Preface *XVII*

Authors *XIX*

1	Introduction	<i>1</i>
1.1	Historical Aspects	<i>1</i>
1.2	Yeast as a Eukaryotic Model System	<i>1</i>
	Further Reading	<i>3</i>
2	Yeast Cell Architecture and Functions	<i>5</i>
2.1	General Morphology	<i>5</i>
2.2	Cell Envelope	<i>6</i>
	2.2.1 Cell Wall	<i>7</i>
	2.2.2 Plasma Membrane	<i>8</i>
2.3	Cytoplasm and Cytoskeleton	<i>8</i>
	2.3.1 Yeast Cytoplasm	<i>8</i>
	2.3.2 Yeast Cytoskeleton	<i>9</i>
	2.3.2.1 Microtubules	<i>9</i>
	2.3.2.2 Actin Structures	<i>9</i>
	2.3.2.3 Motor Proteins	<i>11</i>
	2.3.2.3.1 Myosins	<i>12</i>
	2.3.2.3.2 Kinesins	<i>13</i>
	2.3.2.3.3 Dynein	<i>12</i>
	2.3.2.4 Other Cytoskeletal Factors	<i>13</i>
	2.3.2.4.1 Proteins Interacting with the Cytoskeleton	<i>13</i>
	2.3.2.4.2 Transport of Organellar Components	<i>13</i>
2.4	Yeast Nucleus	<i>14</i>
	2.4.1 Overview	<i>14</i>
	2.4.2 Nuclear Pore	<i>14</i>
	2.4.2.1 Historical Developments	<i>14</i>
	2.4.2.2 Current View of the Nuclear Pore	<i>15</i>
	2.4.2.3 Yeast Nucleolus	<i>17</i>
	2.4.3 Yeast Chromosomes	<i>17</i>
2.5	Organellar Compartments	<i>17</i>
	2.5.1 ER and the Golgi Apparatus	<i>18</i>
	2.5.2 Transport Vesicles	<i>18</i>
	2.5.3 Vacuolar System	<i>20</i>
	2.5.3.1 Yeast Vacuole	<i>20</i>
	2.5.3.2 Vacuolar Degradation	<i>21</i>
	2.5.4 Endocytosis and Exocytosis	<i>21</i>
	2.5.5 Mitochondria	<i>21</i>
	2.5.5.1 Mitochondrial Structure	<i>21</i>
	2.5.6 Peroxisomes	<i>22</i>
	Further Reading	<i>23</i>

3	Yeast Metabolism	25
3.1	Metabolic Pathways and Energy	25
3.2	Catabolism of Hexose Carbon Sources	25
3.2.1	Principal Pathways	25
3.2.2	Respiration Versus Fermentation	26
3.2.3	Catabolism of Other Sugars – Galactose	27
3.2.4	Metabolism of Non-Hexose Carbon Sources	28
3.3	Gluconeogenesis and Carbohydrate Biosynthesis	30
3.3.1	Gluconeogenesis	30
3.3.2	Storage Carbohydrates	30
3.3.2.1	Glycogen	30
3.3.2.2	Trehalose	31
3.3.3	Unusual Carbohydrates	31
3.3.3.1	Unusual Hexoses and Amino Sugars	31
3.3.3.2	Inositol and its Derivatives	32
3.3.3.3	N- and O-Linked Glycosylation	33
3.3.4	Structural Carbohydrates	34
3.4	Fatty Acid and Lipid Metabolism	35
3.4.1	Fatty Acids	35
3.4.2	Lipids	35
3.4.3	Glycolipids	36
3.4.3.1	Phosphatidylinositol and Derivatives	36
3.4.3.2	Sphingolipids	38
3.4.3.3	Glycosylphosphatidylinositol (GPI)	39
3.4.4	Isoprenoid Biosynthesis	40
3.5	Nitrogen Metabolism	42
3.5.1	Catabolic Pathways	42
3.5.2	Amino Acid Biosynthesis Pathways	44
3.5.2.1	Glutamate Family	44
3.5.2.2	Aspartate Family	44
3.5.2.3	Branched Amino Acids	45
3.5.2.4	Lysine	46
3.5.2.5	Serine, Cysteine, and Glycine	46
3.5.2.6	Alanine	46
3.5.2.7	Aromatic Amino Acids	46
3.5.2.8	Histidine	47
3.5.2.9	Amino Acid Methylation	47
3.6	Nucleotide Metabolism	48
3.6.1	Pyrimidine Derivatives	48
3.6.2	Purine Derivatives	48
3.6.3	Deoxyribonucleotides	50
3.6.4	Nucleotide Modification	50
3.7	Phosphorus and Sulfur Metabolism	51
3.7.1	Phosphate	51
3.7.2	Sulfur	52
3.7.2.1	Fixation and Reduction of Sulfate	52
3.7.2.2	Cycle of Activated Methyl Groups	53
3.8	Vitamins and Cofactors	53
3.8.1	Biotin	53
3.8.2	Thiamine	53
3.8.3	Pyridoxine	54
3.8.4	NAD	54
3.8.5	Riboflavin Derivatives	54
3.8.6	Pantothenic Acid and Coenzyme A	55
3.8.7	Folate	55

