List of Contributors XV

1	Introduction for Nanomaterials and Nanocomposites: State of Art, New Challenges, and Opportunities 1
	<i>P. M. Visakh</i>
1.1	Chemistry of Nanoscience and Technology 1
1.2	Carbon Nanotubes and Their Nanocomposites 2
1.3	Graphene- and Graphene Sheets-Based Nanocomposites 3
1.4	Nanocomposites of Polyhedral Oligomeric Silsesquioxane (POSS) and Their Applications 4
1.5	Zeolites and Composites 6
1.6	Mesoporous Materials and Their Nanocomposites 7
1.7	Bio-Based Nanomaterials and Their Bio-Nanocomposites 9
1.8	Metal–Organic Frameworks (MOFs) and Their Composites 10
1.9	Modeling Methods for Modulus of Polymer/Carbon Nanotube (CNT) Nanocomposites 12
1.10	Nanocomposites Based on Cellulose, Hemicelluloses, and Lignin 13
	References 15
2	Chemistry of Nanoscience and Technology 21
	<i>Aftab Aslam Parwaz Khan, Anish Khan, and Abdullah M. Asiri</i>
2.1	Introduction 21
2.2	Nano 22
2.3	Nanomaterials 24
2.4	Quantum Materials 25
2.4.1	Classification of Superconductor 26
2.4.1.1	Response to a Magnetic Field 26
2.4.1.2	By Theory of Operation 27
2.4.1.3	By Critical Temperature 27
2.4.1.4	By Material 27
2.4.1.5	Fullerene 28
2.5	Forces and Bonding of Nanomaterials 29
2.5.1	Hydrogen-Bonding Assemblies 29

2.5.2	$\pi-\pi$ Stacking Assemblies	31
2.5.3	Assemblies by Hydrophilic and Hydrophobic Interactions	33
2.5.4	Metal–Ligand Interactions	36
2.5.5	Other Methods for Construction Nanomaterials	39
2.6	Zero-Dimensional Nanomaterials	40
2.7	One-Dimensional Nanomaterials	42
2.8	Two-Dimensional Nanomaterials	47
2.9	Challenges in Nanoscience and Nanotechnology	54
2.9.1	Challenges for Technological	54
2.9.2	Challenges and Research for the Social Cluster	54
2.9.3	The World Is Facing a Water Crisis	55
2.10	Applications of Nanoscience and Technology	59
2.10.1	Personal Care Products	59
2.10.2	Clays	60
2.10.3	Paints	60
2.10.4	Coatings and Surfaces	60
2.10.5	Renewable Energy	61
2.10.6	Batteries	61
2.10.7	Fuel Additives	61
2.10.8	Fuel Cells	62
2.10.9	Displays	62
2.10.10	Catalysts	62
2.10.11	Food	63
2.10.12	Consumer Products	63
2.10.13	Sports	63
2.10.14	Lubricants	64
2.10.15	Carbon Nanotube	64
2.10.16	Nanosensors	64
2.10.17	Magnetic Materials	66
2.10.18	Medical Implants	66
2.10.19	Machinable Ceramics	66
2.10.20	Elimination of Pollutants	67
2.10.21	Water Purification	67
2.10.22	Textiles	67
2.10.23	Military Battle Suits	68
2.11	Conclusion	68
	References	69
3	Carbon Nanotubes and Their Nanocomposites	75
	<i>Sónia Simões, Filomena Viana, and Manuel F. Vieira</i>	
3.1	Carbon Nanotubes	75
3.1.1	Introduction	75
3.1.2	Structure of Carbon Nanotubes	76
3.1.3	Properties of Carbon Nanotubes	79
3.2	Carbon Nanotubes as Nanomaterials	81

3.2.1	Synthesis of Carbon Nanotubes	81
3.2.2	Chemical Modifications of Carbon Nanotubes	86
3.2.3	Physical Modifications of Carbon Nanotubes	87
3.3	Carbon Nanotubes Based Nanocomposites	89
3.3.1	Interfacial Interaction of Carbon Nanotubes in Nanocomposites	96
3.4	Conclusion	100
	Acknowledgments	101
	References	101
4	Graphene and Graphene Sheets Based Nanocomposites	107
	<i>Anish Khan, Aftab Aslam Parwaz Khan, and Abdullah M. Asiri</i>	
4.1	Introduction	107
4.1.1	Structure of Graphene and Graphene Sheets	107
4.1.2	Properties of Graphene and Graphene Sheets	110
4.1.2.1	Electronic Properties	110
4.1.2.2	Mechanical Properties	110
4.1.2.3	Optical Properties	111
4.1.2.4	Raman Spectroscopy of Graphene	112
4.1.3	Synthesis of Graphene and Graphene Sheets	112
4.1.3.1	Exfoliation	113
4.1.3.2	Epitaxial on Silicon Carbide	116
4.1.3.3	Chemical Vapor Deposition	116
4.1.3.4	Chemical Synthesis	118
4.1.4	Chemical Modifications of Graphene and Graphene Sheets	118
4.1.5	Physical Modifications of Graphene and Graphene Sheets	120
4.2	Graphene and Graphene Sheets Based Nanocomposites	121
4.2.1	Graphene and Graphene Sheets/Rubber Based Nanocomposites Preparation, Characterization, and Applications	123
4.2.2	Graphene and Graphene Sheets/Thermoplastic Based Nanocomposites Preparation, Characterization, and Applications	127
4.2.3	Graphene and Graphene Sheets/Thermoset Based Nanocomposites Preparation, Characterization, and Applications	129
4.2.3.1	Characterization of GO, PI, and PI/GO Nanocomposites	130
4.2.4	Interfacial Interaction of Graphene and Graphene Sheets in Nanocomposites	133
4.3	Graphene and Graphene Sheets in Thermoplastic Based Blends Preparation, Characterization, and Applications	135
4.4	Graphene and Graphene Sheets in Rubber–Rubber Blends Preparation, Characterization, and Applications	138
4.5	Graphene and Graphene Sheets Based Micro and Macro Composites	143
4.6	Conclusion	144
	References	145

