Foreword *XXVII*

Preface *XXIX*

1 Introduction: An Overview of Nanotechnology and Nanomaterial Standardization and Opportunities and Challenges *1*

Ajit Jillavenkatesa

- 1.1 Standards and Standardization *1*
- 1.2 Nanotechnology Standardization *2*
 - 1.2.1 Technology Standardization *2*
 - 1.2.2 Development of Standards for Nanotechnology *3*
 - 1.2.3 Nanotechnology Standards Development in Europe *6*
 - 1.2.4 Working with the Organization for Economic Cooperation and Development *7*
- 1.3 Nanomaterial Standardization *8*
- 1.4 Challenges *9*
 - 1.4.1 Data and Information Gaps *9*
 - 1.4.2 Competing Priorities *11*
 - 1.4.3 Knowledge of Standards Availability and Their Use *11*
- 1.5 Opportunities *12*
- 1.6 Summary *13*

Part One Nanotechnology Basics: Definitions, Synthesis, and Properties *15*

2 Nanotechnology Definitions at ISO and ASTM International: Origin, Usage, and Relationship to Nomenclature and Regulatory and Metrology Activities *17*

Frederick C. Klaessig

- 2.1 Introduction *17*
- 2.2 Context based on Size, Property, and Regulatory Framework *19*
 - 2.2.1 Nanoscale *19*
 - 2.2.2 Properties *21*

2.2.3	Nanotechnology Description and Regulatory Framework	23
2.3	Nano-objects: Particles, Shapes, and Shape Descriptors	24
2.3.1	Particle and Nanoscale	25
2.3.2	Cartesian Coordinates to Describe Shape	25
2.3.3	Shape Descriptors (Object, Particle, Fiber, and Plate)	27
2.4	Collections of Nano-Objects	27
2.4.1	Aggregates and Agglomerates	28
2.4.2	Nanostructured	30
2.4.3	Dispersions and Composites	31
2.5	Layers and Coatings as Surface Chemistry	31
2.6	National Definitions	32
2.7	Nomenclature	34
2.7.1	Background Considerations	34
2.7.2	Commercial Nomenclature	36
2.7.3	Nomenclature as Enumeration	39
2.7.4	Focus, Categories, and Data Sets	41
2.8	Terminology as a Controlled Vocabulary and Nomenclature as Knowledge Organization	42
2.9	Concluding Remarks	44
	Acknowledgments	44
	References	45
3	Engineered Nanomaterials: a Discussion of the Major Categories of Nanomaterials	49
	<i>Marcel Van de Voorde, Maciej Tulinski, and Mieczyslaw Jurczyk</i>	
3.1	Description of Nanotechnology and Nanomaterials	49
3.2	Nanomaterials' Morphologies	49
3.2.1	Zero-Dimensional Nanomaterials	51
3.2.2	One-Dimensional Nanomaterials	51
3.2.3	Two-Dimensional Nanomaterials	52
3.2.4	Three-Dimensional Nanomaterials	52
3.3	Types of Nanomaterials	53
3.3.1	Inorganic	53
3.3.1.1	Metal Nanoparticles	53
3.3.1.2	Other Inorganic Nanoparticles	54
3.3.1.3	Ceramics	54
3.3.1.4	Semiconductors	55
3.3.1.5	Inorganic–Organic Nanomaterials	55
3.3.2	Organic	56
3.3.2.1	Carbon Nanomaterials	56
3.3.2.2	Other Organic Nanomaterials	57
3.3.3	Nanocomposites	57
3.4	Properties of Nanomaterials	58
3.4.1	Mechanical Properties	59
3.4.2	Electrical Properties	59

3.4.3	Magnetic Properties	59
3.4.4	Thermal Properties	60
3.4.5	Optical Properties	60
3.4.6	Biological Properties	61
3.5	Applications of Nanomaterials and Nanocomposites	61
3.5.1	Nanodispersions	63
3.5.2	Nanocrystalline Solids	63
3.5.2.1	Nanostructured Titanium	63
3.5.2.2	Nanostructured Stainless Steel	65
3.5.2.3	Other Nanometals	65
3.5.2.4	Nanoceramics	66
3.5.2.5	Carbon Nanomaterials	67
3.5.2.6	Dendrimers	67
3.5.3	Nanocomposites	68
3.5.3.1	Hydrogen Storage	68
3.5.3.2	Bionanocomposites	68
3.5.3.3	Hard RE-3d Magnets	68
3.5.3.4	Polymer Nanocomposites	68
3.6	Conclusions and Outlook	69
	References	70
4	Nanomaterials Synthesis Methods	75
	<i>Maciej Tulinski and Mieczyslaw Jurczyk</i>	
4.1	Classification	75
4.2	Physical Methods	78
4.2.1	Physical Vapor Deposition	78
4.2.2	Pulsed Laser Deposition	80
4.2.3	Ion Beam Techniques	80
4.2.4	Plasma Synthesis	81
4.3	Chemical Methods	82
4.3.1	Chemical Vapor Deposition	82
4.3.2	Epitaxial Growth	83
4.3.3	Colloidal Dispersion	83
4.3.4	Sol–Gel	84
4.3.5	Hydrothermal Route	85
4.3.6	Microemulsions	85
4.3.7	Polymer Route	86
4.4	Mechanical Methods	87
4.4.1	Milling Processes	87
4.4.1.1	Mechanical Alloying	87
4.4.1.2	High-Energy Ball Milling	89
4.4.1.3	Mechanochemical Synthesis	89
4.4.1.4	Mechanochemical Activation Synthesis	90
4.4.2	Severe Plastic Deformation	90
4.4.2.1	Equal Channel Angular Pressing	90

- 4.4.2.2 Cyclic Extrusion Compression Method 91
- 4.4.2.3 High-Pressure Torsion 92
- 4.4.2.4 Other Severe Plastic Deformation Methods 92
- 4.4.3 Lithography 92
- 4.4.4 Micromachining 93
- 4.4.5 Etching 93
- 4.5 Biological Synthesis 94
- 4.6 Summary 95
- References 96

- 5 Physicochemical Properties of Engineered Nanomaterials 99**
Linda J. Johnston, Elisabeth Mansfield, and Gregory J. Smallwood
- 5.1 Introduction 99
- 5.2 Composition 100
- 5.3 Size and Size Distribution 102
- 5.4 Morphology and Shape 105
- 5.5 Aggregation and Agglomeration 107
- 5.6 Surface Properties 108
- 5.7 Conclusions and Outlook 110