3.8.8	Tetrapyrroles	55
3.8.9	Ubiquinone (Coenzyme Q)	56
3.9	Transition Metals	57
	Further Reading	58
4	Yeast Molecular Techniques	59
4.1	Handling of Yeast Cells	59
4.1.1	Growth of Yeast Cells	59
4.1.2	Isolation of Particular Cell Types and Components	59
4.2	Genetic Engineering and Reverse Genetics	59
4.2.1	Molecular Revolution	59
4.2.2	Transformation of Yeast Cells	61
4.2.2.1	Yeast Shuttle Vectors	61
4.2.2.2	Yeast Expression Vectors	62
4.2.2.3	Secretion of Heterologous Proteins from Yeast	63
4.2.2.4	Fluorescent Proteins Fused to Yeast Proteins	63
4.2.3	Yeast Cosmid Vectors	64
4.2.4	Yeast Artificial Chromosomes	65
4.3	More Genetic Tools from Yeast Cells	65
4.3.1	Yeast Two-Hybrid System	65
4.3.2	Yeast Three-Hybrid System	66
4.3.3	Yeast One-Hybrid (Matchmaker) System	67
4.4	Techniques in Yeast Genome Analyses	67
4.4.1	Microarrays	67
4.4.1.1	DNA-Based Approaches	67
4.4.1.2	Proteome Analyses	68
4.4.2	Affinity Purification	70
4.4.3	Mass Spectrometry	70
	Further Reading	72
5	Yeast Genetic Structures and Functions	73
5.1	Yeast Chromosome Structure and Function	73
5.1.1	Yeast Chromatin	73
5.1.1.1	Organization of Chromatin Structure	73
5.1.1.2	Modification of Chromatin Structure	73
5.1.1.2.1	Modification of Histones	73
5.1.1.2.2	Remodeling Chromatin Structure Overview	81
5.1.2	Centromeres	85
5.1.3	Replication Origins and Replication	85
5.1.3.1	Initiation of Replication	85
5.1.3.2	Replication Machinery	88
5.1.3.2.1	DNA Polymerases	88
5.1.3.2.2	Replication and Replication Factors	89
5.1.3.2.3	Postreplication Repair and DNA Damage Tolerance	89
5.1.3.3	Replication and Chromatin	90
5.1.3.3.1	Chromatin Reorganization	90
5.1.3.3.2	Silencing and Boundaries	91
5.1.3.4	DNA Damage Checkpoints	93
5.1.3.4.1	Checkpoints During Replication	93
5.1.3.4.2	DSB Repair	94
5.1.4	Telomeres	96
5.1.5	Transposons in Yeast	98
5.1.5.1	Classes of Transposable Elements	98
5.1.5.2	Retrotransposons in <i>S. cerevisiae</i>	98
5.1.5.2.1	Ty Elements and their Genomes	98

