

## Contents

Preface *xiii*

- 1 **History of Flexible and Stretchable Devices** 1  
*Kuniharu Takei*  
References 4
  
- 2 **Carbon Nanotube Based Flexible and Stretchable Electronics** 7  
*Le Cai and Chuan Wang*
  - 2.1 Introduction 7
  - 2.2 Carbon Nanotube Networks for Applications in Flexible Electronics 10
    - 2.2.1 Thin-Film Transistors (TFTs) 10
    - 2.2.2 Integrated Circuits 11
    - 2.2.3 Active Matrix Backplanes for Flexible Display, E-Skin and Imager 16
  - 2.3 Carbon Nanotube Networks for Applications in Stretchable Electronics 19
    - 2.3.1 Stretchable Conductors 21
    - 2.3.2 Stretchable Strain Sensor 23
    - 2.3.3 Stretchable Thin-Film Transistors 27
  - 2.4 Scalable Fabrication Process—Printing 35
    - 2.4.1 Digital Printing—Inkjet and Aerosol Jet 36
    - 2.4.2 Gravure Printing 41
    - 2.4.3 Printed Complementary Metal–Oxide Semiconductor (CMOS) Devices 41
  - 2.5 Conclusions and Outlook 44  
References 45
  
- 3 **Organic-Based Transistors and Sensors** 53  
*Aristide Gumyusenge, Tianbai Xu, Xiaozhi Wang, and Jianguo Mei*
  - 3.1 Introduction 53
  - 3.2 Materials Consideration for Flexible Organic-Based Transistors 54
    - 3.2.1 How Flexibility is Achieved 54
      - 3.2.1.1 Flexible Substrates 54

3.2.1.2	Flexible Electrodes	55
3.2.2	Organic Dielectric Layer	56
3.2.3	Organic Functional Layer	57
3.3	State-of-the-Art Designs and Fabrication of Organic-Based Transistors	57
3.3.1	Organic Field-Effect Transistors	58
3.3.1.1	Structure	58
3.3.1.2	Performance and Characterization	59
3.3.2	Modifications of OFETs for Sensing Applications	60
3.3.2.1	Electrolyte-Gated and Ion-Sensitive Organic Field-Effect Transistors	60
3.3.2.2	Organic Electrochemical Transistors	62
3.3.2.3	Operating Mechanisms	63
3.4	Fabrication Techniques for Organic-Based Transistors and Sensors	63
3.5	Flexible Organic Transistor-Based Sensors	65
3.5.1	Flexible Organic Strain Sensors	65
3.5.2	Flexible Organic Pressure Sensors	67
3.5.3	Flexible Organic Temperature Sensors	69
3.5.4	Flexible Organic Biosensors	70
3.5.5	Flexible Organic Optical Sensors	73
3.6	Summary and Outlook	74
	References	75
<b>4</b>	<b>Printed Transistors and Sensors</b>	<b>83</b>
	<i>Kenjiro Fukuda</i>	
4.1	Introduction	83
4.2	Printing Technologies for Electronics	84
4.2.1	Inkjet Printing	85
4.2.2	Gravure Printing	86
4.2.3	Reverse-Offset Printing for High-Resolution Patterning	87
4.3	Printed Transistors	88
4.3.1	Fabrication of Fully Printed Transistors	88
4.3.2	Profile Control of Inkjet-Printed Electrodes	89
4.3.3	Mechanical Stability	91
4.3.3.1	Calculation of Strain in the Devices	91
4.3.3.2	Improvement of Adhesion	91
4.3.4	Printed Organic Transistors with Uniform Electrical Performance	93
4.3.5	Ultraflexible and Fully Printed Organic Circuits	94
4.4	Printed Biosensors	97
	References	99
<b>5</b>	<b>Flexible Photovoltaic Systems</b>	<b>105</b>
	<i>Lichen Zhao, Deying Luo, and Rui Zhu</i>	
5.1	Introduction	105
5.1.1	Introduction of Flexible Photovoltaics	105
5.1.2	Principles of Photovoltaics	106

