List of Contributors XXXVII

Part I RNA Synthesis and Detection 1

1	Enzymatic RNA Synthesis Using Bacteriophage T7 RNA Polymerase	3
	<i>Markus Gößringer, Dominik Helmecke, Karen Köhler, Astrid Schön, Leif A. Kirsebom, Albrecht Bindereif, and Roland K. Hartmann</i>	
1.1	Introduction	3
1.2	Description of Method – T7 Transcription <i>In vitro</i>	4
1.2.1	Templates	4
1.2.1.1	Strategy (i): Insertion into a Plasmid	4
1.2.1.2	Strategy (ii): Direct Use of Templates Generated by PCR	5
1.2.1.3	Strategy (iii): Annealing of a T7 Promoter DNA Oligonucleotide to a Single-Stranded Template	5
1.2.2	Special Demands on the RNA Product	5
1.2.2.1	Homogeneous 5' and 3' Ends, Small RNAs, Functional Groups at the 5' End	5
1.2.2.2	Modified Substrates	6
1.3	Transcription Protocols	8
1.3.1	Transcription with Unmodified Nucleotides	9
1.3.2	Transcription with 2'-Fluoro-Modified Nucleotides	16
1.3.3	T7 Transcripts with 5'-Cap Structures	17
1.3.4	Purification	18
1.4	Troubleshooting	20
1.4.1	Low or No Product Yield	20
1.5	Rapid Preparation of T7 RNA Polymerase	21
1.5.1	Required Material	21
1.5.1.1	Medium	21
1.5.1.2	Buffers and Solutions	21
1.5.1.3	Electrophoresis and Chromatography	22
1.5.2	Procedure	22
1.5.2.1	Cell Growth, Induction, and Test for Expression of T7 RNAP	22

1.5.2.2	Purification of T7 RNAP	23
1.5.3	Notes and Troubleshooting	24
	References	25
2	Production of RNAs with Homogeneous 5'- and 3'-Ends	29
	<i>Mario Mörl and Roland K. Hartmann</i>	
2.1	Introduction	29
2.2	Description of Approach	30
2.2.1	Cis-Cleaving Autocatalytic Ribozyme Cassettes	30
2.2.1.1	The 5'-Cassette	30
2.2.1.2	The 3'-Cassette	30
2.2.1.3	Purification of Released RNA Product and Conversion of End Groups	31
2.2.2	Trans-Cleaving Ribozymes for the Generation of Homogeneous 3' Ends	33
2.2.3	Further Strategies toward Homogeneous Ends	35
2.3	Critical Experimental Steps, Changeable Parameters, Troubleshooting	36
2.3.1	Construction of Cis-Cleaving 5'- and 3'-Cassettes	36
2.4	PCR Protocols	37
2.5	Potential Problems	42
	References	42
3	RNA Ligation	45
	<i>Janne J. Turunen, Liudmila V. Pavlova, Martin Hengesbach, Mark Helm, Sabine Müller, Roland K. Hartmann, and Mikko J. Frilander</i>	
3.1	General Introduction	45
3.1.1	T4 Polynucleotide Ligases	46
3.1.2	Reaction Mechanism	46
3.1.3	Advantages of T4 DNA Ligase for RNA Ligation	49
3.1.4	Chapter Structure	49
3.2	RNA Ligation Using T4 DNA Ligase (T4 Dnl)	50
3.2.1	Overview of the RNA Ligation Method Using the T4 DNA Ligase (T4 Dnl)	51
3.2.2	Large-Scale Transcription and Purification of RNAs	53
3.2.3	Generating Homogeneous Acceptor 3'-Ends for Ligation	53
3.2.4	Site-Directed Cleavage with RNase H	54
3.2.5	Dephosphorylation and Phosphorylation of RNAs	56
3.2.6	RNA Ligation	57
3.2.7	Troubleshooting	58
3.3	Simultaneous Splint Ligation of Five RNA Fragments to Generate RNAs for FRET Experiments	66
3.3.1	Introduction	66
3.3.2	Construct Design	68
3.3.3	Troubleshooting	70

