Preface *IX*

Part I Calcium Orthophosphates (CaPO₄): Occurrence, Properties, and Biomimetics 1

1 Introduction 3
References 5

2 Geological and Biological Occurrences 7
References 11

3 The Members of CaPO₄ Family 17

3.1 MCPM 18

3.2 MCPA (or MCP) 22

3.3 DCPD 22

3.4 DCPA (or DCP) 23

3.5 OCP 24

3.6 β-TCP 25

3.7 α-TCP 26

3.8 ACP 27

3.9 CDHA (or Ca-def HA, or CDHAp) 29

3.10 HA (or HAp, or OHAp) 31

3.11 FA (or FAp) 33

3.12 OA (or OAp, or OXA) 35

3.13 TTCP (or TetCP) 36

3.14 Biphasic, Triphasic, and Multiphasic CaPO₄
Formulations 37

3.15 Ion-Substituted CaPO₄ 38
References 39

4 Biological Hard Tissues of CaPO₄ 59

4.1 Bone 61

4.2 Teeth 73

4.3	Antlers	80
	References	83
5	Pathological Calcification of CaPO₄	99
	References	102
6	Biomimetic Crystallization of CaPO₄	109
	References	113
7	Conclusions and Outlook	121
	References	123
	Part II Calcium Orthophosphate Bioceramics in Medicine	125
8	Introduction	127
	References	128
9	General Knowledge and Definitions	131
	References	133
10	Bioceramics of CaPO₄	135
10.1	History	135
10.2	Chemical Composition and Preparation	135
10.3	Forming and Shaping	137
10.4	Sintering and Firing	139
	References	142
11	The Major Properties	159
11.1	Mechanical Properties	159
11.2	Electric/Dielectric and Piezoelectric Properties	162
11.3	Possible Transparency	163
11.4	Porosity	164
	References	170
12	Biomedical Applications	189
12.1	Self-Setting (Self-Hardening) Formulations	196
12.2	Coatings, Films, and Layers	196
12.3	Functionally Graded Bioceramics	197
	References	200
13	Biological Properties and <i>In Vivo</i> Behavior	205
13.1	Interactions with Surrounding Tissues and the Host Responses	205
13.2	Osteoinduction	207
13.3	Biodegradation	209

13.4	Bioactivity	211
13.5	Cellular Response	215
	References	217
14	Nonbiomedical Applications of CaPO₄	227
	References	227
15	CaPO₄ Bioceramics in Tissue Engineering	231
15.1	Tissue Engineering	231
15.2	Scaffolds and Their Properties	232
15.3	Bioceramic Scaffolds from CaPO ₄	235
15.4	A Clinical Experience	238
	References	238
16	Conclusions and Outlook	253
	References	255
	Part III Biocomposites from Calcium Orthophosphates	259
17	Introduction	261
	Abbreviations	264
	References	265
18	General Information and Knowledge	269
	References	271
19	The Major Constituents of Biocomposites and Hybrid Biomaterials for Bone Grafting	275
19.1	CaPO ₄	275
19.2	Polymers	275
19.3	Inorganic Materials and Compounds	279
19.3.1	Metals	279
19.3.2	Glasses and Glass-Ceramics	279
19.3.3	Ceramics	280
19.3.4	Carbon	280
	References	281
20	Biocomposites and Hybrid Biomaterials Based on CaPO₄	287
20.1	Biocomposites with Polymers	287
20.1.1	Apatite-Based Formulations	292
20.1.2	TCP-Based Formulations	296
20.1.3	Formulations Based on Other Types of CaPO ₄	298
20.2	Self-Setting Formulations	299
20.3	Formulations Based on Nanodimensional CaPO ₄ and Nanodimensional Biocomposites	301

20.4	Biocomposites with Collagen	304
20.5	Formulations with Other Bioorganic Compounds and/or Biological Macromolecules	309
20.6	Injectable Bone Substitutes (IBSs)	312
20.7	Biocomposites with Glasses, Inorganic Compounds, Carbon, and Metals	313
20.8	Functionally Graded Formulations	318
20.9	Biosensors	321
	References	322
21	Interaction among the Phases in CaPO₄-Based Formulations	375
	References	383
22	Bioactivity and Biodegradation of CaPO₄-Based Formulations	391
	References	393
23	Some Challenges and Critical Issues	395
	References	396
24	Conclusions	399
	References	400
	Index	401