5.1.3	The Flexible Substrates	109
5.1.3.1	Metals and the Alloys	109
5.1.3.2	Polymers	110
5.1.4	The Types of Flexible Photovoltaic Systems	110
5.2	Flexible Inorganic Photovoltaic Systems	110
5.2.1	Flexible Silicon Photovoltaics	110
5.2.2	Flexible Copper Indium Gallium Selenide Photovoltaics	113
5.3	Flexible Organic Photovoltaic Systems	115
5.3.1	Fundamental Properties of OPV Materials	115
5.3.2	Device Structure and Working Mechanisms	116
5.3.3	Materials and Methods for OPV	118
5.3.4	Recent Advances in Flexible OPV	119
5.4	Flexible Organic–Inorganic Hybrid Photovoltaic Systems	122
5.4.1	Fundamental Properties of Perovskites	123
5.4.2	Device Structure and Working Mechanisms	124
5.4.3	Materials and Methods for Flexible PerSCs	125
5.4.4	Recent Advances for Flexible PerSCs	128
5.5	Summary and Conclusion	132
	References	133
<b>6</b>	<b>Materials Design for Flexible Thermoelectric Power Generators</b>	<b>139</b>
	<i>Yoshiyuki Nonoguchi</i>	
6.1	Introduction	139
6.2	General Principles	140
6.2.1	The Basic Principles of Thermoelectricity	140
6.2.2	Density of State and the Seebeck Coefficient	141
6.2.3	Energy Conversion Efficiency and Dimensionless Thermoelectric Figure of Merit $ZT$	142
6.2.4	A Classical Requirement for Efficient Module Design	144
6.3	Thermoelectric Materials Design	145
6.3.1	Organic Solids and Conducting Polymers	145
6.3.2	Carbon Nanotubes and Related Matters	149
6.3.3	Useful Survey Methods for Discovering Efficient Thermoelectric Materials	154
6.3.4	Prototype Thermoelectric Generators and Applications	154
6.4	Outlook for Flexible Thermoelectric Generators	155
	References	156
<b>7</b>	<b>Flexible Supercapacitors Based on Two-Dimensional Materials</b>	<b>161</b>
	<i>Dianpeng Qi and Xiaodong Chen</i>	
7.1	Introduction	161
7.2	Flexible Supercapacitors Based on 2D Materials	162
7.2.1	2D Electrode Materials for Flexible EDLCs	163
7.2.2	2D Materials for Pseudocapacitive Supercapacitors	171

7.2.3	2D Electrode Materials for Hybrid Flexible Supercapacitors	176
7.3	Conclusions	179
	References	181
<b>8</b>	<b>Organometal Halide Perovskites for Next Generation Fully Printed and Flexible LEDs and Displays</b>	<b>199</b>
	<i>Thomas Geske, Sri Ganesh R. Bade, Matt Worden, Xin Shan, Junqiang Li, and Zhibin Yu</i>	
8.1	Introduction	199
8.1.1	General Background for LEDs	200
8.1.2	Fundamentals of Halide Perovskites	201
8.1.3	Multilayer Perovskite LEDs	203
8.2	Single Layer Perovskite LEDs	206
8.3	Current Challenges	208
8.4	Conclusions and Outlook	211
	Acknowledgments	211
	References	211
<b>9</b>	<b>Flexible Floating Gate Memory</b>	<b>215</b>
	<i>Ye Zhou, Su-Ting Han, and Arul Lenus Roy Vellaisamy</i>	
9.1	Introduction	215
9.2	Device Operation of Floating Gate Memory	216
9.3	Charge Injection Mechanism in Floating Gate Memory	217
9.3.1	The Hot-electron Injection Mechanism	217
9.3.2	Fowler–Nordheim (F-N) Tunneling Mechanism	218
9.3.3	Direct Tunneling Mechanism	219
9.4	Flexible Nanofloating Gate Memory	219
9.5	Characterization of Floating Gate Memory	221
9.6	Flexibility of Floating Gate Memory	223
9.7	Conclusion	225
	References	225
<b>10</b>	<b>Flexible and Stretchable Wireless Systems</b>	<b>229</b>
	<i>Aftab M. Hussain and Muhammad M. Hussain</i>	
10.1	Introduction	229
10.2	The Basics of Wireless Systems	230
10.2.1	Wireless Systems	230
10.2.2	Antennas	231
10.2.3	Antenna Parameters	233
10.3	Flexible, Stretchable Circuits	234
10.3.1	Flexible, Stretchable Silicon Circuits	234
10.3.2	Non-Silicon-Based Channels	236
10.4	Flexible Antennas	239
10.4.1	Micromachined Flexible Antennas	240
10.4.2	Inkjet-Printed Antennas	240
10.5	Stretchable Antennas	242

