 Chemical Warfare Agents in Ancient Times 5
- 1.2.2 Birth of Modern Chemical Warfare Agents and Their Use in World War I 5
- 1.2.3 Chemical Warfare Agents between the Two World Wars 8
- 1.2.3.1 The Italian–Ethiopian War 8
- 1.2.3.2 Japanese Invasion of China 9
- 1.2.3.3 First Nerve Agents 9
- 1.2.4 Chemical Warfare Agents in World War II 9
- 1.2.5 Chemical Warfare Agents during the Cold War 10
- 1.2.6 Chemical Warfare Agents Used in Terrorism 11
- 1.2.7 Conclusions and Outlook 12
- 1.3 Introduction to Biological Warfare 13
- 1.3.1 Most Harmful Pandemics in History 14
- 1.3.2 Biological Warfare Agents in Ancient Times BC 16
- 1.3.3 Biological Warfare Agents in the Middle Ages to World War I 18
- 1.3.4 From World War I to World War II – the Beginning of Scientifically Based Biological Weapons Research 18

1.3.5	From the End of World War II to the 1980 – the Great Bioweapons Programs	20
1.3.6	From the 1980 Up Today – the Emerging of Bioterrorism	20
1.3.7	Conclusions and Outlook	20
1.4	Introduction to Radiological and Nuclear Warfare	22
1.4.1	Discovery of Nuclear Fission	23
1.4.2	Manhattan Project – Development of the First Fission Weapons	25
1.4.3	Nuclear Arms Race	29
1.4.4	Status of World Nuclear Forces	35
1.4.5	Radiological Warfare and Nuclear Terrorism	35
1.4.6	Conclusions and Outlook	37
	References	37
2	International Treaties – Only a Matter for Diplomats?	39
	<i>Martin Schaarschmidt</i>	
2.1	Introduction to the Minefield of Negotiations	39
2.1.1	Arms Reduction and Prohibition of Use	41
2.1.2	Arms Control and International Controlling Bodies	42
2.1.3	Nonproliferation	42
2.2	Why It Is so Difficult to Implement International Regulations?	42
2.2.1	Trust – Devoid of Trust Every Effort Is Useless	43
2.2.2	Negotiation – Special Skills Are Required	43
2.2.3	Dual Use – Good or Bad Technology?	44
2.2.4	Verification – an Instrument for Trust Building	44
2.2.5	Technological Advancement – Gain of Momentum	45
2.3	Historic Development of Treaties – the Link to the Incidents	46
2.4	Today's System of Treaties – a Global Network	47
2.4.1	The Geneva Conventions – the Backbone for Further Treaties	49
2.4.2	Deployment System for Weapons – Control the Carrier Systems	50
2.4.3	Biological and Chemical Weapons	51
2.4.4	Chemical Weapons Convention 1993 and Organization for the Prohibition of Chemical Weapons (OPCW)	52
2.4.5	Implications of the Chemical Weapons Convention (CWC) and the Biological Weapons Convention (BWC)	53
2.5	Nuclear Weapons	54
2.5.1	Nonproliferation	55
2.5.2	Disarmament	56
2.5.2.1	Strategic Arms Limitation Talks/Treaty (SALT)	56
2.5.2.2	Strategic Arms Reduction Treaty (START)	57
2.5.2.3	Strategic Offensive Reductions (SORT) 2003	58
2.5.3	Test-Ban and Civil Use	58
2.5.4	Nuclear-Weapon-Free Zones	60
2.6	Organizations	63
2.7	Conclusions and Where Does the Road Lead?	64
	References	64

