

## Contents

**Preface** *ix*

**Acknowledgements** *xi*

- 1 Introduction to Hybrid Organic–Inorganic Perovskites** *1*
  - 1.1 Perovskite Oxides *1*
  - 1.2 Evolution from Perovskite Oxides to Hybrid Organic–Inorganic Perovskites *3*
  - 1.3 Classification and Chemical Variations of HOIPs *4*
  - 1.4 Structure, Symmetry, and Property Features of HOIPs *5*
    - 1.4.1 General Trend *5*
    - 1.4.2 Ion Radius Matchability and Tolerance Factor *7*
    - 1.4.3 Phase Transitions *10*
  - References *12*
  
- 2 Hybrid Halide Perovskites** *15*
  - 2.1 Synthesis and Chemical Diversity *15*
  - 2.2 Symmetries and Structures *19*
  - 2.3 Phase Transitions *24*
  - 2.4 Physical Properties *29*
    - 2.4.1 Semiconductivity and Bandgap Structures *29*
    - 2.4.2 Transport Properties and Photovoltaics *32*
    - 2.4.3 Laser Physics *49*
    - 2.4.4 Light-Emitting Diodes *54*
    - 2.4.5 Photodetectors *59*
    - 2.4.6 Ferroelectricity and Rashba Effect *63*
    - 2.4.7 Mechanical Properties *66*
    - 2.4.8 Thermal Conductivity *70*
    - 2.4.9 Caloric Effects *71*
    - 2.4.10 Other Properties and Applications *73*
  - References *73*
  
- 3 Hybrid Formate Perovskites** *79*
  - 3.1 Synthesis and Chemical Diversity *79*
  - 3.2 Symmetries and Structures *82*

3.3	Phase Transitions and Order–Disorder	91
3.4	Physical Properties	94
3.4.1	Magnetism	94
3.4.1.1	Spin-Canting and JT Effect	94
3.4.1.2	Spin-Flop	98
3.4.1.3	Quantum Tunnelling	101
3.4.2	Dielectricity	102
3.4.3	Ferroelectricity	105
3.4.4	Ferroelasticity	114
3.4.5	Multiferroicity	118
3.4.6	Mechanical Properties	125
3.4.7	Thermal Expansion	134
3.4.8	Caloric Effects	139
	References	145
<b>4</b>	<b>Hybrid Azide Perovskites</b>	<b>151</b>
4.1	Synthesis and Structures	151
4.2	Phase Transitions	156
4.3	Physical Properties	164
4.3.1	Magnetism	164
4.3.2	Dielectricity	167
4.3.3	Anti-ferroelectricity and Ferroelasticity	174
4.3.4	Thermal Expansion	176
4.3.5	Mechanical Properties	177
	References	178
<b>5</b>	<b>Hybrid Dicyanamide Perovskites</b>	<b>181</b>
5.1	Synthesis and Structures	181
5.2	Phase Transitions	185
5.3	Physical Properties	188
5.3.1	Dielectricity	188
5.3.2	Optical Properties and Second Harmonic Generation (SHG) Effects	190
5.3.3	Magnetism	191
5.3.4	Mechanical Properties and Thermal Expansion	193
5.3.5	Caloric Effects	195
	References	197
<b>6</b>	<b>Hybrid Cyanide Perovskites</b>	<b>199</b>
6.1	Synthesis and Structures	199
6.2	Phase Transitions (PT)	204
6.3	Physical Properties	211
6.3.1	Second Harmonic Generation (SHG)	211
6.3.2	Dielectricity	211
6.3.3	Ferroelectricity	215
	References	217

<b>7</b>	<b>Hybrid Dicyanometallate and Borohydride Perovskites</b>	<b>219</b>
7.1	Hybrid Dicyanometallate Perovskites	219
7.1.1	Synthesis, Structures, and Phase Transitions	219
7.1.2	Physical Properties	222
7.2	Hybrid Borohydride Perovskites	223
	References	223
<b>8</b>	<b>Hybrid Hypophosphite Perovskites</b>	<b>225</b>
8.1	Synthesis	225
8.2	Symmetries and Structures	227
8.3	Phase Transitions	229
8.4	Physical Properties	231
8.4.1	Mechanical Properties	231
8.4.2	Magnetism	231
	References	233
<b>9</b>	<b>Other Perovskite-Like Hybrid Materials and Metal-Free Perovskites</b>	<b>235</b>
9.1	Hybrid Organic–Inorganic Perchlorates	235
9.1.1	Synthesis, Structures, and Phase Transitions	235
9.1.2	Physical Properties	239
9.1.2.1	Mechanical Properties	240
9.1.2.2	Dielectric Properties	243
9.1.2.3	High Energetic Properties	244
9.2	Hybrid Organic–Inorganic Tetrafluoroborates	246
9.2.1	Synthesis, Structures, and Phase Transitions	246
9.2.2	Physical Properties	248
9.3	Metal-Free Perovskites	249
9.3.1	Synthesis, Structures, and Electronic Properties	249
9.3.2	Phase Transitions	255
9.3.3	Physical Properties	255
9.3.3.1	Photoluminescence	255
9.3.3.2	Ferroelectricity and Dielectricity	256
9.3.3.3	Mechanical Properties	260
	References	265