5.1.5.2.2	Behavior of Ty Elements	99
5.1.5.2.3	Expression of Ty Elements	100
5.1.5.3	Ty Replication	101
5.1.5.4	Interactions between Ty Elements and their Host	102
5.2	Yeast tRNAs, Genes, and Processing	103
5.2.1	Yeast tRNAs	103
5.2.1.1	Yeast Led the Way to tRNA Structure	103
5.2.1.2	Yeast tRNA Precursors and Processing	105
5.2.2	Current Status of Yeast tRNA Research	106
5.2.2.1	Yeast tRNAs and their Genes	106
5.2.2.2	tRNA Processing and Maturation	106
5.2.2.3	Participation of tRNAs in an Interaction Network	109
5.2.2.3.1	Aminoacylation of tRNAs	109
5.2.2.3.2	Rules, Codon Recognition, and Specific tRNA Modification	111
5.2.2.3.3	Recognition of tRNAs in the Protein Biosynthetic Network	111
5.3	Yeast Ribosomes: Components, Genes, and Maturation	113
5.3.1	Historical Overview	113
5.3.2	Ribosomal Components	113
5.3.2.1	Ribosomal RNAs	113
5.3.2.2	Ribosomal Proteins	114
5.3.3	Components and Pathways of Yeast Ribosome Maturation	114
5.4	Messenger RNAs	116
5.4.1	First Approaches to the Structure of Yeast mRNAs	116
5.4.2	Introns and Processing of pre-mRNA	117
5.4.3	Provenance of Introns	121
5.5	Extrachromosomal Elements	121
5.5.1	Two Micron DNA	121
5.5.2	Killer Plasmids	121
5.5.3	Yeast Prions	121
5.6	Yeast Mitochondrial Genome	123
	Further Reading	125
6	Gene Families Involved in Cellular Dynamics	127
6.1	ATP- and GTP-Binding Proteins	127
6.1.1	ATPases	127
6.1.1.1	P-Type ATPases	127
6.1.1.2	V-Type ATPases	127
6.1.1.3	Chaperones, Cochaperones, and Heat-Shock Proteins	128
6.1.1.3.1	HSP70 Family	128
6.1.1.3.2	HSP40 Family	129
6.1.1.3.3	HSP90 Family	129
6.1.1.3.4	HSP60 Family	132
6.1.1.3.5	HSP104	132
6.1.1.3.6	HSP26 and HSP42	132
6.1.1.3.7	HSP150	133
6.1.1.3.8	HSP31/32/33	133
6.1.1.3.9	HSP30	133
6.1.1.3.10	HSP10	133
6.1.1.3.11	Others	133
6.1.1.4	Other ATP-Binding Factors	133
6.1.2	Small GTPases and Their Associates	133
6.1.2.1	RAS Family	134
6.1.2.2	RAB Family	134
6.1.2.3	RHO/RAC Family	134
6.1.2.4	ARF Family	134
6.1.2.5	Ran GTPase	136
6.1.3	G-Proteins	136

6.1.3.1	Mating Pheromone G-Protein	136
6.1.3.2	Gpr1-Associated G-Protein	137
6.1.3.3	RGS Family	137
6.1.3.4	G-Like Proteins	137
6.2	Regulatory ATPases: AAA and AAA ⁺ Proteins	138
6.2.1	ATP-Dependent Proteases	138
6.2.2	Membrane Fusion Proteins	139
6.2.3	Cdc48	139
6.2.4	Peroxisomal AAA Proteins	139
6.2.5	Katanin and Vps4p	139
6.2.6	Dynein	139
6.2.7	DNA Replication Proteins	140
6.2.8	RuvB-Like Proteins	140
6.2.9	Other AAA ⁺ Yeast Proteins	140
6.3	Protein Modification by Proteins and Programmed Protein Degradation	141
6.3.1	Ubiquitin-Proteasome System (UPS)	141
6.3.1.1	Initial Discoveries	141
6.3.1.2	Ubiquitin and Factors in the Ubiquitin-Mediated Pathway	141
6.3.1.3	E3 Ubiquitin Ligases	142
6.3.1.3.1	HECT-Type Ligases	142
6.3.1.3.2	RING Finger-Type Ligases	143
6.3.1.3.3	Functions of Selected E3 Ligases	144
6.3.1.4	Ubiquitin-Specific Proteases	147
6.3.2	Yeast Proteasomes	147
6.3.2.1	Initial Discoveries	147
6.3.2.2	Structure of the Proteasome	148
6.3.2.3	Regulation of Yeast Proteasome Activity	148
6.3.3	More Functions for Ubiquitin	150
6.3.4	Ubiquitin-Like Proteins (ULPs) and Cognate Factors	151
6.3.4.1	SUMO	151
6.3.4.2	Rub1	152
6.3.4.3	Ubiquitin Domain Proteins	152
6.3.4.4	Substrate Delivery to the Proteasome	153
6.4	Yeast Protein Kinases and Phosphatases	153
6.4.1	Protein Kinases in Yeast	153
6.4.1.1	PKA as a Prototype Kinase	153
6.4.1.2	Yeast Possesses a Multitude of Kinases	153
6.4.2	Protein Phosphatases in Yeast	158
6.5	Yeast Helicase Families	159
6.5.1	RNA Helicases in Yeast	166
6.5.1.1	Structures and Motifs	166
6.5.1.2	Functions of RNA Helicases in Yeast	167
6.5.2	DNA Helicases in Yeast	168
6.5.2.1	Structures and Motifs	168
6.5.2.2	Functions of DNA Helicases	168
6.5.2.2.1	ASTRA Complex	170
6.5.2.2.2	RAD Epistasis Group	170
6.5.2.2.3	Monomeric DNA Helicases	170
	Further Reading	173

