Preface *XV*

1	Introduction	<i>1</i>
	References	<i>2</i>
2	Coal Gasification in a Global Context	<i>3</i>
2.1	Applications of Coal Gasification	<i>3</i>
2.2	The Three Generations of Coal Gasifiers	<i>4</i>
2.2.1	First Generation of Coal Gasifiers	<i>5</i>
2.2.2	Second Generation of Coal Gasifiers	<i>5</i>
2.2.3	Third Generation of Coal Gasifiers	<i>6</i>
2.3	Typical Feedstock and Products	<i>9</i>
2.3.1	Feedstock	<i>9</i>
2.3.2	Products	<i>9</i>
2.3.2.1	Ammonia	<i>10</i>
2.3.2.2	Methanol and Derivatives	<i>11</i>
2.3.2.3	Electricity (Integrated Gasification Combined Cycle)	<i>12</i>
2.3.2.4	Substitute Natural Gas (Synthetic Natural Gas)	<i>12</i>
2.3.2.5	Fischer–Tropsch Liquids	<i>13</i>
2.3.2.6	Hydrogen Production	<i>14</i>
2.3.2.7	Others	<i>14</i>
2.4	Main Markets for Coal Gasification	<i>16</i>
2.5	Challenges and Opportunities for Coal Gasification	<i>16</i>
2.6	Environmental Aspects	<i>18</i>
2.6.1	Air Emissions	<i>18</i>
2.6.1.1	Pollutants	<i>18</i>
2.6.1.2	Greenhouse Gases	<i>19</i>
2.6.2	Water Effluents	<i>20</i>
2.6.3	Solid Waste	<i>20</i>
	References	<i>21</i>

3	Coal Characterization for Gasification	25
3.1	Coal as Gasification Feedstock	25
3.2	Petrographic Coal Analysis	26
3.2.1	Introduction to Macerals	26
3.2.2	Technological Background	26
3.2.3	Groups of Macerals	27
3.2.3.1	Huminite and Vitrinite	27
3.2.3.2	Liptinite	29
3.2.3.3	Inertinite	29
3.2.4	Blend Identification	30
3.2.4.1	Background	30
3.2.4.2	Terms and Definitions	30
3.2.4.3	Interpretation of a Reflectance Analysis	31
3.2.5	Temperature Estimation Using Optical Reflectance	33
3.2.6	Detection of Other Material	34
3.3	Coal Classification	35
3.3.1	Introduction	35
3.3.2	Reporting of Coal Analyses	36
3.3.3	Classification According to the American Society for Testing and Materials Standard	38
3.3.4	Classification According to the International Organization for Standardization	40
3.3.5	Other Nomenclatures Relevant to Gasification	40
3.3.5.1	Salty Coals	40
3.3.5.2	Ballast Coals	40
3.3.5.3	Low-Value or Low-grade Gasification Coals	42
3.3.5.4	Three-High Coals	42
3.4	Coal Sampling	43
3.5	Proximate Analysis	44
3.5.1	Moisture Content	44
3.5.1.1	Technological Background	44
3.5.1.2	Analysis of Moisture	45
3.5.2	Ash Content	46
3.5.3	Volatile Matter Content	47
3.5.4	Fixed Carbon	48
3.5.5	Alternative Method	48
3.6	Fischer Assay	48
3.7	Ultimate Analysis	49
3.7.1	Technological Background	49
3.7.2	Analysis Procedure	49
3.7.3	Carbon	50
3.7.4	Hydrogen	51
3.7.5	Nitrogen	51
3.7.6	Sulfur	52
3.7.7	Oxygen	53

3.7.8	Chlorine	53
3.8	Heating Values	54
3.8.1	Technological Background	54
3.8.2	Analysis Procedure	54
3.8.3	Estimation by Empirical Correlations	55
3.8.4	Enthalpy of Formation	55
3.9	Caking Properties	57
3.9.1	Gray–King Assay	57
3.9.2	Free-Swelling Index	58
3.9.3	Roga Index	58
3.9.4	Dilatation Test	59
3.10	Reactivity	59
3.10.1	Technological Background	59
3.10.2	Determination of Reactivity	60
3.10.2.1	General Considerations	60
3.10.2.2	Thermogravimetric Analysis	61
3.10.2.3	Fixed-Bed Reactors	65
3.10.2.4	Entrained Particle Reactors	66
3.10.2.5	Wire-Mesh Reactors	67
3.10.3	Spontaneous Ignition	67
3.11	Mineral Matter and Ash Analysis	68
3.11.1	Technological Background	68
3.11.2	Minerals in Coal	69
3.11.2.1	Origin of Coal Mineral Matter	69
3.11.2.2	Minerals in High-Rank Coals	70
3.11.2.3	Minerals in Low-Rank Coals	70
3.11.2.4	Analysis of Mineral Matter in Coal	71
3.11.3	Transformation of Mineral Matter to Ash	71
3.11.4	Ash Component Analysis	72
3.11.5	Ash Fusion Analysis	73
3.11.5.1	Ash Fusion Test	73
3.11.5.2	Ash Clinkering Test	75
3.11.5.3	Influence of Atmosphere	76
3.11.5.4	Influence of Ash Compositions	76
3.11.6	Slag Viscosity Analysis	79
3.11.6.1	High-Temperature Viscometer Test	79
3.11.6.2	Prediction of Slag Viscosity	81
3.11.7	Devolatilization of Mineral Compounds	84
3.11.7.1	Partitioning	84
3.11.7.2	Behavior of Alkali Metals	85
3.11.8	Utilization Properties of Ash and Slag	86
3.12	Relevant Physical Properties	86
3.12.1	Coal Density	87
3.12.1.1	True Density	87
3.12.1.2	Apparent Density	88