Part II CBRN Characteristics – Is There Something Inimitable? 67

- 3 Chemical Agents – Small Molecules with Deadly Properties** 69
Hans-Jürgen Altmann, Silke Oelze, and Bernd Niemeyer
- 3.1 Are Special Properties Required for Chemical Warfare Agents? 69
- 3.2 How can we Classify Chemical Warfare Agents? 71
- 3.2.1 A: Physicochemical Behavior 72
- 3.2.2 B: Route of Entry into the Body 74
- 3.2.3 C: Organs to be Affected 75
- 3.2.4 D: Physiological Effects on Humans 76
- 3.2.5 E: Identification According to the NATO Code 78
- 3.3 Properties of Chemical Warfare Agents 78
- 3.3.1 Blister Agents (Vesicants) 78
- 3.3.2 Arsenicals 83
- 3.3.3 Blood Agents 85
- 3.3.4 Tear Agents (Lachrymators) 89
- 3.3.5 Vomiting Agents (Sternutators) 92
- 3.3.6 Nerve Agents 94
- 3.4 Choking and Irritant Agents 97
- 3.5 Incapacitating Agents 99
- 3.6 Dissemination Systems of Chemical Warfare Agents 99
- 3.7 Conclusions and Outlook 101
- References 101
- 4 Characteristics of Biological Warfare Agents – Diversity of Biology** 103
Birgit Hülseweh
- 4.1 What Is Special? 104
- 4.2 Types of Biological Agents 104
- 4.2.1 Bacteria 105
- 4.2.2 Viruses 107
- 4.2.3 Toxins 108
- 4.2.4 Fungi 109
- 4.3 Risk Classification of Biological and Biological Warfare Agents 110
- 4.3.1 Risk Classification of Potential Biological Warfare Agents 111
- 4.4 Routes of Entry 114
- 4.5 Origin, Spreading, and Availability 118
- 4.5.1 Methods of Delivery 120
- 4.6 The Biological Event – Borderline to Pandemics, Endemics, and Epidemics 121
- 4.7 The Bane of Biotechnology – Genetically Engineered Pathogens 121
- 4.8 Conclusions and Outlook 123
- References 123

5	Characteristics of Nuclear and Radiological Weapons	125
	<i>Ronald Rambousky and Frank Sabath</i>	
5.1	Introduction to Nuclear Explosions	126
5.1.1	Nuclear Fission	126
5.1.1.1	Critical Mass for a Fission Chain	127
5.1.2	Nuclear Fusion	128
5.1.3	Weapon Design	129
5.1.3.1	Pure Fission Weapon	129
5.1.3.2	Fusion-Boosted Fission Weapon	130
5.1.3.3	Thermonuclear Weapons	130
5.1.4	Effects of a Nuclear Explosion	131
5.2	Direct Effects	133
5.2.1	Thermal Radiation	133
5.2.2	Blast and Shock	137
5.2.3	Initial Nuclear Radiation	140
5.2.4	Residual Nuclear Radiation	145
5.3	Indirect Effects	149
5.3.1	Transient Radiation Effects on Electronics (TREE)	149
5.3.2	Nuclear Electromagnetic Pulse (NEMP)	152
5.3.2.1	Generation of Electric Field	152
5.3.2.2	NEMP in High-Altitude Burst	153
5.3.2.3	Early Component of NEMP (E1)	154
5.3.2.4	Intermediate Component of NEMP (E2)	156
5.3.2.5	Late Time Component of NEMP (E3)	157
5.4	Radiological Weapons	159
5.4.1	Radioactive Material and Radiological Weapons	160
5.4.2	Impacts of Radiological Weapons	162
5.4.2.1	Radiological Exposure Device	162
5.4.2.2	Radiological Dispersal Device	162
	References	165
	Part III CBRN Sensors – Key Technology for an Effective CBRN Countermeasure Strategy	167
6	Why Are Reliable CBRN Detector Technologies Needed?	169
	<i>Birgit Hülseweh, Hans-Jürgen Marschall, Ronald Rambousky, and Andre Richardt</i>	
6.1	Introduction	169
6.2	A Concept to Track CBRN Substances	170
6.3	Low-Level Exposure and Operational Risk Management	175
6.4	Conclusions and Outlook	177
	References	178