7 Yeast Growth and the Yeast Cell Cycle 175

7.1	Modes of Propagation	175
7.1.1	Vegetative Reproduction	175
7.1.1.1	Budding	175
7.1.1.2	Septins and Bud Neck Filaments	178
7.1.1.3	Spindle Pole Bodies and their Dynamics	179

7.1.2	Sexual Reproduction	181
7.1.3	Filamentous Growth	181
7.1.4	Yeast Aging and Cell Death	183
7.1.4.1	Yeast Lifespan	183
7.1.4.2	Yeast Apoptosis	184
7.1.4.2.1	External Triggers of Yeast Apoptosis	184
7.1.4.2.2	Endogenous Triggers of Yeast Apoptosis	185
7.1.4.2.3	Regulation of Yeast Apoptosis	185
7.2	Cell Cycle	186
7.2.1	Dynamics and Regulation of the Cell Cycle	186
7.2.1.1	Some Historical Notes	186
7.2.1.2	Periodic Events in the First Phases of the Cell Cycle	188
7.2.1.2.1	CDK and Cyclins	189
7.2.1.2.2	Regulation of the CDK/Cyclin System	190
7.2.2	Dynamics and Regulation of Mitosis	193
7.2.2.1	Sister Chromatids: Cohesion	193
7.2.2.2	Spindle Assembly Checkpoint	196
7.2.2.3	Chromosome Segregation	198
7.2.2.4	Regulation of Mitotic Exit	199
7.3	Meiosis	200
7.3.1	Chromosome Treatment During Meiosis	200
7.3.2	Regulation of Meiosis	201
7.3.2.1	Early, Middle, and Late Meiotic Events	201
7.3.2.2	Sporulation	202
7.3.3	Checkpoints in Meiosis	202
	Further Reading	204
8	Yeast Transport	207
8.1	Intracellular Protein Sorting and Transport	207
8.1.1	“Signal Hypothesis”	207
8.1.2	Central Role of the ER	207
8.1.3	Intracellular Protein Trafficking and Sorting	208
8.1.3.1	Some History	208
8.1.3.2	Membrane Fusions	210
8.1.3.2.1	SNAREs and All That	210
8.1.3.2.2	Small GTPases and Transport Protein Particles	211
8.1.3.3	ER-Associated Protein Degradation	214
8.1.3.4	Golgi Network	215
8.1.3.5	Vacuolar Network	216
8.1.3.5.1	Autophagy	216
8.1.3.5.2	Cytoplasm-to-Vacuole Targeting (CVT) Pathway	217
8.1.3.5.3	Nomenclature in Autophagy and Cvt	218
8.1.3.6	Endocytosis and the Multivesicular Body (MVB) Sorting Pathway	218
8.1.3.6.1	Endocytosis by Vesicles Budding from the Membrane	218
8.1.3.6.2	Endosomal Sorting Complexes Required for Transport (ESCRTs)	219
8.1.3.7	Exocytosis	221
8.2	Nuclear Traffic	221
8.2.1	Nuclear Transport	221
8.2.2	Nuclear mRNA Quality Control	223
8.2.3	Nuclear Export of mRNA	224
8.2.4	Nuclear Dynamics of tRNA	225
8.3	Membrane Transporters in Yeast	226
8.3.1	Transport of Cations	226
8.3.2	Channels and ATPases	226
8.3.2.1	Channels	226
8.3.2.2	ATP-Dependent Permeases	226

