

Outline

Part I: Growing

- 1 The Coffee Plant 3
- 2 Botany, Genetics and Genomics of Coffee 25
- 3 Coffee Selection and Breeding 61
- 4 Coffee Propagation 91
- 5 Biotechnologies Applied to Coffee 141
- 6 Environmental Factors Suitable for Coffee Cultivation 168
- 7 Establishing a Coffee Plantation 182
- 8 Crop Maintenance 250
- 9 Vermicomposting in Coffee Cultivation 328
- 10 Organic Coffee 343
- 11 Frost in Coffee Crops: Frost Characteristics, Damaging Effects on Coffee and Alleviation Options 359
- 12 Importance of Organic Matter and Biological Fertility in Coffee Soils 375
- 13 Sustainable Coffee Production 388
- 14 Shade Management and its Effect on Coffee Growth and Quality 395

Part II: Pests & Diseases

- 1 Coffee Pests in Africa 425
- 2 Major Pests of Coffee in the Asia–Pacific Region 463
- 3 Nematodes in Coffee 478
- 4 Coffee Diseases 495
- 5 Viral Diseases in Coffee 550
- 6 Resistance to Coffee Leaf Rust and Coffee Berry Disease 557
- 7 Spraying Equipment for Coffee 571
- 8 Quarantine for Coffee 597

Part III: Harvesting & Processing

- 1 Yield Estimation and Harvest Period 601
- 2 Harvesting and Green Coffee Processing 610
- 3 Ecological Processing of Coffee and Use of Byproducts 724

Part IV: Storage, Shipment, Quality

- 1 Green Coffee Storage 741
- 2 Shipment of Green Coffee 759
- 3 Green Coffee Defects 766
- 4 Factors Influencing the Quality of Green Coffee 797
- 5 Coffee Bean Quality Assessment 818

Part V: Economics

- 1 Economic Aspects of Coffee Production 831
- 2 Technology Transfer 843

Part VI: Data & Information

- 1 Units and Conversion Tables 859
- 2 Information Sources 904
- 3 Data on Coffee 925
- 4 Acronyms and Terms used in Coffee Production 937

Index 965

Part I: Growing

- 1 The Coffee Plant** 3
J. N. Wintgens
- 1.1 Taxonomy 3
 - 1.2 Origins 3
 - 1.3 Areas of Cultivation 3
 - 1.4 Botany 4
 - 1.4.1 Seed and Germination 4
 - 1.4.2 Root System 7
 - 1.4.3 Framework of the Tree 9
 - 1.4.4 Leaves 10
 - 1.4.5 Fruit Formation 11
 - 1.4.5.1 The Flower 11
 - 1.4.5.2 The Flowering Process 12
 - 1.4.5.3 Pollination 15
 - 1.4.5.4 The Fruit 15
 - 1.5 Harvesting Strategies and Crop Management 19
 - 1.6 Photosynthesis 19
 - 1.6.1 The Biennial Pattern 20
 - 1.6.2 The Leaf Area Index (LAI) 20

- 1.7 Abnormalities in Beans 20
 - 1.7.1 Polyembryony (Elephant Beans) 20
 - 1.7.2 Monospermy – Peaberry or Caracoli 21
 - 1.7.3 Polyspermy 22
 - 1.7.4 Empty Beans (Vanos) 23
 - 1.7.5 Misshapen Beans 23
 - 1.7.6 Bean Size 23

- 2 Botany, Genetics and Genomics of Coffee 25**
A. Charrier, P. Lashermes and A. B. Eskes
 - 2.1 Introduction 25
 - 2.2 Botanical Description and Taxonomy 25
 - 2.2.1 Botany 25
 - 2.2.2 Botanical Information 26
 - 2.2.2.1 Herbaria 26
 - 2.2.2.2 Recent Collecting Missions 29
 - 2.2.3 Taxonomy 29
 - 2.3 Genetic Diversity and Phylogeny 33
 - 2.3.1 Genetic Diversity 33
 - 2.3.2 Phylogenies 34
 - 2.3.3 Origin of *C. arabica* 36
 - 2.4 Coffee genome 36
 - 2.4.1 Cytotaxonomy 36
 - 2.4.2 Genetic maps 37
 - 2.4.3 Genomic resources 38
 - 2.5 Cultivated Coffee Populations 38
 - 2.5.1 Cultivated Species 38
 - 2.5.2 *C. arabica* Populations 39
 - 2.5.2.1 Spontaneous and Subspontaneous Accessions 39
 - 2.5.2.2 Accessions from Yemen 42
 - 2.5.2.3 Genetic Structure 42
 - 2.5.2.4 Mutants of Commercial Interest 43
 - 2.5.2.5 Natural Crosses with Diploid Species 45
 - 2.5.3 *C. canephora* Populations 45
 - 2.5.3.1 Spontaneous Populations 46
 - 2.5.3.2 Traditionally Cultivated Populations 50
 - 2.5.3.3 Natural crosses with diploid species 50
 - 2.6 Conservation 51
 - 2.6.1 Coffee Gene Banks 51
 - 2.6.2 *In Vitro* Techniques and Cryopreservation 53
 - 2.6.3 *In Situ* Conservation 55
 - 2.7 Future Outlook 55
 - 2.8 Acknowledgments 56

