

## Contents

Preface *xiii*

Acknowledgment *xv*

- 1 Nanotechnology: What, Why, and Why Now? 1**
  - 1.1 What Is Nanotechnology? 1
  - 1.2 Why Is Nanotechnology So Unique? 3
  - 1.3 Where Did Nanotechnology Come From? 11
  - 1.4 Why Has Nanotechnology Burst Forth Now? 12
  
- 2 Some Physics Fundamentals Pertinent to Nanotechnology 15**
  - 2.1 Introduction 15
  - 2.2 Some Pertinent Physics Fundamentals 15
    - 2.2.1 Energy Quantization 15
    - 2.2.2 Wave–Particle Duality 17
    - 2.2.3 Particles and Waves 17
      - 2.2.3.1 Electrons and Probability Waves 19
      - 2.2.3.2 Photons and E-M Waves 22
    - 2.2.4 Some Further Aspects of Quantum Mechanics 25
      - 2.2.4.1 Tunneling 25
      - 2.2.4.2 Uncertainty 27
      - 2.2.4.3 Quantum Fluctuations 27
      - 2.2.4.4 Entanglement 28
    - 2.2.5 Statistics and Thermodynamics 29
      - 2.2.5.1 Statistical Mechanics 29
      - 2.2.5.2 Thermal Fluctuations 33
  
- 3 Some Chemistry Fundamentals Pertinent to Nanotechnology 35**
  - 3.1 Introduction 35
  - 3.2 Some Pertinent Chemistry Fundamentals 35
    - 3.2.1 The Single Electron Atom 35
    - 3.2.2 Multielectron Atoms 39
    - 3.2.3 Nanoparticles 40
      - 3.2.3.1 Functionalized Nanoparticles 40

3.2.3.2	Nanoparticle Assembly	41
3.2.4	Chemical Bonding of Atoms, Molecules, and Nanoparticles	41
3.2.4.1	Covalent Bonding	41
3.2.4.2	$\pi$ Stacking	42
3.2.4.3	Ionic Bonding	43
3.2.4.4	Metallic Bonding	43
3.2.4.5	Permanent Dipole Bonding	43
3.2.4.6	Fluctuating Dipole Bonding	44
3.2.4.7	Phility and Phobicity Interactions	44
3.3	Supramolecular Chemistry	45
3.4	Quantum Chemistry	45
<b>4</b>	<b>Some Biology and Biochemistry Fundamentals Pertinent to Nanotechnology</b>	<b>49</b>
4.1	Introduction	49
4.2	Some Pertinent Biology and Biochemistry Fundamentals	49
4.2.1	Cells, Biomolecules, and Machinery	49
4.2.2	The Molecules of Life	52
4.2.2.1	Carbohydrates	52
4.2.2.2	Lipids	55
4.2.2.3	Nucleic Acids	55
4.2.2.4	Proteins	57
4.3	Viruses	57
4.4	Microbes, Molecules, and Nanomaterials	57
4.5	Applying Biology to Nanotechnology Systems	58
<b>5</b>	<b>Some Materials Science Fundamentals Pertinent to Nanotechnology</b>	<b>59</b>
5.1	Introduction	59
5.2	Some Materials Fundamentals	59
5.2.1	Structure of a Solid	59
5.2.2	Quantum State of a Solid	61
5.2.2.1	Valence Electron states in a 3-D Solid	62
5.2.2.2	Vibration Modes in a 3-D Solid	68
5.2.2.3	Valence Electron States in 2-D Solids	69
5.2.2.4	Vibration Modes in 2-D Solids	72
5.2.2.5	Valence Electron States in 1-D Materials	72
5.2.2.6	Vibration Modes in 1-D Materials	73
5.2.2.7	Valence Electron States in 0-D Materials	76
5.2.2.8	Vibration Modes in 0-D Materials	77
5.2.2.9	Topological Materials	77
5.2.3	Spin and Orbital Angular Magnetic Moment in Solids	79
<b>6</b>	<b>Properties of Nanotechnology Materials</b>	<b>81</b>
6.1	Introduction	81
6.2	Material Properties and the Nanoscale	81
6.2.1	Electrical Conduction Properties of Nanomaterials	81