5	Nanocomposites of Polyhedral Oligomeric Silsesquioxane (POSS) and Their Applications	151
	<i>Dhorali Gnanasekaran</i>	
5.1	Introduction	151
5.1.1	Nanocomposites	151
5.1.2	How Nanocomposites Work?	154
5.1.3	Applications	154
5.1.4	Polyhedral Oligomeric Silsesquioxane (POSS)	154
5.1.5	Hybrid Properties	156
5.1.6	Polymer Nanocomposites	157
5.1.7	Hybrid Nanocomposites from Silsesquioxane Monomers	159
5.1.7.1	Polyamide-POSS Hybrid Nanocomposites	159
5.1.7.2	Poly(urethane-imide) POSS Hybrid Nanocomposites (PUI-POSS)	165
5.1.8	Range of Other POSS Nanocomposites	170
5.1.8.1	Blends of POSS Nanocomposites	171
5.1.8.2	Bridged Polysilsesquioxanes	173
5.2	Advantages of POSS Nanocomposites	174
5.3	Applications	175
5.3.1	Gas Separation Studies	175
5.3.2	Aerospace Industry	175
5.3.3	Electric Applications	177
5.3.4	Other Applications	178
5.4	Conclusions	179
	References	179
6	Zeolites and Composites	187
	<i>G. Gnana kumar</i>	
6.1	Introduction	187
6.2	Progress of Zeolite Materials	189
6.2.1	Natural Zeolites	189
6.2.2	Artificially Synthesized Zeolites	190
6.2.3	Low-Silica Zeolites	190
6.2.4	High-Silica Zeolites	190
6.3	Classification of Zeolites	191
6.3.1	Classification Based on the Pore Structure	191
6.3.1.1	Microporous Zeolites	191
6.3.1.2	Mesoporous Zeolites	191
6.3.2	Classification Based on Structural Building Units	192
6.3.2.1	Primary Building Unit (PBU)	192
6.3.2.2	Secondary Building Unit (SBU)	192
6.3.2.3	Sodalite Cage Building Units	192
6.3.3	Classification Based on the Ring Structure	193
6.3.4	Classification Based on Si/Al Ratio	193
6.3.5	Classification of Zeolites Based on the Crystal Structure	194

6.4	Molecular Sieves	194
6.5	Synthesis of Zeolites	197
6.5.1	History of Zeolite Synthesis	197
6.5.2	Conventional Synthesis Approaches	197
6.5.2.1	Hydrothermal Synthesis	197
6.5.2.2	Solvothermal Synthesis	198
6.5.3	Green Approaches	199
6.5.3.1	Ionothermal Synthesis	199
6.5.3.2	Microwave-Assisted Synthesis	199
6.5.4	Recent Synthesis Approaches	200
6.5.4.1	Dry Gel Conversion	200
6.5.4.2	Synthesis of Zeolites under Microgravity Environment	201
6.5.5	Droplet-Based Synthesis Method	201
6.5.5.1	Microemulsion-Based Synthesis	201
6.5.5.2	Droplet-Microfluid Synthesis	202
6.5.6	Other Synthesis Approaches	202
6.5.6.1	Seed-Induced Synthesis	202
6.5.6.2	Centrifugation-Assisted Grinding	203
6.5.7	Zeolite Composites	203
6.5.7.1	<i>Ex situ</i> Composite Formation	203
6.5.7.2	<i>In situ</i> Composite Formation	204
6.6	Properties	204
6.6.1	Physical Properties	204
6.6.1.1	Thermal Properties	204
6.6.1.2	Hydrophobicity	205
6.6.1.3	Optical Properties	205
6.6.1.4	Electrical Properties	205
6.6.1.5	Magnetic Properties	206
6.6.1.6	Pore Properties	206
6.6.2	Chemical Properties	206
6.6.2.1	Basicity	206
6.6.2.2	Adsorption	207
6.6.2.3	Ion-Exchange	207
6.7	Applications	208
6.7.1	Fuel Cells	208
6.7.2	Dye Sensitized Solar Cells (DSSCs)	209
6.7.3	Batteries	210
6.7.4	Oil Refining	211
6.7.5	Photocatalysts	212
6.7.6	Hydrogen (H_2) Storage	213
6.7.7	CO_2 Capture	214
6.8	Future Perspectives of Zeolites and Their Composites	214
6.9	Conclusion	216
	References	216
