

## Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
	<i>Sreekanth Thota and Debbie C. Crans</i>	
1.1	History of Metal Complexes	1
1.1.1	Introduction	1
1.1.2	Metal Complexes	1
1.1.3	Metal Complexes in Medicine	2
1.2	Nanotechnology	2
1.2.1	Introduction	2
1.2.2	Development of Nanotechnology	2
1.2.3	Nanotechnology in Medicine	3
1.3	Nanoparticles	4
1.3.1	Introduction	4
1.3.2	Development of Nanoparticles	5
1.3.2.1	Liposome-Based Nanoparticles	5
1.3.2.2	Polymeric Nanoparticles	5
1.3.2.3	Metal Nanoparticles	5
1.3.3	Nanoparticles in Science and Medicine	6
1.4	Nanotechnology-Supported Metal Nanoparticles	7
	Acknowledgment	7
	References	7
<b>2</b>	<b>Methods for Preparation of Metal Nanoparticles</b>	<b>15</b>
	<i>Siavash Iravani</i>	
2.1	Introduction	15
2.2	Methods for Preparation of Metallic NPs	15
2.2.1	Physical and Chemical Methods	15
2.2.2	Green and Bio-based Strategies	19
2.3	Conclusion	24
	References	24
<b>3</b>	<b>Metal Nanoparticles as Therapeutic Agents: A Paradigm Shift in Medicine</b>	<b>33</b>
	<i>Mahendra Rai, Dipali Nagaonkar, and Avinash P. Ingle</i>	
3.1	Introduction	33

3.2	Metal Nanoparticles in Diagnostics	35
3.2.1	Nanoparticles as Biolabels	35
3.2.2	Nanoparticulate Detection of Proteins	35
3.2.3	Nanobiosensing	36
3.2.4	<i>In vivo</i> Imaging	37
3.3	Advanced Drug Delivery	38
3.4	Nanoparticle-Mediated Gene Transfer	39
3.5	Nanotechnology in Regenerative Therapies	41
3.5.1	Tissue Engineering and Implants	41
3.5.2	Bone Regeneration Materials	41
3.5.3	In Dentistry	42
3.5.4	Cell Therapy	43
3.6	Nanoparticles–Essential Oils Combination Against Human Pathogens	43
3.7	Conclusion	44
	Acknowledgment	44
	References	44
<b>4</b>	<b>Soft-Oxometalates: A New State of Oxometalates and Their Potential Applications as Nanomotors</b>	<b>49</b>
	<i>Apabrita Mallick and Soumyajit Roy</i>	
4.1	Introduction to Soft-Oxometalates (SOMs)	49
4.1.1	Classification of Soft-Oxometalates	50
4.1.1.1	Spontaneously Formed Soft-Oxometalates	50
4.1.1.2	Designed Soft-Oxometalates	50
4.2	Application of Soft-Oxometalates	51
4.2.1	Control of Morphology of SOMs	51
4.2.2	SOMs in Catalysis	52
4.2.3	SOMs in Patterning	52
4.3	Active Nano/micro Motors	55
4.3.1	Catalytic Motors	55
4.3.2	Magnetically Propelled Motors	55
4.3.3	Electrically Propelled Motors	56
4.3.4	Light Driven Motors	56
4.3.5	Ultrasonically Driven Motors	56
4.4	Micro-Optomechanical Movement (MOM) in Soft-Oxometalates	56
4.5	Autonomous Movements Induced in Heptamolybdate SOMs	58
4.6	SOMs as Water Oxidation Catalysts	60
4.7	Conclusion	61
	Acknowledgment	61
	References	61
<b>5</b>	<b>Medicinal Applications of Metal Nanoparticles</b>	<b>67</b>
	<i>Ayan K. Barui, Rajesh Kotcherlakota, and Chitta R. Patra</i>	
5.1	Overview	67
5.2	Introduction and Background	67
5.2.1	History of Medicinal Use of Metals, Metal Ions, and Complexes	69