6.2.2	Optical Properties of Nanomaterials	84
6.2.3	Magnetic Properties of Nanomaterials	88
6.2.4	Catalytic Properties	89
6.2.5	Thermal and Thermoelectric Properties	89
6.2.6	Mechanical Properties	92
<b>7</b>	<b>An Overview of Nanotechnology Characterization Approaches</b>	<b>95</b>
7.1	Introduction	95
7.2	Visible Range Light: Optical Microscopy	96
7.3	Probe Nanocharacterization Methods	98
7.3.1	Probe Microscopies	99
7.3.1.1	Atomic Force Microscopy (AFM)	99
7.3.1.2	Electrostatic Force Microscopy (EFM)	103
7.3.1.3	Magnetic Force Microscopy (MFM)	103
7.3.1.4	Kelvin Probe Force Microscope (KPFM)	103
7.3.1.5	Scanning Tunneling Microscopy (STM)	104
7.3.2	Probe Spectroscopies	104
7.3.2.1	Scanning Tunneling Spectroscopy (STS)	105
7.3.2.2	Tip-Enhanced Raman Spectroscopy (TERS)	105
7.4	Further E-M Radiation-Based Nanoscale Characterization Methods	106
7.4.1	Nonvisible E-M Radiation Microscopies	106
7.4.2	E-M Radiation-Driven Spectroscopies	106
7.4.2.1	X-ray Diffraction (XRD)	106
7.4.2.2	Small Angle X-ray Scattering (SAXS)	107
7.4.2.3	Photoelectron Spectroscopies	108
7.4.2.4	Infrared Spectroscopy	109
7.4.2.5	Raman Spectroscopies	109
7.4.2.6	E-M Radiation Driven Mass Spectroscopy	110
7.5	Electron Beam Nanocharacterization Methods	110
7.5.1	Electron Beam Microscopies	110
7.5.1.1	Transmission Electron Microscopy	112
7.5.1.2	Scanning Electron Microscopy	113
7.5.1.3	Scanning Auger Microscopy (SAM)	113
7.5.2	Electron-Beam-Based Spectroscopies	114
7.5.2.1	Characteristic X-ray Emission Spectroscopies	114
7.5.2.2	Auger Electron Spectroscopy (AES)	114
7.5.2.3	Electron Energy Loss Spectroscopy (EELS)	115
7.5.2.4	Low- and High-Energy Electron Diffraction	115
7.6	Ion Beam Nanocharacterization Techniques	116
7.6.1	Ion Beam Microscopy	116
7.6.1.1	Scanning Helium Ion Microscopy (SHIM)	116
7.6.1.2	Atom Probe Field Ion Microscope (AP-FIM)	117
7.6.2	Ion Beam Driven Spectroscopies	118
7.6.2.1	Secondary Ion Mass Spectroscopy (SIMS)	118
7.6.2.2	Low-Energy Ion Scattering (LEIS)	118
7.7	Neutral Particle Beam Nanocharacterization Techniques	119

<b>8</b>	<b>Nanomaterial Preparation and Device Fabrication: Nonbiological Approaches</b>	<b>121</b>
8.1	Introduction	121
8.2	Materials Preparation	121
8.2.1	Physical Preparation Methods	121
8.2.1.1	Milling Processes	122
8.2.1.2	Physical Vapor Deposition Processes	123
8.2.1.3	Physical Ion Beam Processing	124
8.2.1.4	Langmuir–Blodgett Deposition	125
8.2.1.5	Probe Deposition	125
8.2.1.6	Electrospinning	125
8.2.2	Chemical Preparation Methods	127
8.2.2.1	Colloidal Chemistry	127
8.2.2.2	Sol–Gel Processing	129
8.2.2.3	Surfactant Self-Assemblies: Micelles and Microemulsions Processing	129
8.2.2.4	Structured Polymers Processing	130
8.2.2.5	Nanocomposite Formation	132
8.2.2.6	Chemical Vapor Deposition Processes	133
8.2.2.7	Epitaxial Growth Techniques	135
8.2.2.8	Focused Ion Beam Deposition	136
8.3	Fabrication	136
8.3.1	Pattern Orchestration	136
8.3.2	Etching	138
8.3.3	Process Flow	139
<b>9</b>	<b>Nanomaterial Preparation and Device Fabrication: Biologically Based Approaches</b>	<b>141</b>
9.1	Introduction	141
9.2	Biologically Based Materials Preparation	141
9.2.1	Nanomaterial Biosynthesis Using Plant Substances	141
9.2.2	Material Biosynthesis Using Eukaryotic Cells	142
9.2.3	Material Biosynthesis Using Prokaryotic Cells	142
9.2.4	Nanomaterial Biosynthesis Using Viruses	143
9.2.5	Nanomaterials Biosynthesis Using Amino Acids, Peptides, and Proteins	144
9.3	Biologically Based Fabrication – Bionanofabrication	146
9.3.1	Bionanofabrication Using Cell Structures	146
9.3.2	Bionanofabrication Using Viruses	147
9.3.3	Bionanofabrication Using DNA	147
9.3.4	Bionanofabrication Using Proteins	148
9.3.5	Bionanofabrication Using Peptides	149
<b>10</b>	<b>Nanotechnology and Engineering: Computing, Communications, Imaging, and Sensing</b>	<b>151</b>
10.1	Introduction	151
10.2	Nanoelectronics	152