10.5.1	Material Stretchability	242
10.5.2	Design Stretchability	244
10.6	Future Outlook	246
	References	247
<b>11</b>	<b>Conductive Nanosheets for Ultra-Conformable Smart Electronics</b>	<b>253</b>
	<i>Kento Yamagishi, Silvia Taccola, Shinji Takeoka, Toshinori Fujie, Virgilio Mattoli, and Francesco Greco</i>	
11.1	Introduction	253
11.2	Fabrication of Conductive Nanosheets	255
11.2.1	Spin-Coating-Processed Conductive Nanosheets	255
11.2.2	Roll-to-Roll (R2R) Gravure-Printing-Processed Conductive Nanosheets	258
11.3	Characterization of Conductive Nanosheets	260
11.3.1	Electrical Properties of Conductive Nanosheets	260
11.3.2	Structural Properties of Conductive Nanosheets	262
11.3.3	Mechanical Properties of Conductive Nanosheets	263
11.3.4	Electrochemical Properties of Conductive Nanosheets	267
11.4	Applications of Conductive Nanosheets	269
11.4.1	Surface Electromyogram (EMG) Recording Using Conductive Nanosheets	269
11.4.2	Humidity Sensors	272
11.4.3	Microactuators	272
11.4.4	Tattoo Conductive Nanosheets for Skin-Contact Applications	274
11.5	Concluding Remarks	277
	Acknowledgments	278
	References	278
<b>12</b>	<b>Flexible Health-Monitoring Devices/Sensors</b>	<b>287</b>
	<i>Minjeong Ha, Seongdong Lim, and Hyunhyub Ko</i>	
12.1	Introduction	287
12.2	Flexible Sensors for Health Monitoring	288
12.2.1	Detection Approaches for Physical Bio-Signals	289
12.2.1.1	Pressure and Strain Sensors for Health Monitoring	289
12.2.1.2	Temperature Sensors for Health Monitoring	293
12.2.2	Detection Approaches for Biochemical Signals	295
12.2.2.1	Flexible pH Sensors	297
12.2.2.2	Flexible Blood Sugar Sensors	299
12.2.2.3	Flexible Pulse Oximeters	299
12.2.2.4	Other Flexible Chemical Sensors to Detect Volatile Organic Compounds	302
12.2.3	Detection Approaches for Electrophysiological Signals	304
12.3	Multifunctional Flexible Sensors for Multiple Bio-Signals	306
12.4	Practical Applications of Flexible Health-Monitoring Devices	309
12.4.1	Sports and Fitness	309
12.4.2	Prosthetics and Rehabilitation	309

- 12.4.3 Wound Therapy 311
- 12.4.4 Telemedicine and Self-Diagnosis of Disease 311
- 12.5 Conclusions and Future Perspective 312
- References 312
  
- 13 Stretchable Health Monitoring Devices/Sensors 323**  
*Xian Huang*
- 13.1 Introduction 323
- 13.2 Materials for Stretchable Health Monitoring Devices 323
- 13.2.1 Physically Soft and Stretchable Materials 324
- 13.2.2 Unique Stretchable Structures 324
- 13.3 Health Monitoring Applications of Stretchable Devices 326
- 13.3.1 Skin Sensors 326
- 13.3.1.1 Skin Biophysical Signal Monitoring 329
- 13.3.1.2 Biomolecule Analysis 332
- 13.3.2 Implantable Devices 336
- 13.3.2.1 Brain and Neural Probes 336
- 13.3.2.2 Cardiovascular Monitoring 337
- 13.3.3 Body Wearable Devices 337
- 13.3.3.1 Rehabilitation 337