3	Coffee Selection and Breeding	61
	<i>A. B. Eskes and Th. Leroy</i>	
3.1	Introduction	61
3.1.1	General context	61
3.1.2	Characteristics of Coffee Species related to Breeding	62
3.2	History of Coffee Selection	62
3.2.1	<i>C. arabica</i>	62
3.2.2	Diploid Coffee Species	63
3.2.3	Interspecific Crosses	64
3.3	Selection Criteria	65
3.3.1	Agronomic Traits	65
3.3.1.1	Yield	65
3.3.1.2	Vigor	65
3.3.1.3	Visual Breeders Score	65
3.3.1.4	Growth Habit	65
3.3.1.5	Yield Stability	66
3.3.2	Resistances	66
3.3.2.1	Fungal Diseases	66
3.3.2.2	Physiological Disorders	66
3.3.2.3	Resistance to Nematodes	66
3.3.2.4	Resistance to Insects	67
3.3.3	Quality	67
3.3.3.1	Technological Features	67
3.3.3.2	Flavor Features	68
3.4	Breeding Methods and Techniques	68
3.4.1	Generalities	68
3.4.2	Selection Methods Applied to <i>C. arabica</i>	69
3.4.2.1	Yield	70
3.4.2.2	Disease Resistance	70
3.4.2.3	Nematode Resistance	70
3.4.2.4	Insect Resistance	71
3.4.3	Selection Methods Applied to <i>C. canephora</i>	71
3.4.3.1	Conventional Hybrid Selection	71
3.4.3.2	Conventional Clone Selection	73
3.4.3.3	Reciprocal Recurrent Selection	73
3.4.3.4	Interspecific Hybridization	74
3.4.4	Breeding Techniques and Tools	74
3.5	Variety Trials	76
3.5.1	Statistical Layout	76
3.5.2	Observations to be Carried Out	77
3.5.3	Statistical Analyses	77
3.6	Description of Main Cultivated Varieties	78
3.6.1	Selected <i>C. arabica</i> Varieties	78
3.6.1.1	Typica-type Varieties	78
3.6.1.2	Bourbon-type Varieties	78

3.6.1.3	S795 Variety	78
3.6.1.4	Java Variety	79
3.6.1.5	Maragogipe	79
3.6.1.6	Caturra	79
3.6.1.7	Mundo Novo	79
3.6.1.8	Catuai	80
3.6.1.9	Catimor- and Sarchimor-type Varieties	80
3.6.1.10	Icatu	81
3.6.1.11	Ruiru 11	81
3.6.1.12	Root-stock Varieties for Nematode Resistance	81
3.6.2	Selected <i>C. canephora</i> Varieties	82
3.7	Multiplication of Selected Varieties	82
3.8	Conclusions and Perspectives	83
4	Coffee Propagation	91
	<i>J. N. Wintgens and A. Zamarripa C.</i>	
4.1	Background	91
4.1.1	Productivity	91
4.1.2	Coffee Quality	91
4.1.3	Production Costs	91
4.2	Propagation Methods	92
4.3	The Choice of a Propagation System	92
4.3.1	Arabica	92
4.3.2	<i>Coffea canephora</i> (Robusta, Conillon) and other Allogamic Species (Excelsa, Liberica)	92
4.4	Propagation by Seeds	93
4.4.1	The Selection and Preparation of Seeds	93
4.4.2	Sowing Directly in the Field	95
4.4.3	Sowing in Nurseries	95
4.4.3.1	The Nursery Site	95
4.4.3.2	Layout of the Nursery	96
4.5	Vegetative Propagation	106
4.5.1	Grafting	106
4.5.1.1	Splice or Approach Grafting (Ingles Simple)	107
4.5.1.2	Wedge Grafting or Reyna Method (Injerto de Incrustación)	107
4.5.1.3	Grafting Transplanted Seedlings	111
4.5.1.4	Hypocotyledonary Grafting with Somatic Embryos and Microcuttings	111
4.5.1.5	Coffee Rehabilitation	112
4.5.1.6	Necessary Precautions to be taken when grafting or budding	115
4.5.1.7	Advantages of Grafting Arabica on Canephora	119
4.5.1.8	Disadvantages of Grafting	119
4.5.2	Horticultural Cutting	119
4.5.2.1	Choosing the Site for a Propagation Centre	119
4.5.2.2	The Root-stock Orchard	119

- 4.6 Conditions for Successful Grafting and Horticultural Cutting 130
 - 4.6.1 The Influence of the Vegetal Material 130
 - 4.6.2 Environmental Conditions 130
- 4.7 *In Vitro* Propagation 131
 - 4.7.1 Microcuttings 131
 - 4.7.2 Somatic Embryogenesis 133
- 4.8 Transfer of *In Vitro* Produced Material 133
 - 4.8.1 Frozen or Dehydrated Cellular Mass (Calluses) 133
 - 4.8.2 Frozen or Dehydrated Embryos 134
 - 4.8.3 Sterile Microplants 134
 - 4.8.4 Rooted Microplants (Non-sterile) 134
 - 4.8.5 “Bare-root” Microplants (Non-sterile) 134
- 4.9 The Cost of Propagation Material 134
- 4.10 The Choice of a Propagation Method 136
 - 4.10.1 The Pros and Cons of Different Varieties of Coffee 136
 - 4.10.2 The Supply of Clonal Material 136
 - 4.10.3 Requirements Influence the Alternative Choices 137
- 4.11 How to Plant Clones 137
- 4.12 Expression of the Potential of Planting Material 139