7 Analysis of Chemical Warfare Agents – Searching for Molecules 179*Andre Richardt, Martin Jung, and Bernd Niemeyer*

- 7.1 Analytical Chemistry – the Scientific Basis for Searching Molecules 180
- 7.2 Standards for Chemical Warfare Agent Sensor Systems and Criteria for Deployment 182
 - 7.2.1 Recommended Chemical Agent Concentration and Requirements for Chemical Warfare Agent Sensors 182
 - 7.2.2 Acute Exposure Guideline Levels (AEGs) for Chemical Warfare Agents 183
- 7.3 False Alarm Rate and Limit of Sensitivity 184
- 7.4 Technologies for Chemical Warfare Agent Sensor Systems 185
 - 7.4.1 Mass Spectrometry 187
 - 7.4.2 Atomic Absorption Spectrometry (AAS) 190
 - 7.4.3 Ion Mobility Spectrometry (IMS) 192
 - 7.4.4 Colorimetric Technology 197
 - 7.4.5 Photoionization Technology (PI) 198
 - 7.4.6 Electrochemical Technologies 199
 - 7.4.7 Infrared (IR) Spectroscopy 200
- 7.5 Testing of Chemical Warfare Agent Detectors 203
- 7.6 Conclusions and Future Developments 206
 - References 208

8 Detection and Analysis of Biological Agents 211*Birgit Hülseweh and Hans-Jürgen Marschall*

- 8.1 What Makes the Difference? 212
- 8.2 The Ideal Detection and Identification Platform 215
- 8.3 Bioaerosols: Particulate and Biological Background 216
- 8.4 Aerosol Detection – A Tool for Threat Monitoring 217
 - 8.4.1 Cloud Detection 217
 - 8.4.2 Radio Detecting and Ranging (RADAR) and Light Detection and Ranging (LIDAR) 219
 - 8.4.3 Aerosol Particle Sizer (APS), Flame Photometry, and Fluorescence Aerosol Particle Sizer (FLAPS) 220
 - 8.4.4 Detector Layout Topology, Sensitivity, and Response 222
- 8.5 Sampling of Biological Agents 223
 - 8.5.1 Aerosol Sampling 224
 - 8.5.1.1 Surface Sampling 227
- 8.6 Identification of Biological Warfare Agents 229
 - 8.6.1 Immunological Methods Based on Enzyme-Linked Immunosorbent Assay (ELISA) 229
 - 8.6.2 Molecular Methods 233
 - 8.6.3 Chemical and Physical Identification 236

8.7	Developing and Upcoming Technologies	238
8.8	Conclusions	239
	References	240
9	Measurement of Ionizing Radiation	243
	<i>Ronald Rambousky</i>	
9.1	Why Is Detection of Ionizing Radiation So Important?	244
9.2	Physical Quantities used to Describe Radioactivity and Ionizing Radiation	248
9.2.1	Activity	248
9.2.2	Absorbed Dose	249
9.2.3	Equivalent Dose	250
9.2.4	Effective Dose Equivalent	250
9.2.5	Operational Dose Quantities	250
9.3	Different Measuring Tasks Concerning Ionizing Radiation	251
9.3.1	Personal Dosimetry	252
9.3.2	Measuring the Ambient Dose Rate	252
9.3.3	Searching for Gamma- and Neutron-Sources	252
9.3.4	Surface Contamination Measurements	253
9.3.5	Nuclide Identification	253
9.3.6	Measurement of Activity	254
9.3.7	Detection of Radioactive Aerosols	255
9.4	Basics of Radiation Detectors	256
9.4.1	Gas-Filled Detectors	256
9.4.2	Luminescence Detectors	259
9.4.3	Photo-emulsion	260
9.4.4	Scintillators	260
9.4.5	Semiconductor Detectors	262
9.4.6	Neutron Detectors	265
9.5	Gamma Dose Rate and Detection of Gamma Radiation	266
9.5.1	Metrological Dose Rate Measurements	266
9.5.2	Energy Response of a Dose-Rate Detector	267
9.5.3	Quantitative Detection	268
9.6	Conclusions and Outlook	271
	References	272
	Part IV Technologies for Physical Protection	273
10	Filter Technology – Clean Air is Required	275
	<i>Andre Richardt and Thomas Dawert</i>	
10.1	Filters – Needed Technology Equipment for Collective and Individual Protection	275
10.2	General Considerations	276
10.3	What are the Principles for Filtration and Air-Cleaning?	278
10.3.1	Particulate Filtration	279