3.3.3.1	Low Overall Ligation Efficiency	70
3.3.3.2	Undesired Ligation By-products	70
3.3.3.3	RNA Degradation	70
3.4	T4 RNA Ligase(s)	70
3.4.1	Introduction	70
3.4.2	Mechanism and Substrate Specificity	71
3.4.2.1	Early Studies	71
3.4.2.2	Substrate Specificity and Reaction Conditions	72
3.4.3	Applications of T4 RNA Ligase	73
3.4.3.1	End-Labeling	73
3.4.3.2	Circularization	75
3.4.3.3	Intermolecular Ligation of Polynucleotides	75
3.4.4	T4 RNA Ligation of Large RNA Molecules	76
3.4.5	Application Examples and Protocols	79
3.4.5.1	Production of Full-Length tRNAs	79
3.4.6	Troubleshooting	84
	References	84
4	Northern Blot Detection of Small RNAs	89
	<i>Benedikt M. Beckmann, Arnold Grünweller, and Roland K. Hartmann</i>	
4.1	Introduction	89
4.1.1	Isolation of RNA	89
4.1.1.1	Kits	90
4.1.1.2	Do it Yourself	90
4.1.1.3	Quality Control	90
4.1.2	Native <i>versus</i> Denaturing Gels	90
4.1.3	Transfer of RNA and Fixation to Membranes	91
4.1.4	Hybridization with a Complementary Probe	92
4.1.4.1	Design of DNA/LNA Mixmer Probes	92
4.1.5	Detection of DIG-Labeled Probes	95
4.1.6	Troubleshooting	95
4.1.7	Application Example	96
4.1.8	Limitations of the Method	96
4.2	Northern Hybridization Protocols	98
	References	102
5	Rapid, Non-Denaturing, Large-Scale Purification of <i>In Vitro</i> Transcribed RNA Using Weak Anion-Exchange Chromatography	105
	<i>Laura E. Easton, Yoko Shibata, and Peter J. Lukavsky</i>	
5.1	Introduction	105
5.2	Materials	106
5.2.1	Cloning and Plasmid Purification	106
5.2.2	<i>In Vitro</i> Transcription	106
5.2.3	Weak Anion-Exchange FPLC	107

5.3	Protocols for Plasmid Design and Preparation, RNA Transcription, and Weak Anion-Exchange Purification	107
5.4	Troubleshooting	115
	Acknowledgments	115
	References	116
6	3'-Terminal Attachment of Fluorescent Dyes and Biotin	117
	<i>Dagmar K. Willkomm and Roland K. Hartmann</i>	
6.1	Introduction	117
6.2	Description of Method	118
6.3	History of the Method	118
6.4	Troubleshooting	124
6.4.1	Problems Caused Before the Labeling Reaction	124
6.4.1.1	Quality of the RNA 3' Ends	124
6.4.1.2	Purity of the RNA to Be Labeled	124
6.4.2	Problems with the Labeling Reaction Itself	124
6.4.2.1	pH of Reagents	124
6.4.2.2	Stability of Reagents	124
6.4.3	Postlabeling Problems	125
6.4.3.1	Removal of Labeling Reagents	125
6.4.3.2	Loss of RNA Material during Downstream Purification	125
6.4.3.3	Stability of Labeled RNA	125
	Acknowledgment	125
	References	125
7	Chemical RNA Synthesis, Purification, and Analysis	129
	<i>Brian S. Sproat</i>	
7.1	Introduction	129
7.2	Description	132
7.2.1	The Solid-Phase Synthesis of RNA	132
7.2.2	Deprotection	136
7.2.3	Purification	138
7.2.3.1	Anion-Exchange HPLC Purification	139
7.2.3.2	Reversed-Phase HPLC Purification of Trityl-On RNA	140
7.2.3.3	Detritylation of Trityl-On RNA	142
7.2.3.4	Desalting by HPLC	142
7.2.4	Analysis of the Purified RNA	143
7.3	Troubleshooting	144
	References	147
8	Modified RNAs as Tools in RNA Biochemistry	151
	<i>Thomas E. Edwards and Snorri Th. Sigurdsson</i>	
8.1	Introduction	151
8.1.1	Modification Strategy: the Phosphoramidite Method	152
8.1.2	Modification Strategy: Postsynthetic Labeling	154

8.2	Description of Methods	156
8.2.1	Postsynthetic Modification: the 2'-Amino Approach	156
8.2.2	Reaction of 2'-Amino Groups with Succinimidyl Esters	158
8.2.3	Reaction of 2'-Amino Groups with Aromatic Isothiocyanates	158
8.2.4	Reaction of 2'-Amino Groups with Aliphatic Isocyanates	159
8.3	Experimental Protocols	159
8.3.1	Synthesis of Aromatic Isothiocyanates and Aliphatic Isocyanates	160
8.3.2	Postsynthetic Labeling of 2'-Amino-Modified RNA	161
8.3.3	Postsynthetic Labeling of 4-Thiouridine-Modified RNA	164
8.3.4	Verification of Label Incorporation	164
8.3.5	Potential Problems and Troubleshooting	165
	References	166

