

Contents

1	Introduction to Plastics	1
1.1	Plastics	1
1.1.1	Types of Polymers	1
1.2	Structure and Behaviour of Plastics	5
1.2.1	Influence of Molecular Weight on Material Properties	7
1.2.1.1	Homopolymers and Copolymers	9
1.2.1.2	Polymer Blends	11
1.3	Melting Polymers	12
1.3.1	Flow Properties of Polymer Melts	13
1.4	Mechanical Behaviour of Polymers	15
1.4.1	Relaxation Phenomena	15
1.4.2	Glass Transition Temperature	17
1.4.3	Melting	18
1.4.4	Solidification	18
1.4.5	Time-Dependent Deformation	22
1.4.6	Time Dependence and Thermal Activation	26
1.5	Uniaxial Stress–Strain Behaviour	28
1.5.1	Elastic Properties	29
1.5.2	Effects on Stiffness	32
1.5.3	Effects on Ductility	32
1.5.4	Effect of Time and Temperature on Mechanical Properties	35
1.5.5	Fatigue Behaviour	35
1.6	Resins	37
1.7	Material Selection	39
1.7.1	Quality Considerations	39
1.8	Processing of Polymers	40
1.8.1	Preconditioning	41
1.8.2	Production Processes	42
1.8.3	Effects on Quality	43
2	Polymer Testing	45
2.1	Introduction	45
2.2	Objective of Polymer Testing	45
2.3	Sample Preparation and Test Procedure	48

2.4	Sample Extraction/Sampling	49
2.5	Types of Samples	50
2.6	Test Implementation/Operation/Accomplishment	51
2.7	Description of Test Results/Test Report	51
3	Identification of Polymers	53
3.1	Introduction	53
3.2	Density Measurement	53
3.2.1	Floating (Suspension) Method	54
3.2.2	Buoyancy Method	56
3.2.3	Density Gradient Method	57
3.2.4	Pycnometer Method	57
3.3	Infrared Spectroscopy	58
4	Rheological Testing	65
4.1	Introduction	65
4.2	Rheometry	70
4.2.1	Rotational Method	71
4.2.1.1	Cone-Plate Measuring Arrangement	72
4.2.1.2	Plate-Plate Measuring Arrangement	73
4.2.2	Oscillation Method	74
4.3	Viscometry	77
4.3.1	Determination of Melt Flow Rate	78
4.3.1.1	Melt Mass Flow Rate (MFR)	78
4.3.1.2	Melt Volume Flow Rate (MVR)	79
4.3.2	High-pressure Capillary Viscometry (HPCV)	80
4.3.3	Solution Viscometry	82
5	Mechanical Testing	87
5.1	Introduction	87
5.2	Quasi-Static Loading	88
5.2.1	Tensile Test	89
5.2.1.1	Modulus of Elasticity	95
5.2.2	Compression Test	98
5.2.3	Bending Test	101
5.2.4	Hardness Test	105
5.2.4.1	Ball Indentation Hardness	106
5.2.4.2	Vickers Hardness	107
5.2.4.3	Knoop Hardness	108
5.2.4.4	Durometer or Shore Hardness	110
5.2.4.5	Ball Indentation Hardness – International Rubber Hardness Degree (IRHD)	112
5.3	Impact Loading	113
5.3.1	Tensile Impact Test	114
5.3.2	Bending Impact Test	115
5.3.2.1	Charpy Impact Test	116
5.3.2.2	Izod Impact Test	118

5.3.2.3	Falling Dart Test	118
5.4	Long-Term Static Loading	120
5.4.1	Creep Test	120
5.4.2	Relaxation Test	125
5.5	Long-Term Dynamic Loading – Fatigue	126
5.5.1	Fatigue Testing	130
5.5.1.1	Tension–Compression Test	130
5.5.1.2	Flexural Fatigue Test	130
6	Tribological Testing	133
6.1	Introduction	133
6.2	Sliding Behaviour	134
6.3	Friction Coefficient	135
6.4	Wear	136
7	Thermal Testing	139
7.1	Introduction	139
7.2	Tests Under Thermal Loading	141
7.2.1	Accelerated Testing	143
7.3	Thermal Ageing Behaviour	144
7.4	Differential Scanning Calorimetry (DSC)	144
7.5	Dynamic Mechanical Analysis (DMA)	152
7.6	Thermogravimetric Analysis (TGA)	158
7.7	Thermomechanical Analysis (TMA) – Dilatometry	161
7.8	Calcination Test	164
7.9	Thermal Dimensional Stability	166
7.9.1	Vicat Softening Temperature	167
7.10	Heat Deflection Temperature	169
8	Chemical Testing	173
8.1	Introduction	173
8.2	Chemical Resistance Investigation	173
8.3	Environmental Stress Cracking Resistance (ESCR) Investigation	174
8.3.1	ESCR Investigation Using Tensile Creep Test	176
8.3.2	ESCR Investigation by Bending Strip Method	177
8.3.3	ESCR Investigation by Ball or Pin Indentation Method	179
9	Physical Testing	181
9.1	Introduction	181
9.2	Determination of Mass	181
9.3	Determination of Water Absorption	182
9.3.1	Moisture in the Moulding Compound During Processing	182
9.3.2	Moisture in the Moulded Part	183

10	Geometrical Inspection	187
10.1	Introduction	187
10.2	Sizes and Tolerances	187
10.2.1	Tactile Measurement Methods	188
10.2.2	Contactless Measurement Methods	189
10.2.2.1	Light Stripe Projection Method	191
10.2.2.2	Computed Tomography (CT)	191
10.3	Processing and Post-processing Shrinkage	195
10.3.1	Migration-Induced Shrinkage	196
10.4	Warpage	197
11	Optical Testing Methods	199
11.1	Introduction	199
11.2	Visual Inspection	199
11.3	Light Microscope (LM)	201
11.3.1	Sample Preparation	203
11.3.1.1	Grinding and Polishing	204
11.3.1.2	Microtome Slices/Thin Sections	205
11.4	Digital Microscope (DM)	207
11.5	Scanning Electron Beam Microscope (SEM)	208
11.6	Polarized Light Inspection	212
	Bibliography	215
	Index	219
