List of Contributors XIX

### Part I Perspectives and General Methodology in Vitamin Analysis 1

#### 1 Stable Isotope Dilution Assays in Vitamin Analysis—A Review of Principles and Applications 3

*Michael Rychlik*

1.1 Principle of Stable Isotope Dilution Assays 3

1.1.1 General Remarks 3

1.1.2 Benefits and Limitations of Using an Isotopologic Internal Standard 5

1.1.3 Prerequisites for Isotopologic Standards 7

1.1.4 Calibration Procedures 10

1.2 Application of Stable Isotope Dilution Assays to Vitamins 11

1.2.1 Fat-Soluble Vitamins 11

1.2.1.1 Vitamin A 11

1.2.1.2 Vitamin E 11

1.2.1.3 Vitamin D 12

1.2.1.4 Vitamin K 12

1.2.2 Water-Soluble Vitamins 12

1.2.2.1 Vitamin B<sub>6</sub> 12

1.2.2.2 Niacin 13

1.2.2.3 Ascorbic Acid 13

1.2.2.4 Folic Acid 13

1.2.2.5 Pantothenic Acid 14

1.3 Outlook 14

References 15

#### 2 Analytical Methods to Assess the Bioavailability of Water-Soluble Vitamins in Food—Exemplified by Folate 21

*Cornelia M. Witthöft*

2.1 Introduction 21

2.2	Folate Bioavailability	24
2.2.1	Definition	24
2.2.2	Analytical Methods for Folate Quantification and Characterization	24
2.2.3	Models/Methods to Determine Folate Bioavailability	25
	References	31
<b>3</b>	<b>Quantitation of Vitamins Using Microbiological Assays in Microtiter Formats</b>	<b>37</b>
	<i>Wolfgang Weber, Sabine Mönch, Michael Rychlik, and Sylvia Stengl</i>	
3.1	Introduction	37
3.1.1	History	37
3.1.2	Principle of Microbiological Assays	38
3.1.3	Requirements for Classic Microbiological Analysis	38
3.1.4	Partial Replacement of Vitamin Microbiological Assays by Chromatographic Methods	38
3.1.5	New Developments in Microbiological Assay Technology	39
3.1.5.1	Coupling with Chromatography	39
3.1.5.2	Coupling with Liquid Chromatography	40
3.1.5.3	Microtiter Formats and Standardized Assays	40
3.2	Methods and Materials	41
3.2.1	Extraction of Vitamins	41
3.2.1.1	Extraction of Total Folate Content (Native Folates and Added Folic Acid)	41
3.2.1.2	Extraction of Total Vitamin B <sub>12</sub> Content (Native and Added Vitamin B <sub>12</sub> )	42
3.2.1.3	Extraction of Total Pantothenic Acid or Riboflavin Content (Native and Added Vitamins) in Foods	42
3.2.1.4	Extraction of Total Riboflavin Content (Native and Added Vitamin B <sub>2</sub> in Yeasts and Yeast Products)	43
3.2.1.5	Incubation of the Microbiological Assay	43
3.2.1.6	Calculation of the Limits of Detection and Quantitation for the Microbiological Assay	43
3.2.1.7	Stable Isotope Dilution Assay for Folates	43
3.3	Results	44
3.3.1	Principle of Microbiological Assay in Microtiter Plate Format	45
3.3.2	Description of the Microorganisms Used in Microbiological Assays	45
3.3.3	Assays for Single Vitamins	45
3.3.3.1	Folic Acid	45
3.3.3.2	Microbiological Assay for Vitamin B <sub>12</sub>	50
3.3.3.3	Microbiological Assay for Pantothenic Acid	56
3.3.3.4	Microbiological Assay for Riboflavin	58
3.4	Conclusion	61

15.3.3	Analysis	204
15.3.4	HPLC	205
	References	208

#### **16 HPLC Determination of Vitamin E in Fortified Foods 211**

*Afaf Kamal-Eldin and Jelena Jastrebova*

16.1	Introduction	211
16.2	Fortification of Foods with Vitamin E	211
16.3	Experimental Procedures Used to Determine Vitamin E in Fortified Foods by HPLC	214
16.3.1	Chemicals	215
16.3.2	Extraction Procedures	215
16.3.3	Instrumentation	216
16.3.3.1	Columns	216
16.3.3.2	Detectors	218
16.4	Conclusions	219
	References	220

#### **17 Determination of Vitamin D by LC–MS/MS 223**

*Dorit Kern*

17.1	Introduction	223
17.2	Materials and Methods	224

17.2.1	Chemicals	224
17.2.2	Preparation of Standards	225
17.2.3	Samples and Reference Materials	225
17.2.4	Sample Preparation	225
17.2.4.1	Saponification	225
17.2.4.2	Solid-Phase Extraction (SPE)	226
17.2.4.3	Equipment	226
17.3	Results and Discussion	227
17.3.1	Analytical Methods	227
17.3.2	Development of the Mass Spectrometry Method	227
17.3.3	Development of the Liquid Chromatographic Method	228
17.3.4	Choice of Internal Standard	230
17.3.5	Calibration and Validation	230
17.3.6	Analysis of Real Samples and Conclusion	230
	Acknowledgments	234