- 5 Biotechnologies Applied to Coffee 141**
 - A. Zamarripa C. and V. Pétiard*
 - 5.1 Definition and Biological Bases 141
 - 5.2 Markers for Identification/Genetic Mapping/Selection 142
 - 5.2.1 Introduction 142
 - 5.2.2 Techniques 143
 - 5.2.2.1 Isozymes 143
 - 5.2.2.2 RAPD 143
 - 5.2.2.3 RFLP 144
 - 5.2.2.4 SSRs 144
 - 5.2.3 Applications to Coffee 146
 - 5.3 Cryopreservation 148
 - 5.3.1 Introduction 148
 - 5.3.2 Methods 149
 - 5.3.2.1 Conventional Cryoconservation 149
 - 5.3.2.2 Simplified Method 149
 - 5.3.2.3 Pre-drying/Freezing 149
 - 5.3.3 Applications to Coffee 149
 - 5.4 Haplomethods 150
 - 5.4.1 Introduction 150
 - 5.4.2 Methods 151
 - 5.4.3 Applications to Coffee 152
 - 5.5 Somatic Embryogenesis 152
 - 5.5.1 Introduction 153
 - 5.5.2 Methods 153

- 5.5.2.1 Induction 154
- 5.5.2.2 Multiplication 155
- 5.5.2.3 Expression: Production of Somatic Embryos 155
- 5.5.2.4 Maturation: Development up to the Green Stage 156
- 5.5.2.5 Acclimatization to *Ex Vitro* Conditions 156
- 5.5.3 Applications to Coffee 157
- 5.6 Somaclonal Variation 158
 - 5.6.1 Introduction 158
 - 5.6.2 Methods 158
 - 5.6.3 Applications to Coffee 159
- 5.7 Genetic Engineering 159
 - 5.7.1 Introduction 159
 - 5.7.2 Methods 160
 - 5.7.2.1 Gene of Interest 160
 - 5.7.2.2 Introduction of the Gene of Interest: Transformation 161
 - 5.7.2.3 Regeneration of Transformed Plants 162
 - 5.7.2.4 Applications to Coffee 162
- 5.8 Conclusions 163

- 6 Environmental Factors Suitable for Coffee Cultivation 168**
F. Descroix and J. Snoeck
 - 6.1 Temperature 168
 - 6.1.1 Arabica 168
 - 6.1.2 Robusta 169
 - 6.2 Water Availability 169
 - 6.2.1 Rainfall 169
 - 6.2.2 Atmospheric Humidity 170
 - 6.3 Sunlight and Shading 171
 - 6.4 Wind 171
 - 6.5 Soil Characteristics 172
 - 6.6 Topography 176

- 7 Establishing a Coffee Plantation 182**
J. N. Wintgens and F. Descroix
 - 7.1 Choice of Site 182
 - 7.1.1 General Considerations 182
 - 7.1.2 Environmental and Physical Factors 182
 - 7.1.2.1 Macroclimatic Features 182
 - 7.1.2.2 Topographic Features 183
 - 7.1.2.3 Identification of Sites for more Detailed Study 183
 - 7.1.2.4 Detailed Studies of Selected Sites 185
 - 7.1.3 The Socioeconomic Environment 187
 - 7.2 Planning the Plantation Infrastructure 189
 - 7.2.1 Overall Layout of the Plantation 189
 - 7.2.2 Housing and Social Infrastructure 189

- 7.2.3 Office Accommodation 190
- 7.2.4 Processing and Storage Facilities 190
- 7.2.5 Workshops and Machinery Sheds 190
- 7.2.6 Other Special Purpose Land Areas 190
- 7.2.7 Preparation of Plantation Area Map 191
- 7.3 Land Development 192
 - 7.3.1 Land Clearance 192
 - 7.3.2 Land Improvement Measures 194
 - 7.3.3 Land Preparation before Planting the Coffee 196
 - 7.3.3.1 Soil Conservation Needs 196
 - 7.3.3.2 Contour Planting 197
 - 7.3.3.3 Transversal Planting 202
 - 7.3.3.4 Measures to Control Removal of Rainfall Run-off 202
 - 7.3.3.5 Limitation of Topsoil Removal by Absorption Pits 205
 - 7.3.3.6 Other Soil Conservation Measures 205
 - 7.4 The Interplanting of Coffee 208
 - 7.4.1 The Use of Cover Plants in Coffee 208
 - 7.4.2 Strip Cropping for Erosion Control 212
 - 7.4.3 Shade Trees in Coffee 214
 - 7.4.3.1 Advantages and Disadvantages of Shade and Shade Trees 214
 - 7.4.3.2 Choice of Shade Trees 216
 - 7.4.3.3 Tree Species used as Shade Trees 216
 - 7.4.3.4 Temporary Shade 219
 - 7.4.3.5 Other Types of Shade Trees 220
 - 7.4.4 Wind Breaks in Coffee 221
 - 7.4.4.1 The Need for Wind Breaks 221
 - 7.4.4.2 The Design of Wind Breaks 222
 - 7.4.4.3 Plant Species for use as Wind Breaks 223
 - 7.4.5 Intercropping in Coffee 224
 - 7.4.5.1 Temporary Intercropping or Catch Cropping 224
 - 7.4.5.2 Permanent Intercropping 225
 - 7.5 Planting Practices 229
 - 7.5.1 Density, Layout and Spacing 229
 - 7.5.1.1 General Considerations 229
 - 7.5.1.2 Robusta 229
 - 7.5.1.3 Arabica with Normal Growth Habit 229
 - 7.5.1.4 Dwarf Arabica 230
 - 7.5.1.5 Other Layouts 231
 - 7.5.1.6 Calculation of Planting Density 231
 - 7.5.2 Staking, Holing, Refilling, Planting 232
 - 7.5.2.1 Staking Out Planting Sites 232
 - 7.5.2.2 Holing and Refilling 233
 - 7.5.2.3 Fertilization at Planting 233
 - 7.5.2.4 Planting Out 234
 - 7.5.2.5 Planting Materials and Planting Methods 235

