List of Contributors XIX

Part I Preparation and Characterization of Carbon Nanotubes 1

1	Structures and Synthesis of Carbon Nanotubes	3
	<i>Yahachi Saito</i>	
1.1	Structures of Carbon Nanotubes	3
1.1.1	Single-Wall CNTs	3
1.1.2	Multiwall CNTs	6
1.1.3	Thin-Walled CNTs	7
1.2	Synthesis of Carbon Nanotubes	7
1.2.1	Arc Discharge	7
1.2.2	Chemical Vapor Deposition	8
1.2.2.1	Thermal CVD	9
1.2.2.2	Plasma-Enhanced CVD	9
1.3	Electrical and Mechanical Properties of Carbon Nanotubes	10
1.3.1	Electronic Structure	10
1.3.2	Electric Properties	11
1.3.3	Mechanical Properties	12
1.3.4	Heat-Transport Properties	13
	References	13
2	Preparation of CNT Emitters	15
	<i>Yahachi Saito</i>	
2.1	Introduction	15
2.2	CNT Point Emitters	15
2.2.1	Manual Attachment of a CNT Bundle	15
2.2.2	Mounting Inside an SEM	16
2.2.3	Electrophoretic and Magnetophoretic Methods	16
2.2.4	Direct Growth on the Apex of a Tip	18
2.2.5	Other Methods	19

2.3	CNT Film Emitters	19
2.3.1	Spray Coating	19
2.3.2	Screen Printing	19
2.3.3	Electrophoresis	20
2.3.4	CVD Method	20
	References	21
3	Preparation of Patterned CNT Emitters	23
	<i>Mark Mann, William Ireland Milne, and Kenneth Boh Khin Teo</i>	
3.1	Background	23
3.2	Growth of Carbon Nanotubes from Patterned Catalysts	25
3.2.1	Patterned Growth from Catalyst Film Edges	25
3.2.2	Patterned Growth from Catalyst Thin Films on a Diffusion Barrier	27
3.3	Single Nanotube Growth – Requirements and Uniformity	28
3.4	Nanotube Growth without Surface Carbon	32
3.4.1	Analysis of Substrate Surfaces Exposed to the Plasma	32
3.4.2	Analysis of Substrate Surfaces Shielded from the Plasma	37
3.5	Summary	38
	Acknowledgments	40
	References	40
	Part II Field Emission from Carbon Nanotubes	41
4	Field Emission Theory	43
	<i>Seungwu Han</i>	
4.1	Fowler–Nordheim Theory	43
4.2	Field Emission from CNTs	44
4.2.1	Computational Methods to Calculate the Emission Currents from Carbon Nanotubes	46
4.2.1.1	The Integration of Time-Dependent Schrödinger Equation	46
4.2.1.2	Transfer Matrix Method	47
4.2.1.3	Other Quantum Mechanical Methods	49
4.2.1.4	Semiclassical Approaches	49
4.2.2	Current–Voltage Characteristics of Field Emission Currents from Carbon Nanotubes	51
4.3	Concluding Remarks	52
	References	52
5	Field Emission from Graphitic Nanostructures	55
	<i>Kazuyuki Watanabe and Masaaki Araidai</i>	
5.1	Introduction	55
5.2	Method and Model	56
5.3	Results	57
5.3.1	Graphitic Ribbons: H Termination and Field Direction	57
5.3.2	Graphene Arrays: Interlayer Interaction	61

5.3.3	Graphene Sheet: Defects	61
5.3.4	Diamond Surfaces: Impurities	62
5.4	Conclusion	64
	Acknowledgments	64
	References	65
6	The Optical Performance of Carbon Nanotube Field Emitters	67
	<i>Niels de Jonge</i>	
6.1	Introduction	67
6.2	Making an Electron Source from an Individual Carbon Nanotube	68
6.3	The Emission Process	69
6.3.1	The Fowler–Nordheim Model	69
6.3.2	Measurement of the Fowler–Nordheim Plot	70
6.3.3	The Energy Spread	71
6.3.4	Measurement of Energy Spectra	72
6.3.5	Comparing the Measured Tunneling Parameter with Theory	74
6.3.6	Determining the Work Function	74
6.4	The Brightness	74
6.4.1	Measuring the Brightness	74
6.4.2	New Model for the Brightness	75
6.4.3	Discussion of the New Model	76
6.4.4	The Total Figure of Merit for Carbon Nanotube Electron Sources	77
6.5	Conclusions	78
	Acknowledgments	78
	References	78
7	Heat Generation and Losses in Carbon Nanotubes during Field Emission	81
	<i>Stephen T. Purcell, Pascal Vincent, and Anthony Ayari</i>	
7.1	Introduction	81
7.2	Heat Diffusion Equation for Nanotubes	83
7.3	Simulations	85
7.4	Experiments	88
7.5	Conclusion	92
	References	92
8	Field Emission Microscopy of Multiwall CNTs	95

