Preface IX

About the Author XIII

- 1 Capturing Sun's Energy** 1
- 1.1 Solar Power: Now 1
- 1.2 Never Trust the Skeptics 2
- 1.3 Solar Power for the Masses 6
- 1.4 Why Nanoscience is Relevant to the Solar Energy Industry 9
- 1.5 Expanding the Solar Business 15
- 1.6 Solar Hydrogen from Water 19
- References 24
- 2 From Chemistry to Nanochemistry** 27
- 2.1 Why Small is Different 27
- 2.2 Nanochemistry, the Chemical Approach to Nanotechnology 29
- 2.3 An Insight into Chemical Methodology 31
- 2.4 Making Nanomaterials 39
- References 43
- 3 Storing and Supplying Clean Energy** 45
- 3.1 Ending the Era of the Internal Combustion Engine 45
- 3.2 Nanotechnology-Based Batteries 49
- 3.3 Biological Fuel Cells 54
- 3.4 Fuel Cells for the People 58
- References 63
- 4 Catalysis: Greening the Pharma Industry** 65
- 4.1 Pharma: An Industry to Be Cleaned Up 65
- 4.2 Sol-Gel Catalysts: Philosopher's Stones 69
- 4.3 Biogels: Marriage of Glass and Life 76
- 4.4 Nanocatalysts: Abating Polluting Emissions and Product Contamination 81
- References 85

5	Organically Doped Metals	87
5.1	A Watershed Development in Science	87
5.2	The New Reactivity of Metal-Entrapped Molecules	90
5.3	Two-for-One-Catalyst	93
5.4	Chiral Metals	95
	References	98
6	Protecting Our Goods and Conserving Energy	101
6.1	Multifunctional Nanocoatings	101
6.2	Multifunctional Textiles	109
6.3	Protecting Cultural Heritage	110
6.4	Protecting Goods from Light	111
	References	117
7	Better Medicine Through Nanochemistry	119
7.1	Nanomedicine	119
7.2	Hemostasis: Change in Surgery and Emergency Medicine	122
7.3	Biogels: Biotechnology Made Possible	123
7.4	Small is Beautiful? Nanotech Cosmetics	125
7.5	Nanotechnology in Orthopedics	129
7.6	A Hybrid, Welcome Science	131
	References	136
8	Getting There Cleanly	139
8.1	Why Sustainable Nanotechnology?	139
8.2	Regulating Nanomaterials	141
8.3	Greening Nanomaterials	143
8.3.1	Cleaning Up Water	144
8.3.2	Biocompatible Coatings	145
8.3.3	Green Metal Nanoparticles	145
8.4	Understand the Risks and Minimize Them	146
8.5	Communicating the Nanotech Risk	148
8.5.1	Cultural Message Framing	150
8.5.2	Contextualization	150
	References	151
9	Managing (Nano)innovation	153
9.1	Scholars, and not Researchers	153
9.2	Renewing Management and Scientific Education	155
9.3	Nexus of the Sciences	159
9.4	In Praise of Scientific Culture	162
9.5	Communicating Nanochemistry	164
	References	170
	Index	171
