Foreword by Professor Graeme Clark IX

Acknowledgments XI

1	Medical Bionics	1
1.1	Medical Bionic Devices	4
1.1.1	Electrodes and Electrode Arrays	4
1.1.1.1	Bionic Hearing	5
1.1.1.2	Bionic Vision	8
1.1.1.3	Neural Prosthetic Applications	18
1.1.1.4	Vagus Nerve Stimulation (Epilepsy and Pain Management)	19
1.1.1.5	Transcutaneous Electrical Nerve Stimulation	21
1.1.1.6	Cardiovascular Applications	21
1.1.1.7	Orthopedic Applications	22
1.2	Key Elements of a Medical Bionic Device	24
1.2.1	Organic Conductors	25
1.2.1.1	Neural Stimulation and Recording	27
1.2.2	Emerging Areas of Application for Medical Bionics	28
1.2.2.1	Bionics for Peripheral Nerve Injury	28
1.2.2.2	Bionics for Damaged or Diseased Muscle	30
1.2.3	Outline of the Book	31
	References	31
2	Carbon	41
2.1	Introduction to Carbon	41
2.2	Graphene	42
2.2.1	Properties of Graphene	44
2.2.1.1	Electronic Properties	44
2.2.1.2	Electrochemical Properties	45
2.2.1.3	Chemical Properties	49
2.2.1.4	Mechanical Properties	50

2.3	Carbon Nanotubes	51
2.3.1	Synthesis	52
2.3.2	Electronic Properties of Carbon Nanotubes	53
2.3.3	Electrochemistry of Carbon Nanotubes	54
2.3.4	Chemical and Biological Properties of Carbon Nanotubes	55
2.3.5	Mechanical Properties of Carbon Nanotubes	63
2.4	Summary	65
	References	65
3	Organic Conducting Polymers	81
3.1	Polypyrrole	83
3.2	Polythiophenes	88
3.3	Polyanilines	90
3.4	Properties of OCPs	91
3.4.1	Conducting and Electrochemical Switching Properties	91
3.4.2	Electrochemical Switching Properties	91
3.4.2.1	Polythiophenes	94
3.5	Chemical-Biological Properties	97
3.5.1	Polypyrroles	97
3.5.2	Polythiophenes	98
3.5.3	Polyanilines	98
3.6	Mechanical Properties	99
3.6.1	Polypyrroles	99
3.6.2	Polythiophenes	100
3.6.3	Polyanilines	101
3.7	Surface Morphology	101
3.8	Conclusions	103
	References	104
4	Organic Conductors – Biological Applications	113
4.1	Carbon Structures for Medical Bionics	113
4.1.1	Carbon-Based Electrodes for Medical Bionics	114
4.2	Carbon Nanotubes	116
4.2.1	Neural Applications	116
4.2.2	Muscle Regeneration	118
4.2.3	Bone	119
4.2.4	Stem Cells	121
4.3	Graphene	123
4.3.1	Carbon-Based Drug Delivery Applications	125
4.4	Conducting Polymers	126
4.4.1	Neural Applications	126
4.4.2	Muscle Regeneration	132
4.4.3	Bone	135
4.4.4	Stem Cells	136
4.5	Toxicity	136

4.6	Sterilization	138
4.6.1	Physical Methods of Sterilization	138
4.6.2	Irradiation	140
4.6.3	Electron Beam (E-Beam)	140
4.6.4	Ultraviolet (UV) Light Irradiation	141
4.6.4.1	Plasma Sterilization	141
4.6.5	Chemical Methods of Sterilization	141
4.6.6	Ethylene Oxide (EtO)	142
4.6.7	Ozone (O ₃)	142
4.6.8	Bleach (Sodium Hypochlorite)	142
4.6.9	Glutaraldehyde and Formaldehyde	142
4.6.10	Ortho-Phthalaldehyde (OPA)	143
	References	143
5	Materials Processing/Device Fabrication	151
5.1	Introduction	151
5.2	Conducting Polymers	153
5.2.1	Blending	153
5.2.2	Solution Processing	153
5.2.3	Colloidal-Assisted Processing	155
5.2.4	Processing with Nanoparticles	157
5.2.4.1	Inorganic Particles	157
5.2.4.2	Organic Nanoparticles	159
5.2.5	Melt Processing	159
5.3	Carbon Nanotubes	161
5.3.1	Solution Processing	162
5.3.2	Surfactant/Polymer-Assisted Processing	163
5.3.3	Chemical Modification	165
5.3.4	Processing with Nanoparticles	166
5.3.5	Melt Processing	169
5.4	Graphene	171
5.4.1	Solution Processing	172
5.5	Composites with Conventional Polymers—a Medical Focus	173
5.6	3-D Structured Materials and Device Fabrication	176
5.6.1	Fiber Spinning Technologies	176
5.6.2	Wet Spinning	178
5.6.3	Conducting Polymers	178
5.6.4	Carbon Nanotubes and Graphene	180
5.6.5	Electrospinning	182
5.6.6	Printing Technologies	187
5.6.7	Inkjet Printing	189
5.6.8	Printing Carbon Nanotubes	191
5.6.9	Printed Electronics as a Basis for Printed Bionics	192

5.6.10	Dip-Pen Nanolithography	196
5.6.11	Conclusions	200
	References	200
6	Organic Bionics – Where Are We? Where Do We Go Now?	211
6.1	Materials Design and Selection	213
6.2	Materials Synthesis and Processing	214
6.3	Flexible and Printable Electronics	214
6.3.1	Power Supply	215
6.4	Characterization	215
6.4.1	Characterization Tools	215
6.4.2	Device Fabrication	216
6.4.3	Pulling It Together . . .	217
	References	218
	Index	221