8.3.3	Ca ²⁺ -Signaling and Transport Pathways in Yeast	227
8.3.3.1	Ca ²⁺ Transport	227
8.3.3.2	Ca ²⁺ -Mediated Control	228
8.3.3.3	Ca ²⁺ and Cell Death	228
8.3.4	Transition Metal Transport	228
8.3.4.1	Iron	229
8.3.4.2	Copper	230
8.3.4.3	Zinc	231
8.3.4.4	Manganese	232
8.3.5	Anion Transport	232
8.3.5.1	Phosphate Transport	232
8.3.5.2	Transport of Other Anions	233
8.3.6	Nutrient and Ammonium Transport	233
8.3.6.1	Transport of Carbohydrates	233
8.3.6.2	Amino Acid Transport	234
8.3.6.3	Transport of Nucleotide Constituents/Nucleotide Sugars	234
8.3.6.4	Transport of Cofactors and Vitamins	234
8.3.6.5	Ammonium Transport	234
8.3.7	Mitochondrial Transport	235
8.3.7.1	Transport of Substrates	235
8.3.7.2	Electron Transport Chain	236
8.3.7.3	Proton Motive Force – ATP Synthase	239
	Further Reading	240

9 Yeast Gene Expression 241

9.1	Transcription and Transcription Factors	241
9.2	RNA Polymerases and Cofactors	241
9.2.1	RNA Polymerase I	242
9.2.2	RNA Polymerase III	243
9.2.3	RNA Polymerase II	245
9.2.4	General Transcription Factors (GTFs)	246
9.2.4.1	TBP	246
9.2.4.2	TFIIA	247
9.2.4.3	TFIIB	247
9.2.4.4	TFIIE and TFIIIF	247
9.2.4.5	TFIIH	247
9.2.4.6	TFIIS	247
9.2.4.7	TFIID	247
9.2.4.8	First Simplified Pictures of Transcription	247
9.2.5	Transcriptional Activators	248
9.2.5.1	TAFs	249
9.2.5.2	SRB/Mediator	249
9.2.5.3	Depicting Transcriptional Events	249
9.3	Transcription and its Regulation	251
9.3.1	Regulatory Complexes	251
9.3.1.1	SAGA	251
9.3.1.2	PAF Complex	252
9.3.1.3	CCR4–NOT Complex	252
9.3.1.4	Other Factors and Complexes	253
9.3.2	Modification of Chromatin During Polymerase II Transcription	254
9.3.2.1	Early Endeavors	254
9.3.2.2	Chromatin-Modifying Activities and Transcriptional Elongation	254
9.3.2.3	Models for Specific Chromatin Remodeling During Transcription	255
9.3.2.3.1	GAL4 System	256