- 7.6 Mulching as a Post-planting Soil Management Tool 241
 - 7.6.1 Functions of Mulching 241
 - 7.6.2 Mulching as an Erosion Control Measure 241
 - 7.6.3 Mulching as a Soil Moisture Conservation Measure 242
 - 7.6.4 Mulching as a Weed Control Measure 242
 - 7.6.5 Sources of Mulching Materials 243
 - 7.6.6 Multi-purpose Plants used for the Production of Mulch 245
- 7.7 Conclusions and Prospects 248

- 8 Crop Maintenance 250**
 - 8.1 Fertilization 250
 - J. Snoeck and Ch. Lambot*
 - 8.1.1 Guidelines and Targets 250
 - 8.1.2 Interaction with other Cultivation Practices 251
 - 8.1.3 Fertilization: Organic Fertilization 251
 - 8.1.4 Fertilization: Mineral Fertilization 252
 - 8.1.4.1 Requirements of Coffee Trees 252
 - 8.1.4.2 Depletion of Nutrients 252
 - 8.1.4.3 The Fertilization Program 254
 - 8.1.4.4 Practical Indications for Applying Fertilizers 260
 - 8.1.5 Conclusions 262
 - 8.1.6 Annexes 263
 - 8.1.6.1 Physical Soil Composition 263
 - 8.1.6.2 The Soil as a Reservoir of Nutrients 264
 - 8.1.6.3 The C:N Ratio 266
 - 8.1.6.4 Procedures for Leaf and Soil Sampling 267
 - 8.1.6.5 Mixing Fertilizers 268
 - 8.1.6.6 Mineral Deficiency Symptoms on Coffee Leaves 269
 - 8.2 Soil Protection 274
 - Ch. Lambert and P. Bonharmont*
 - 8.2.1 Introduction 274
 - 8.2.2 Weed Control 274
 - 8.2.2.1 Principles and Objectives 274
 - 8.2.2.2 Ground Cover Vegetation 275
 - 8.2.2.3 Mulching 277
 - 8.2.2.4 Plastic Sheets 280
 - 8.2.2.5 Manual Soil Maintenance 280
 - 8.2.2.6 Mechanized Soil Maintenance 281
 - 8.2.2.7 Chemical Soil Maintenance – Herbicides 281
 - 8.2.3 Shade Trees 282
 - 8.2.3.1 Goals 282
 - 8.2.3.2 Choice of Shade Trees 283
 - 8.2.3.3 Maintenance of Shade Trees 284
 - 8.2.3.4 Temporary Shade and the Production of Timber 285
 - 8.2.3.5 Impact on Quality 285

- 8.2.4 Wind breaks 285
- 8.2.5 Infilling 286
- 8.2.6 Conclusions and Future Options 287
- 8.3 Pruning 288
 - Ch. Lambert and P. Bonharmont*
 - 8.3.1 Introduction 288
 - 8.3.2 Pruning Systems 291
 - 8.3.2.1 Pruning of Freely Growing Coffee Trees 292
 - 8.3.2.2 Pruning System with Capping 295
 - 8.3.3 The Rejuvenation of Coffee Trees 299
 - 8.3.3.1 Principles and Objectives 299
 - 8.3.3.2 Rejuvenation of Freely Growing Coffee Trees 299
 - 8.3.3.3 Rejuvenation of Capped Coffee Trees 305
 - 8.3.3.4 Criteria for Rejuvenation 309
 - 8.3.4 Methods and Tools 310
 - 8.3.5 How Pruning Influences Coffee Quality 310
 - 8.3.6 Conclusions 310
- 8.4 Irrigation 312
 - R. Goodyear*
 - 8.4.1 Some Climatic Characteristics of Coffee-growing Countries 312
 - 8.4.2 Effective Rainfall 312
 - 8.4.3 Coffee Cultivation Practices to Maximize Effective Rainfall 314
 - 8.4.3.1 Introduction 314
 - 8.4.3.2 Soil and Water Conservation Measures 314
 - 8.4.3.3 Use of Artificial Ground Cover 315
 - 8.4.3.4 Use of Natural Organic Mulches 315
 - 8.4.3.5 Use of Stones as a Ground Cover 316
 - 8.4.4 Coffee Water Use 316
 - 8.4.5 The Need for Irrigation in Selected Coffee-growing Countries 317
 - 8.4.6 Factors affecting Irrigation Water Management 318
 - 8.4.6.1 The Soil Water Reservoir 318
 - 8.4.6.2 Soil Moisture-holding Characteristics 319
 - 8.4.6.3 Irrigation and the Production Cycle 319
 - 8.4.6.4 Irrigation Water Demand 321
 - 8.4.6.5 Irrigation Water Quality 323
 - 8.4.7 Methods of Irrigation 323
 - 8.4.7.1 Surface Irrigation 323
 - 8.4.7.2 Overhead Irrigation 324
 - 8.4.7.3 Ground-level Irrigation 325
 - 8.4.8 Conclusion 327

