

## Index

### **a**

- acetyl-coenzyme A acetyltransferase (ACAT) 199, 275, 276
- acid lipase deficiency 186
- acid sphingomyelinase (ASM) 187, 188
- active termination program 226
- alkyl-dihydroxyacetonephosphate synthase (AGPS) 275, 278
- Alzheimer's disease (AD) 1, 182, 269, 275, 277–279, 281, 283
  - cholesterol/cholesterol esters 276, 277
  - lipidomics 319
  - lipids implicated in 275
  - phospholipase A2 (PLA2) 278, 279
  - phospholipase C (PLC) 279–281
  - phospholipase D (PLD) 279–281
  - plasmalogen phosphatidylethanolamine (pPE) 277, 278
  - sulfatides 277
- ameliorate degeneration 284. *See also* Parkinson's disease (PD)
- amyloid precursor proteins (APPs) 183, 275, 276, 278
- anabolic hormone insulin 177, 178
- analytical lipid outputs 2
  - hierarchical categorization 2, 3
  - lipid class 3, 4
  - molecular lipids 5, 6
  - structurally defined molecular lipids 6, 7
  - sum compositions 4, 5
- animal models, of atherosclerotic research 259, 260
- anionic lipids 54
- anti-inflammatory lipid mediators 188
- apoB-containing lipoproteins 205
- apoC-III-enriched LDL 210
- apoE-containing HDLs 200
- apolipoprotein 180, 181, 198, 199
  - apolipoprotein (APOE) e4 allele 276

- arachidonic acid (AA) 41, 182, 203, 219, 220, 235, 256, 257, 278, 280
- 2-arachidonoyl-glycerol (2-AG) 287
- astrocytes 276, 308–311
- atherogenesis, molecular lipids 252
- atherosclerotic plaque 252, 255, 256
- ATP-binding cassette transporter (ABC) 199
- automated BUME extraction 40
- autophagy 183–186, 270

### **b**

- beta-amyloid peptides (A $\beta$ ) 270
- beta-amyloid plaques 275
- beta-amyloid precursor protein ( $\beta$ APP) 279
- bioactive acidic phospholipids 240, 241
- bioinformatics 11, 16, 46, 47, 253, 298, 303
- biomarkers
  - diagnostic, of atherosclerosis 260, 261
  - discovery, strategy 321–326
  - for pharmaceutical research 320, 321
- bis(monoacylglycerol)phosphate 22
- brain lipids 270–272
  - distribution 272
  - mass spectrometry 272–274
  - molecular structures 271
- brutto lipids 4, 7

### **c**

- Caenorhabditis elegans* 36
- cancer 184–186
- cardiolipin (CL) 22, 40, 54, 55, 202, 203, 272, 298, 299, 300, 301, 303, 307, 308
  - abnormalities, factors associated with 307
  - influence of *in vitro* growth environment 307–311
  - electron transport chain enzyme activities 309
  - distribution of molecular species in mitochondria 304, 308

- electron transport chain
  - abnormalities 299–307
- interaction with protein amino acid sequence 301
- relationship of abnormalities with electron transport chain activities 306
- structure 300
- cardiovascular disorders (CVDs) 179–181
- C24–C26 carbon ceramides 9
- cell adhesion 1, 252
- $\beta$ -cell dysfunction 178
- cell membranes 1, 21, 26, 198, 270, 277, 319
- cellular lipid distribution 22, 23
- central nervous system (CNS) 271, 277
- ceramide (Cer) 25, 204, 210, 272
  - synthesis 178
- cerebrosides 283
- CFTR protein 187
- cholesterol 1, 22, 24, 25, 40, 197–199, 210, 254, 271, 276
  - metabolism 183
- cholesterol/phospholipid ratio 298
- cholesteryl ester (CE) 4, 40, 44, 205, 210, 261, 276
  - in dyslipidemia 210
  - in normolipidemic subjects 205
- cholesteryl ester transfer protein (CETP) 200, 202, 205, 276
- choline 36, 54, 220
- chylomicrons 198, 200
- coenzyme Q 284, 285
- collision-induced dissociation (CID) 6, 43, 54, 87, 100, 109, 116, 134, 222
- complex lipids 186
- coronary artery disease (CAD) 7, 251
- Crabtree effect 310
- cyclooxygenase (COX) 219–222, 227, 228, 229, 257
  - inhibitors 321
  - isomers 182, 221
- cystic fibrosis 187, 188, 206
- cytochrome P450 monooxygenase (CYP) 219
- d**
- DAG signaling 281
- Danielli–Davson unit model 21
- data processing 158–165. *See also* lipidomic data processing
  - biological networks 46
  - de novo lipid identification 159–161
  - and evaluation 46, 47
  - lipidomic data
- normalization 162–165
- targeted export 161, 162
- multivariate approaches 46
- software 46
- steps, in data processing workflow 46
- delta-9 desaturase 14
- diabetes 177–179
- diacylglycerides 201, 205
- diacylglycerol (DAG) 36, 37, 54, 55, 99, 112, 150, 244, 261, 279
- dihydrophosphingomyelin (dhSM) 24, 29
- 1,3-diphosphatidyl-*sn*-glycerol 299
- docosahexaenoic acid (DHA) 10, 24, 110, 111, 221, 229, 235, 278
- dopamine transporter (DAT) 284
- double bond position 108–110
  - targeted fragmentation 115–123
  - untargeted fragmentation 110–115
  - double bond stereochemistry 104, 105, 123, 124

