Preface XI

List of Contributors XIII

- 1 Carbon Nanostructures: Covalent and Macromolecular Chemistry** 1
Francesco Giacalone, M^a Ángeles Herranz, and Nazario Martín
- 1.1 Introduction 1
- 1.2 Fullerene-Containing Polymers 2
- 1.3 Carbon Nanotubes 10
- 1.3.1 Defect Functionalization 11
- 1.3.2 Sidewall Functionalization 13
- 1.4 Graphenes 16
- 1.4.1 Covalent Functionalization 17
- 1.4.2 Noncovalent Functionalization 17
- 1.5 Summary and Conclusions 20
- References 20
- 2 Hydrogen-Bonded Fullerene Assemblies** 27
José Santos, Beatriz M. Illescas, Luis Sánchez, and Nazario Martín
- 2.1 Introduction 27
- 2.2 Hydrogen-Bonded Fullerene-Based Supramolecular Structures 28
- 2.3 Hydrogen-Bonded Fullerene-Based Donor–Acceptor Structures 32
- 2.4 Applications 46
- References 49
- 3 Receptors for Pristine Fullerenes Based on Concave–Convex π – π Interactions** 55
Takeshi Kawase
- 3.1 Introduction 55
- 3.2 Fullerene Receptors Based on Traditional Hosts 56
- 3.2.1 Simple Traditional Hosts 56
- 3.2.2 Modified Traditional Host Molecules 59
- 3.2.3 Receptors Bearing a Dimeric Structure of Traditional Host Molecules 62
- 3.3 Hydrocarbon Receptors 64
- 3.4 Receptors Bearing a Curved Conjugated System 66

3.4.1	Receptors Based on Bowl-Shaped Conjugated Systems	66
3.4.2	Receptors Bearing a Cylindrical Cavity	67
3.4.3	Carbon Nanorings	68
3.5	Conclusions	72
	References	72
4	Cooperative Effects in the Self-Assembly of Fullerene Donor Ensembles	79
	<i>Jean-François Nierengarten</i>	
4.1	Introduction	79
4.2	Allosteric Cooperativity	80
4.2.1	General Principle	80
4.2.2	Allosteric Cooperativity in Supramolecular Fullerene Donor Ensembles	81
4.3	Chelate Cooperativity	88
4.3.1	General Principle	88
4.3.2	Binding of a Divalent Ligand AA to a Divalent Receptor BB	91
4.3.3	Binding of a Divalent Asymmetric Ligand AC to a Complementary Receptor BD	95
4.4	Conclusions	98
4.5	Experimental Details	99
4.5.1	General	100
4.5.2	UV-Visible Titrations	100
4.5.3	Luminescence Titrations	100
	References	104
5	Fullerene-Containing Rotaxanes and Catenanes	107
	<i>Aurelio Mateo-Alonso</i>	
5.1	Introduction	107
5.1.1	Synthetic Strategies	107
5.1.1.1	Rotaxanes	107
5.1.1.2	Catenanes	108
5.1.2	Bistable Rotaxanes and Catenanes	109
5.2	Fullerene Rotaxanes and Catenanes	110
5.2.1	Metal Coordination	110
5.2.2	π Stacking Interactions	111
5.2.3	Hydrogen Bonds	113
5.3	Conclusions	123
	References	124
6	Biomimetic Motifs Toward the Construction of Artificial Reaction Centers	127
	<i>Bruno Grimm and Dirk M. Guldi</i>	
6.1	Introduction	127
6.2	Supramolecular Architectures for Solar Energy Conversion	130

6.2.1	General Considerations	130
6.2.2	Coulomb Interactions	134
6.2.3	π - π Stacking	137
6.2.4	Hydrogen Bonding	143
6.2.5	Metal-Ligand Coordination	150
6.3	Outlook	154
	References	154
7	Supramolecular Chemistry of Fullerene-Containing Micelles and Gels	159
	<i>Hongguang Li, Sukumaran Santhosh Babu, and Takashi Nakanishi</i>	
7.1	Introduction	159
7.2	Solubilization of Pristine C ₆₀ in Surfactant Assemblies	160
7.2.1	Solubilization in Micelles	160
7.2.2	Solubilization in Vesicles	162
7.3	Self-Assemblies of Amphiphilic C ₆₀ Derivatives	164
7.4	Gels of Fullerenes	166
7.5	Conclusions and Outlook	169
	References	170
8	Fullerene-Containing Supramolecular Polymers and Dendrimers	173
	<i>Takeharu Haino and Toshiaki Ikeda</i>	
8.1	Introduction	173
8.2	Fabrication of [60]Fullerene Polymeric Array	174
8.3	Supramolecular Polymerization of Functionalized [60]Fullerene	178
8.3.1	Ionic Interaction	179
8.3.2	Hydrogen Bonding Interaction	182
8.3.3	Host-Guest Interaction	185
8.4	Supramolecular [60]Fullerene Dendrimer	188
8.4.1	Dendrimers with Peripheral Fullerene	188
8.4.2	Dendrimers with Inner Fullerene	193
8.5	Conclusions	198
	References	198
9	[60]Fullerene-Containing Thermotropic Liquid Crystals	203
	<i>Daniel Guillon, Bertrand Donnio, and Robert Deschenaux</i>	
9.1	Introduction	203
9.2	Noncovalent C ₆₀ Derivatives	204
9.2.1	The Liquid-Crystalline Supramolecular Complex of C ₆₀ with a Cyclotriveratrylene Derivative	204
9.2.2	Supramolecular Complex Composed of Rigid Dendritic Porphyrin and Fullerene	206
9.2.3	Self-Assembled Columns of C ₆₀	207
9.2.4	Phthalocyanine-[60]Fullerene Dyads in Liquid Crystals	208
9.3	Covalent C ₆₀ Derivatives	208