10.3.2	Gas-Phase Air Cleaning	283
10.4	Test Methods	286
10.4.1	Particle filter testing methods	288
10.4.2	Gasfilter tests	289
10.5	Selection Process for CBRN Filters	290
10.6	Conclusions and Outlook	292
	References	293
11	Individual Protective Equipment – Do You Know What to Wear?	295
	<i>Karola Hagner and Friedrich Hesse</i>	
11.1	Basics of Individual Protection	296
11.2	Which Challenges for Individual Protection Equipment (IPE) Can Be Identified?	296
11.3	The Way to Design Individual Protective Equipment	298
11.4	Function	299
11.5	Ergonomics – a Key Element for Individual Protection Equipment	301
11.6	Donning and Doffing – Training Is Required	305
11.7	Overview of IPE Items – They Have to Act in Concert	306
11.7.1	Respiratory Protection	307
11.7.2	Respirator Design	310
11.7.2.1	Air-Purifying Escape Respirator (APER) with CBRN Protection	313
11.7.3	Air-Purifying Respirators (APRs) with Canisters for Ambient Air	314
11.7.3.1	Respirators with Blower Support (Powered Air-Purifying Respirator, PAPR)	315
11.7.3.2	Respirators with Self-contained Breathing Apparatus (SCBA)	316
11.7.4	Canisters	317
11.7.5	Body Protection	317
11.7.6	Protective Suits	318
11.7.6.1	Permeable Protective Suits	319
11.7.6.2	Impermeable Protective Suits	320
11.7.7	Protective Gloves	322
11.7.8	Protective Footwear	323
11.7.9	Pouches	323
11.7.10	Ponchos	324
11.7.11	Self-Aid Kit	324
11.7.12	Casualty Protection	325
11.8	Quality Assurance	326
11.9	Workplace Safety	327
11.10	Future Prospects	327
	References	328

12	Collective Protection – A Secure Area in a Toxic Environment	331
	<i>Andre Richardt and Bernd Niemeyer</i>	
12.1	Why Is Collective Protection of Interest?	332
12.2	Collective Protection Systems – Required for Different Scenarios	337
12.3	Basic Design	341
12.3.1	Air Filtration Unit (AFU) and Auxiliary Equipment	342
12.3.2	Environmental Control Unit (ECU)	344
12.3.3	Contamination Control Area (CCA)	345
12.3.4	Airlock – the Bottleneck for Ingress and Egress	346
12.3.5	Toxic-Free Area (TFA)	348
12.4	Conclusions and Outlook	348
	References	349
	Part V Cleanup after a CBRN Event	351
13	Decontamination of Chemical Warfare Agents – What is Thorough?	353
	<i>Hans Jürgen Altmann, Martin Jung, and Andre Richardt</i>	
13.1	What Is Decontamination?	353
13.2	Dispersal and Fate of Chemical Warfare Agents	354
13.3	Decontamination Media for Chemical Warfare Agents	356
13.3.1	Aqueous-Based Decontaminants	358
13.3.1.1	Water	358
13.3.1.2	Water-Soluble Decontamination Chemicals	359
13.3.2	Non-aqueous Decontaminants	359
13.3.3	Heterogeneous Liquid Media	362
13.3.3.1	Macroemulsions (Emulsions)	362
13.3.3.2	Microemulsions	366
13.3.3.3	Foams and Gels	367
13.4	Selected Chemical Warfare Agents and Decont Reaction Schemes	369
13.4.1	Sulfur Mustard (HD)	370
13.4.1.1	Hydrolysis	370
13.4.2	Sarin (GB)	370
13.5	Soman (GD)	372
13.6	VX	372
13.7	Catalysis in Decontamination	373
13.8	Decont Procedures	375
13.8.1	Generalities	376
13.8.2	Equipment Decontamination	376
13.8.2.1	Wet Procedures	376
13.8.2.2	Dry Procedures	378
13.8.2.3	Clothing and Protective Clothing	378
13.8.2.4	Decontamination of Personnel	379