9.3.2.3.2	PHO System	256
9.3.2.3.3	Other Studies	257
9.3.2.3.4	Global Nucleosome Occupancy	258
9.3.3	Nucleosome Positioning	259
9.4	DNA Repair Connected to Transcription	259
9.4.1	Nucleotide Excision Repair (NER)	259
9.4.2	Mismatch Repair	261
9.4.3	Base Excision Repair	261
9.5	Coupling Transcription to Pre-mRNA Processing	261
9.5.1	Polyadenylation	261
9.5.2	Generation of Functional mRNA	263
9.5.2.1	General Principles	263
9.5.2.2	Control and Pathways of mRNA Decay	265
9.5.2.2.1	Exosome-Mediated Pathways in Yeast	265
9.5.2.2.2	Nonsense-Mediated mRNA Decay (NMD)	267
9.6	Yeast Translation Apparatus	268
9.6.1	Initiation	269
9.6.2	Elongation and Termination	270
9.7	Protein Splicing – Yeast Inteins	271
	Further Reading	271
10	Molecular Signaling Cascades and Gene Regulation	273
10.1	Ras–cAMP Signaling Pathway	273
10.2	MAP Kinase Pathways	275
10.2.1	Mating-Type Pathway	275
10.2.2	Filamentation/Invasion Pathway	278
10.2.3	Control of Cell Integrity	279
10.2.4	High Osmolarity Growth Pathway	280
10.2.5	Spore Wall Assembly Pathway	280
10.2.6	Influence of MAP Kinase Pathways in Cell Cycle Regulation	281
10.3	General Control by Gene Repression	281
10.3.1	Ssn6–Tup1 Repression	281
10.3.2	Activation and Repression by Rap1	283
10.4	Gene Regulation by Nutrients	283
10.4.1	TOR System	283
10.4.1.1	Structures of the TOR Complexes	283
10.4.1.2	Signaling Downstream of TORC1	284
10.4.1.3	Signaling Branches Parallel to TORC1	286
10.4.1.4	Internal Signaling of TORC1	286
10.4.1.5	TOR and Aging	286
10.4.2	Regulation of Glucose Metabolism	287
10.4.2.1	Major Pathway of Glucose Regulation	287
10.4.2.2	Alternative Pathway of Glucose Regulation	289
10.4.3	Regulation of Galactose Metabolism	289
10.4.4	General Amino Acid Control	290
10.4.5	Regulation of Arginine Metabolism	293
10.5	Stress Responses in Yeast	294
10.5.1	Temperature Stress and Heat-Shock Proteins	294
10.5.2	Oxidative and Chemical Stresses	295
10.5.2.1	AP-1 Transcription Factors in Yeast	295
10.5.2.2	STRE-Dependent System	296
10.5.2.3	PDR: ABC Transporters	296
10.5.3	Unfolded Protein Response	298
	Further Reading	299

11	Yeast Organellar Biogenesis and Function	301
11.1	Mitochondria	301
11.1.1	Genetic Biochemistry of Yeast Mitochondria	301
11.1.2	Mitochondrial Functions Critical to Cell Viability	303
11.1.2.1	Superoxide Dismutase	303
11.1.2.2	Iron Homeostasis	304
11.1.3	Biogenesis of Mitochondria: Protein Transport	305
11.1.3.1	Presequence Pathway and the MIA Pathway	307
11.1.3.2	Membrane Sorting Pathway: Switch Between TIM22 and TIM23	307
11.1.3.3	β -Barrel Pathway	308
11.1.3.4	Endogenous Membrane Insertion Machinery	308
11.1.4	Mitochondrial Quality Control and Remodeling	308
11.2	Peroxisomes	310
11.2.1	What They Are – What They Do	310
11.2.2	Protein Import and Cargo	311
	Further Reading	312
12	Yeast Genome and Postgenomic Projects	313
12.1	Yeast Genome Sequencing Project	313
12.1.1	Characteristics of the Yeast Genome	314
12.1.2	Comparison of Genetic and Physical Maps	315
12.1.3	Gene Organization	315
12.1.3.1	Protein-Encoding Genes	315
12.1.3.2	Overlapping ORFs, Pseudogenes, and Introns	316
12.1.4	Genetic Redundancy: Gene Duplications	317
12.1.4.1	Duplicated Genes in Subtelomeric Regions	317
12.1.4.2	Duplicated Genes Internal to Chromosomes	318
12.1.4.3	Duplicated Genes in Clusters	318
12.1.5	Gene Typification and Gene Families	318
12.1.5.1	Gene Functions	318
12.1.5.2	tRNA Multiplicity and Codon Capacity in Yeast	319
12.1.5.2.1	tRNA Gene Families	319
12.1.5.2.2	Correlation of tRNA Abundance to Gene Copy Number	320
12.1.5.2.3	tRNA Gene Redundancy and Codon Selection in Yeast	320
12.2	Yeast Functional Genomics	322
12.2.1	Early Functional Analysis of Yeast Genes	322
12.2.2	Yeast Transcriptome	322
12.2.2.1	Genomic Profiling	322
12.2.2.2	Protein–DNA Interactions	323
12.2.3	Yeast Proteome	324
12.2.3.1	Protein Analysis	324
12.2.3.2	Proteome Chips	325
12.2.3.3	Protein–Protein Interactions and Protein Complexes: The Yeast Interactome	325
12.2.4	Yeast Metabolic Networks	327
12.2.4.1	Metabolic Flux	327
12.2.4.2	Yeast Metabolic Cycle	328
12.2.5	Genetic Landscape of a Cell	329
12.2.6	Data Analysis Platforms	329
12.3	Yeast Systems Biology	330
12.4	Yeast Synthetic Biology	332