9.3.1	Liquid–Crystalline Methanofullerene- and Fulleropyrrolidine-Based Poly(Aryl Ester) Dendrons	208
9.3.2	Liquid–Crystalline Fulleropyrrolidine-Based Poly(Benzyl Ether) Dendrons	212
9.3.3	Liquid–Crystalline Fullero(Codendrimers)	218
9.3.4	Polypedal [60]Fullerenes	223
9.3.5	Conical-Like “Shuttlecock” [60]Fullerenes	227
9.4	Conclusions	232
	References	233
10	Supramolecular Chemistry of Fullerenes on Solid Surfaces	237
	<i>Roberto Otero, José María Gallego, Nazario Martín, and Rodolfo Miranda</i>	
10.1	Introduction	237
10.2	Fullerenes on Nonpatterned Metal Surfaces	238
10.2.1	Nature and Strength of Fullerene–Metal Interactions	238
10.2.2	Translational and Orientational Order of Fullerene Layers on Flat Metal Surfaces	239
10.2.3	Conventional Approaches to 2D Fullerene Supramolecular Chemistry: Fullerene Functionalization	240
10.3	Surface Templates for Fullerene Adsorption	243
10.3.1	0D Point Defects and Single-Molecule Arrays	243
10.3.2	1D Line Defects: Molecular Chains	244
10.3.3	2D Nanomeshes	246
10.4	Supramolecular Aggregation of Fullerenes and other Organic Species on Surfaces	248
10.4.1	Self-Assembled Monolayers as Hosts for Fullerenes on Solid Surfaces	249
10.4.2	Coassembly of Fullerenes and Other Organic Species	251
10.5	Outlook	258
	References	259
11	Supramolecular Chemistry of Carbon Nanotubes	263
	<i>Bruno Jousseme, Arianna Filoramo, and Stéphane Campidelli</i>	
11.1	Introduction	263
11.2	Supramolecular Carbon Nanotube Hybrids	264
11.2.1	Carbon Nanotube and Surfactants	264
11.2.1.1	Suspension of Single-Wall Carbon Nanotubes (Why, How, and What for?)	264
11.2.2	π Stacking Interactions	270
11.2.2.1	Pyrene Derivatives	270
11.2.2.2	Other Cyclic Aromatic Compounds	276
11.2.2.3	Porphyrins and Derived Structures	277
11.2.3	Polymers and Wrapping	280
11.2.4	Filling Nanotubes	283

11.3	Conclusions	288
	References	288
12	Supramolecular Chemistry of Fullerenes and Carbon Nanotubes at Interfaces: Toward Applications	301
	<i>Riccardo Marega, Davide Giust, Adrian Kremer, and Davide Bonifazi</i>	
12.1	Introduction	301
12.2	Fullerene Interfaces	302
12.2.1	Fullerenes at the Liquid–Liquid and Micellar Interfaces	303
12.2.2	Fullerenes at the Solid–Liquid Interface	307
12.2.3	Fullerenes at the Gas–Solid Interface	310
12.2.4	Fullerenes at the Biological Interface	313
12.3	Carbon Nanotubes	317
12.3.1	Carbon Nanotubes at the Liquid–Liquid Interface	317
12.3.2	Carbon Nanotubes at the Solid–Liquid Interface	320
12.3.3	Carbon Nanotubes at the Gas–Solid Interface	325
12.3.4	Carbon Nanotubes at the Biological Interface	327
12.4	Conclusions	334
	References	335
13	Applications of Supramolecular Ensembles with Fullerenes and CNTs: Solar Cells and Transistors	349
	<i>Hiroshi Imahori and Tomokazu Umeyama</i>	
13.1	Introduction	349
13.2	Solar Cells	350
13.2.1	Fullerene-Based Solar Cells	350
13.2.1.1	Self-Assembled Monolayers	350
13.2.1.2	Layer-by-Layer Deposition	353
13.2.1.3	Electrochemical Deposition	354
13.2.1.4	Solution-Processed Bulk Heterojunction Solar Cells	359
13.2.1.5	Hydrogen Bonding Systems	360
13.2.1.6	Coordination Bonding Systems	362
13.2.2	Carbon Nanotubes	363
13.3	Transistors	366
13.3.1	Fullerenes	366
13.3.2	Carbon Nanotubes	366
13.4	Summary	368
	References	369
14	Experimental Determination of Association Constants Involving Fullerenes	375
	<i>Emilio M. Pérez Álvarez and Nazario Martín</i>	
14.1	Planning a Titration Experiment	375
14.2	Performing a Titration	376

14.3	Choosing the Spectroscopic Method	378
14.4	Analyzing the Data	379
14.5	Determining Stoichiometry	380
14.6	Estimating Errors	381
14.7	Fullerenes as Guests: Spectroscopic Properties	381
14.8	Determination of the Binding Constant of an exTTF-based Host toward C ₆₀ : A Practical Example	385
14.9	Conclusions	389
	References	390