5.2.2	Nanotechnology and Nanomedicine	70
5.2.3	Application of Disease-Specific Nanomedicine	71
5.2.4	Importance of Metal Nanoparticles in Biology	71
5.3	Biomedical Applications of Metal Nanoparticles	72
5.3.1	Delivery of Biomolecules Using Metal Nanoparticles	73
5.3.1.1	Drug Delivery	73
5.3.1.2	Nucleic Acid Delivery	78
5.3.1.3	Immunological Molecule Delivery	79
5.3.2	Anticancer Activities of Metal Nanoparticles	80
5.3.3	Antiangiogenic Therapy Using Metal Nanoparticles	82
5.3.4	Proangiogenic Properties of Metal Nanoparticles	83
5.3.5	Metal Nanoparticles in Bioimaging	85
5.3.6	Biosensing Applications of Metal Nanoparticles	86
5.3.7	Antimicrobial Activity of Metal Nanoparticles	88
5.3.8	Metal Nanoparticles in Neurodegenerative Diseases	90
5.3.9	Metal Nanoparticles in Tissue Engineering	92
5.3.10	Metal Nanoparticles in Diabetes	92
5.3.11	Metal Nanoparticles for Retinal Disorder	93
5.3.12	Anti-Inflammatory Effects of Metal Nanoparticles	93
5.3.13	Biologically Synthesized Nanoparticles for Biomedical Applications	94
5.4	Pharmacokinetics of Metal Nanoparticles	95
5.5	Status of Metal Nanoparticles in Clinical Study	97
5.6	Future Prospect of Metal Nanoparticles in Medicine	98
	Acknowledgment	99
	Abbreviations	99

<b>6</b>	<b>Metal Nanoparticles in Nanomedicine: Advantages and Scope</b>	<b>121</b>
	<i>Tapan K. Sau, Arunangshu Biswas, and Parijat Ray</i>	
6.1	Introduction	121
6.1.1	Therapeutic Use of Metals: Historical Perspective	121
6.1.2	Nanomedicines and Metals	122
6.2	Advantages Associated with Metal Nanosystems	123
6.2.1	Metals as Nanosystems	124
6.2.1.1	Small Size and Large Surface Area-to-Volume Ratio	124
6.2.1.2	Shape and Morphology Dependence	125
6.2.2	Varieties of Metal Nanoparticles, Synthesis, and Fabrication Techniques	125
6.2.3	Inertness, Biocompatibility, and Ease of Surface Modifications	126
6.2.4	Optical Properties: Localized Surface Plasmon Resonance (LSPR)	128
6.2.5	Large Scattering and Absorption Cross Sections and Photothermal Effects	132
6.2.6	Enhanced Local Electromagnetic Field: Surface-Enhanced Spectroscopies	133

6.3	Applications and Scope	135
6.3.1	Targeted Drug Delivery and Controlled Release	135
6.3.2	Photothermal and Photodynamic Therapies and Cancer Treatment	139
6.3.3	Antimicrobial and Wound Healing Effects	141
6.3.4	Clinical Diagnostics	143
6.3.4.1	Medical Imaging	144
6.4	Concluding Remarks	151
	Acknowledgments	151

## **7 Applications of Metal Nanoparticles in Medicine/Metal Nanoparticles as Anticancer Agents** 169

*Wenjie Mei and Qiong Wu*

7.1	Advantages of Metal Nanoparticles	169
7.1.1	Stability and Homogeneity	169
7.1.2	Luminescence Property	170
7.1.3	Biocompatibility	170
7.1.4	Metabolic Pathways	170
7.2	Metal Nanoparticles as Anticancer Agents	171
7.3	Gold Nanoparticles	171
7.3.1	AuNPs as Therapeutic Agents	172
7.3.1.1	AuNPs in Plasmonic Photothermal Therapy	172
7.3.1.2	AuNPs in Photodynamic Therapy	173
7.3.1.3	AuNPs as a Therapeutic Agent	173
7.3.2	AuNPs as Drug Carriers	174
7.3.2.1	Targeted Delivery of Anticancer Drugs	174
7.3.2.2	Delivery of Genes	175
7.3.3	AuNPs in Cancer Imaging	175
7.4	Silver Nanoparticles (AgNPs)	176
7.4.1	Synthesis of AgNPs	176
7.4.1.1	Chemical Methods	176
7.4.1.2	Physical Methods	176
7.4.1.3	Biological Methods	176
7.4.2	AgNPs as Inhibitor in Chemotherapy	177
7.4.2.1	AgNPs as Promising Inhibitor Against Tumor	177
7.4.3	AgNPs as Drug Carrier	178
7.4.4	AgNPs in Cellular Imaging and Clinic Diagnostics	179
7.4.5	Cytotoxicity of AgNPs	179
7.5	Copper Nanoparticles	180
7.5.1	Synthesis of CuNPs	180
7.5.2	Antibacterial Activity	180
7.5.3	Anticancer Activity	180
7.5.4	Molecular Imaging	181
7.5.5	Drug Carrier	182
7.6	Conclusion	183
	Acknowledgments	183
	References	183