 - 14.2 Early Shade Management: Traditional Coffee Farms 396
 - 14.3 “Intensification” of Coffee Production: Reduced Shade Levels 397
 - 14.4 The Effects of Shade: How much Shade is Best? 399
 - 14.4.1 Effects of Trees and Shade on the Ecosystem 400
 - 14.4.1.1 Biodiversity 401
 - 14.4.1.2 Soil and Water 402
 - 14.4.2 Effects of Trees and Shade on Coffee 403
 - 14.4.2.1 Coffee Productivity 403
 - 14.4.2.2 Microclimate and Coffee Physiology 407

- 14.4.2.3 Plant Vigor and Nutrition 409
- 14.4.2.4 Pests, Diseases and Weeds 411
- 14.4.3 Effects of Trees and Shade on Coffee Quality 414
 - 14.4.3.1 Fruit Weight 414
 - 14.4.3.2 Fruit to Bean Conversion Factors 415
 - 14.4.3.3 Bean Size 415
 - 14.4.3.4 Visual Appearance and Organoleptic Attributes 416
- 14.5 How to Design the Ideal Shade 418
- 14.6 Conclusions and Research Recommendations 419

Part II: Pests & Diseases

- 1 Coffee Pests in Africa 425**
T. J. Crowe
 - 1.1 Introduction 425
 - 1.2 Grasshoppers and Crickets 426
 - 1.3 Termites 427
 - 1.4 Aphids 428
 - 1.5 Scale Insects and Mealybugs 429
 - 1.6 Sucking Bugs 433
 - 1.7 Thrips 437
 - 1.8 Wood-boring Beetles 438
 - 1.9 Coffee Berry Borer 443
 - 1.10 Leaf-eating Beetles 444
 - 1.11 Fruit Flies 445
 - 1.12 Lepidopterous Leaf Miners 447
 - 1.13 Berry-boring Lepidoptera 450
 - 1.14 Leaf-eating Caterpillars 453
 - 1.15 Ants 457
 - 1.16 Mites 459
 - 1.17 Storage Pests 460
 - 1.18 Vertebrates 461
 - 1.18.1 Amphibia 461
 - 1.18.2 Reptilia 461
 - 1.18.3 Aves 461
 - 1.18.4 Mammalia 461
 - 1.19 Future Trends in Pest Control 461
- 2 Major Pests of Coffee in the Asia-Pacific Region 463**
C. C. Lan and J. N. Wintgens
 - 2.1 Introduction 463
 - 2.2 Integrated Management of Insect Pests 463
 - 2.3 Major Coffee Pests 464
 - 2.3.1 Coffee White Stem Borer 464
 - 2.3.2 Coffee Brown Beetle 467

2.3.3	Red Branch Borer	469
2.3.4	Shot-Hole Borer, Twig Borer	470
2.3.5	Coffee Berry Borer	471
2.3.6	Mealybugs	474
2.3.7	Green Scale	477
3	Nematodes in Coffee	478

3.8.10	Antagonistic Plants	492
3.8.11	Integrated Management	492
3.9	Conclusions	492
4	Coffee Diseases	495
	<i>R. A. Muller, D. Berry, J. Avelino, and D. Bieysse</i>	
4.1	Introduction	495
4.1.1	General Comments	495
4.1.2	Chemical Control	496
4.1.2.1	Pesticides	496
4.1.2.2	Productivity	497
4.1.2.3	Epidemiology	497
4.1.2.4	Treatment Methods	498
4.1.2.5	Application Rates	499
4.1.2.6	Assessment of Damage related to the Efficiency of the Treatment	499
4.1.3	Genetic Control	500

