1	Phosphines and Related Tervalent Phosphorus Systems	1
	<i>Piet W. N. M. van Leeuwen</i>	
1.1	Introduction	1
1.1.1	History	1
1.1.2	Alternative Ligands	2
1.1.3	Aim of the Chapter	2
1.2	Synthesis of Phosphorus Ligands	3
1.2.1	Introduction	3
1.2.2	Nucleophilic Substitution by Carbanions at P ^{δ+}	3
1.2.3	Phosphorus–Carbon Bond Cleavage and Phosphido Anion Preparation	7
1.2.4	Phosphido Anions as Nucleophiles	9
1.2.5	P–H Addition to Unsaturation	12
1.2.6	Reduction of Phosphine Oxides and Sulfides	13
1.2.7	X/Y-Substitution at Phosphorus	14
1.2.8	Aryl-X in Metal-Catalyzed Cross-Coupling	15
1.2.9	Quaternization and Reduction	16
1.2.10	The Use of R ₂ PCH ₂ [−] Anions in Phosphine Synthesis	16
1.3	Ligand Properties	18
1.3.1	Electronic Properties	18
1.3.2	Steric Properties	20
1.3.3	The Bite Angle of Bidentate Ligands	22
1.3.4	Chirality	25
1.3.4.1	P-Stereogenic or P-Chiral Ligands	25
1.3.4.2	Chiral Backbone	27
1.3.4.3	Chiral Substituents at Phosphorus	27
1.3.4.4	Axial Asymmetry or Atropisomerism	27
1.3.4.5	Spiro Diphosphines	28
1.3.4.6	Planar Asymmetry	28
1.3.4.7	Helical Symmetry	29
1.4	Rhodium-Catalyzed Hydroformylation with Xantphos-Type Ligands	29
1.4.1	Introduction	29

1.4.2	Monophosphines, Characterization Studies, and Diphosphines	30
1.5	Cross-Coupling Catalysis with Mono- and Bidentate Phosphines	33
1.5.1	Introduction and Simplified Mechanism	33
1.5.2	Oxidative Addition	34
1.5.3	Transmetallation	37
1.5.4	Reductive Elimination	37
1.6	Decomposition Reactions	43
1.6.1	Phosphine Decomposition	43
1.6.1.1	Phosphine Oxidation	43
1.6.1.2	P–C Cleavage of Ligands	44
1.6.2	Phosphite Decomposition	47
	References	50
2	Recent Developments in Phosponium Chemistry	59
	<i>Mathieu Berchel and Paul-Alain Jaffrès</i>	
2.1	Introduction	59
2.2	Synthesis of Phosponium Salts	60
2.3	Phosponium Salts as a Tool for Organic Synthesis	70
2.3.1	Phosponium Salts as Ionic Liquids	70
2.3.2	Phase Transfer Catalysis (PTC)	74
2.3.3	Coupling Agent for Peptide Synthesis	78
2.4	Phosponium Salts for Biological and Medical Applications	84
2.4.1	Targeting Mitochondria	84
2.4.1.1	Anticancer Drugs	86
2.4.1.2	Imaging Agents	90
2.4.2	Phosponium Salts for Nucleic Acid Delivery	92
2.4.3	Phosponium Salts as Antimicrobial Agents	96
2.5	Conclusion	102
	References	103
3	Phosphorus Ylides and Related Compounds	113
	<i>Alejandro Presa Soto and Joaquín García-Álvarez</i>	
3.1	Introduction	113
3.2	Preparation of Phosphorus Ylides	115
3.2.1	Synthesis of Phosphorus Ylides from Phosponium Salts	116
3.2.2	One-Pot Three-component Reactions of Phosphines, Dialkyl Acetylenedicarboxylates, and Various Organic Nucleophiles	121
3.2.3	Other Methodologies for the Synthesis of Phosphorus Ylides	125
3.3	Applications of Phosphorus Ylides in Organic Synthesis	130
3.3.1	Wittig Reaction	130
3.3.1.1	Application of Wittig Reaction in Cyclization Processes	133
3.3.1.2	Application of Wittig Reaction in Tandem Processes	135
3.3.1.3	Application of Wittig Reaction in Total Synthesis of Natural Products	140
3.3.1.4	Wittig Reactions with Nonstabilized Ylides	142

- 3.3.1.5 Application of Wittig Reaction in Nonconventional Solvents or Under Solvent-free Conditions 144
- 3.3.2 Other Organic Reactions of Phosphorus Ylides 146
- 3.4 Conclusions 148
 - Acknowledgments 148