Part II Structure Determination 173

9	Direct Determination of RNA Sequence and Modification by Radiolabeling Methods	175
	<i>Olaf Gimple and Astrid Schön</i>	
9.1	Introduction	175
9.2	General Methods	175
9.3	Isolation of Pure RNA Species from Biological Material	176
9.3.1	Preparation of Size-Fractionated RNA	176
9.3.2	Isolation of a Single Unknown RNA Species Following a Functional Assay	176
9.3.2.1	Solutions for Electrophoresis, Staining, and Elution of RNAs from Gels	176
9.3.2.2	Two-Dimensional Electrophoresis of RNA	177
9.3.2.3	Comments on the Electrophoretic Purification and Elution of RNA Species	178
9.3.3	Isolation of Single RNA Species with Partially Known Sequence	178
9.3.3.1	Materials for Hybrid Selection of Single RNA Species	178
9.4	Radioactive Labeling of RNA Termini	180
9.4.1	Materials for 5'-End Labeling of RNAs	180
9.4.2	3'-Labeling of RNAs	181
9.4.2.1	Materials for 3'-End Labeling of RNAs	182
9.5	Sequencing of End-Labeled RNA	183
9.5.1	Sequencing by Base-Specific Enzymatic Hydrolysis of End-Labeled RNA	184
9.5.1.1	Materials Required for Enzymatic Sequencing	185
9.5.1.2	Interpretation and Troubleshooting	186
9.5.2	Sequencing by Base-Specific Chemical Modification and Cleavage	187
9.5.2.1	Materials Required for Chemical Sequencing	188

9.5.2.2	Interpretation and Troubleshooting	189
9.6	Determination of Terminal RNA Sequences by Two-dimensional Mobility Shift	190
9.6.1	Materials Required for Mobility Shift Analysis	190
9.7	Determination of Modified Nucleotides by Postlabeling Methods	194
9.7.1	Analysis of Total Nucleotide Content	195
9.7.1.1	Materials Required for RNA Nucleotide Analysis	195
9.7.1.2	Interpretation and Troubleshooting	197
9.7.2	Determination of Position and Identity of Modified Nucleotides	198
9.7.2.1	Interpretation and Troubleshooting	199
9.8	Conclusions and Outlook	201
	Acknowledgments	202
	References	202
10	Probing RNA Structure <i>In Vitro</i> with Enzymes and Chemicals	205
	<i>Anne-Catherine Helfer, Cédric Romilly, Clément Chevalier, Efthimia Lioliou, Stefano Marzi, and Pascale Romby</i>	
10.1	Introduction	205
10.2	Enzymatic and Chemical Probes	207
10.2.1	Enzymes	207
10.2.2	Base-Specific Chemical Probes	210
10.2.3	Backbone-Specific Chemical Probes	211
10.3	<i>In Vivo</i> DMS Modification	222
10.3.1	Generalities	222
10.3.2	<i>In Vivo</i> Probing	222
10.4	Commentary	223
10.4.1	Critical Parameters	223
10.4.1.1	RNA Preparation	223
10.4.1.2	Homogeneous RNA Conformation	224
10.4.1.3	Chemical and Enzymatic Probing	224
10.4.1.4	<i>In Vivo</i> DMS Mapping	225
10.5	Troubleshooting	225
	Acknowledgments	227
	References	227
11	Probing RNA Solution Structure by Photocrosslinking: Incorporation of Photoreactive Groups at RNA Termini and Determination of Crosslinked Sites by Primer Extension	231
	<i>Michael E. Harris</i>	
11.1	Introduction	231
11.1.1	Applications of RNA Modifications	231
11.1.2	Techniques for the Incorporation of Modified Nucleotides	232
11.2	Description	233

11.2.1	5'-End Modification by Transcription Priming	233
11.2.2	Chemical Phosphorylation of Nucleosides to Generate 5'-Monophosphate or 5'-Monophosphorothioate Derivatives	234
11.2.3	Attachment of an Aryl Azide Photocrosslinking Agent to a 5'-Terminal Phosphorothioate	236
11.2.4	3'-Addition of an Aryl Azide Photocrosslinking Agent	238
11.3	Troubleshooting	240
11.4	Probing RNA Structure by Photoaffinity Crosslinking with 4-Thiouridine and 6-Thioguanosine	240
11.4.1	Introduction	240
11.4.2	Description	243
11.4.2.1	General Considerations: Reaction Conditions and Concentrations of Interacting Species	243
11.4.2.2	Application Example – RNase P RNA and s ⁶ G-Modified Precursor tRNA	244
11.4.2.3	Generation and Isolation of Crosslinked RNAs	246
11.4.2.4	Primer Extension Mapping of crosslinked Nucleotides	247
11.4.3	Troubleshooting	249
	References	250
12	Terbium(III) Footprinting as a Probe of RNA Structure and Metal Binding Sites	255
	<i>Dinari A. Harris, Gabrielle C. Todd, and Nils G. Walter</i>	
12.1	Introduction	255
12.2	Application Example	261
12.3	Troubleshooting	265
12.4	Frontiers in Footprinting Data Analysis	265
	References	266
13	Pb²⁺-Induced Cleavage of RNA	269
	<i>Leif A. Kirsebom and Jerzy Ciesiolka</i>	
13.1	Introduction	269
13.2	Pb ²⁺ -Induced Cleavage to Probe Metal Ion Binding Sites, RNA Structure, and RNA–Ligand Interactions	271
13.2.1	Probing High-Affinity Metal Ion Binding Sites	271
13.2.2	Pb ²⁺ -Induced Cleavage and RNA Structure	273
13.2.3	Pb ²⁺ -Induced Cleavage to Study RNA–Ligand Interactions	274
13.2.4	Pb ²⁺ -Induced Cleavage of RNA <i>In Vivo</i>	275
13.3	Troubleshooting	279
13.3.1	No Pb ²⁺ -Induced Cleavage Detected	279
13.3.2	Complete Degradation of the RNA	280
13.3.3	<i>In Vivo</i>	280
	Acknowledgments	280
	References	281