3.12.1.3	Bulk Density	88
3.12.1.4	Washability Test	89
3.12.2	Thermal Properties	90
3.12.2.1	Heat Capacity	90
3.12.2.2	Thermal Conductivity	91
3.12.3	Granulometric Properties	91
3.12.3.1	Technological Background	91
3.12.3.2	Representative Diameters	92
3.12.3.3	Rosin-Rammler-Sperling-Bennett Particle Size Distribution	92
3.12.3.4	Fragmentation	93
3.12.3.5	Hardgrove Grindability Index	94
3.12.3.6	Abrasion Index	95
3.12.4	Fluid-Dynamic Properties	95
3.12.4.1	Technological Background	95
3.12.4.2	Coal Bed Pressure Drop	95
3.12.4.3	Minimum Fluidization Velocity	96
3.12.4.4	Fluid Bed Pressure Drop	96
3.12.4.5	Terminal Entrainment Velocity	97
3.12.4.6	Visualization in the Reh Diagram	98
	References	100
4	Fundamentals	107
4.1	Terms and Definitions	107
4.2	Gasification Reactions	108
4.3	Pyrolysis Reactions	109
4.4	Gasification Parameters	110
4.5	Classifying Gasification Methods	112
4.5.1	Bed Type (Particle Size)	112
4.5.1.1	Moving-Bed Gasifiers	112
4.5.1.2	Fluid-Bed Gasifiers	113
4.5.1.3	Entrained-Flow Gasifiers	114
4.5.2	Temperature Range	114
4.5.3	Pressure Level	116
4.5.4	Feeding Method	116
4.5.4.1	Dry Feed Systems	116
4.5.4.2	Hydraulic Feed Systems	118
4.5.5	Wall Type	120
4.5.6	Syngas Cooling	121
4.5.7	Oxidant	122
4.5.8	Solid Residue Removal	123
4.5.9	Addition of Catalysts	124
4.5.9.1	General Considerations	124
4.5.9.2	Groups of Catalysts	125
4.5.9.3	Application of Catalytic Coal Gasification	126
	References	126

5	Coal Gasification Modeling	129
5.1	Introduction	129
5.2	Balancing of Gasification Systems	130
5.3	Thermodynamic Modeling	131
5.3.1	Equilibrium Constant-Based Calculations	131
5.3.2	Minimization of Gibbs Free Energy	134
5.4	Kinetic Modeling	135
5.4.1	Conversion Processes	135
5.4.2	Fundamentals	135
5.4.3	Heterogeneous Reaction Kinetics	138
5.4.3.1	Analysis of Kinetic Data from Literature	138
5.4.3.2	Selection of Kinetic Data for Modeling	139
5.4.4	Homogeneous Reaction Kinetics	144
5.5	Computational Fluid Dynamics Modeling of Coal Gasifiers	145
5.5.1	Background	145
5.5.2	Typical Case Setup	145
5.5.2.1	Definition of the Calculation Domain	145
5.5.2.2	Solver Settings and Numerical Submodels	147
5.5.3	Convergence Strategies	148
5.5.4	Results for the Internal Circulation Gasifier Case	148
5.5.5	Conclusions of the Computational Fluid Dynamics Study	150
5.6	Generic Models for Case Studies	152
5.6.1	Temperature Approach Concept	152
5.6.2	Modeling Approach	153
5.6.3	Limitations of the Approach Temperature Concept	154
5.6.4	Boundary Conditions	155
5.6.4.1	Coal Selection	155
5.6.4.2	Reference Case Definition	156
5.6.4.3	Sensitivity Analysis	157
	References	164
6	Coal Gasification Technology Survey	169
6.1	Entrained-Flow Gasifiers	169
6.1.1	Introduction	169
6.1.2	Shell and Uhde Coal Gasification Technology	170
6.1.2.1	Historical Background	170
6.1.2.2	Process Description	170
6.1.2.3	Enhancements	176
6.1.2.4	Verification Case for Model Setup	177
6.1.2.5	Modeling Results	180
6.1.3	Siemens Fuel Gasification Technology	181
6.1.3.1	Historical Background	181
6.1.3.2	Process Description	182
6.1.3.3	Enhancements	187
6.1.3.4	Verification Case for Model Setup	188

