3	Strengthening Bioenergy Regions: An Introduction to BEST 15
	Christian Ammer, Michael Bredemeier and Norbert Lamersdorf
3.1	Background and Motivation 15
3.2	Aims and Structure of the Project 16
3.3	Research Results Contributed to this Book 17
	References 20
	Part II Environmental Constraints, Landscape Functions and
	Ecosystem Services 21
4	The Bioenergy Allocation and Scenario Tool (BEAST) to Assess Options
	for the Siting of Short Rotation Coppice in Agricultural Landscapes:
	Tool Development and Case Study Results from the Göttingen
	District [*] 23 Corald Purch and Ian C. Thiele
4.1	Introduction 22
4.1 1.2	Study Area and Methods 24
4.2 1.2	Study Area 24
4.2.1	Field Geometries Administrative Units and Ecological Units as
T , Z , Z	Snatial Reference 24
423	The BEAST Assessment Approach 25
4.2.4	Spatial Selection and Multi-Criteria Evaluation Procedure 25
4.2.4.1	Step 1: Setting the Objectives 26
4.2.4.2	Step 2: Defining Restricted and Preference Areas 28
4.2.4.3	Step 3: Scaling the Evaluation Criteria 28
4.2.4.4	Step 4: Weighting the Evaluation Criteria and Executing the MCE
	Calculation 28
4.2.5	Production Criteria 29
4.2.5.1	Crop Yield Modelling 29
4.2.5.2	Short Rotation Coppice Yield Modelling 31
4.2.5.3	Application in the Göttingen District 32
4.2.5.4	Production Criteria Setting for the Case Study 32
4.2.6	Economic Criteria 33
4.2.6.1	Cost Calculation 33
4.2.6.2	Price Calculation 35
4.2.6.3	Economic Criteria Setting for the Case Study 35
4.3	Results 35
4.3.1	Identification of Economically Competitive Short Rotation Coppice
	Sites 35
4.3.2	Shift in Yield Levels Due to Site Selection 37
4.3.3	Erosion Protection as Ecological Synergy 38
4.4	Discussion and Conclusions 40