14	Identification and Characterization of Metal Ion Coordination Interactions with RNA by Quantitative Analysis of Thiophilic Metal Ion Rescue of Site-Specific Phosphorothioate Modifications	285
	<i>Michael E. Harris</i>	
14.1	Introduction	285
14.1.1	Thiophilic Metal Ion Rescue of RNA Phosphorothioate Modifications	286
14.2	Purification of Phosphorothioate Stereoisomers by RP-HPLC	290
14.3	Techniques for Incorporation of Phosphorothioates into RNA	291
14.4	Kinetic Analysis of Thiophilic Metal Ion Rescue	293
14.5	Data Analysis by Fitting to Simple Equilibrium Models	295
	References	297
15	Probing RNA Structure and Ligand Binding Sites on RNA by Fenton Cleavage	301
	<i>Corina G. Heidrich and Christian Berens</i>	
15.1	Introduction	301
15.2	Comments and Troubleshooting	312

16.3	Forced Dialysis Is the Preferred Method for Separating Bound and Free Mg^{2+}	321
16.4	Alternative Methods for Separating Free and Bound Mg^{2+} Ions	323
16.5	Determining the Concentration of Free Mg^{2+} in the Flow-Through	324
16.6	How to Determine the Concentration of Mg^{2+} Bound to the RNA and the Number of Binding Sites on the RNA	324
16.7	Conclusion	327
16.8	Troubleshooting	327
	References	327
17	Nucleotide Analog Interference Mapping and Suppression (NAIM/NAIS): a Combinatorial Approach to Study RNA Structure, Folding, and Interaction with Proteins	329
	<i>Olga Fedorova, Marc Boudvillain, and Christina Waldsich</i>	
17.1	Introduction	329
17.1.1	NAIM: a Combinatorial Approach for RNA Structure–Function Analysis	329
17.1.1.1	Description of the Method	330
17.1.2	NAIS: a Chemogenetic Tool for Identifying RNA Tertiary Contacts and Interaction Interfaces	332

17.1.2.1	General Concepts	332
17.1.2.2	Applications: Elucidating Tertiary Contacts in Group I and Group II Ribozymes	332
17.2	Experimental Protocols for NAIM	333
17.2.1	Nucleoside Analog Thiotriphosphates	333
17.2.2	Preparation of Transcripts Containing Phosphorothioate Analogs	335
17.2.2.1	Tips and Troubleshooting	336
17.2.3	Radioactive Labeling of the RNA Pool	337
17.2.4	The Selection Step of NAIM: Three Applications to Studies of RNA Function	339
17.2.4.1	Group II Intron Ribozyme Activity: Selection through Transesterification	339
17.2.4.2	Group II Ribozyme Folding: Selection through Mg^{2+} -Induced Compaction of RNA	344
17.2.4.3	RNA–Protein Interactions: a One-Pot Reaction for Studying Rho-Independent Transcription Termination	347
17.2.4.4	RNA–Protein Interactions: Elucidation of the Rho Helicase Activation Mechanism via Unwinding Activity	351
17.2.5	Iodine Cleavage of RNA Pools	354
17.2.5.1	Experimental Procedure	355
17.2.5.2	Tips and Troubleshooting	355
17.2.6	Analysis and Interpretation of NAIM Results	355
17.2.6.1	Quantification of Interference Effects	355
17.3	Experimental Protocols for NAIS	358
17.3.1	Design and Construction of RNA Mutants	358
17.3.1.1	General Considerations	358
17.3.1.2	Preparation of RNA Molecules Containing Single-Atom Substitutions	359
17.3.2	Functional Analysis of Mutants for NAIS Experiments	362
17.3.3	The Selection Step for NAIS	362
17.3.4	Data Analysis and Presentation	363
	Acknowledgments	364