6.1.3.5	Modeling Results	191
6.1.3.6	Other Similar Technologies	192
6.1.4	GE Energy Technology	193
6.1.4.1	Historical Background	193
6.1.4.2	Process Description	194
6.1.4.3	Enhancements	202
6.1.4.4	Verification Case for Model Setup	203
6.1.4.5	Modeling Results	206
6.1.4.6	Other Similar Technologies	208
6.1.5	E-Gas Technology	210
6.1.5.1	Historical Background	210
6.1.5.2	Process Description	211
6.1.5.3	Enhancements	215
6.1.5.4	Verification Case for Model Setup	217
6.1.5.5	Modeling Results	219
6.1.6	Other Entrained-Flow Technologies	220
6.1.6.1	East China University of Science and Technology Gasifiers	220
6.1.6.2	Mitsubishi Heavy Industries Gasifier	221
6.1.6.3	Thermal Power Research Institute Gasifier	222
6.1.6.4	Pratt & Whitney Rocketdyne Gasifier	224
6.2	Fluid-Bed Gasifiers	225
6.2.1	Introduction	225
6.2.2	High-Temperature Winkler Technology	226
6.2.2.1	Historical Background	226
6.2.2.2	Process Description	227
6.2.2.3	Enhancements	233
6.2.2.4	Verification Case for Model Setup	234
6.2.2.5	Modeling Results	237
6.2.3	Other Fluid-Bed Technologies	237
6.2.3.1	Utility-Gas Gasifier	237
6.2.3.2	Agglomerating Fluidized-Bed Gasifier	239
6.2.3.3	Kellogg Brown & Root Transport Reactor	239
6.2.3.4	Kellogg Rust Westinghouse Gasifier	242
6.2.3.5	Bharat Heavy Electrical Limited Technology	243
6.2.3.6	HRL Integrated Drying Gasification Combined Cycle Process	243
6.2.3.7	Circulating Fluidized-Bed Technology	244
6.3	Moving-Bed Gasifiers	244
6.3.1	Introduction	244
6.3.2	Lurgi Fixed-Bed Dry Bottom Technology	245
6.3.2.1	Historical Background	245
6.3.2.2	Process Description	247
6.3.2.3	Enhancements	261
6.3.3	Other Similar Technologies	263
6.3.3.1	SEDIN Dry Bottom Gasification	263
6.3.3.2	Sasol Dry Bottom Gasification	263

6.3.4	British Gas/Lurgi Technology	263
6.3.4.1	Historical Background	263
6.3.4.2	Process Description	264
6.3.4.3	Operational Data	275
6.3.4.4	Enhancements	275
	References	277
7	Thermodynamic Process Assessment	289
7.1	Introduction of a Ternary Gasification Diagram	289
7.1.1	Basic Idea	289
7.1.2	Domain Overview and Pressure Sensitivity	290
7.1.3	Diagram Types	292
7.1.4	Domain Boundaries for Gasification Systems	293
7.1.5	Treatment of H ₂ O Stream	295
7.1.6	Displaying Gasifiers with Multiple Inlets	296
7.1.7	Optimum User Diagrams	296
7.2	Diagrams for Pittsburgh No. 8 Coal	298
7.2.1	Temperature and Carbon Conversion Diagram	298
7.2.2	Cold Gas Efficiency and Methane Yield Diagram	300
7.2.3	Syngas Yield and H ₂ /CO Diagram	300
7.2.4	Optimum User Diagram	301
7.2.5	Optimum Correlations	301
7.3	Diagrams for South African Coal	304
7.3.1	Temperature and Carbon Conversion Diagram	304
7.3.2	Cold Gas Efficiency and Methane Yield Diagram	306
7.3.3	Syngas Yield and H ₂ /CO Diagram	306
7.3.4	Optimum User Diagram	307
7.3.5	Optimum Correlations	307
7.4	Technology Potential Analysis	310
7.5	Influence of the Ash Content	312
7.6	Other Gasification Systems	314
7.7	Conclusions	315
	References	316
8	Exergetic Process Assessment	319
8.1	Exergy Calculations	319
8.1.1	Exergy and Reference Environment	319
8.1.2	Exergy of Gaseous and Liquid Streams	320
8.1.3	Exergy of Solid Streams	323
8.1.4	Definition of Efforts and Benefits	323
8.2	Exergetic Analysis	324
8.2.1	Impact of Gas Cooling Methods	324
8.2.2	Comparison of Gasification Systems	326
8.2.2.1	Exergy Flow Analysis	326
8.2.2.2	Exergetic Process Efficiency	328

8.3	Conclusions of Process Assessment	329