- 4.1.3.1 The Benefits of Genetic Engineering 500
- 4.1.3.2 Progress of Research on the Coffee Plant 500
- 4.1.4 Biological and Agronomical Control 501
 - 4.1.4.1 Prophylactic Measures 501
 - 4.1.4.2 Agricultural Practices 501
 - 4.1.4.3 Biological control 502
 - 4.1.4.4 Escape Strategies 502
- 4.1.5 Eradication Measures 502
- 4.1.6 International Exchange 504
- 4.2 Cryptogamic Diseases 504
 - 4.2.1 Nursery Diseases 504
 - 4.2.1.1 Damping Off 504
 - 4.2.1.2 Seedling Blight 505
 - 4.2.2 Root Diseases 506
 - 4.2.2.1 Root Rot Diseases 506
 - 4.2.2.2 Mealybug Root Disease or Phtiriosis 510
 - 4.2.3 Diseases of Aerial Organs 510
 - 4.2.3.1 Coffee Wilt Disease 510
 - 4.2.3.2 Canker or “Machete Disease” 513
 - 4.2.3.3 Phloem Necrosis 513
 - 4.2.3.4 Leaf rust diseases 513
 - 4.2.3.5 American Leaf Spot 525
 - 4.2.3.6 Blister Spot 527
 - 4.2.3.7 Brown Eye Spot or *Cercospora* Blotch 528
 - 4.2.3.8 Other Smudgy Foliar Diseases 528
 - 4.2.3.9 Thread Blight Diseases 529
 - 4.2.3.10 Die-back 531
 - 4.2.3.11 Pink Disease 532
 - 4.2.3.12 Burn or Blight 533
 - 4.2.4 Berry Diseases 534
 - 4.2.4.1 Coffee Berry Disease (CBD) 534
- 4.3 Bacterial Diseases 545
 - 4.3.1 Elgon Die-back or Bacterial Blight 545
- 4.4 Physiological Diseases 546
 - 4.4.1 Hot and Cold Disease 546
- 5 Viral Diseases in Coffee 550**
E. W. Kitajima and C. M. Chagas
 - 5.1 Introduction 550
 - 5.2 Coffee Ringspot Virus 550
 - 5.2.1 History 550
 - 5.2.2 Symptoms 550
 - 5.2.3 Nature of the Causal Agent and Transmission 550
 - 5.2.4 Geographical Distribution 554
 - 5.2.5 Economic Importance 554

- 5.2.6 Control 554

- 6 Resistance to Coffee Leaf Rust and Coffee Berry Disease 557**
C. J. Rodrigues Jr and A. B. Eskes
- 6.1 Introduction 557
- 6.2 Coffee Leaf Rust 557
 - 6.2.1 History 557
 - 6.2.2 Races of CLR and Resistance Genes 559
 - 6.2.2.1 Races of CLR 559
 - 6.2.2.2 Differential Resistance Groups of Coffee and Resistance Genes 560
 - 6.2.3 Evaluation of Resistance 561
 - 6.2.3.1 Resistance Tests 561
 - 6.2.3.2 Recording of Resistance Reactions 561
 - 6.2.4 Resistant Varieties 562
 - 6.2.4.1 Resistance from *C. arabica* 562
 - 6.2.4.2 Resistance from *C. liberica* 563
 - 6.2.4.3 Resistance from *C. canephora* 563
 - 6.2.5 Prospects 563
- 6.3 Coffee Berry Disease 564
 - 6.3.1 History 564
 - 6.3.2 Resistance Tests 565
 - 6.3.3 Breeding for Resistance 566
 - 6.3.4 Fungus Races 567
 - 6.3.5 Prospects 567
- 6.4 International Cooperation 568

- 7 Spraying Equipment for Coffee 571**
H. Pfalzer
- 7.1 Introduction 571
 - 7.1.1 Timing of the Treatment 571
 - 7.1.2 Spray Coverage 572
 - 7.1.3 Product Dosage 573
 - 7.1.4 Safety 573
- 7.2 Application Equipment 573
 - 7.2.1 The Lever-operated Knapsack Sprayer 573
 - 7.2.2 Compression Sprayer 574
 - 7.2.3 Power-operated Spray Gun 576
 - 7.2.4 Motorized Knapsack Mistblower 576
 - 7.2.5 Tractor-mounted or -drawn Mistblowers 577
 - 7.2.6 Canon-type Mistblower 579
 - 7.2.7 Other Application Equipment 580
 - 7.2.7.1 Reduced-volume Sprayers, also known as Controlled Droplet Application (CDA) 580
 - 7.2.7.2 Electrostatic Spraying 580
 - 7.2.7.3 Fogging Equipment using Shear Force for Droplet Production 582

- 7.2.7.4 Granule Applicators 582
 - 7.3 Calibrating the Application Equipment 583
 - 7.4 Preparing for Spraying 584
 - 7.4.1 Product Measurement and Mixing 584
 - 7.4.1.1 Portable Equipment 584
 - 7.4.1.2 Tractor-drawn Equipment 584
 - 7.5 Spraying 584
 - 7.5.1 General Points to be observed when spraying Coffee Trees 584
 - 7.5.2 Spray Volumes 585
 - 7.5.3 Spray Deposit Monitoring with Water-sensitive Papers 586
 - 7.5.4 The Spray Nozzle 586
 - 7.5.4.1 Nozzle Types and Parts 586
 - 7.5.5 Nozzle Material 589
 - 7.6 The Spray Droplets 589
 - 7.7 Operator Safety 590
 - 7.7.1 Exposure 590
 - 7.7.2 Classification of Pesticides by Hazard 591
 - 7.7.3 Necessary Precautions when Handling CPPs 592
 - 7.7.4 Factors which Influence the Dermal Absorption of CPPs 592
 - 7.7.5 Prevention of Adverse Health Effects 592
 - 7.7.5.1 Education 592
 - 7.7.5.2 Protective Practices 592
 - 7.7.5.3 Protective Devices 594
 - 7.7.5.4 Substitution 595
 - 7.7.5.5 Specificity 595
 - 7.8 Conclusions 595
- 8 Quarantine for Coffee 597**
D. Bieysse
 - 8.1 The Reasons behind Quarantine Measures 597
 - 8.2 General Recommendations for the Transfer of Plant Material 597
 - 8.3 Type of Plant Material 598
 - 8.3.1 Ripe or Ripening Fruit 598
 - 8.3.2 Grafts and Shoots 598
 - 8.3.3 Shoots and Plants with Roots 598
 - 8.4 Transfer 598