8.1	Introduction	95
8.2	FEM of Carbon Nanotubes	96
8.2.1	FEM Measurement	96
8.2.2	MWNTs with Clean Surfaces	97
8.2.3	FEM Patterns Depending on Tip Radius	98
8.3	Field Emission from Adsorbates on an MWNT	99
8.3.1	Molecules	99

8.3.1.1	Hydrogen	99
8.3.1.2	Nitrogen	99
8.3.1.3	Oxygen	101
8.3.1.4	Carbon Monoxide	101
8.3.1.5	Carbon Dioxide	101
8.3.1.6	Methane	102
8.3.1.7	Comparison with Related Theoretical Studies	103
8.3.2	Aluminum Clusters	103
8.4	Resolution in FEM and Possible Observation of Atomic Detail	105
8.5	Concluding Remarks	106
	References	107
9	<i>In situ</i> Transmission Electron Microscopy of CNT Emitters	109
	<i>Koji Asaka and Yahachi Saito</i>	
9.1	Introduction	109
9.2	Degradation and Failure of Nanotubes at Large Emission Current Conditions	110
9.3	Effect of Tip Structure of Nanotubes on Field Emission	112
9.4	Relationship between Field Emission and Gap Width	113
9.5	Other Studies by <i>In situ</i> TEM of CNT Emitters	114
	References	116
10	Field Emission from Single-Wall Nanotubes	119
	<i>Kenneth A. Dean</i>	
10.1	Introduction	119
10.2	Single-Wall Nanotubes and Field Emission	119
10.3	Measuring the Properties of a Single SWNT	120
10.4	Field Emission from a Clean SWNT Surface	121
10.4.1	Clean SWNT Field Emission Microscope Images	122
10.4.2	Clean SWNT I - V s	124
10.4.3	Thermal Field Emission	126
10.4.4	High Current and Field Evaporation	128
10.4.5	Anomalous High-Temperature Behavior	130
10.5	SWNT-Adsorbate Field Emission	131
10.5.1	Field Emission Microscopy	131
10.5.2	Electron Energy Distributions	133
10.5.3	Current Saturation and Field-Emission-Induced Surface Cleaning	134
10.6	Field Emission Stability	136
10.6.1	Current Fluctuation	137
10.6.2	Current Degradation	137
10.7	Conclusions	140
	References	140

11	Simulated Electric Field in an Array of CNTs	143
	<i>Hidekazu Murata and Hiroshi Shimoyama</i>	
11.1	Introduction	143
11.2	Simulation Method	143
11.3	Computational Model	145
11.4	Field Analysis for the VA-CNT System	148
11.4.1	Dependence of Numerical Accuracy in Electric Field Calculation on the Discretization Number	148
11.4.2	Appropriateness of 9×9 CNT Computational Model	149
11.5	Field Analysis for VA-CNT System with Uniform Length	150
11.5.1	Dependence of the Electric Field Strength at the CNT Apex on Geometrical Parameters of the CNTs	152
11.5.2	Universal Curve	153
11.6	Field Analysis for VA-CNT System with Nonuniform Length	154
11.7	Effect of Shape of CNT Apex	157
11.8	Effect of CNT Length	158
11.9	Electric Field Analysis of Network-Structured CNT System	160
	References	162
12	Surface Coating of CNT Emitters	163
	<i>Yoshikazu Nakayama</i>	
12.1	Effects of Surface Coating of CNT Emitters	164
12.1.1	Parameters Determining Field Emission Properties	164
12.1.2	Lowering of the Potential Barrier	165
12.1.2.1	Coating Layer with Low Work Function	165
12.1.2.2	Coating Layer with Wide Band Gap	165
12.1.3	Stabilization of Emission Current	167
12.2	Field Emission from Individual CNT Coated with BN	167
12.3	Field Emission from Brush-Like CNTs Coated with MgO	169
12.4	Field Emission from Brush-Like CNTs Coated with TiC	172
	References	174
	Part III Field Emission from Related Nanomaterials	177
13	Graphite Nanoneedle Field Emitter	179
	<i>Takahiro Matsumoto and Hidenori Mimura</i>	
13.1	Introduction	179
13.2	Fabrication and Structure Characterization	179
13.3	Field Emission Characteristics	181
13.4	Applications	182
13.4.1	Pulse X-ray Generation and Time-Resolved X-ray Radiography	182
13.4.2	Construction of a Compact FE Scanning Electron Microscope (FE-SEM) System	184
13.4.3	Stabilization of the FE-SEM System by Thermal Field Operation	186
13.5	Stochastic Model	188

13.6	Summary	191
	References	191