<b>8</b>	<b>Noble Metal Nanoparticles and Their Antimicrobial Properties</b>	<b>191</b>
	<i>Lini Huo and Peiyuan Li</i>	
8.1	Introduction	191
8.2	Synthesis of Antibacterial Noble Metal Nanoparticles	191
8.2.1	Physical Methods	191
8.2.2	Chemical Methods	192
8.2.3	Green Synthesis Methods	193
8.3	Antibacterial Nanomaterials and Their Antibacterial Mechanism	193
8.3.1	Mechanisms of Nanoparticles Antibacterial Activity	194
8.4	Concluding Remarks and Future Outlook	195
	References	196
<b>9</b>	<b>Metal Nanoparticles and Their Toxicity</b>	<b>203</b>
	<i>Ivan Pacheco and Cristina Buzea</i>	
9.1	Introduction to Metal Nanoparticles Toxicity	203
9.2	Metal Nanoparticle Internalization and Biodistribution	204
9.3	Physicochemical Properties of Metal Nanoparticles	206
9.4	Nanoparticle Size and Toxicity	207
9.4.1	Size and Uniformity of Metal Nanoparticles	207
9.4.2	Nanoparticle Size-Dependent Toxicity	207
9.5	Nanoparticle Composition and Toxicity	210
9.5.1	Nanoparticles Composition	210
9.5.2	Comparative Toxicity of Metal Nanoparticles	212
9.5.3	Toxicity of Silver Nanoparticles	215
9.5.4	Toxicity of Metal Oxides	215
9.5.4.1	Titanium Dioxide Nanoparticles Toxicity	215
9.5.4.2	Zinc Oxide Nanoparticles Toxicity	216
9.5.4.3	Copper Oxide Nanoparticle Toxicity	216
9.5.4.4	Cerium Oxide Nanoparticles Toxicity	216
9.6	Nanoparticle Morphology and Toxicity	217
9.6.1	Nanoparticles Morphology	217
9.6.2	Nanoparticle Morphology-Dependent Toxicity	218
9.7	Nanoparticle Crystalline Structure and Toxicity	220
9.7.1	Nanoparticle Crystalline Structure	220
9.7.2	Crystalline Structure-Dependent Toxicity	221
9.8	Nanoparticle Surface and Toxicity	221
9.8.1	Hydrophobicity and Hydrophilicity	221
9.8.2	Catalytic Activity	222
9.8.3	Surface Functionalization-Dependent Toxicity	222
9.8.4	Surface Charge-Dependent Toxicity	223
9.9	Nanoparticle Magnetism and Toxicity	223
9.9.1	Magnetism of Nanoparticles Magnetic in Bulk Form	223
9.9.2	Magnetism of Nanoparticles Nonmagnetic in Bulk Form (Au, Pt, Pd)	227
9.9.3	Magnetic Nanoparticles Toxicity	227
9.9.3.1	Iron Oxide Nanoparticles Toxicity	228
9.9.3.2	Cobalt and Nickel Compounds Nanoparticles Toxicity	228

9.9.4	Gold and Platinum Nanoparticle Toxicity	229
9.9.4.1	Gold Nanoparticles Toxicity	229
9.9.4.2	Platinum Nanoparticle Toxicity	229
9.10	Interaction of Nanoparticles Within Organisms	230
9.10.1	Formation of Protein Corona	230
9.10.2	Metal Nanoparticle Uptake by Cells	231
9.10.3	Nanoparticles Crossing the Placental Barrier	233
9.10.4	Nanoparticles Association to Cardiovascular Diseases	233
9.10.5	Central Nervous System Interaction with Nanoparticles	236
9.10.6	Immune System Interaction with Nanoparticles	236
9.10.7	Liver, Kidneys, and Other Organ Interaction with Nanoparticles	237
9.11	Other Novel Properties of Metal Nanoparticles	238
9.11.1	Optical Properties	238
9.11.2	Melting Temperature	240
9.12	Conclusions	242