Part III: Harvesting & Processing

- 1 Yield Estimation and Harvest Period 601**
Ch. Cilas and F. Descroix
 - 1.1 Introduction 601
 - 1.2 Different Approaches to Harvest Estimates 601
 - 1.3 Presentation of the Method 602
 - 1.3.1 Principles 602

- 1.3.2 Example of Counting and Sampling Methods 603
- 1.3.3 Improving the Sampling Technique 603
- 1.4 Application of the Method in Burundi 604
- 1.5 Conclusion 606

- 2 Harvesting and Green Coffee Processing 610**
Carlos H. J. Brando
- 2.1 General Principles of Coffee Processing 610
- 2.2 Harvesting 611
 - 2.2.1 Objective 611
 - 2.2.2 Principle 614
 - 2.2.3 Techniques and Equipment 614
 - 2.2.3.1 Manual Harvesting 614
 - 2.2.3.2 Mechanical Harvesting 616
 - 2.2.3.3 Equipment to Pick Coffee from the Ground 619
 - 2.2.3.4 Winnowers 620
 - 2.2.3.5 Post-harvest Quality Corrections 621
 - 2.2.4 Problems and Impact on Quality 621
 - 2.2.5 Comments 622
- 2.3 Dry, Semi-dry and Wet Processing 623
 - 2.3.1 Dry Processing 623
 - 2.3.1.1 Objective 623
 - 2.3.1.2 Principle 623
 - 2.3.1.3 Techniques and Equipment 623
 - 2.3.1.4 Problems and Impact on Quality 627
 - 2.3.1.5 Comments 628
 - 2.3.2 Semi-dry (Pulped Natural) Processing 629
 - 2.3.2.1 Objective 629
 - 2.3.2.2 Principle 630
 - 2.3.2.3 Techniques and Equipment 630

 - J. N. Wintgens*
 - 4.1 The Interactions between Market Situation and Quality 797
 - 4.2 Influence of the Genotype 797
 - 4.2.1 Size and Shape of the Beans 797

4.2.2	Color	799
4.2.3	Chemical Composition	799
4.2.4	Flavor	799
4.3	Influence of Environmental Factors	801
4.3.1	Climate	801
4.3.2	Altitude	802
4.3.3	Water Availability	802
4.3.4	Soils	802
4.3.5	Frost and Hail	803
4.4	Influence of Cultivation Practices	803
4.4.1	Fertilization	803
4.4.2	Shade	804
4.4.3	Crop Management	805
4.4.4	Use of Ripening Hormones	805
4.4.5	Pest and Diseases	805
4.4.6	Physiological Damage	806
4.4.7	Harvest	806
4.5	Influence of Post-harvest Treatment	807
4.5.1	Pulping	807
4.5.2	Mucilage Removal	807
4.5.3	Washing, Grading and Soaking	809
4.5.4	Drying	809
4.5.5	Hulling, Husking and Sorting	811
4.6	Storage	811
4.7	Summary of Factors affecting the Quality of Green Coffee	813
4.7.1	Genotype	813
4.7.2	Environment	813
4.7.3	Cultivation Practices	814
4.7.4	Post-harvest treatment	815
4.7.5	Storage	815
4.8	Conclusions	816
5	Coffee Bean Quality Assessment	818
	<i>J. N. Wintgens</i>	
5.1	Introduction	818
5.2	Green Coffee Grading	818
5.3	Determination of Defective Beans	819
5.4	Green Bean Color	821
5.5	Cup Tasting	821
5.6	Analytical Techniques	822
5.7	Profiles of Some Coffees	823
5.7.1	Brazil	823
5.7.2	Colombia	824
5.7.3	Costa Rica	824
5.7.4	Guatemala	824

- 5.7.5 Dominican Republic and Haiti 825
- 5.7.6 Mexico 825
- 5.7.7 Jamaica 825
- 5.7.8 Panama 825
- 5.7.9 Kenya 825
- 5.7.10 Ethiopia 826
- 5.7.11 Tanzania 826
- 5.7.12 Kivu, Rwanda and Burundi 826
- 5.7.13 India 826
- 5.7.14 Indonesia 826
- 5.7.15 Papua New Guinea (PNG) 827
- 5.7.16 Hawaii 827
- 5.7.17 Yemen 827
- 5.8 Storage deterioration 827
- 5.9 Conclusions 827

Part V: Economics

- 1 Economic Aspects of Coffee Production 831**
B. Rodriguez P. and M. Vasquez M.
 - 1.1 Introduction 831
 - 1.2 Economic Concepts 831
 - 1.3 Production Systems 832
 - 1.4 Set-up and Development Costs 834
 - 1.5 Annual Production Costs 835
 - 1.6 Economic Indicators 836
 - 1.7 Sensitivity Analysis 837
 - 1.8 Recommendations 837