**q**

quadrupole time-of-flight (QTOF)  
technology 6, 41, 42, 148, 151, 153, 154,  
222  
quality control plot 163

**r**

reactive oxygen species (ROS) 181  
recombinant DNA technology 21  
resolvins 219  
reverse cholesterol transport (RCT) 200  
robot-assisted extraction 39  
– procedures 41  
– sample preparation and lipid extraction 15  
rotor-stator homogenizer 39

**s**

saccharolipids (SL) 36, 37  
*Saccharomyces cerevisiae* 169  
saturation index 7  
scavenger receptors A1 (SR-AI) 199  
selected reaction monitoring (SRM)  
analysis 236, 322  
serine 36  
serine palmitoyltransferase (SPT) 181  
shotgun lipidomics 42–44  
– analytical validation 44, 45  
SM/PC ratio 209  
*sn* position 105–108  
soft ionization technology 222  
solid-phase extraction (SPE) protocols 41  
spectral data quality control 162  
sphinganine-1-phosphate 12  
sphingolipid 14  
– metabolite 185  
– precursor 181  
sphingolipidomics, in biology and disease 91  
– LC-MS/MS 91, 92  
– transcriptomic guided tissue imaging mass  
spectrometry 92, 93  
sphingolipids (SPs) 25, 36, 37, 101, 203, 204,  
209, 210, 244, 245, 272  
– analysis via targeted LC-MS/MS 76, 77  
– data analysis 90  
– description and nomenclature 75  
– in dyslipidemia 209, 210  
– extraction protocol 79–81  
– internal standards 77, 78  
– liquid chromatography 81–83  
– Cer, HexCer, LacCer, SM, ST, and  
Cer1P 84, 85  
– GlcCer and GalCer 85  
– LCBs and Cer1P 83, 84  
– mass spectrometry 85–87

– metabolism, application for 244, 245  
– minor 204  
– multiple reaction monitoring 88, 89  
– in normolipidemic subjects 203, 204  
– quality control 90, 91  
– standard curves, generation of 89  
sphingolipid–sterol–protein rafts 30  
sphingomyelin (SM) 24, 25, 151, 183, 187,  
201, 204, 206, 209, 234, 272  
sphingomyelinase (SMase) 206  
sphingosine kinase (SphK2), 185  
sphingosine 1-phosphate 12, 178, 185,  
204  
Spo14 regulatory factor 1 (Srf1) 281  
statin-induced muscle toxicity 262  
sterol lipids (STs) 36, 37  
sterols 22, 101, 205  
structure-specific fragment ions 159  
substantia nigra pars compacta (SNpc) 183  
subthalamic nucleus (STN) 287  
sum compositions 4, 5  
surfactants 25  
synaptic defects 270  
synaptosomal 1 (SYN1) 279

**t**

Tay–Sachs disease 187  
2-tetradecylglycidic acid 179  
thrombogenic collagenous matrix 180  
thromboxanes (TX) 220  
tissue homogenization 39  
toll-like receptor 4-TRIF 239  
total lipid extraction 39  
transmembrane domain (TMD) 11  
triacylglycerides 54, 201, 205, 210  
triacylglycerols (TAGs) 7, 36, 37, 60,  
101, 106, 110, 120, 148, 149, 197,  
258, 323  
triglycerides 38, 180, 184, 204  
triple quadrupole (QQQ) approaches 41, 43,  
45, 86, 87, 322, 323  
tumor mitochondria, lipidomic  
abnormalities 297, 298  
tumor-promoting molecule 185

**u**

uncoupling proteins (UCPs) 285  
user-specified *m/z* tolerance window 159

**v**

vaccenic acid 212  
vascular endothelial growth factor  
(VEGF) 185  
very low-density lipoprotein (VLDL) 38, 108,  
177, 198, 201, 203, 205, 212