- 10.3 Spintronics 153
- 10.4 Nanophotonics 156
- 10.5 Nano-Optoelectronics 156
- 10.6 Sensors 158
  
- 11 Nanotechnology and Engineering: Materials, Energy Technologies, the Environment, Food and Agriculture, and Chemical Processes 159**
  - 11.1 Introduction 159
  - 11.2 Some Basic Materials 159
  - 11.3 Textile Materials 162
  - 11.4 Energy Technology 163
    - 11.4.1 Super-Capacitor Energy Conversion 164
    - 11.4.2 Chemical Energy Conversion Technology 165
      - 11.4.2.1 Batteries 165
      - 11.4.2.2 Fuel Cells 166
    - 11.4.3 Photovoltaic Energy Conversion 167
    - 11.4.4 Hydrogen Storage 167
  - 11.5 Environmental Engineering 168
  - 11.6 Food and Agriculture 169
  - 11.7 Chemical Processing 170
  
- 12 Nanotechnology and Medicine: NP Targeting for Therapy and Imaging 173**
  - 12.1 Introduction 173
  - 12.2 Some Current and Future Targeting Therapy and Imaging Opportunities 175
    - 12.2.1 NP Targeting for Cancer 175
    - 12.2.2 NP Targeting for Cardiovascular Diseases 180
    - 12.2.3 NP Targeting for Pulmonary Diseases or Infections 184
    - 12.2.4 NP Targeting for Neurological Disorders 186
  
- 13 Nanotechnology and Medicine: Devices and Materials 189**
  - 13.1 Introduction 189
  - 13.2 Some Current and Future Devices and Materials 189
    - 13.2.1 Devices 189
      - 13.2.1.1 Nanoelectronics and Nanosensors 190
      - 13.2.1.2 Nanomechanical Devices 192
      - 13.2.1.3 Lab-on-a-Chip Devices 193
    - 13.2.2 Materials 194
      - 13.2.2.1 Scaffolds for Tissue Growth 194
      - 13.2.2.2 Injectable and Implantable Materials 195
      - 13.2.2.3 Stents 196
  
- 14 Nanotechnology: The Risks 199**
  - 14.1 Introduction 199
  - 14.2 Key Factors Influencing Nanomaterial Toxicity 201

14.3	NP Entry Routes and Some Possible Resulting Diseases	203
14.3.1	Entry by Inhalation	204
14.3.2	Entry by Contact	205
14.3.3	Entry by Ingestion	205
14.4	Nanoparticle Clearance Routes	205
14.5	Nanoparticle Translocation through Biological Barriers	207
14.6	Overall Effects of Nanoparticles	208
14.7	Nanotoxicology	209
14.7.1	<i>In vivo</i> Models	209
14.7.1.1	Inhalation Approach	209
14.7.1.2	“Nose – Only” Approach	209
14.7.1.3	Intra-Tracheal Instillation Approach	210
14.7.1.4	Feed/Gavage Approach	210
14.7.1.5	Cutaneous Contact Approach	210
14.7.1.6	Injection Approach	210
14.7.2	<i>In vitro</i> Models	210
14.8	Nanotoxicology Limitations	211
<b>15</b>	<b>Nanotechnology: Economic, Environmental, Societal, and Health Impact</b>	<b>213</b>
15.1	Introduction	213
15.2	Nanotechnology and the Economy	214
15.3	Nanotechnology and the Environment	215
15.4	Nanotechnology and Society	217
15.4.1	Public Engagement and Consumer Acceptance	217
15.4.2	Nanotechnology and Ethics	218
15.5	Nanotechnology and Health	219
15.5.1	Regulatory Aspects	220
15.5.2	Workplace and Consumer Protection	220
15.5.3	Labeling Requirements	222
15.6	Summary	222
<b>A</b>	<b>Canonical Ensemble Statistics</b>	<b>223</b>
<b>B</b>	<b>Fermi–Dirac Statistics</b>	<b>227</b>
<b>C</b>	<b>Bose–Einstein Statistics</b>	<b>231</b>
	<b>References</b>	<b>233</b>
	<b>Index</b>	<b>267</b>