- 2 Technology Transfer 843**
F. Martinez, J. Rojas, and G. Castillo F.
 - 2.1 Introduction 843
 - 2.2 A Brief History of the Development of Coffee Growing 845
 - 2.2.1 The Origins of Coffee Growing 845
 - 2.2.2 The Expansion of Coffee during the Colonial Period 845
 - 2.2.3 The New Order 845
 - 2.2.4 The Institutional Era 846
 - 2.2.5 The Globalization Era 846
 - 2.3 Existing Schemes for Transmitting New Technologies and Developments 847
 - 2.3.1 Introduction 847
 - 2.3.2 Technological Transfer Groups (TTG) 847
 - 2.3.3 T & V System 848
 - 2.3.4 Community Scheme to Support Technology Transfer (MOCATT) 848
 - 2.3.5 Farmers Participatory Method (FPM) 849

- 2.3.6 Nestlé Integrated Model (NIM) 849
- 2.4 Main Aspects of Technology Transfer to Farmers 851
 - 2.4.1 Financial and Entrepreneurial Aspects 851
 - 2.4.2 Producer Needs 851
 - 2.4.3 Sustainable Production Systems 852
 - 2.4.4 Influence of the Local Situation on Choice of Technologies 852
 - 2.4.5 Practical Learning (Producers and Consultants) 852
 - 2.4.6 Responses to Price Fluctuations 853
 - 2.4.7 Interaction and Dynamics 854
 - 2.4.8 Initiative and Performance 854
- 2.5 Conclusions 854

Part VI: Data & Information

- 1 **Units and Conversion Tables** 859
J. N. Wintgens and H. Waldburger
 - 1.1 Introduction 859
 - 1.1.1 Presentation of Units 859
 - 1.1.2 Symbols and Abbreviations 860
 - 1.2 Metric Units of Measures 862
 - 1.2.1 Prefixes, Symbols and Powers of 10 862
 - 1.2.2 Length 863
 - 1.2.3 Area 863
 - 1.2.4 Volume and Capacity 864
 - 1.2.5 Weight 864
 - 1.3 UK and US Units of Measures 865
 - 1.3.1 Length 865
 - 1.3.2 Area 865
 - 1.3.3 Volume and Capacity 866
 - 1.3.4 Weight (Avoirdupois) 866
 - 1.4 Units of Measures from around the World 867
 - 1.4.1 Length 867
 - 1.4.2 Area 871
 - 1.4.3 Volume and Capacity 875
 - 1.4.4 Weight 880
 - 1.5 Conversions 887
 - 1.5.1 Conversions of UK and US Units to Metric Units 887
 - 1.5.1.1 Decimal and Metric Equivalentents of Fractions of 1 in 887
 - 1.5.1.2 Length 889
 - 1.5.1.3 Area 889
 - 1.5.1.4 Volume and Capacity 889
 - 1.5.1.5 Weight (Avoirdupois) 889
 - 1.5.1.6 Household Measures 890
 - 1.5.2 Volume per Area 890

- 1.5.3 Weight per Area 890
 - 1.5.3.1 Application Rate and Yield 890
 - 1.5.3.2 Double Conversion 891
 - 1.5.4 Volume per Volume (Concentration or Dilution) 891
 - 1.5.5 Weight per Volume 892
 - 1.5.6 Concentrations per Parts 892
 - 1.5.7 Temperature 892
 - 1.5.7.1 Temperature conversion formulas 892
 - 1.5.7.2 Examples of Temperature Conversion 893
 - 1.5.7.3 Scale Comparison 893
 - 1.5.7.4 Boiling Temperatures of Water and Barometric Pressures at Various Altitudes 893
 - 1.5.8 Pressure 893
 - 1.5.9 Energy 894
 - 1.5.9.1 Units of Work 894
 - 1.5.9.2 Units of Power 894
 - 1.5.10 Wind (Beaufort Scale) 894
 - 1.5.11 Speed 895
 - 1.5.12 Fuel Consumption 895
 - 1.5.13 Precipitation and Irrigation 895
 - 1.5.14 Flow Rates 896
 - 1.5.15 Flow Rate Calculation 896
 - 1.5.16 Water Analysis Equivalents of (CaCO₃) 896
 - 1.5.17 Soil Chemistry: Common Soil-related Conversions 897
 - 1.5.18 Dry Soil 898
 - 1.5.19 Slope Data 898
 - 1.5.19.1 Degrees to Percent and Percent to Degrees 898
 - 1.5.19.2 Natural Tangent to Degrees 900
 - 1.5.20 Maps 900
 - 1.5.21 Coffee Classification 901
 - 1.5.21.1 Bean Sizing 901
 - 1.5.21.2 Flat Bean Separation 901
 - 1.5.21.3 Peabean Separation 901
 - 1.5.22 Net Weight per Bag used in Producing Countries/Regions 902
- 2 Information Sources 904**
C. Fardeau
- 2.1 List of Coffee Machinery Suppliers 904
 - 2.2 Shade, Forest and Cover Plant Seed Sources 906
 - 2.3 Coffee Books, Manuals and Reports 918
 - 2.4 Coffee Periodicals 921
 - 2.5 Coffee Associations, Organizations and Teaching Centers 922
 - 2.6 Coffee Events 922
 - 2.7 Important Coffee Research Organizations 923