- 15.1 Selection of Model Genomes for the Génolevures and Other Sequencing Projects 371
- 15.2 Ecology, Metabolic Specificities, and Scientific Interest of Selected Species 373
 - 15.2.1 *Candida glabrata* – A Pathogenic Cousin of *S. cerevisiae* 373
 - 15.2.2 *Lachancea (Saccharomyces) kluyveri* – An Opportunistic Anaerobe 375
 - 15.2.3 *Kluyveromyces lactis* – A Respiro-Fermentative Yeast 376
 - 15.2.4 *Eremothecium (Ashbya) gossypii* – A Filamentous Plant Pathogen 377
 - 15.2.5 *Debaryomyces hansenii* – An Osmotolerant Yeast 378
 - 15.2.6 *Scheffersomyces (Pichia) stipitis* – A Xylose-Utilizing Yeast 379
 - 15.2.7 *Komagataella (Pichia) pastoris* – A Methanol-Utilizing Yeast 380
 - 15.2.8 *Blastobotrys (Arxula) adenivorans* – A Thermotolerant Yeast 381
 - 15.2.9 *Yarrowia lipolytica* – An Oily Yeast 382
- 15.3 Differences in Architectural Features and Genetic Outfit 383
 - 15.3.1 Genome Sizes and Global Architecture 383
 - 15.3.2 Chromosome Architecture and Synteny 383
 - 15.3.3 Arrangements of Genetic Elements 385
 - 15.3.3.1 Replication Origins, Centromeres, and Telomeres 385
 - 15.3.3.2 Gene Arrays 386
 - 15.3.3.2.1 Megasatellites 386
 - 15.3.3.2.2 Tandem Gene Arrays 387
 - 15.3.3.2.3 Yeast Pseudogenes 387
 - 15.3.4 Gene Families and Diversification of the Protein Repertoires 388
 - 15.3.4.1 Biological Divergence 388
 - 15.3.4.2 Diversification of the Gene Repertoire 389
 - 15.3.5 tRNAs and rRNAs 391
 - 15.3.6 Other Noncoding RNAs 392
 - 15.3.7 Introns 393
 - 15.3.8 Transposons 395
 - 15.3.9 Mitochondrial DNA 395
 - 15.3.10 DNA Plasmids 397
- 15.4 Molecular Evolution of Functions 397
 - 15.4.1 Proteome Diversification and Loss or Gain of Functions 398
 - 15.4.1.1 Loss and Relocalization of Pathways 398
 - 15.4.1.2 Diversification of Paralogs 398
 - 15.4.1.3 Horizontal Transfers 398
 - 15.4.1.4 Evolution of Cell Identity 399
 - 15.4.1.5 Heterochromatin, Gene Silencing, and RNA Interference 399
 - 15.4.2 Changes in Transcriptional Regulation 400
 - 15.4.2.1 Evolution of the *GAL* Regulon 400
 - 15.4.2.2 Glucose Effects and Adaptation to Anoxic Conditions 401
 - 15.4.2.3 Stress Responses 401
 - 15.4.2.4 Recruitment of New Transcription Factors and DNA-Binding Sites 402
 - 15.4.2.5 New Combinatorial Controls 403
 - 15.4.2.6 Nucleosome Positioning in Evolution 403
 - 15.4.3 Changes in Post-Transcriptional Regulations 404
