	Foreword	<i>vii</i>
	Prologue: Challenges for the Third Millennium	<i>ix</i>
1	Introduction	<i>1</i>
1.1	Industrial Batch Processes	<i>1</i>
1.2	Types of Sensors	<i>3</i>
1.3	Batch Process Modeling	<i>5</i>
1.3.1	Knowledge-based Models	<i>5</i>
1.3.2	Data-driven Models	<i>6</i>
1.3.3	Hybrid Models	<i>7</i>
1.4	Bilinear Modeling Cycle for Batch Process Monitoring	<i>7</i>
2	Data-driven Models Based on Latent Variables	<i>13</i>
2.1	Compression	<i>13</i>
2.2	Principal Component Analysis	<i>18</i>
2.2.1	Data Preprocessing	<i>21</i>
2.2.2	Selection of the Number of Principal Components	<i>26</i>
2.2.3	Parameters Stability	<i>30</i>
2.3	Regression	<i>33</i>
2.4	Regression Models Based on Latent Variables	<i>35</i>
2.4.1	Principal Component Regression	<i>35</i>
2.4.2	Partial Least Squares	<i>36</i>
2.4.3	Data Preprocessing	<i>38</i>
2.4.4	Selection of the Number of Latent Variables	<i>41</i>
2.4.5	PLS Versus Other Regression Models	<i>42</i>
2.5	Multivariate Exploratory Data Analysis	<i>43</i>
2.6	Missing Data	<i>46</i>
2.6.1	Model Exploitation	<i>47</i>
2.6.2	Model Building	<i>52</i>
2.6.3	Final Reflections About Missing Data Imputation and MSPC	<i>52</i>

3	Batch Data Equalization	55
3.1	Introduction	55
3.2	Challenges in Batch Equalization	56
3.3	Equalization of Variables Within a Batch	59
3.3.1	Discarding Intermediate Values	62
3.3.2	Estimating Missing Values	64
3.3.2.1	Comparison of Equalization Methods Based on Latent Variable Models	70
3.3.3	Rearranging Data	71
3.4	Multirate System	74
4	Batch Synchronization	79
4.1	Introduction	79
4.2	Synchronization Approaches	81
4.2.1	Indicator Variable	83
4.2.2	Time Linear Expanding/Compressing	87
4.2.2.1	Observation (OWU) Level and TLEC Synchronization Approach	89
4.2.3	Dynamic Time Warping	90
4.2.3.1	Warping Function Constraints	92
4.2.3.2	The DTW Algorithm	94
4.2.3.3	Optimization Problem	95
4.2.3.4	End-of-batch DTW Synchronization for Batch Process Monitoring	97
4.2.3.5	On the Use of Warping Information	100
4.2.4	Relaxed Greedy Time Warping	105
4.2.4.1	Enhanced Global Constraints	107
4.2.4.2	Cross-validation for the Estimation of the RGTW Parameters	110
4.2.5	Multisynchro	114
4.2.5.1	Asynchronism Detection	115
4.2.5.2	Specific Batch Synchronization	117
4.2.5.3	Iterative Batch Synchronization and Anomaly Detection Procedure	120
4.3	Effects of Synchronization on the Correlation Structure	129
5	Batch Data Preprocessing	141
5.1	Batch Preprocessing Operations	141
5.2	Mean Centering	143
5.3	Scaling	144
6	Three-way to Two-way Transformation	149
6.1	Introduction	149
6.2	Single-model Approach	150
6.2.1	Batch-wise Unfolding	150
6.2.2	Variable-wise Unfolding	156
6.2.3	Batch Dynamic Unfolding	160
6.3	<i>K</i> -models Approach	162
6.3.1	Hierarchical-model Approach	168

6.4	Multiphase Approach	171
6.4.1	Phases in Batch-wise Data	172
6.4.2	Phases in Variable-wise Data	175
6.4.3	Phases in Batch Dynamic Data	177
6.5	Conclusion	178
7	Batch Process Data Analysis and Statistical Monitoring	181
7.1	Introduction	181
7.2	Historical Batch Data Analysis	181
7.3	Batch Multivariate Statistical Process Control	186
7.3.1	Phase I	186
7.3.2	Phase II	187
7.3.2.1	Post-batch Process Monitoring	187
7.3.2.2	Real-time Process Monitoring	188
7.4	Practical Issues	190
	List of Acronyms	197
	Bibliography	199
	Index	211