13.8.2.5	Rapid Decontamination of Personnel and Personal Gear	379
13.8.2.6	Thorough Decontamination of Personnel	380
13.9	Conclusions and Outlook	380
	References	381
14	Principles and Practice of Disinfection of Biological Warfare Agents – How Clean is Clean Enough?	383
	<i>Andre Richardt and Birgit Hülseweh</i>	
14.1	General Principles of Disinfection and Decontamination	384
14.1.1	Definition of Terms	384
14.1.2	Physical Methods of Disinfection	385
14.1.3	Chemical Methods of Disinfection	385
14.2	Mechanisms of Action of Biocides against Microorganisms	385
14.2.1	Chemicals for Disinfection	386
14.2.2	Fumigation – Well-Known for Decontamination of Objects	388
14.2.2.1	Fumigation with Ethylene Oxide	388
14.2.2.2	Fumigation with Chlorine Dioxide Gas	388
14.2.2.3	Fumigation with Formaldehyde Gas	389
14.2.2.4	Vaporized Hydrogen-Peroxide (VHP)	389
14.3	Levels of Disinfection	390
14.4	Biological Target Sites of Selected Biocides	393
14.4.1	Viral Target Sites	393
14.4.2	Bacterial Target Sites	394
14.5	The Spores Problem	395
14.6	Inactivation as Kinetic Process	399
14.7	Evaluation of Antimicrobial Efficiency	401
14.8	Carrier Tests versus Suspension Tests	403
14.9	Resistance to Biocide Inactivation – a Growing Concern	405
14.9.1	Resistance of Viruses	406
14.9.2	Resistance of Bacteria	407
14.10	New and Emerging Technologies for Disinfection	408
14.11	“Is Clean Clean Enough” or “How Clean Is Clean Enough”?	408
	References	409
15	Radiological/Nuclear Decontamination – Reduce the Risk	411
	<i>Nikolaus Schneider</i>	
15.1	Why Is Radiological/Nuclear Decontamination So Special?	412
15.2	Contamination	414
15.2.1	Nuclear Weapons	414
15.2.1.1	Nuclear Fallout Contaminates the Ground	414
15.2.1.2	Rainout/Washout	415
15.2.2	Radiological Contaminations – Radiological Dispersal Device (RDD)	416
15.3	Decontamination	418
15.3.1	Decontamination Efficiency Calculation	418

- 15.3.2 Decontamination Procedures for RN Response 420
- 15.3.3 RN Decontamination Agents 421
 - 15.3.3.1 Surfactant 422
 - 15.3.3.2 Chelating Agent 424
- 15.3.4 Specific Decon Processes, Alternative Procedures 424
 - 15.3.4.1 Spraying/Extraction Systems 425
 - 15.3.4.2 Surface Ablation Techniques 426
- 15.4 Conclusions and Outlook 428
- References 429

Part VI CBRN Risk Management – Are We Prepared to Respond? 431

- 16 Preparedness 433**
 - Marc-Michael Blum, Andre Richardt, and Kai Kehe*
 - 16.1 Introduction to Risk Management 433
 - 16.2 Key Elements Influencing a Counter-CBRN Strategy 436
 - 16.3 A Special Strategy for CBRN 438
 - 16.3.1 Chemical Threats 440
 - 16.3.2 Biological Threats 443
 - 16.3.3 Radiological Threats 447
 - 16.3.4 Nuclear Threats 450
 - 16.4 Proliferation Prevention 456
 - 16.5 Active Countermeasures 458
 - 16.6 If Things Get Real: Responding to a CBRN Event 459
 - 16.6.1 Fundamentals of Installation of a Response 459
 - 16.6.2 Detection, Reconnaissance, and Surveillance 461
 - 16.6.3 Risk Assessment 462
 - 16.6.4 CBRN Warning and Reporting 464
 - 16.6.5 Command and Control, Communication 465
 - 16.6.6 Technical Response 466
 - 16.6.7 Medical Response 468
 - 16.6.8 Risk Communication 470
 - 16.6.9 Medical Support and Post-disaster Recovery 472
 - 16.7 Research 473
 - 16.8 Aftermath Action – Lessons Learned 474
 - 16.9 Conclusions and Outlook 475
 - References 476
