Preface ix

- 1 Molecular Gel as Medium or Intermediate in Functional Materials Synthesis 1**
Rong Miao and Junxia Peng
 - 1.1 Introduction 1
 - 1.2 Molecular Gel as Intermediate in Synthesizing Fluorescent Sensing Films with High Performance 2
 - 1.2.1 Molecular Design 3
 - 1.2.2 Molecular Gel Strategy-Based Sensing Film for VOC Vapor Detection 4
 - 1.2.3 Molecular Gel Strategy-Based Film for Chemicals Sensing in Liquid Phase 9
 - 1.3 Molecular Gel as Intermediate in Synthesizing Porous Materials 9
 - 1.3.1 Porous Materials for Removal of Oil on Water Surface 11
 - 1.3.2 Porous Materials for VOCs Adsorption 13
 - 1.4 Summary and Perspectives 14
 - References 16

- 2 Preparation and Sensing Application of Fluorescent Organogels and Hydrogels 21**
Xudong Yu, Lijun Geng, and Jiangbo Guo
 - 2.1 Introduction 21
 - 2.2 Types of Gels that Respond to Different Stimuli 22
 - 2.2.1 Fluorescent Gels that Respond to Physical Stimuli 22
 - 2.2.1.1 Fluorescent Gels that Respond to Heat 22
 - 2.2.1.2 Fluorescent Gels that Respond to Light 23
 - 2.2.1.3 Fluorescent Gels that Respond to Ultrasound 25
 - 2.2.1.4 Fluorescent Xerogels that Respond to Grinding or Pressure 28
 - 2.2.2 Fluorescent Gels for Visual Chemical Stimulus Sensing 30
 - 2.2.2.1 Fluorescent Gels for Cation Sensing 30
 - 2.2.2.2 Fluorescent Gels for Anion Sensing 35
 - 2.2.2.3 Fluorescent Gels for CO₂ Sensing 37
 - 2.2.2.4 Fluorescent Gels for Solvent and Humidity Sensing 38

2.2.2.5	Fluorescent Gels for Nitroaromatic Derivative Sensing	42
2.2.2.6	Fluorescent Gels for Amine Sensing	42
2.3	Summary and Perspectives	45
	References	46
3	Preparation of Self-Assembled Composite Hydrogels and Their Application in Biomedicine and Wastewater Treatment	51
	<i>Ran Wang, Jingxin Zhou, Lexin Zhang, and Tifeng Jiao</i>	
3.1	Introduction	51
3.2	Prepared Composite Hydrogels Used in Biomedicine	52
3.2.1	Self-Assembly and Drug Release Capacities of Organogels via Some Amide Compounds with Aromatic Substituent Headgroups	52
3.3	Prepared Composite Hydrogels Used in Wastewater Treatment	55
3.3.1	Preparation and Self-assembly of Some Functionalized Supramolecular Hydrogels	55
3.3.2	Preparation and Self-assembly of Some Graphene Oxide-Based Composite Hydrogels	57
3.4	Conclusion and Perspectives	64
	Acknowledgments	65
	References	65
4	Conductive Hydrogels for Flexible Mechanical Sensors	71
	<i>Zhihui Qin and Tifeng Jiao</i>	
4.1	Introduction	71
4.2	Fabrication of Conductive Hydrogels	73
4.2.1	Electronically Conductive Hydrogel	74
4.2.2	Ionically Conductive Hydrogels	78
4.3	Conductive Hydrogel-Based Mechanical Sensors	80
4.3.1	Strain Sensors	81
4.3.2	Pressure Sensors	85
4.4	Conclusion and Outlook	89
	Acknowledgments	90
	References	90
5	Recent Progress on Heat-Set Molecular Gels	99
	<i>Yuangang Li, Zonglin Yang, Yong Chen, Huajing Li, Rong Yang, and Chenyu Huang</i>	
5.1	Introduction	99
5.2	Heat-Set Molecular Gels	101
5.2.1	Heat-Set Molecular Hydrogel	101
5.2.2	Heat-Set Organic Gel	110
5.3	Conclusion and Perspectives	118
	Acknowledgements	120
	References	120

6	Supramolecular Gels from Carbohydrate Biopolymers for Water Remediation	127
	<i>Xuefeng Zhang and Weiqi Leng</i>	
6.1	Introduction	127
6.2	Hydrogels from Carbohydrate Biopolymers	128
6.2.1	Hydrogels from Native Cellulose or Chitin	129
6.2.2	Hydrogels from Cellulose or Chitin Derivatives	130
6.2.3	Hydrogels from Biopolymer Nanomaterials	132
6.2.3.1	Hydrogels from Physically Cross-Linked NC or NCh	134
6.2.3.2	Hydrogels from Chemically Cross-Linked NC or NCh	137
6.3	Aerogels from Carbohydrate Biopolymers	138
6.4	Biopolymer-Derived Gels for Water Remediation	140
6.4.1	Heavy Metal Removal	141
6.4.2	Organic Pollutants Removal	146
6.5	Conclusions and Perspectives	156
	References	156
7	Biobased Aerogels for Oil Spill Remediation	169
	<i>Weiqi Leng, Sheng He, Xuefeng Zhang, Xiang Wang, and Chanaka M. Navarathna</i>	
7.1	Introduction	169
7.2	Aerogels: Classification, Fabrication, and Properties	172
7.2.1	Classification of Aerogels	172
7.2.2	Fabrication of Biobased Aerogels	173
7.2.2.1	Supercritical Drying	177
7.2.2.2	Freeze-drying	179
7.2.3	Functionalization of Biobased Aerogels	186
7.3	Biobased Aerogels for Oil Spill Remediation	193
7.3.1	Parameters That Affect the Oil Absorption Performance	193
7.3.2	Mechanisms of Oil Absorption	197
7.3.3	Post-processing of Aerogel Absorbent After Oil Spill Remediation	200
7.4	Conclusion and Future Scope	201
	References	201
8	Luminescent Supramolecular Gels	215
	<i>Xue Jin and Pengfei Duan</i>	
8.1	Introduction	215
8.2	Fluorescence in Supramolecular Gels	216
8.3	Phosphorescence in Supramolecular Gels	219
8.4	Upconverted Luminescence in Supramolecular Gels	224
8.5	Circularly Polarized Luminescence in Supramolecular Gels	230
8.5.1	CPL-Active Gel Based on Chiral Luminescent Gelators	234
8.5.2	CPL-Active Supramolecular Gel Based on Achiral Luminescent Gelators	238

8.5.3	CPL-Active Supramolecular Gel by Using Organic Luminophores as Guests	239
8.5.4	CPL-Active Supramolecular Gel Based on Inorganic Luminescence Guest	245
8.6	Conclusion and Perspectives	249
	Acknowledgments	250
	References	250
	Index	257
